Chem.: A salt of dithionous acid.

di-thi-on-îc, *a.* [*Pref. di=twice, twofold, and Gr. theion=sulphur*.]

Chem.: Hypo-sulphuric acid, dihydric dithionate, $H_2S_2O_6$. Obtained by passing sulphur dioxide, SO_2 , into cold water in which finely divided manganese dioxide, MnO_2 , is suspended, then barium hydrate is added which precipitates the manganese and sulphuric acid which has been formed. The filtered solution containing barium dithionate is carefully decomposed by dilute sulphuric acid, the dithionous acid is then concentrated over sulphuric acid to density 1.347; if evaporated further it is decomposed into sulphuric acid and sulphur dioxide. In contact with the air it is gradually oxidized to sulphuric acid. The dithionates are obtained by decomposing the barium salt with sulphates of other metals. They crystallize and are permanent in the air. Heated with hydrochloric acid, they liberate SO_2 , and sulphuric acid is formed, but no sulphur is deposited.

***dith-ÿ-râmb** (*Eng.*), ***dith-ÿ-râmb-ûs** (*Lat.*), *s.* [*Lat. dithyrambus*; *Gr. dithyrambos*=a hymn in honor of Bacchus; *Fr. dithyrambe*.]

B. As subst.: A subject, a tributary.

"The dittonaries of Counaboa."—*Eden: Trans. of P. Martyn.*

di-tö-lyl, *s.* [*Pref. di=twice, twofold, and Eng. tolyl* (toluene).]

Chem.: $C_{11}H_{14}$ or $CH_3C_6H_4C_6H_4CH_3$. An aromatic hydrocarbon obtained by the action of sodium on para-bromtoluene, $C_6H_4BrCH_3$. Ditolyl is a crystalline substance easily soluble in hot alcohol; it melts at 121° , and can be distilled without decomposition. By combination with oxidizing agents it is converted into diphenyl dicarbonic acid, $HOOC\cdot C_6H_4\cdot C_6H_4\cdot COOH$.

ditolyl-amine.

Chem.: $(C_6H_4CH_3)_2NH$. An aromatic amine found by heating toluidine $C_6H_4(NH_2)CH_3$, with its hydrochlorate. It forms long white needles melting at 70° .

ditolyl-ethane.

Manuf. Chem.: Dimethyl-phenyl-ethane, dixyl, $CH_3CH(C_6H_4CH_3)_2$, is obtained by the action of paracetaldehyde dissolved in sulphuric acid on toluene. Ditolyl-ethane is an oily liquid not solidifying at 20° . It boils at 295° . Oxidized with chromic acid mixture, it yields ditolyl-ketone.

ditolyl-ketone.

Chem.: $CO\cdot C_6H_4CH_3$. Obtained by oxidizing ditolyl-isostilbene, $H_2C=C(C_6H_4CH_3)_2$, with chromic acid mixture. Ditolyl-ketone forms rhombic crystals which melt at 95° .

ditolyl-methane.

Chem.: $CH_3\cdot C_6H_4CH_3$. An aromatic hydrocarbon obtained by the action of sulphuric acid on a mixture of methylal, $CH_2(OCH_3)_2$, toluene and glacial acetic acid. It boils at 290° .

***dit-ôn**, *s.* [*O. Fr.*] A motto.

"Your arms are the ever-green holline leaves, with a blowing horn, and this diton," *Virescit vulnere virtus*."

Chem.: Organic compounds formed by the union of one molecule of a bibasic acid and two molecules of urea; with elimination of four molecules of water they contain four or five atoms of carbon, as uric acid (q. v.). Diureides containing six and eight carbon atoms are formed by the union of two monureide molecules with elimination of water, as alloxantin (q. v.).

di-u-rê-sis, s. [Gr. *diourêsis*, from *dioureô*=to pass urine.]

Med.: An excessive flow of urine.

di-u-rêt, s. [BIURET.]

di-u-rêt-ic, di-u-rêt-ick, a. & s. [French *diurétique*, from Gr. *diourêtikos*, from *dioureô*=to pass urine.]

A *As adj.*: Having the power or quality of exciting diuresis; tending to provoke the secretion or discharge of urine.

"Inwardly received it may be very diuretic, and break the stone in the kidney."—*Broune*: *Vulgar Errors*, bk. ii., ch. v.

B. As *substantive*:

1. *Pharm.*: Diuretics are medicines which cause an increase of the function of the kidneys, and consequently augment the quantity of the urine. They are divided by Garrod into sedative, as squills, scoparium, tobacco, colchicum; and stimulant, as juniper, turpentine, copaiba, cantharides, nitrite of ethyl, alcohol, and water. Indirect diuretics, or hydragogue purgatives, as elaterium, cream of tartar, digitalis, gamboge. Lithontriptics, or remedies which alter the quality of the urine and prevent the crystallization and deposition of the ingredients which form gravel and calculi, as carbonates of lithium, potassium, sodium, and alkaline, mineral waters, &c. Diuretics are given (1) to cause an increased flow of urine when the renal secretion is deficient; (2) to eliminate poisons and matters formed in disease from the blood; (3) to produce a larger flow of urine, to hold in solution substances which would be deposited, and form calculi. (*Garrod*: *Materia Medica*.)

*2. A person suffering from diuresis.

"In diuretics . . . he tried it with good success."—*Boyle*: *Works*, ii. 89.

di-ür-na, s. pl. [Neut. pl. of Lat. *diurnus*=pertaining to a day, daily; by day, as opposed to by night.]

1. *Entom.*: The name given by Latreille, Cuvier, and their successors to the highest sub-order or tribe of the order Lepidoptera. The term implies that they are day-fliers, as distinguished from the Crepuscularia, which fly by twilight, and the Nocturna, which do so by night. The first of these three sub-orders contains the Butterflies; the second the SpHINGIDES, Sphinxes, or Hawk Moths; and the third the Moths, properly so called. The Diurna are placed in harmony with the conditions of their existence, in being clad, as they are, in bright colors. The antennæ are knobbed, whence they are often called Rhopalocera (q. v.), the two other sub-orders being reduced to one, Heterocera. The wings, when in repose, usually stand erect. The caterpillars have six thoracic legs and ten prolegs, sixteen in all. The chrysalides, which, as a rule, are angular, are naked, and often suspended head downward. Butterflies are diffused over all countries, but the largest and finest are from the tropics. They may be divided into four families: Papilionidæ, Nymphalidæ, Lyceidæ or Polyommaticidæ, and Hesperidæ (q. v.).

2. *Zoöl.*: A name given by Cuvier, Blainville, &c., to a section of the Accipitres, or birds of prey, which fly in the daytime. Cuvier separated it into two divisions: the Vultures and the Falcons. These now constitute the families of the Vulturidæ and the Falconidæ (q. v.).

B. Ornith.: One of a family of birds, Colymbinæ, remarkable for their power and habit of diving. The neck is long, thus presenting a great affinity to the Grebes; the tail is very short and rounded; the wings short; the bill straight, strong, and pointed. The Divers are as much inhabitants of the ocean as the Grebes are of fresh water; they are confined to Northern latitudes, whence they migrate farther south in the winter season. The largest of the three European species is the great Northern Diver, *Colymbus glacialis*, but the other two—the Red-throated Diver, *C. septentrionalis*, and the Black-throated Diver, *C. arcticus*—are perhaps better known, as they are found in abundance in this country. They live on fish, which they follow under the water, propelling themselves along with their wings as well as their feet, and frequently remaining for some time before they emerge again. They fly with great rapidity.

(2) To draw or attach to different sides; as, The meeting was *divided* in opinion.

(3) To share; to have or take a portion of with others.

"Let old Timotheus yield the prize,
Or both divide the crown."

Dryden: St. Cecilia's Day.

†(4) To embarrass, to cause to hesitate through indecision; to raise doubts in: as, He was *divided* in his mind.

II. Technically:

1. Math.: To resolve or separate into parts or factors: one quantity is said to be *divisible* by another when it can be resolved into two entire factors, one of which is the divisor and the other the dividend.

2. Instr.: To mark with graduated divisions; to graduate according to a standard.

3. Music: To vary a simple theme with notes so connected as to form one series. [DIVISION, II. 4.]

"And all the while sweet music did divide
Her looser notes to Lydian harmony."

Spenser: F. Q., III. i. 40.

4. Parliamentary: To cause to vote on a question; so called from the members going into opposite lobbies: ayes to the right, noes to the left.

5. Comm.: To make a dividend of, to distribute as a dividend.

B. Intransitive:

I. Ordinary Language:

1. Literally:

(1) To part, to separate; to become separated or sundered.

"It [blood] doth divide in two slow rivers."

Shakesp.: Rape of Lucrece, 1,737.

(2) In the same sense as II.

*2. Figuratively:

(1) To become divided or disunited in feelings, opinions, &c.

"Love cools, friendship falls off,
Brothers divide."

Shakesp.: Lear, i. 2.

(2) To share.

"You shall in all divide with us."

Shakesp.: Coriolanus, i. 6.

II. Parliamentary, &c.: To vote on any question by "siding off," as in the British Parliament, the ayes going to the right and the noes to the left. [A. II. 4.]

"It was not thought advisable to divide."—*Macaulay: Hist. Eng., ch. xxi.*

¶ (1) Crabb thus discriminates between *to divide*, *to part*, and *to separate*: "*To part* approaches nearer to *separate* than to *divide*; the latter is applied to things only; the former two to persons, as well as things: a thing becomes smaller by being *divided*; it loses its junction with, or cohesion to, another thing, by being *parted*: a loaf of bread is

ból, bôy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bəl, dəl.

divided by being cut in two; two loaves are *parted* which have been baked together. Sometimes *part*, as well as *divide*, is used in the application of that which is given to several, in which case they bear the same analogy as before: several things are *parted*, one thing is *divided*: a man's personal effects may be *parted*, by common consent, among his children; but his estate, or the value of it, must be *divided*: whatever can be disjoined without losing its integrity is *parted*, otherwise it is *divided*: in this sense, our Savior's garments are said to have been *parted*, because they were distinct things; but the vesture which was without seam must have been *divided*, if they had not cast lots for it. That is said to be *divided* which has been, or is conceived to be a whole; that is *separated* which might be joined: a river *divides* a town by running through it; mountains or seas *separate* countries: to *divide* does not necessarily include a *separation*; although a *separation* supposes a *division*: an army may be *divided* into larger or smaller portions, and yet remain united; but during a march, or an engagement, these companies are frequently *separated*. Opinions, hearts, minds, &c., may be *divided*; corporeal bodies only are *separated*: the minds of men are often most *divided*, when in person they are least *separated*; and those, on the contrary, who are *separated* at the greatest distance from each other may be the least *divided*. With regard to persons, *part* designates the actual leaving of the person: *separate* is used in general for that which lessens the society: the former is often casual, temporary, or partial; the latter is positive and serious: the *parting* is momentary; the *separation* may be longer or shorter."

(2) He thus further discriminates between to *divide*, to *distribute*, and to *share*: "The act of *dividing* does not extend beyond the thing *divided*; that of *distributing* and *sharing* comprehends also the purpose of the action: we *divide* the thing; we *distribute* to the person; we may *divide* therefore without *distributing*; or we may *divide* in order to *distribute*: thus, we *divide* our land into distinct fields for our private convenience; or we *divide* a sum of money into so many parts, in order to *distribute* it among a given number of persons; on the other hand, we may *distribute* without *dividing*: for guineas, books apples, and many other things may be *distributed* which require no *division*. To *share* is to make into parts the same as *divide*, and it is to give those parts to some persons, the same as *distribute*; but the person who *shares* takes a part himself; he who *distributes* gives it always to others: a loaf is *divided* in order to be eaten; bread is *distributed* in loaves among the poor; the loaf is *shared* by a poor man with his poorer neighbor, or the profits of a business are *shared* by the partners. To *share* may imply either to give or receive; to *distribute* implies giving only: we *share* our own with another, or another *shares* what we have; but we *distribute* our own to others." (Crabb: Eng. Synon.)

di-vi-de, s. [DIVIDE, v.] That which divides or serves as a line of demarcation between two adjacent places: specif. the watershed of a district, or the ridge of land dividing the affluents of one river from those of another. The divide between any two streams may be approximately traced upon a map by drawing a line so that it shall head all the affluents of both streams.

¶ The Great Divide: (For def. see extract.)

"Comprised in the territories of Montana and Wyoming there is a region which contains all the peculiarities of the continent in a remarkable degree, and which moreover is exceedingly interesting on account of its scenery, its geography, its mineralogy, and its sport. . . . There it is that great rivers rise, running through every clime, from perpetual snow to tropical heat. It is the geographical center of North America. It is essentially The Great Divide."—Earl of Dunraven: The Great Divide, ch. i.

di-vid'-ēd, pa. par. or a. [DIVIDE, v.]

A. As pa. par.: (See the verb.)

B. As adjective:

1. **Ord. Lang.:** Separated, sundered, shared, joint, distributed, disunited. (*Lit. & fig.*)

"She thus maintains divided sway
With you bright regent of the day."
Cowper: On Mrs. Montagu's Feather Hangings.

2. **Bot.:** Applied to a leaf cut into divisions by incisions extending nearly to the midrib.

divided axle, s.

Vehicles: An axle bisected at its midlength. In some instances the parts are coupled together, in others they are independent. [CARRIAGE-AXLE.]

divided object-glass micrometer, s. Another name for the double-image micrometer. The object-glass of the telescope or microscope is bisected diametrically, the straight edges being ground smooth so that they may easily slide by each other. The halves of the bisected lens are movable in a direction

perpendicular to the line of section by means of a screw; the distances being determined by the number of revolutions necessary to bring the points to be measured into optical coincidence. (*Knight.*)

***di-vid'-ēd-lŷ, adv.** [Eng. *divided*; -ly.]

1. In a divided manner; in divisions or parts.

"If God be everywhere it cannot possibly be that He should possibly be so *dividedly*."—Cudworth: *Intell. System*, p. 783.

2. Separately, distinctly.

"The Apostle calls them ministering spirits jointly, whom he here calls his spirits, and his ministers, *dividedly*."—Knatchbull: *Annot.*, p. 260.

div-I-dēnd, *div-I-dent, s. & a. [Lat. *dividendum*=that which may or is to be divided or shared; gerund of *divido*=to divide; Fr. *dividende*; Ital. *dividendo*.]

A. As substantive:

I. Ordinary Language:

*1. A share, a portion distributed or allotted.

"Shall I set there
So deep a share,
(Dear wounds) and only now
In sorrow draw no dividend with you?"
Crashaw: *Charitas Nimia*.

2. In the same sense as II. 3.

II. Technically:

1. **Arith.:** A number which has to be divided by another: thus, if we have to divide 20 by 4, 20 is the dividend, and 4 the divisor.

2. **Bankruptcy:** The fractional part of the assets of a bankrupt which is paid to the creditor in proportion to the amount of the debt which he has proved against the estate of the debtor.

3. **Comm.:** The sum periodically payable as interest on loans, debentures, &c., or that periodically distributed as profit on the capital of a railway or other company. The sum to be divided is broken up into as many portions as there are bondholders or shareholders to claim them, and the fractional part falling to each holder bears the same proportion to the whole dividend as the amount of stock or shares he holds bears to the whole capital from which the dividend is derived. Bondholders are said to receive their dividends, and the process of paying them is called, in banks and other offices, the payment of dividends. (*Bithe'll.*)

B. As adj.: Bearing or yielding a dividend.

"As regards dividend stocks, the yield per cent. at the present prices is based upon the dividend of the past year."—London Daily Chronicle.

di-vid'-ēr, s. [Eng. *divider*(e); -er.]

I. Ordinary Language:

1. Literally:

(1) One who or that which divides, cuts, or separates anything into parts.

"According as the body moved, the divider did more and more enter into the divided body."—Digby: *On the Soul*.

(2) One who distributes or allots to others their shares.

"Man, who made me a judge or a divider over you?"—Luke xii. 14.

(3) A soup-ladle. (*Prov.*)

2. **Fig.:** One who or that which causes division or disunion.

"Hate is of all things the mightiest divider, nay, is division itself."—Milton: *Discipline of Divorce*, bk. ii., ch. xxi.

II. Technically:

1. **Husbandry:** The prow or wedge-formed piece on a reaping-machine, which divides the grain to be cut from the standing grain.

2. **Instruments (pl.):** A form of compasses, usually with an adjusting and retaining arrangement. Its name is derived from its specific use in dividing lines into any given number of equal parts. The legs are driven apart by a spring as the nut is retracted on the screw, and closed by contrary motion of the said nut; the fine thread of the screw admitting of a very delicate adjustment. (*Knight.*)

di-vid-lŷg, pr. par., a. & s. [DIVIDE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of making a division; division.

"Piercing even to the dividing asunder of soul and spirit."—Hebrews iv. 12.

dividing-engine, s. A machine for dividing a circle into a number of parts of equal proportions, either for the purpose of graduation, as the circles and arcs of astronomical, surveying, and plotting instruments, or for spacing off and cutting the circumference of a wheel into teeth. In the application of the screw to the graduation of mathematical scales, it is employed to move a platform which

slides freely and carries the scale to be graduated, the swing-frame for the diamond-point being attached to some fixed part of the framing of the machine. (*Knight.*) [GRADUATING-MACHINE.]

dividing-sinker, s.

Knitting-machine: One of the pieces interposed between jack-sinkers, which, being advanced while the latter are retracted, force the yarn between the needles of each pair, so that by the joint action of the jack-sinkers and the dividing-sinkers the yarn is looped on each of the needles. (*Knight.*)

***di-vid-lŷg-lŷ, adv.** [Eng. *dividing*; -ly.] By division.

div-I-div-I, s. [Native name.]

Comm.: The very astringent husks of *Cæsalpinia coriaria*, imported from South America, in the form of dark brown rolls containing a few flat seeds. The outer rind of the husks contains a large quantity of tannin, together with ready-formed gallic acid. Dividivi is used in tanning.

***di-vid-u-ŷl, a. & s.** [Lat. *dividu(us)*=divisible, and Eng. *adj. suff. -al*.]

A. As adjective:

1. Separated, distinct.

"His religion is now no more within himself, but is become a *dividual* movable."—Milton: *Areopagitica*.

2. Divided; shared or participated in with others; joint.

"Her reign
With thousand lesser lights *dividual* holds."
Milton: *P. L.*, vii. 381, 382.

B. As substantive:

Arith. & Alg.: One of the several parts of a dividend from which each separate figure or term of the quotient is found.

***di-vid-u-ŷl-lŷ, adv.** [Eng. *dividual*; -ly.] In a divided manner; by division.

***di-vid-u-ŷus, a.** [Lat. *dividuus*.] Divided, dividual.

"He so often substantiates distinctions into *dividuus*, self-subsistent."—Coleridge, in Webster.

***di-vin'-a-cle, s.** [A dimin., as if from a Lat. *divinaculum*, from *divinus*.] A riddle. (*Phillips.*)

***di-vin'-ŷl, *dy-vyn-all, a. & s.** [Lat. *divin(us)*, and Eng. *adj. suff. -al*.]

A. As adj.: Divine.

"Syne all these were mynstris of God to in mortal,
And had in theym no power *dyvynall*."
Fabyan: *Prologues*.

B. As subst.: Divination.

"What say we of hem that belevon on *divinales*?"—Chaucer: *Parson's Tale*.

div-in-ŷ-tion, *de-vin-a-cion, *di-vin-a-cion, s. [Lat. *divinatio*, from *divino*=to divine (q. v.); Fr. *divination*; Ital. *divinazione*.]

I. Ordinary Language:

1. The act of predicting or foretelling future events, or of discovering hidden or secret things by supernatural power or means.

"And they used *divination* and enchantments."—2 Kings xvii. 17.

2. An indication or forenoon of something future; an omen, an augury, a prediction.

"This controversy should be decided by the flying of birds, which do give a happy *divination* to things to come."—North: *Plutarch*, p. 19.

3. A prophecy or conjecture of the future.

"Tell thou thy earl his *divination* lies,
And I will take it as a sweet disgrace."
Shakespeare: *Henry IV.*, Pt. I., i. 1.

II. Technically:

1. **Script.:** In Old Testament times certain methods of, in certain circumstances, unveiling futurity or obtaining a communication from God as to human conduct and duty, were sanctioned in Scripture. Thus Joseph and Daniel interpreted prophetic dreams (Gen. xl, xli. 1-32; Dan. ii. 26-45, iv. 8-37); lots were often drawn after religious solemnities (Num. xxvi. 55, 56; Josh. vii. 13, 16-19; 1 Sam. x. 20, 21; Acts i. 26); and the Mercy Seat, from above which Jehovah on special occasions spoke (Exod. xxv. 22) became a veritable oracle of God (2 Sam. xvi. 23). Finally, there was the long series of true prophets. Not satisfied with these legitimate sources of obtaining communications from the Divinity, the Jews, after the example of the surrounding nations, had recourse to many unsanctioned methods of operation, each of which had its pretended experts. The Mosaic law sternly denounces these, and specially any one that made "his son or his daughter to pass through the fire, or that useth *divination*, or an observer of times, or an enchanter, or a witch, or a charmer, or a consulter with familiar spirits, or a wizard, or a necromancer" (Deut. xviii. 10-12).

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, plt, sīre, sīr, marine; gō, pēt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

Christianity set itself against these practices, and when Paul preached at Ephesus, "Many of those which used curious arts brought their books together, and burned them before all men; and they counted the price of them, and found it fifty thousand pieces of silver" (Acts xix. 19).

2. *Hist.*: Divination among the ancients was classed under two divisions: natural and artificial. Natural divination was attributed to the inspiration of the divine afflatus; such were the celebrated oracles of Delphi, &c. The second kind was effected by various rites or observations; as by sacrifices, inspection of the entrails of the victims, observation of the flight of birds, the stars, &c. Gaul, in his *Mag-Astro-Mantir* (1652), ch. xix., gives a long list of the various methods of divination, such as "Aeromancy, or divining by the air; Pyromancy, by fire; Hydromancy, by water; Geomancy, by earth; Dæmonomancy, by the suggestions of evil demons or devils," &c. The Romans never entered upon any important undertaking, whether public or private, without first endeavoring to ascertain the feelings of the gods upon the subject, and hence to infer the probable issue of the enterprise. With them the whole system of divination was placed under the control of the College or Corporation of Augurs. [AUGUR.] The greatest reliance was placed upon the manifestations of the divine will by thunder and lightning, &c., and above all by the cries, the flight, and the feeding of birds; but there was scarcely any sight or sound connected with animate or inanimate nature which might not, under certain circumstances, be regarded as yielding an omen.

**di-vin'-a-tōr*, s. [Lat. *diviner*; one who practices or pretends to divination.

"Enthusiasts, diviners, prophets, sectaries, and schismatics."—Burton: *Anat. of Melancholy*, p. 641.

**di-vin'-a-tōr-ŷ*, a. [Fr. *divinatoire*; Ital. & Sp. *divinatorio*.] Pertaining to or of the nature of divination.

"Julian, according to his usual modesty, roundly affirms, that this intercourse was properly divinationary."—Biblioth. Bibl. (Ox. 1720), on Gen. xv. 9.

**di-vin'-a-trice*, s. [Lat. *divinatrix*.] Divination.

"False astrology and divinationary."—Str. F. More: *A Woful Lamentation*.

di-vi-ne, **de-vine*, **de-vyn*, **de-vyne*, a. & s. [Fr. *divin*=divine, *divin*=a diviner, from Lat. *divinus*, from the same root as *divus* and *deus*.]

A. As adjective:

I. Literally:

1. Pertaining to God or the Deity.

"The immensity of the divine nature."—Paley.

2. Pertaining to any deity or deified person.

3. Partaking of the nature of a god; godlike.

"No more was seen the human form divine."—Pope: *Homer's Odyssey*, x. 277.

4. Proceeding from God; as, *Divine* revelation or judgment.

"You gave me once a divine responsibility, That I should be the flour of loaves in Troye."

Chaucer: *Test of Creseide*.

5. Appropriated to or proper for the Deity; as, *Divine* service or worship.

II. Figuratively:

1. Excellent, above the nature of man; godlike, heavenly.

(1) *Of persons*:

"He gazed upon that mighty orb of song, The divine Milton."

Wordsworth: *Excursion*, bk. 1.

(2) *Of things*:

"A diviner creed Is living in the life they lead."

Longfellow: *Tales of a Wayside Inn*. (Interl.)

*2. Pertaining to divinity or theology.

"Church history and other divine learning."—South.

*3. Pious, holy, religious.

"I know him for a man divine and holy."

Shakespeare: *Measure for Measure*, v. 1.

*4. Divining, presaging, foreboding; feeling a presentiment.

"Yet oft his heart, divine of something ill, Misgave him."

Milton: *P. L.*, ix. 846, 847.

B. As substantive:

*1. Divination, prophecy.

"Merlin in his dream of him has said."

Langtoft, p. 282.

*2. A diviner, an augur, a presager or predictor.

"Dere Daniel also that was divine noble."

E. Eng. Allit. Poems; *Cleanness*, 1, 302.

*3. Divinity, theology.

"I saugh bishopis bolde and bacheloris devyn."

MS. in Wright's Ed. of *P. Plowman*, p. 308.

4. One who is learned in divinity or theology; a theologian; a writer on theology.

"Some of our most eminent divines have made use of this Platonic notion."—Spectator, No. 90.

5. A clergyman, a priest, a minister of the gospel; an ecclesiastic.

"Was this a man to be absolved by Christian divines?"

Macaulay: *Hist. Eng.*, ch. xxi.

¶ *Divine right of kings*: The claim of kings to hold their office by Divine appointment, and hence to govern absolutely without any interference on the part of their subjects, opposition to their will being considered in the light of a sin. The doctrine was supported by Hobbes, Salmasius, Filmer, and others, and opposed by Milton, Algernon Sidney, &c. It is a tenet eminently pleasing to rulers of despotic proclivities, and just as displeasing to the mass of their subjects, many of whom are accustomed to describe it neatly and antithetically, in the words of Pope:

"The Right Divine of Kings to govern wrong."

Pope: *Dunciad*, iv. 188.

For the difference between *divine* and *Godlike*, see *GODLIKE*; for that between *divine* and *holy*, see *HOLY*; and for that between *divine* and *ecclesiastic*, see *ECCLÉSIASTIC*.

di-vine, **de-vyne*, **de-vyn-en*, v. t. & i. [Fr. *diviner*, from Lat. *divino*, from *divinus*=divine, *holy*; Ital. *divinare*; Sp. *adivinar*; Port. *adivinhar*.] [DIVINE, a.]

A. Intransitive:

1. To prophesy, to presage, to utter prognostications or prophecies.

"Daniel of hire undoyngs Devyned and seide."

P. Plowman, 10,765.

2. To explain.

3. To conjecture, to guess.

"The best of commentators can but guess at his meaning; none can be certain he has divined rightly."—Dryden: *Juvenal*. (Dedication.)

4. To feel a presentiment or presage.

"If secret powers Suggest but truth to my divining thoughts, This pretty lad will prove our country's bliss."

Shakespeare: *Henry VI.*, Pt. III., iv. 6.

5. To use or practice divination.

"Wot ye not that such a man as I can certainly divine?"

Gen. xlv. 15.

B. Transitive:

1. To foretell, to presage, to prophesy.

2. To foreknow, to have a presentiment of.

"Atrides from the voice the storm divined, And thus explored his own unconquered mind."

Pope: *Homer's Iliad*, xvii. 99, 100.

*3. To make divine or heavenly; to deify.

"Borne above the clouds to be divined."

Spenser: *Ruins of Time*.

¶ For the difference between *to divine* and *to guess*, see *GUESS*.

di-vi-ne-ly, adv. [Eng. *divine*; -ly.]

"An earthly paragon; behold divineness No elder than a boy."

Shakespeare: *Cymbeline*, iii. 6.

di-vin'-ēr, **de-vin-ōr*, **de-vin-ōur*, **di-vin-ōur*, **dy-vyn-ōur*, s. [O. Fr. *devinere*, *devineor*, *devinur*; Ital. *divinare*; Lat. *divinator*, from *divino*=to divine.]

1. One who practices or professes divination; one who pretends to foretell future events or to reveal occult things by supernatural means; an augur, a seer.

"The diviners have seen a lie, and have told false dreams."—Zech. ix. 2.

2. One who divines, guesses, or conjectures; a guesser, a conjecturer.

"If he himself be conscious of nothing he then thought on, he must be a notable diviner of thoughts, that can assure him that he was thinking."—Locke.

**di-vin'-ēr-ēss*, **di-vin-er-esse*, s. [Fr. *divin-eresse*.] A woman who practices or professes divination; a prophetess.

"The mad divineress had plainly writ."

Dryden: *Hind and Panther*, iii. 490.

div-ing, pr. par., a. & s. [DIVE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. The act of plunging head foremost into water or other fluid; the act of making or taking a dive.

2. The act, practice, or art of descending and remaining for a certain period under water, by means of a diving-bell (q. v.). It is practiced for various purposes, such as coral, pearl, or sponge fishing; examining the bottom of rivers, the sea, &c., for engineering purposes; the raising or removing of sunken vessels, or the recovery of valuable stores, &c., from them.

diving-bell, s. An apparatus, having some analogy in shape to a bell, in which persons may descend and remain for a while in safety beneath the surface of the water. The principle of the diving-bell may be illustrated by taking a tumbler, inverting it, and pressing it down into a vessel of water, when it will be seen that, although the water will rise in the tumbler to an extent proportioned to its degree of immersion, yet the upper part of the tumbler will remain perfectly dry, and if a lighted taper be placed within, it will not be extinguished, but will, on the contrary, burn with even increased energy, owing to the condensation of the air by pressure.

¶ *Diving-bell pump*: A pump having a casing divided by a vertical partition into two chambers, which are provided with inwardly and outwardly opening valves. The chambers are kept partially filled with water, which, together with air, is admitted to each through the inwardly opening valves, and expelled through those opening outwardly, to supply the bell with fresh air. This is effected by the alternate reciprocations of a piston working in the open-ended cylinder, which, at each stroke, draws a portion of the water from one of the chambers into the cylinder, lowering its level in that chamber, and permitting the air to enter through the inwardly opening valve; the return-stroke causes the water to rise, forcing some of it, together with the air, into an exterior chamber, whence it is carried to a condenser, and thence, through a tube, to the bell. (Knight.)

diving-dress, s. A waterproof clothing and helmet for those who make submarine explorations. In the old forms of diving-dress the air filled the space between the body of the diver and his impervious clothing, the expired air escaping by a small valve in the helmet, through which any excess of air also escaped. Irregularity in the action of the pump caused also irregularities in the escape of the bubbles, and thus the assistants might for a long time unconsciously continue to send air to a corpse. In the new apparatus, the appearance of the bubbles indicates the safety of the diver, and the assistants on the watch are at any time warned of his danger by their non-appearance. (Knight.)

diving-spider, s.

Zoöl.: A spider (*Argyroneta aquatica*), which though fitted only for aerial respiration, yet constructs a dwelling shaped not unlike a diving-bell, at the bottom of shallow water, carrying down air by means of the hairs with which it is clothed. [ARGYRONETA.]

diving-stone, s. A name given to a variety of jasper.

**di-vin'-i-fied*, pa. par. or a. [DIVINIFY.]

**di-vin'-i-fy*, v. t. [Lat. *divinus*=divine, and *facio* (pass. *fi*)=to make.] To make divine, heavenly, or godly; to deify.

"My beloved is white and red, and chosen of a thousand; white, for his blessed and undivided soul; red, for his precious flesh embred with his blood."—*Parthenia Sacra* (1633), p. 204.

di-vin'-ing, **de-vin-ing*, **de-vin-yng*, **dy-vyn-yng*, pr. par., a. & s. [DIVINE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of foretelling, prognosticating, or presaging future or occult things; divination.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bəl, dəl.

divining-rod, s. A forked rod or branch, generally, but not necessarily of hazel, by means of which it is pretended to the foolish and superstitious that the presence of water, minerals, &c., underground can be detected. When used, the rod, which is carried slowly along in suspension, will, as is affirmed, dip and point toward the ground when brought over the spot where the concealed water or mineral is to be found.

"Will you assist us with your triangular vial of May-dew, or with your divining-rod of witch-hazel?"—Scott: *Antiquary*, ch. xxiii.

(2) That which causes a separation or disunion.

"As the long *divorce* of steel falls on me,
Make of your prayers one sweet sacrifice,
And lift my soul to heaven."
Shakespeare: *Henry VIII.*, ii. 1.

II. Technically:

1. **Law:**

(1) The partial or total dissolution of a marriage previously contracted. In the former case this dissolution proceeds no further than the judicial separation of the parties; in the latter, the marriage itself comes to an end.

2. History:

(1) Among the classic nations of antiquity: The Spartans rarely divorced their wives; the Athenians and other Greeks did so often for trivial causes. It has been stated that divorce scarcely if at all existed during the early period of Roman history; in the later period of the republic, and yet more under the empire, it was extensively practiced, the power of divorce, and that for trivial causes, being vested in the wife as well as the husband.

(2) Among the Jews: The enactment of the Mosaic law was the following: "When a man hath taken a wife, and it come to pass that she find no favor in his eyes because he hath found some uncleanness in her, then let him write her a bill of divorcement, and give it in her hand, and send her out of the house" (Deut. xxiv. 1). Here, it will be perceived, impurity is the only assigned cause for such divorce. The woman sent away might marry another man, but if he, too, divorced her, it was not permitted her first husband to take her again. The word "uncleanness" in the passage now quoted is a free translation: the Hebrew words mean literally "the nakedness of a thing." The exact import of this expression was sharply contested in the immediately pre-Christian times, the school of Hillel giving it a general meaning, and holding that a man might divorce his wife for the most trivial cause; while that of Shammai considered that the doubtful phrase signified adultery, for which therefore alone a man could put away his wife.

(3) Among the Christian nations: Our Lord, replying to a question put to Him by the Pharisees, laid down the principle, whoever put away his wife for any cause except fornication (which we should now call adultery) and should marry another, committed adultery, as did any man who married the divorced wife (Matt. xix. 3-9). Wherever Christianity prevailed this tended to become the law, and when, in A. D. 1215, Pope Innocent III. elevated marriage to the dignity of a sacrament, the ecclesiastical courts claimed that it fell solely under their jurisdiction. They, as a rule, carried out the law of Christ, but in exceptional cases granted dispensations at a handsome pecuniary price for the dissolution of marriage.

(4) Among the Mohammedans: By the laws of the Koran, a Mussulman may dissolve the marriage union by saying to his wife three times, "Thou art divorced."

(5) Among the modern Ethnic nations: Among the Hindoos, the Chinese, &c., divorce may be practiced for the most trifling causes.

di-vôr'ce, *v. t. & i.* [DIVORCE, *s.*]

Dix'-le, *s.* [From the name of one Dixy, a large-holding and kind-hearted slave-owner on Manhattan Island in the latter part of the 18th century. His treatment of his negroes caused them to regard his plantation (or "Dixy's") as little short of an earthly paradise, and when any of the slaves were taken away from his home he was always pining for "Dixy's" and singing and talking of its joys. When slavery moved southward in search of a more secure and congenial habitat, the same ideal of "Dixy's" was taken along, and the chant which the former slaves of Dixy sung of their old home became so widespread that its origin was lost sight of and it came to be applied to the southern homes of the negroes.] A name given in negro minstrelsy to the Southern States.

dig-gē-tai, dzig-gē-tai, s. [A Central Asian word.]
Zool.: An animal (*Equus hemionus*) of the same genus as the horse and ass, and by some supposed to be the parent of the latter animal, though the more general opinion is that the ass is derived from the Onager (*Equus onager*), or wild ass of the desert.

dō (1), s. [Ital.]

Music.: The first of the syllables used for the solfeggio of the scale. The note C, to which it is applied, was originally called Ut, and is still called so in France. Its introduction dates from the seventeenth century. Lorenzo Penna in his *Albort Musicale*, 1672, uses *do* for *ut*, and speaks of it as a recent practice. When the sol-fa syllables, *do, re, mi, fa, sol, la, si*, are only used for the actual notes C, D, E, F, G, A, B, the method is called the Fixed Do. But when the sol-fa syllables are used to denote the seven degrees of any scale, the key-note being always *do*, regardless of its actual pitch, the system is called the Movable Do.

do. (2), s. [Read *ditto*.] A contraction of *DITTO* (q. v.).

Dō-çē-tā, s. pl. [Gr. *dokeō*=to seem, to appear.]

Ch. Hist. A name applied to those heretics in the early ages of the Church who maintained that Christ, during his life on earth, had not a real or natural, but only an apparent or phantom-like body. The bolder Docetæ assumed the position that Christ was born without any participation of matter; they denied accordingly the resurrection and the ascent into heaven. The milder school of Docetæ attributed to Christ an ethereal and heavenly, instead of a truly human body. Among the Gnostics and Manichæans this opinion existed in its worst type, and it has been held since the Reformation by a small fraction of the Anabaptists.

†dō-çē-tic, a. [Eng. *Docetæ* (æ); -ic.] Of or pertaining to the Docetæ; held by the Docetæ.

With smiles I could betray, with temper kill."

Prior: *Solomon; Power*.

3. (Of the lower animals): Tractable, easily managed.

"Dogs soon grow accustomed to whatever they are taught, and being *docile* and tractable, are very useful."—*Ellis: Voyage*.

¶ Crabb thus discriminates between *docility*, *tractability*, and *docility*: "The idea of submitting to the directions of another is comprehended in the signification of all these terms: *docility* marks the disposition to conform our actions in all particulars to the will of another, and lies altogether in the will; *tractability* and *docility* are modes of *docility*, the former in regard to the conduct, the latter in regard to the principles and sentiments: *docility* is in general applied to the ordinary actions of the life, where simply the will is concerned; *tractability* is applicable to points of conduct in which the judgment is concerned; *docility* to matters in which the character is formed: a child ought to be *docile* with its parents at all times; it ought to be *tractable* when acting under the direction of its superiors; it ought to be *docile* to imbibing good principles: the want of *docility* may spring from a defect in the disposition; the want of *tractableness* may spring either from a defect in the temper or from self-conceit; the want of *docility* lies altogether in a natural stubbornness of character: *docility* being altogether independent of the

judgment is applicable to the brutes as well as to men; *tractableness* and *docility* is applicable mostly to thinking and rational objects only, though sometimes extended to inanimate or moral objects: the ox is a *docile* animal; the humble are *tractable*; youth is *docile*." (*Crabb: Eng. Synon.*)

dō-çil-i-tý, s. [Fr. *docilité*, from Lat. *docilitas*, from *docilis*=easily taught; *docere*=to teach.] Aptness or readiness to learn or to be taught; docibleness.

"But tact and *docility* made no part of the character of Clarendon."—*Macaulay: Hist. Eng.*, ch. ii.

dōç-i-mā-çý, *dō-ci-ma-sý, *dō-ci-ma-si-a, s. [Gr. *dokimasia*=a trial, an essay; *dokimazō*=to try, to essay; *dokimos*=tried, proved.]

döck (3), *s.* [O. Dut. *dokke*=a harbor; Low Lat. *doga*=a canal, a ditch; cf. Ger. *docke*; Dan. *dokke*; Sw. *docka*=a dock, from Gr. *dochē*=a receptacle; *dechomai*=to receive.]

Hydraul. Engin.: An artificial excavation or structure for containing a vessel for repairs, loading or unloading. Docks are of various kinds, as, for instance: Wet-dock, dry-dock, graving-dock, screw-dock, sectional-dock, floating-dock, hydraulic-dock, slip-dock, and shipbuilding-dock. (See these words.)

dock-dues, *s. pl.* Charges made for the use of docks; dockage.

dock-master, *s.* The official who has charge and superintendence of a dock.

dock-rent, *s.* The charge made for warehousing or storing goods in a dock.

dock-warrant, *s.*

Comm.: A kind of receipt given by the owner of a dock in return for goods deposited with him. It passes freely from hand to hand like a bill of exchange, but differs from it in this respect, that no exchange is implied in the transaction. A dock-warrant refers to certain goods, goes with those goods, and is of no value apart from them. It gives the holder a claim to those specific goods, and not merely to something of equal value, as a bill of exchange does. Dock-warrants are often deposited with bankers as security for money advanced by way of loan. (Bithell.)

dock-yard, *s.* A yard or inclosed magazine near a harbor, in which are deposited all kinds of necessary stores and materials for vessels.

"I suggested that he might go to a dock-yard, and work, as Peter the Great did."—Boswell: *Tour to the Hebrides*, p. 304.

"From a scholar he became a fellow, and then the president of the college, after he had received all the graces and degrees, the proctorship and the doctorship."—*Clarendon: Civil War*, i. 199.

Doctors'-Commons, s.

English Law, &c.: The house or houses in the city of London occupied by an association of Doctors of Civil Law, who agreed to take food at a common table. It came into existence in 1500, and was formed by civilians entitled to plead in the Court of Arches. Where they first met has not been recorded, but in 1568 Dr. Henry Hervie procured a place for them near St. Paul's Cathedral, which being burnt in the Great Fire of London, was again rebuilt and was occupied till quite recently for its original purpose. In 1768, the Society was incorporated under the name of the College of Doctors of Laws exercising in the Ecclesiastical and Admiralty Courts. The Doctors of Laws referred to were those who had received the academic degree of D.C.L. from the University of Oxford or from that of Cambridge. Doctors' Commons consisted of five Courts—viz., the Court of Arches, the Prerogative Court of Canterbury, the Court of Faculties or Dispensations, the Consistory Court, and the High Court of Admiralty. The official residences of the Judges in the Courts were within the precincts of Doctors' Commons. Recent legal changes and other causes, having removed the necessity for its continuance, 20 & 21 Vict. c. 17, § 116, 117, gave the Society power to sell their property, surrender their charter of incorporation, and dissolve the college.

"You told me that a dignity of our Church, in friendship to the gentleman's father, had been at Doctors'-Commons; and there fed one of the doctors, who is a judge of one of those courts where matrimonial causes are consuable."—*Bp. Barlow: Remains*, p. 365.

"Should you say an ague were a fever, the doctress would have a shaking fit of laughter!"—*Whitlock: Manners of the English*, p. 47.

*dōc'-trīce, s. [As if from a Lat. *doctrīx*, fem. of *doctor*.] The same as DOCTRESS (q. v.).

"Ones the Jewish tongue kepe silence, being the doctrine and auancer of carnall obstruances, the evangelicall tongue hath no power to speke."—*Udall: Luke* i.

*dōc'-trin-a-ble, a. [Eng. (*doctrin(e)*); -able.] Containing doctrine.

"Then certainly is more doctrinable the fained Cirus in Xenophon than the true Cyrus in Justine."—*Sidney: Apology for Poetry*. (Nares.)

dōc'-trin-ā-ire, dōc'-trin-nā-ire, s. [Fr., as if from a Lat. *doctrinarius*, from *doctrina*=teaching, instruction.]

I. Ordinary Language:

1. One who theorizes in politics without regard to practical considerations; a theorizer, an ideologist.

"A few crotchet-mongers, Positivists, and doctrinaires."—*Pall Mall Gazette*.

2. One of the party or class of politicians described in II.

II. *French Hist. (pl.)*: ["Doctrinaire: terme politique introduit sous la Restauration (1814-30). Homme politique dont les idées subordonnées à un ensemble de doctrines étaient semi-libérales et semi-conservatives." "Doctrinaire: Political term introduced under the Restoration (1814-1830). A politician whose ideas are dominated by a mixture of the doctrines supported by the semi-liberals and semi-conservatives." *Litttré*.] A name given in 1814 to a class or section of politicians in France, who held moderately liberal views. They supported constitutional principles (that is, a limited monarchy with representative government) as opposed to arbitrary monarchical power on the one hand, and republicanism on the other. They derived their name from their being looked upon by the members of both extreme parties as mere theorizers or visionaries without any practical knowledge or consideration of politics.

dōc'-trin-ā-l, a. & s. [Low Lat. *doctrinalis*, from *doctrina*=teaching, instruction; Fr. & Sp. *doctrinal*; Port. *doctrinal*; Ital. *doctrinale*.]

A. As adjective:

4. That which is taught; a principle or position of any sect, master, or teacher.

"That great principle in natural philosophy is the doctrine of gravitation, or mutual tendency of all bodies toward each other."—*Watts: Improvement of the Mind*.

5. The principles, tenets, or dogma of any party or sect.

"This seditious, unconstitutional doctrine of electing kings is now publicly taught, avowed, and printed."—*Burke*.

II. *Relig.*: The principles and revealed truths which form the basis of the system.

Doctrine of Chances: The formulae by which probabilities are calculated; the doctrine of probabilities. Where the number of chances for and against are known, the reasonable odds in favor of an event are calculated by the formation of a fraction whose numerator is the number of chances for its happening and its denominator the sum of the chances both for and against. Thus, if there are 3 chances for, and 5 against, the odds will be represented by the fraction $\frac{3}{8}$, and that fraction of the stake should be offered as a wager.

¶ (1) Crabb thus discriminates between *doctrine*, *precept*, and *principle*: "The doctrine requires a teacher; the precept requires a superior with authority; the principle requires only an illustrator. The doctrine is always framed by some one; the precept is enjoined or laid down by some one; the principle lies in the thing itself. The doctrine is composed of principles; the precept rests upon principles or doctrines. Pythagoras taught the doctrine of the metempsychosis, and enjoined many precepts on his disciples for the regulation of their conduct. We are said to believe in doctrines; to obey precepts; to imbibed or hold principles. The doctrine is that which constitutes our faith; the precept is that which directs the practice; both are the subjects of rational assent, and suited only to the matured understanding; principles are often admitted without examination, and imbibed as frequently from observation and circumstances as from any direct personal efforts; children as well as men get principles."

(2) He thus discriminates between *doctrine*, *dogma*, and *tenet*: "The doctrine rests on the authority of the individual by whom it is framed; the dogma on the authority of the body by whom it is maintained; the tenet rests on its own intrinsic merits. Many of the doctrines of our blessed Savior are held by faith in Him; they are subjects of persuasion by the exercise of our rational powers;

the dogmas of the Roman Church are admitted by none but such as admit its authority; the tenets of republicans, levelers, and freethinkers have been unblushingly maintained both in public and private." (*Crabb: Eng. Synon.*)

dōc'-u-mēnt, s. [Fr., from Lat. *documentum*=a proof, from *doceo*=to teach; Sp., Port., & Italian *documento*.]

Botany;

1. The common name for plants of the genus *Cuscuta* (q. v.). There are several species; they are slender, thread-like, twining, leafless parasites, involving and destroying the whole plants on which they grow. Two species are natives of this country: *Cuscuta Epithymum*, which grows abundantly on ericas, and *C. europæa*, upon thistles and nettles or other soft plants within its reach, bringing them to final destruction. Of late years two other species have accidentally been introduced; viz., *Flax Dodder*, *C. trifoliata*, and *Clover Dodder*, *C. Epilinum*. The first destroys whole fields of flax, and the latter preys to a great extent on clover, both plants being the cause of great losses to the agriculturist. In India some species are very large and powerful, involving trees of considerable size in their grasp. (Smith.)

Dodder.

dō-dō, s. [Port. *duodo*=silly, foolish.]

Ormith.: A large bird, belonging to the order Columbidae, or Pigeons, that inhabited the Mauritius in great numbers when that island was colonized in 1644 by the Dutch, but which was totally exterminated within fifty years from that date, the last record of its occurrence being in the year 1681. The Dodo, *Didus ineptus*, was a heavy bird, bigger than a turkey, incapable of flight,

Dodo.

and entirely unlike the pigeons in general appearance. The wings were rudimentary, the legs short and stout, and the tail a tuft of soft plumes. The beak was strongly arched toward the end, and the upper mandible had a hooked point like that of a bird of prey. The Dodo owed its extermination to the fact that it was good to eat and was unable to fly.

"The *dodo* [is] a bird the Dutch call *walghvogel* or *dod Eezen*; her body is round and fat, which occasions her slow pace; or that, her corpulency."—*Sir T. Herbert: Travels*, p. 382.

doeglic-acid, s.

Chem.: $C_{15}H_{25}CO_2OH$. An acid belonging to the oleic series, obtained from doegling train-oil (q. v.). It can be obtained by saponifying the oil with oxide of lead, and dissolving in ether, and separating by acids. Doeglic-acid is a clear yellow liquid, which solidifies at 0°. It reddens litmus, and forms a crystalline barium salt which dissolves in boiling alcohol.

doeg-ling (doeg as dūg), a. [For etym. see definition.]

doegling train-oil, s.

Comm.: The oil obtained from the Bottle-nosed Whale, *Balæna rostrata*, called *dōgling* in the Farøe Isles, where it is caught. The oil becomes turbid at 8°, and deposits a crystalline fat at 0°. It contains 79.9 per cent of carbon and 13.4 per cent of hydrogen. When exposed to the air it absorbs oxygen and dries up. It forms a better fuel for lamps than common train-oil. It can be freed from its offensive smell by leaving it exposed to the sun in contact with water, by shaking it up with thin milk of lime, or by dissolving it in boiling alcohol. (*Watts: Dict. Chem.*)

dōffed, pa. par. or a. [DOFF, v.]

dōff-ēr, s. [Eng. *doff*; *-er*.]

1. **Ord. Lang.**: One who or that which doffs.

2. **Carding**: A comb or revolving card-covered cylinder in a carding-machine, which strips the fleece or sliver of fiber off the main card-wheel after the filaments have passed the series of smaller carding-rollers and the flat cards. It is usually a comb with very fine teeth, which penetrate slightly between the wire teeth of the card as the comb moves downward. (*Knight*.)

dōff-īng, pr. par., a. & s. [DOFF, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of putting off, or laying aside, as clothes, &c.

doffing-cylinder, s. A cylinder clothed with cards which are presented in such direction and at such a rate of motion to the main card-cylinder as to remove the fibers from the teeth of the latter. The doffing-cylinder assumes one of three forms: (1) Continuous clothing; removing a perfect fleece of the width of the machine. Such is the doffer of the

scribbling-machine, which yields a continuous lap or fleece. (2) Longitudinal bands of card clothing; removing slivers of a width determined by the breadth of the bands and of a length equal to that of the doffer. (3) Circumferential bands or rings of card-clothing; removing narrow, continuous slivers, which pass to the condenser, whereby they are compacted and brought to the condition of slubs. [*SLUBBING-MACHINE*.]

doffing-knife, s. A blade of steel toothed at its edge like a fine comb, and vertically reciprocated by a crank tangentially to the teeth of the doffer in a carding-machine, in order to remove therefrom a fine fleece of carded wool which is gathered into a sliver. [*DOFFER*.] (*Knight*.)

dōg, *dōge, *dōgg, *dōgge, s. & a. [O. H. Ger. *dog*; Dut. *dog*; Sw. *dogg*=a mastiff; Dan. *dogge*; Icel. *doggur*; O. Fr. *dogue*.]

A. As substantive:

I. Ordinary Language:

1. **Literally:**

(1) In the same sense as II. 1.

(2) The flesh of the animal described under II. 1.

"A viand which the hosts called mutton, but which the guests strongly suspected to be *dog*."—*Macaulay: Hist. Eng.*, ch. iii.

2. **Figuratively:**

(1) Used as a term of contempt, scorn, or reproach.

"Another time you called me *dog*."

Shakesp.: Merchant of Venice, i. 3.

(2) A gay young fellow; a "spark," a "brick."

(3) A name given by mariners to a meteor seen, immediately above the horizon, generally before sunrise or after sunset; viewed as a certain prognostic of the approach of bad weather. If this be seen before sunrise, it is believed that (as they express themselves) it will bark before night; if after sunset, that it will bark before morning; if while the sun is up, the prognostic is less attended to. But seamen are not fond of these meteors at any time, especially in winter. In summer they often prognosticate warm weather. (*Jamieson*.)

II. Technically:

1. **Zool.**: A well-known animal belonging to the genus *Canis* (q. v.). The Common Dog, *Canis familiaris*, in all its numerous varieties is essentially a domestic animal, and as such has been man's companion from remote periods; for there is reason to suppose that the bones of a canine animal found in the Danish Kitchen Middens, and consequently of Neolithic period, were those of a dog. "The dog," says Cuvier, "is the most useful conquest that man has made. The whole species is devoted to his master, adopts his manners, distinguishes and defends his property, and remains attached to him even unto death; and all this springs not from mere necessity, but from a true friendship. The swiftness, the strength, and the highly developed power of smelling of the dog have made him a powerful ally of man against the other animals, and were, perhaps necessary to the establishment of society." It was formerly believed that all dogs were descended from a common ancestor, but the more careful researches made of late years have led to the conclusion that they have sprung from several different species of wolves and jackals. Well-marked varieties resembling those of to-day [*BULL-DOG, GREYHOUND*] were known to the ancients. Thus, a mastiff occurs on an Assyrian monument; while on the Egyptian sculptures the prototypes of the greyhound, the Arab boarhound, with its tightly-curled tail, and the short-legged turnspit are represented. Though principally employed in the chase, dogs have been put to various uses at different times and in different places. The Esquimaux, who believe themselves descended from dogs, employ them to draw their sledges. For purposes of light draught they were at one time largely resorted to in England, an employment for which others are still called into requisition on the continent. With some of the aborigines of this country the dog was an object of worship, and by the Japanese it is held in great respect. On the other hand, the Greeks, Romans, and the old Celtic inhabitants of Scandinavia were accustomed to sacrifice dogs to certain of their deities; while, *per contra*, dogs have also been employed as executioners and even as living tombs. There are several kinds of feral or wild dogs inhabiting several parts of the world, such as the Dingo in Australia, the Indian Wild-dog or Dhole, the Pariah dogs, &c. (q. v.), all of which are merely domestic varieties that have run wild.

2. **Astron.**: A name given to two constellations in the southern hemisphere, the Greater Dog, *Canis Major*, and the Lesser Dog, *Canis Minor*. [*CANICULA*.]

"Among the southern constellations, two there are who bear the name of the *dog*; the one in sixteen degrees latitude, containing on the left thigh a star of the first magnitude, usually called Procyon or Anticanus."—*Browne: Vulgar Errors*.

bōil, bōy; pōut, jōwī; cat, cēll, chorus, c̄hin, bench; go, gēm; thīn, thīs; sin, aš; expect, Xēnophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -t̄ion, -s̄ion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bēl, dēl.

3. *Mech.*: A name given to various mechanical contrivances acting as holdfasts; a device with a tooth which penetrates or grips an object and detains it. The analogy and inference of the name is that the device has a tooth and bites.

(1) *Pile-driving*: A grappling-iron or grab, usually with jaws, and adapted to raise the monkey of a pile-driver. When the jaws open the object is dropped or released. [PILE-DRIVER.]

(2) *Well-boring*: A grab for clutching well-tubes or tools, in withdrawing them from bored, drilled, or driven wells. [GRAB.]

(3) *Turning*: A clamp fastened to a piece suspended on the centers of a lathe, and by which the rotation of the chuck or face-plate is imparted to the piece to be turned.

(4) A click or pallet adapted to engage the teeth of a ratchet-wheel, to restrain the back action; a click or pawl. [RATCHET, WINDLASS.]

(5) *Machinery*:

(a) The converging set screws which establish the bed-tool of a punching-press in direct coincidence with the punch.

(b) A contrivance for holding the staff to the rest, chuck, or carriage, while being cut, sawed, planed, or drilled.

(c) An adjustable stop placed in a machine to change direction of motion, as in the case of feed-motion, or in jacking, shaping, or planing-machines.

(6) *Hoisting and Hauling*:

(a) A grappling-iron with a fang which is driven into an object to be raised or moved. In the continuous system of feed in saw-mills, the chain has a number of dogs attached to different portions of its length. Dogs are also used for securing and towing floating logs and in shifting or loading logs on the ground or carriage.

(b) A ring-dog or span-dog: two dogs shackled together by a ring, and used for hauling or hoisting.

(c) Sling-dogs: two dogs at the end of a rope, and used in hoisting barrels; a span-shackle.

(7) *Joinery*: A bench-dog is a clamp, and holds the timber by its tusk.

(8) *Sawing*: A rod on the head or tail block of a saw-mill carriage, by which the log is secured in position. The dog is pivoted to the block, and its tooth is driven into the log. It varies in form on the head and tail blocks respectively.

(9) *Shipbuilding*: The last detent or support knocked away at the launching of a ship; a dog-shore.

(10) *Locksmith*: A projection, tooth, tusk, or jag in a lock, acting as a detent. Especially used in tumbler-locks.

(11) *Domestic*: An andiron.

"The iron dogs bear the burden of the fuel."—Fuller: *Worthies*, ch. ix.

(12) *Smith*: A lever used by blacksmiths in shoeing—i. e., hooping—cart-wheels.

(13) *Gunnery*: The hammer of a pistol or fire-lock; called also Dog-head (q. v.).

"He lets fall the dog, the pistol goes off, and his wife is killed with it."—Law: *Memorials*, p. 225.

B. As adjective:

1. Used to express degeneracy, worthlessness, poorness, or meanness; as, *dog-rose*, *dog-latin*.

2. Used to express the male of an animal; as, *dog-fox*, *dog-otter*, &c.

† (1) *A dead dog*: A thing of no worth.

"After whom dost thou pursue? After a dead dog, after a flea."—1 Sam. xxiv. 14.

(2) *To go to the dogs*: To be utterly ruined; especially when the ruin is the result of one's own conduct.

(3) *To give or throw to the dogs*: To throw away as useless.

"Throw physic to the dogs; I'll none of it."—Shakesp.: *Macbeth*, v. 3.

(4) *A dog in the manger*: A churlish, selfish person, who will neither make use of a thing himself, nor allow any one else to have the benefit of it.

In order to obviate this the watches are arranged thus: 8 to 12 P. M. (a); 12 to 4 A. M. (b); 4 to 8 A. M. (a); 8 to 12 A. M. (b); 12 to 4 P. M. (a); 4 to 6 P. M. (b), dog-watch; 6 to 8 P. M. (a), dog-watch; 8 to 12 P. M. (b), and so on.

dōg'-wood, *s.* [Eng. *dog*, and *wood*.]

Botany: A common name for plants of the genus *Cornus*, but more especially applied to *Cornus sanguinea*. [CORNUS.] Dr. Prior says that it is "not so named from the animal, but from skewers being made of it," while Loudon thinks the name alludes to the employment of a wash, prepared from the leaves and branches, for dogs afflicted with mange. (Britten & Holland.) The wood is hard, and is sometimes used for butchers' skewers, toothpicks, &c. The fruit is black, about the size of a currant, very bitter, and yields an oil used in France for burning in lamps and for soapmaking. The following are the best-known varieties:

1. *Cornus florida*: Is a common American shrub, growing 6-10 feet in height, and bearing beautiful white clusters of flowers, enlivening the hedges and bush of the warmer portions of this country. It is productive of a bark much valued as an anti-periodic in ague, &c., and its wood, which is hard, white, and close grained, is useful in various ways. One unique use of its small branches is to form toothbrushes, with which women in some of the Southern States "dip" snuff. The brush is formed by chewing the end of a stick of dogwood until the fibers of the wood separate and assume a brush-like form.

2. *Euonymus europæus*: By analogy with its other names, such as Skewer-wood, the meaning here seems the same as in 1. But Loudon says, "It is called dogwood because a decoction of its leaves was used to wash dogs to free them from vermin;" and this derivation receives some support from another of its synonyms, Louse-berry Tree. (Britten & Holland.)

3. *Rhamnus frangula*: The dogwood used in the manufacture of gunpowder is produced by this shrub. (Britten & Holland.)

4. *Prunus padus*. (Britten & Holland.)

5. *Viburnum opulus*.

6. *Solanum dulcamara*: (Britten & Holland.)

dōl-i-chō-pōd'-i-dæ, s. pl. [Gr. *dolichos*=long; *pous* (genit. *podos*)=a foot, and Lat. fem. pl. suff. -ide.]

Entom.: A numerous family of small Dipterous flies, belonging to the tribe Tanytoma. They are remarkable for the length of their legs and the brilliant metallic colors with which they are adorned. The antennæ are short, three-jointed, and prominent. The proboscis is short, thick, fleshy and contains only one bristle. The head is of moderate size, and the eyes are usually separate. The abdomen in the male exhibits a marked peculiarity, its extremity being bent under and furnished with an extraordinary number of appendages. The Dolichocephalidæ frequent trees, walls, &c., and exhibit wonderful activity in the pursuit of their prey.

dōl-ich'-ō-pūs, s. [Gr. *dolichos*=long, and *pous*=a foot.]

Entom.: A genus of Dipterous insects, the typical one of the family Dolichocephalidæ.

dōl-i-chōs, s. [Gr.=long.]

Bot.: A genus of papilionaceous plants, tribe Phaseolæ, sub-tribe Euphaseolæ. As founded by Linneus it included many species now transferred to other genera; it is now limited to those which have a linear legume, with incomplete cellular dissepiments, and ovate seeds with a small oval hilum. Even when thus restricted it contains about seventy known species, which are from the tropics of both hemispheres. The legumes of *Dolichos sesquipedalis* are eaten in the south of Europe. *D. lignosus* is one of the most common kidney beans in India. *D. unifloris* is the Horse Gram of the same country. The tuberous root of *D. tuberosus* is eaten in Martinique. The legumes of various species now removed to other genera are eaten.

dōl-i-chō-sau'-rūs, s. [Gr. *dolichos*=long, and *sauros*=a lizard.]

Palæont.: A small snake-like Lacertilian reptile, between one and two feet long, whose remains have been found in the chalk formation. It was remarkable for possessing a very small head and long slender neck, but in other respects its affinities were truly Lacertilian. Its abdomen was deep and narrow, like that of the water snakes (Hydrophidæ), which it also resembled in habits, being aquatic, and swimming by undulatory lateral movements of its long body.

dōl-i-chō-spēr-mūm, s. [Gr. *dolichos*=long, and *sperma*=a seed.]

Bot.: A genus of Nostochaceæ, established by Thwaites for five British species, having elongated and mostly cylindrical spermatocysts, which are invariably truncated at the ends. They are all freshwater algae. (Griffith & Henfrey.)

dōl-i-chūr'-ūs, s. [Gr. *dolichos*=long, and *oura*=a tail.]

(4) The unit of value in Canada, represented by paper only, Canada having no coinage of its own.

(5) The English name of a silver coin in circulation in many other countries, as Norway, Sweden, Denmark, &c. In many cases the name is different, but the value is the same; thus, the Spanish dollar is also called *piastre*, or *duro*; that of Peru, the *sol*; that of Chili, the *peso*, &c.

2. The value of a dollar, the unit employed in reckoning money in the United States.

3. Five shillings English. (Slang.)

¶ The sign \$, now generally used to signify a dollar, is commonly supposed to date from the time of the celebrated Pillar dollar of Spain. This dollar was known as the Piece of Eight (meaning eight reals), and the curved portion of the sign is a rude representation of the figure 8. The two vertical strokes are thought to be emblematical of the Pillars of Hercules, which were stamped upon the coin itself. (Bithell.) [PILLAR DOLLAR.]

***dōl-lar-lēss, a.** [Eng. *dollar*; -less.] Without money; penniless.

"A dollarless and unknown man."—Dickens: *Martin Chuzzlewit*, ch. xvii.

"The dome of Thought,
The palace of the soul."—*Byron*.

II. Technically:

1. *Arch.*: A term applied to a covering of the whole or part of a building; the word *dome* is strictly applied to the external part of the spherical or polygonal roof, and cupola to the internal part. The dome or cupola is a roof, the base of which is a circle, an ellipsis, or a polygon, and its vertical section a curve line, concave toward the interior. Hence domes are called circular, elliptical, or polygonal, according to the figure of the base. The most usual form for a dome is the spherical, in which case its plan is a circle, and the section a segment of a circle. The top of a large dome is often finished with a lantern, which is supported by the framing of the dome. The interior and exterior forms of a dome are not often alike, and in the space between a staircase to the lantern is generally made. According to the space left between the external and internal domes, the framing must be designed. Sometimes the framing may be trussed with ties across the opening; but often the interior dome rises so high that ties cannot be inserted. Accordingly, the construction of domes may be divided into two cases, viz., domes with horizontal ties, and those not having such ties. The oldest dome on record is that of the Pantheon at Rome, which was erected under Augustus, and is still perfect; the largest is that of the Lutheran Church at Warsaw, the diameter of which is 200 ft. The dome of St. Sophia at Constantinople is an oblate semi-spheroid 104 ft. in diameter, 201 feet high. It was built in the sixth century. The dome in the Duomo of Florence was built by Brunelleschi, in 1417. It is of brick, octagonal in plan, 139 ft. in diameter, and 310 ft. in height. The dome of St. Peter's, at Rome, was built at the close of the sixteenth century, from designs left by Michael Angelo. It is 139 ft. in diameter, 330 feet high. The dome of St. Paul's, in London, by Sir Christopher Wren, is not masonry, but a shell inclosing the brick cone which supports the lantern. It is 112 ft. in diameter, 215 ft. high. The dome of the Capitol, Washington, is 287 ft. 11 in. above the base-line of the east front. The greatest diameter of the dome at the springing is 135 ft. 5 in. The weight of iron in the dome and tholus is 8,009,200 lbs. The rotunda is 95 ft. in diameter, and its height from the floor to the top of the canopy is 180 ft. 25 in. Domes are a common feature in the construction of Turkish and Arab buildings. The former are usually of a flattened, segmental character, being mostly derivatives of the dome of St. Sophia. The Arab domes are usually of the pointed form, such as are derived from the rotation of the Gothic arch, or bulbous, the section being a horse-shoe arch. A submersed or diminished dome is one that is segmental on its vertical section; a surmounted dome is one that is higher than the radius of its base. (*Weale, Gwilt, &c.*)

domestic architecture.

1. *Ancient Greek and Roman*: In general all the rooms were grouped on the ground floor, round an atrium or court, and a peristyle or hall, which two portions of the house had the most importance attached to them, because they constituted the favorite spot in summer on account of the breeze, and in winter on account of the sun. By this arrangement, as well as by the embellishment of the rooms, the ancient house is essentially different from that of

the Middle Ages or of modern times; but particularly in this respect, that whereas in both the last descriptions of houses great stress is laid on the appearance of the front, that part of the building was hardly taken into consideration at all by the Romans, and their houses, except the open shops, generally presented a dead expanse of wall to the passer-by. An attempt was sometimes made in the cases of houses of persons of distinction, to give the entrance a more important appearance by the addition of a portico or vestibule, but a view into the street from the interior of the house, a point to which so much attention is paid nowadays, was never thought of: though in their villas windows were occasionally introduced in order to enjoy a beautiful view of landscape, mountains, or sea. Both the Roman and Greek houses consisted of two divisions, but the meaning and employment of these divisions did not coincide: for whereas in Greek houses the front part constituted the andronitis or men's apartments, in Roman houses it formed the public part of the building, in which clients used to wait upon their patron. The back part, on the contrary, was intended for the residence and real dwelling-rooms of the family; while in the Greek houses the back was the gynaeceitis, or apartments for the women and domestics. The atrium, or court, formed the central part of the front of the house and the peristyle, or hall, the central part of the back, both being open to the air. Round these the rooms were grouped, and from these principally they derived their light. Behind the peristyle were the cubacula, or sleeping-rooms, and the triclinium, or dining-room, which was quite open to the peristyle. Of domestic habitations within towns during the Roman dominion in distant provinces, we know but little. The method adopted appears to have been fully as substantial as that observed in Italy.

2. *Saxon*: From the Sagas, and other early records of the history and manners of the northern races, we find that the dwellings of their kings and chiefs in the countries adjacent to the Baltic consisted only of two apartments, and that sovereigns and their counselors are described as sleeping in the same room. The habitations of the mass of the people were wooden huts, rarely containing more than one room, in the center of which the fire was kindled. To this method there was nothing repugnant in the houses erected on the Roman plan which the Saxons found on their arrival. When a new building was erected, the Saxon thegn built it from the woods on his demesne by the labor of his bondmen. It was thatched with reeds or straw, or roofed with wooden shingles. It consisted of but one large apartment or "hall," which formed at night the sleeping room of the dependents, and a small adjoining apartment for the accommodation of the lord. Style there was none; the only difference between one house and another lay in the size or ground-plan. There were no chimneys, the fire being kindled in the middle of the hall, and the smoke finding its way out through an opening in the roof immediately above the hearth, or by the door, windows, or eaves.

3. *Norman*: The towns and ordinary houses of the Normans were entirely built of wood. Their castles, having but one destination, that of defense, aimed at nothing but strength in their plan or construction. The principal feature was always the keep or donjon, which contained the apartments of the lord of the castle, and was also meant to be the last refuge of the garrison if the outer works were forced. The keep was usually raised on an artificial mound, or placed on the edge of a precipice. The windows were few, and little more than chinks, unless very high up, or turned to the court. The door of entrance could only be reached by a staircase. Under the keep were usually vaults, or dungeons. The keep was inclosed in two courts surrounded by walls flanked with towers. The tower at the entrance was called the barbican, and served for an outwork and post of observation. The whole fortress was defended by a moat. (*Weale*.) [DONJON.]

4. *English*: Like the Saxons the Normans had built almost entirely in wood or timber frame-work, houses of stone being the exception. The troubled state of the country, however, led to the erection of numerous strong stone buildings or fortresses. Gradually, as civilization improved, the necessity for defense decreased, and the efforts of Edward I. to introduce and encourage the arts in England by bringing over choice workmen and artists from France led to a marked change in the style of architecture. Simultaneously with the rapid development of Ecclesiastical Architecture, similar progress was made in domestic buildings; not only were the halls enriched by the introduction of the new style of windows, with their tracery in geometrical forms, but the plans of the houses themselves were improved and enlarged, and the number of offices increased. This advance in domestic architecture continued during the reigns of the second and third Edwards, during which period the Decorated Style of architecture prevailed. [DECORATED.]

This was followed by the Perpendicular Style, one admirably adapted for domestic buildings, though a decline from the perfection of that which preceded it. Many houses of the fourteenth century are of large extent and great magnificence, and testify to the wealth and prosperity of their owners. Examples are seen in the Bishops' palaces at Wells, Lincoln, St. David's, Southwell, and Norwich, and at Penshurst in Kent. The troubled state of the country in the middle of the fifteenth century led to a temporary resumption of the practice of fortifying buildings, but at the termination of the York and Lancaster Wars, the fortified style was gradually and finally abandoned in England. The Tudor Style, with its square moldings over porches and doors, its richly decorated roofs, and heavy ornamentation, prevailed for nearly two hundred years. The ordinary dwelling-houses of the sixteenth and seventeenth centuries are distinguished principally by their half-timber construction, the numerous gates the broad low windows, divided by simple wooden or stone mullions, in the gable-ends, the ornamentation of the inclined sides of the gable-ends, and the plain or embattled parapets. In many cases in towns the upper story is built projecting over the lower. The close of the seventeenth century brought with it a taste for a return to classical models, and an attempt was made to work out a national style combining to some extent the characteristics of the Tudor and the Classical. This is commonly known as "Queen Anne" Style. The buildings are generally of brick, solid and heavy. The domestic architecture of the Georgian era is a very debased imitation of the Classical. In the present day there is no essentially characteristic architectural style. Toward the end of last century a new artistic impetus was aroused, called into existence and favored by the scientific investigation and surveys of Grecian architectural monuments. An attempt was made to return to a pure classical style, or to good models of the Queen Anne, or foreign styles. Attention is more given to the internal and sanitary arrangements, while the introduction of iron as a building material has enabled architects to introduce various modifications.

5. *American*: As a matter of course, in the earlier years of the existence of our Republic our architectural styles were drawn almost exclusively from English sources, and up to the outbreak of the civil war, except in very few instances, our country did not contain any architecture of distinctive features. But with the return of peace and prosperity the arts began to flourish, and great attention was bestowed upon the construction and ornamentation of domestic buildings. Numerous styles have appeared, had their day, and then given way in rapid succession to others. The result is that the average American city presents a diversity of architecture that is bewildering; and, in some instances, to a stranger, the effect is grotesque. In our great cities, the business houses are all substantially built, and owing to the revolution in the use of materials, wood being almost entirely abandoned, architects have been enabled to accomplish in the matter of height of buildings feats that formerly had not been dreamed of, seventeen and twenty-story buildings being not uncommon.

domestic boiler, s. One for heating water on a somewhat large scale for the household. Such are made of sheet-metal, to set upon the top of a stove occupying two of the stove-holes; or, made of cast iron, they form reservoirs as a permanent attachment to the stove. [WASH-BOILER, RESERVOIR-STOVE.]

(1) A seat, an abiding place.

*(2) A compartment, a part.

"One of the cells or domicils of the understanding, which is memory."—Bacon: *On Learning*, bk. ii., ch. xii.

II. Law:

1. The place of residence of an individual or a family; the place where one habitually resides, and which he looks upon as his home, as distinguished from places where one resides temporarily or occasionally. Domicile is of three sorts: (1) *Domicile of origin or nativity*, which is that of the parents at the time of the birth; (2) *Domicile of choice*, which is that place in which a person voluntarily chooses as his residence and home; (3) *Domicile by operation of law*, as that of a wife acquired by marriage.

2. The length of time during which a party must have resided in a state in order to give jurisdiction in civil causes, the period varying in the different states.

"The domicile of origin remains until another has been acquired. In order to change such domicile, there must be an actual removal with an intention to reside in the place to which the party removes. When he changes it, he acquires a domicile in the place of his new residence, and loses his original domicile. Officers of the government whose public duties require a temporary residence elsewhere, retain their domiciles. Officers, soldiers, and marines, in the service of the United States, do not lose their domiciles while thus employed.

dōm-i-cīle, *v. t. & i.* [Fr. *domicilier*; Sp. *domiciliar*.] [DOMICILE, s.] To establish in a fixed place of residence; to provide with a domicile; to domiciliate.

II. Technically:

Music: [DOMINANT CHORD.]

B. As substantive:

*1. *Ord. Lang.*: One who is in authority or power; a ruler, a superior.

2. Music:

(1) The name now given to the fifth note of the scale of any key, counting upward. Thus G is the dominant in the key of C, F in that of B flat, and F sharp in that of B. It is so called because the key of a passage cannot be distinguished for certain unless some chord in it has this note for root; for which reason also it is called in German *der herrschende ton*. The dominant plays a most important part in cadences, in which it is indispensable that the key should be strongly marked; and it is therefore the point of rest in the imperfect cadence or half-close, and the point of departure to the tonic in the perfect cadence, or full close. It also marks the division of the scale into two parts: as in fugues, in which, if a subject commences with the tonic, its answer commences with the dominant, and *vice versa*. In the sonata form it used to be almost invariable for the second subject to be in the key of the dominant, except when the movement was in a minor key, in which case it was optional for that part of the movement to be in the relative major. (Grove.)

5. The Lord's house, a church.

"Then began Christian Churches, Oratories, or Dominicals to outshine the temples of heathen gods."—Gauden: *Tears of the Church*, p. 351.

6. (*Pl.*): The Scripture lessons appointed to be read on Sundays.

dominical-letter, s. Also called the Sunday letter. In the Calendar the first seven letters of the alphabet are applied to the days of the week, the letter A being always given to the first of January, whatever that day may be, and the others in succession to the following days. If the year consisted of 364 days, making an exact number of weeks, it is evident that no change would ever take place in these letters: thus, supposing the first of January to be Sunday, all the Sundays would be represented by A, not only in that year, but in all succeeding years. There being, however, 365 days, the letter A is repeated for the 31st of December, and consequently the Sunday letter for the following year will be G, and in the third year F. If every year were common, the process would continue regularly, and a cycle of seven years would suffice to restore the same letters to the same days as before. But the intervention of a day in every bissextile or leap year occasions a variation in this respect. The bissextile year containing 366 days instead of 365, will throw the dominical letter of the following year back two letters; so that if the dominical letter at the beginning of any leap year be C, the dominical letter of the following year will be A, and not B. This alteration is not effected by dropping a letter altogether, but by changing the dominical letter at the end of February, where the intercalation of a day takes place. The following rule is given in the (*English Church*), *Book of Common Prayer*, to find the Dominical or Sunday letter according to the calendar in the Prayer-book: "For the next century, that is, from the year 1800 till the year 1899 inclusive, add to the current year its fourth part, and then divide by 7; if there is no remainder, then A is the Sunday letter; if any number remaineth, then the letter corresponding to that number is the Sunday letter."

dōm-in'-i-can, a. & s. [See Def.]

A. *As adj.*: Of or pertaining to St. Dominic, or the Dominicans.

B. *As substantive*:

Church History:

1. One of a religious order called in some places *Predicantes* or *Preaching Friars*, and in France *Jacobins*, from their first convent in Paris being in the Rue St. Jacques. They took their ordinary name from their founder, Dominic de Guzman (afterward canonized under the name of St. Dominic), a Spanish ecclesiastic, born in 1170 at Calahorra, in Old Castile. He was first canon and archdeacon of Osuna or Osma; he afterward preached with great fervor and vehemence against the Albigenses, in Languedoc, where he laid the first foundations of his order, the special purpose of which was to oppose the doctrines of the Albigenses. The new order was approved of in 1215 by Pope Innocent III., and confirmed in 1216 by a bull of Pope Honorius III., under the rule of St. Augustine, a rule to which they have adhered, although they subsequently adopted a white habit resembling that of the Carthusians, in place of their original black dress. They were under a vow of absolute poverty. In England they were called *Black Friars*, and in 1276 the Corporation of London gave them two streets near the Thames, where they erected a large convent, whence that part is still called *Blackfriars*. The Dominicans always took a principal part in the Inquisition, and St. Dominic is said to have been the first Inquisitor-General. He is represented with a sparrow by his side, and with a dog carrying a burning torch in his mouth. He died in 1221. The Dominicans were the chief supporters of the doctrine of the Immaculate Conception.

2. One of an order of nuns founded by St. Dominic under the same rules as the friars, but devoted to industry.

3. One of an order of knights, also founded by St. Dominic, for the purpose of putting down heresy by force of arms.

† *Tertiaries of St. Dominic*: To the friars, nuns, and knights mentioned above, St. Dominic added, in 1221, the Tertiaries—persons who, without forsaking secular life or even the marriage-tie, connected themselves with the Order by undertaking certain obligations, such as to dress plainly, to live soberly, to carry no weapon of offense, and to perform stated devotions. Similar orders existed in connection with the Franciscans and the Premonstratensians. The members were entitled to be buried in the habit of the Order, and it is to this custom Milton alludes (*P. L.*, iii. 478-80)—

"They who to be sure of Paradise,
Dying put on the weeds of Dominic
Or in Franciscan think to pass disguised."

Dōn'-a-tism, s. [Low Latin *Donatismus*; Fr. *Donatisme*.]

Ch. Hist.: The doctrines or principles of the Donatists (q. v.).

Dōn'-a-tist, s. [Low Lat. *Donatista*; Fr. *Donatiste*.]

Ch. Hist.: One of a sect of schismatics in Africa, the followers of Donatus, bishop of Casa Nigra, in Numidia. The sect arose in A. D. 311, when Cæcilianus was elected bishop of Carthage, and consecrated by the African bishops alone, without the concurrence of those of Numidia. The people, resenting this, refused to acknowledge Cæcilianus, and set up Majorinus, who was then consecrated by Donatus. The Donatists held that Christ, though of the same substance with the Father, yet was less than the Father; they also denied the infallibility of the church, which they said had fallen away in many particulars. They were condemned in a council held at Rome A. D. 313, also in another at Arles in the following year; and a third time, in A. D. 318, at Milan, before Constantine the Great. At the end of the fourth century they had a large number of churches, but soon after began to decline, owing to a schism among themselves, occasioned by the election of two bishops in the room of Parmenian, the successor of Donatus, and also through the zealous opposition of St. Augustine, bishop of Hippo. They were finally suppressed in the sixth century by Pope Gregory the Great.

dōn-jōn, ***dōn-geōn**, *s.* [Fr. *donjon*.] [DUNGEON.]

Norm. Arch.: The grand central tower of a Norman or mediæval castle, frequently raised on an artificial elevation. It was the strongest portion of the building, a high square tower with walls of enormous thickness, usually detached from the surrounding buildings by an open space walled, called the Inner Bailey, and another beyond called the Outer Bailey. Here, in case of the outward defenses being gained, the garrison retreated to make their last stand. The donjon contained the great hall, and principal rooms of state for solemn occasions, and also the prison of the fortress; from which last circumstance we derive the modern and restricted use of the word dungeon. Examples are seen in the White Tower, in the Tower of London, Rochester Castle, and the Castle at Newcastle. It was also called the Donjon-keep. [KEEP; DOMESTIC ARCHITECTURE.]

Donjon.

"Then, one by one, was heard to fall
The tower, the donjon-keep, the hall."
Scott: *Rokeby*, v. 37.

***dōnk**, *a. & s.* [DANK.]

"Then is dooms-day near."—*Shakespeare: Hamlet*, ii. 2.

*2. *Fig.*: The day of death; the end, the destruction.

"Doomsday is near: die all, die merrily."

Shakespeare: Henry IV., Pt. I., iv. 1.

¶ To take *doomsday* seems to mean to fix *doomsday* as the time for payment.

"And sometimes he may do me more good here in the city by a free word of his mouth, than if he had paid me half in hand, and took *doomsday* for the other."—*The Puritan*, ii. 621. (Suppl. to *Shakespeare*.)

B. As adj.: See the compound.

doomsday-book, domesday-book.

A book compiled by order of William the Conqueror, containing a register or survey of the lands in England, from which judgment was given as to the value, tenures, and services of each holding. It was commenced about the year 1084, and finished in 1086. Its compilation was determined upon by William the Conqueror, in council, in order that he might know what was due to him, in the way of tax, from his subjects, and that each at the same time might know what he had to pay. It was compiled as much for their protection as for the benefit of the sovereign. The nobility and people had been grievously distressed at the time, by the king bringing over large numbers of French and Bretons, and quartering them on his subjects, "each according to the measure of his land," for the purpose of resisting the invasion of the king of Denmark, which

was apprehended. The commissioners appointed to make the survey were to inquire the name of each place; who held it in the time of King Edward the Confessor; the present possessor; how many hides were in the manor; how many plows were in demesne; how many homagers; how many villeins; how many cottars; how many serving men; how many free tenants; how many tenants in socage; how much wood, meadow and pasture; the number of mills and fish-ponds; what had been added or taken away from the place; what was the gross value in the time of Edward the Confessor; the present value; and how much each man had, and whether any advance could be made in the value. So minute was the survey, that the writer of the contemporary portion of the Saxon Chronicle records, with some asperity: "So very narrowly he caused it to be traced out, that there was not a single hide, nor one virgate of land, nor even, it is shame to tell, though it seemed to him no shame to do, an ox, nor a cow, nor a swine was left, that was not set down."

For some reason left unexplained, many parts were left unsurveyed; Northumberland, Cumberland, Westmoreland, and Durham, are not described in the survey.

Domesday Book was printed *verbatim et literatim* during the eighteenth century, in consequence of an address of the House of Lords to King George III. in 1767. It was not, however, commenced until 1773, and was completed early in 1783. It was again reproduced in 1860-2.

¶ Stow says that the name was derived from *Doms Dei*, because the book was deposited in a part of Winchester Cathedral so called, but it is more probable that it is connected with *doom* in the sense of judgment.

***dōoms-man, *dōmes-man, *dōms-man, *dom-ys-man, s.** [Eng. *doom*, and *man*.] A judge, an umpire.

"Thay wald fayne fle
Or hide tham fra that doomsman sight."

Hampole: Prick of Conscience, 5,060.

***dōom-stēr, dēmp-stēr, s.** [Eng. *doom*; -ster.]

1. *Ord. Lang.*: A judge; one who pronounces the doom or sentence.

"The law shall never be my doomster, by Christ's grace."—*Rutherford: Letters*, pt. i., lett. 195.

2. *Scots Law*: The name given to a public official, who also, in most cases, held the office of public executioner. In a case of capital punishment he repeated the sentence in court, after it had been pronounced by the judge and recorded by the clerk, adding the words: "And this I pronounce for doom," by which it became legalized.

"And this," said the Doomster, aggravating his harsh voice, "I pronounce for doom."—*Scott: Heart of Mid-Lothian*, ch. xxiv.

dōon, doun, adv. [DOWN.] Down.

"The puir Colonel bought a new one just the day before they marched, and I winna let them tak that one doun, but just to brush it ilka day mysell."—*Scott: Waverley*, ch. lxiii.

dōon (1), s. [Cingalese.]

Bot.: A Cingalese name for *Doona zeylanica*, a large tree of the Dipterocarpaceae family, native of Ceylon; the timber is much esteemed for building purposes. A resin exudes from the trunk resembling dammar, which is mixed with paddy-husks, and used for burning in lamps. (*Smith*.)

dōon (2), s. [Etym. doubtful; probably connected with *doun*, s. (q. v.).]

1. A place or green used for play.

2. The goal in a game.

"Fra doon to doon shoot forth the pennystane."

Davidson: Seasons, p. 87.

1. *Ordinary Language*:

Literally:

(1) An opening in a wall for a passage-way; the means of entrance into a building, room, or passage.

"Some to hors ran in haste,
Doors and windows barred fast."

Richard Cœur de Lion, 1,933.

(2) A frame of wood or metal, closing such opening or entrance, and constructed to swing on hinges. [*II.*]

"With his ax he smot right tho
Dores, barres and iron chains."

Richard Cœur de Lion, 2,210.

(3) Used for a house, or room: as, He lives next door to me.

2. *Figuratively*:

(1) The entrance, portal, or beginning.

"Buds, that yet the blast of Eurus fear,
Stand at the door of life, and doubt to clothe the year."
Dryden: Flower and Leaf, 8, 9.

(2) A passage, avenue, or means of approach or access.

"I am the door."—*John* x. 9.

II. Carp.: A wooden or metal, or partly wood and partly metal frame, constructed so as to open and shut on hinges and close the entrance to a building, room, &c. The doors of ancient Egypt and contemporary nations swung upon vertical pintles which projected from the top and bottom of the door into sockets in the lintel and threshold respectively. The commonest form of door had the pintle in the middle of the width, so that, as it opened, a way was afforded on each side of it for ingress or egress. The doors of the oracle of Solomon's Temple were of olive-wood, and were "a fifth part of the wall." As the width of the house was 20 cubits, the doorway was about 6½ feet wide. The door was double. The outer door of the temple was of fir, and hung upon olive-wood posts. The doorway was about eight feet wide, and the double doors had each two leaves. In a six-panel door the rail next to the top rail is called the frieze-rail. A panel wider than its height is a lying-panel; if of equal height and width, a square panel; if its height be greater than its width, a standing panel. A double-door consists of two pairs of folding-doors, hung on the angles of the apertures and opening toward the reveals against which they are hung. *Folding-doors* are two doors hung on opposite corners of the aperture in the same plane, so that the styles meet in the center when closed. *Double-margin doors* are made in imitation of folding doors, the middle style being made double with an intervening bead. *Sliding-doors* are an improvement on folding; they slip into grooves in the partition. A *proper-ledged door* is one made of boards placed side by side with battens called ledges at the back. With a diagonal piece at the back, in addition, it is said to be framed and ledged. (*Knight*.)

¶ (1) *In or within doors*: Within or inside the house.

"How now! rain within doors, and none abroad?"

Shakespeare: Henry IV., Pt. II., iv. 5.

* (2) *Out of door, out of doors*:

(a) *Lit.*: Outside the house, abroad.

"Jumping out of bed, and running out of doors."—*Farmer: Demoniacs of the New Testament*, ch. ii., §3.

(b) *Fig.*: Quite or entirely sent away, dismissed, or done away with.

"His imaginary title of fatherhood is *out of doors*, and Cain is no prince over his brother."—*Locke*.

(3) *Next door to*: Approaching closely to or bordering upon.

"A seditious word leads to a broil, and a riot unpunished is but *next door to a tumult*."—*L'Estrange*.

(4) *To lie or be at one's door*: To be imputable or chargeable to.

"In any of which parts if I have failed, the fault lies wholly at my door."—*Dryden: Dufresnoy*. (Pref.)

(5) *To be put to the door*: To be ruined. (*Scotch*.)

(6) *To take the door on one's back*: To pack off; to be gone. (*Scotch*.)

"Stop the mill, Sauners' Gait, and come out, and tak the door on your back."—*R. Gilhaize*, ii. 313.

door-alarm, s. A device attached to a door to give an audible notice when the door is opened or tampered with. [BURGLAR-ALARM.]

door-bell, s. A bell attached to a door or door-post, or hung by a handle exposed outside of the door.

door-case, s. The frame of a door in which it swings and fits.

"The making of frames for *doorcases* is the framing of two pieces of wood athwart two other pieces."—*Mozon*.

door-fastener, s. A portable contrivance for fastening a door. It usually consists of a piece jammed in between the door and the casing, having spurs which catch in the latter and a turn-button which engages against the door. Sometimes it is a toggle-strut which thrusts against the door and the floor.

door-frame, s.

Carpentry:

1. The structure in which the panels are fitted. It is composed of: The stiles, or upright pieces at the sides; the munnions, or central upright pieces; the bottom rail, the lock or central rail, and the top-rail.

2. The case into which the door is fitted.

door-keeper, s. A porter, an usher; one who keeps the entrance to a building, house, &c.

"The salary of the *doorkeeper* of the Excise-office had been, by a scandalous job, raised to five hundred a year. It ought to have been reduced to fifty."—*Macaulay: Hist. Eng.*, ch. xviii.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

door-knob, s. The bulb or handle on the spindle of a door-lock. It is made of metal, glass, porcelain, or clay of various colors. Ingenuity is employed in devising means of attaching the knob to its shank, and the latter to the spindle. With glass knobs the shank of thin iron may be passed into the congealing glass in the mold. With clay and porcelain the heat of baking is too great, and the shanks are fastened to the knobs by cement or fusible metal. (*Knight.*)

door-latch, s. A latch or apparatus for shutting and opening a door. [DOOR-LOCK.]

"Door-latch and tinkling staples ring."

Scott: William and Helen.

door-lock, s. A door-fastening whose bolt is retracted by a key; differing from a latch or catch, in which the bolt is worked by the knob or handle.

***door-man, s.** A door-keeper.

Versteegan: Restitution of Decayed Intelligence, ch. vi.

door-way, s. [DOORWAY.]

door-dā, door-wā, dūr-wā, s. [Various Indian languages.]

Bot.: The name in India for *Cynodon dactylon*, a creeping-rooted perennial low grass, its flowers

being digitate in spikes. In many countries it occupies large areas. In India it abounds in the Sunderbunds. When its leaves dry up in the sun, its roots form a never-failing supply for feeding horses in Calcutta, and a cooling drink is said to be made from them. (*Smith.*) [CYNODON, DOOB.]

Door'-ga, Door'-gah, Dūr'-ga, s. [Bengalee, &c., from Sanscrit. Properly the appellation of a giant slain by Doorga, to whom, consequently, his name was transferred. Some suppose that in its wider meaning it implies that which is difficult of approach, inaccessible, impenetrable, or unattainable; or it may be from the Sanscrit particle *dūr*=difficult, troublesome, and *gam*=to be known, implying that this goddess is to be known only by laborious and severe austerities; or it may be from *dūr*=bad, vile, ill, and *gai*=to sing, Doorga being extolled in the hymns and songs of the wicked.]

Hindoo Mythol.: The principal wife, as well as the mother, of Siva, one of the gods belonging to the Hindoo triad. The name Doorga is her appropriate appellation in Bengal, but in Southern and Western India she is generally Purwutee, or Parvati. Her great exploit in slaying the giant Doorga has already been mentioned. [Etymol.] In an encounter with another monster of the same kind, Mahisha, she was equally victorious. How great her services were on this occasion will be obvious when it is mentioned that the giant had overcome the gods in war, and reduced them to such a state of indigence that they were wandering about the earth like common beggars. For the form in which she is represented, see DOORGA POOJAH. Doorga has other names. One is Bhagabati. As the consort of Siva, when the latter is represented as Kala, she is called Kalee, or Kālī (q. v.). (*Madras Christian Instructor*, vol. i. (1843).)

doorga poojah, s. [Bengalee, from Sanscrit, *doorga* (q. v.), and *poojah*=worship.]

Hindoo Festivals: The worship of Doorga, and the festival at which that worship chiefly takes place. It is said that when instituted by King Surat it was held in spring; now it is celebrated in autumn. According to the Rev. A. F. Lacroix, of Calcutta, the image of the goddess is usually made of clay, in the shape of a female with ten arms. In one of her right hands is a spear, with which she is piercing the giant Mahisha; with one of the left she holds the tail of a serpent, and the hair of the giant, whose breast the serpent is biting. The other hands are all filled with various implements of war. Against her right leg leans a lion, and against her left the giant mentioned above. Her sons, Kartkeya and Ganesa, with several goddesses, are often placed by the side of the image.

door'-lāh, s. [Various Indian languages.] A cotton cloth made in India.

***door'-līg, s.** [Eng. door; -līg.] A door with all its appendages, posts, frame, &c.

"He reports of a whirlpool, between the Rost Islands and Lofoot, called Malestrand; which is heard to make so terrible a noise as shakes the doorings of houses in those islands ten miles off."—Milton: *Hist. Moscovia*, ch. v.

door'-lëss, a. [Eng. door; -less.] Deprived of or without a door.

"Doorless is that house,

And dark it is within."

Longfellow: The Grave.

door'-wāy, s. [Eng. door; -way.]

1. *Ord. Lang.*: The entrance way or passage into a building, house, or room.

2. *Arch.*: In the architecture of the middle ages, doorways are striking and important features, exhibiting, in the character of the moldings and ornaments, the style and period of the edifice. The doorways gave scope to the richest embellishment, and are frequently adorned with sculptures, sometimes representing saints, at others grotesque forms, which are introduced either in the tympanum in relief, or independently between the shafts. Symbolical, historical, and astronomical representations are also met with. Thus the signs of the zodiac and calendars often occur on the pilasters of the doors, the latter marking the months of the year by representing the proper employment for different trades in each month.

doorway-plane, s.

Arch.: The space included between the intrados of a large archway and the actual door of entrance.

***dōp** (1), *v. t.* [DIP, v.]

2. A mock imprecation.

"The dor on Plutarch and Seneca! I hate it."—*Ben Jonson: Epicoene*, ii. 2.

† To give one the dor: To cheat, to trick, to make a fool of.

dor (2), **dorr** (2), *s.* [From the noise made by the insect.]

Entomology:

1. A species of Beetle, *Geotrupes stercorarius*, belonging to the family Geotrupidae, or Earth-borers. It is of a glossy violet, black, or deep greenish-black. The club of the antennæ is yellowish, the elytra smooth, but slightly punctured, as is the thorax. It may often be seen flying about in the summer evenings. Its size and weight render it very unwieldy on the wing, so that it has but little power of guiding itself, and apparently none of checking its course quickly, for it strikes against all kinds of objects, but without suffering any damage. The female lays its eggs in patches of cow-dung. It is about an inch long. It is also called Dor or Dorr-beetle, Dor-fly, and Buzzard-fly.

"The dor or beetle, which you may find under cow-dung."—*Walton: Angler*, pt. i., ch. iii.

2. The Cock-chaffer (q. v.).

2. **Fig.**: Any broad and hard dialect: as the Scottish.

Doric mode, s.

Music: [DORIAN MODE.]

Doric order, s.

Architecture:

1. **Grecian Doric**: The earliest and most simple form of columnar edifice. The Doric column was first adapted to edifices having the proportions, strength and beauty of the body of a man. The trunks of trees probably suggested the first idea of columns, but in the Doric style the proportions of a man appear to have been adopted. A man was found to be six times the length of his foot, hence the plain Doric columns were made six diameters in height. The Greeks composed their beautiful temples upon this idea: their simplicity and harmony are remarkable—in simplicity in the long unbroken lines which bound their forms, and the breadth and boldness of every part; in harmony in the evident fitness of every part to the rest.

Doric Column.

2. **Roman Doric**: An imitation of the Grecian, but in some of the best examples the column is eight times the diameter in height; the shaft is quite plain except fillets above and below with escape and corvette, and it diminishes one-fifth of its diameter. The capital is four-sevenths of a diameter high, and is composed of a torus which forms the hypotrachelium, and with the necking occupies one-third of the whole height; three deep fillets with a quarter-round molding are intended to represent the ovula and annulets of the Greek capital. The Doric order, says Palladio, was invented by the Dorians and named from them, being a Grecian people which dwelt in Asia. If Doric columns are made alone without pilasters, they ought to be seven and a half or eight diameters high. The intercolumns are to be little less than three diameters of the columns; and this Vitruvius calls Diastyles.

The ancients employed the Doric in temples dedicated to Minerva, to Mars, and to Hercules, whose grave and manly dispositions suited well with the character of this order. Serlio says it is proper for churches dedicated to Jesus Christ, to St. Paul, St. Peter, or any saints remarkable for their fortitude in exposing their lives and suffering for the Christian faith. The height of the Doric column, including its capital and base, is sixteen modules; and the height of the entablature, four modules; the latter of which being divided into eight parts, two of them are given to the architrave, three to the frieze, and the remaining three to the cornice. Vitruvius himself makes the Doric column in porticoes higher by half a diameter than in temples; and modern architects have, on some occasions, followed his example. In private houses, therefore, it may be 16½, 16, or 15½ modules high; in interior decorations even seventeen modules, and sometimes perhaps a trifle more; which increase in the height may be added entirely to the shaft, as in the Tuscan order, without changing either the base or capital. The entablature, too, may remain unaltered in all the aforesaid cases; for it will be sufficiently bold without alteration. In some of the ancient temples the Doric column is executed without a base. (*Weale*.)

Dör'-i-çism, Dör'-ism, s. [Eng. *Doric*; -ism; Gr. *dorismos*.] A phrase or idiom of the Doric dialect.

"There is not the least shadow of Doricism."—*Boyle*: *On Bentley's Phalaris*, p. 43.

döt (1), s. [Dut. dot = "a little bundle of spoiled wool, thread, silk, or such-like, which is good for nothing" (*Skeat*). A corruption of jot (*Mahn*).]

I. Ordinary Language:

1. A little mark, speck, or point made with a pen or pointed instrument.

2. A diminutive child.

II. Technically:

1. Music:

(1) A point added to a note, or rest, which lengthens its value by one-half. When a second dot follows the first (when the note or rest is doubly dotted), the second dot adds one-half of the value of the previous dot. A dot was called the point of addition (punctus), hence a dotted note was called formerly a *pricked note*; this expression must not, however, be connected with *prick-song*, which signifies written music, as opposed to music sung by ear.

(2) When placed over a note, the dot is a direction that the note is to be played or sung *staccato*.

(3) When two or four dots are placed in the spaces of the staff, on either side of a double bar, they are a direction to repeat so much of the music as is inclosed between them.

(4) When placed under a slur, dots are a direction to play *spiccato*, that is, in violin playing, played by the same bow, but the bow must remain stationary between each sound. From violin music the term has been transferred to that of the pianoforte, and sometimes for the voice.

(5) A system of tablature for wind instruments; the Dot system. [TABLATURE.]

(6) Dots were formerly placed over a note to show its subdivision into lesser repeated notes, thus a half note with four dots above it would be equal to four eighth notes. (*Stainer & Barrett*.)

(7) Besides the employment of the dot as a sign of augmentation of value, it is used to indicate *staccato*, being placed above or below the note, and written as a round dot if the staccato is not intended to be very marked, and as a pointed dash if the notes are to be extremely short.

(8) Dots are also placed before or after a double bar as a sign of the repetition of a passage or section. (*Grove*.)

2. (Pl.) Plastering: Nails driven into a wall to a certain depth, so that their protruding heads form a gauge of depth in laying on a coat of plaster.

Geog.: An ancient French town, 50° 21' N. lat. and 3° 6' E. long.; 108 miles N. by E. from Paris. Douai is the seat of a university, and possesses a good public library, containing upward of 35,000 volumes.

Douay Bible, s.

Scrip.: The English version of the Bible translated by the students of the Roman Catholic college at Douay, under the auspices of Cardinal Allen, the founder of that seat of education. The work was published at Douay in 1609, about two years before the appearance of King James' authorized Protestant Bible, which was issued in 1611. The Douay version contains the Old Testament only, a translation of the New having been sent forth from the press at Rheims as early as A. D. 1582. The Douay version is the only English one which has obtained the sanction of the Pope. Independently of its religious uses, it possesses interest for philologists.

dōub'-le (le as *el*), ***do-ble, *du-ble, a., adv. & s.** [O. Fr. *doble*; Fr. *double*, from Lat. *duplus*=double, lit. twice-full: =*du*=two, and *plus*, related to Lat. *plenus*=full; Sp. *doble*; Ital. *doppio*; Port. *dobre*, *dobro*.]

A. As adjective:

I. Ordinary Language:

1. Literally:

(1) In pairs, two of a sort or in a set together; consisting of two similar or corresponding parts; twofold, duplicate.

"All things are *double* one against another, and he hath made nothing imperfect."—Ecclesi. xlii. 24.

(2) Twice as much or as great; containing or composed of the same quantity or amount double or repeated.

"It was necessary to harass them with *double* duty."—Macaulay: *Hist. Eng.*, ch. xiv.

(3) Twofold, of two kinds.

"Heaven grant this festival may prove their last!
Or, if they still must live, from me remove
The *double* plague of luxury and love!"
Pope: *Homer's Odyssey*, iv. 906-11.

As double as the duke's."
Shakesp.: Othello, i. 2.

- *(4) Applied to capital letters.

"Two double letters, T and L."
Beattie: Poems.

II. *Technically*:

1. *Bot.*: Flowers are said to be double when the stamens become more or less petaloid, as in the Rosaceæ and Malvaceæ; sometimes this results from the transformation of stamens and carpels, as in the Ranunculaceæ, &c. The term double is wrongly applied to certain of the Compositæ, as the Dahlia for example, because the change caused by culture is not from the addition of new petals, or from the transformation of different organs into petals, but simply from the amplification of the tubulous corollas or florets, which increase themselves, and often assume new colors. (*Balfour*.)

Music: The notes in the bass octave from D₂ to D₃ are often spoken of by organ-builders as double G, double F, &c.

B. *As adv.*: Twice.

"Then I was double their age, which now I am not."—*Swift*.

C. *As substantive*:I. *Ordinary Language*:1. *Literally*:

(1) Twice the quantity, amount, value, or sum; twice as much.

"In all the four great years of mortality above mentioned, I do not find that any week the plague increased to the double of the precedent week above five times."—*Grant: Bills of Mortality*.

(2) A fold, a plait, a doubling.

(3) A turn in running to escape pursuit.

"And when thou hast on foot the purblind hare,
Mark the poor wretch, to overshoot his troubles
How he outruns the wind, and with what care
He cranks and crosses with a thousand doubles."
Shakesp.: Venus and Adonis, 679-82.

2. *Figuratively*:

- *(1) A trick, an artifice, a shift, a scheme.

"I would now rip up
All their arch-villanies, and their doubles."
Beaum. & Flét.: Woman's Prize, iii. 1.

(2) Something exactly like another; a counterfeit, a duplicate, an exact copy.

"He put in the Marquis' hand a double of the late proclamation from England."—*Batille: Letters*, i. 174.

*(3) Strong beer, beer of twice the ordinary strength, marked XX.

II. *Technically*:

1. *Eccles.*: As many of the holy days of the Church are fixed to certain determinate days of the year, and the others, including all the Sundays, are continually subject to change in their days, it must necessarily follow that two holy days will occasionally come together on the same day of the year, and consequently that for such a day there will be two sets of lessons for morning and evening prayer, with two collects, epistles, and gospels. These days are technically called Doubles. Concurrent Holy-days, or Duplex Festivals.

2. *Milit.*: The quickest step or pace in marching. In the double the soldier takes 165 steps, of 33 inches each, in the minute. [DOUBLE-QUICK.]

3. *Music*:

(1) An old term for a variation. In some of Handel's harpsichord lessons, the variations of a theme are marked Double 1, Double 2, &c. A variation on a dance tune is also called a Double.

(2) The repetition of words in singing was also called the "Doubles or ingeminations thereof."

(3) An artist who understudies a part in an opera or play, that is, who prepares a part on the chance of the accidental absence of the principal.

(4) That which is an octave below the unison in pitch, i. e., double-bass, an instrument whose sounds are an octave below those of the violoncello; double-bassoon, an instrument similarly sounding an octave below the bassoon; double-diapason, an organ-stop of 16-feet pitch.

(5) A turn. (*Stainer & Barrett*.)

4. *Print.*: Several words, lines, or passages set up twice; among pressmen, a sheet that is twice pulled and mackled.

5. *Build.*: The smallest size of roofing slates, measuring thirteen inches by six inches.

6. *Campan. (pl.)*: The name given by change-ringers to changes on five bells, from the fact that two pairs of bells change places in each successive change. (*Grove*.)

7. *Fabric (pl.)*: Thick, narrow, black ribbons, made for shoe-strings. They are supposed to be entirely of silk, but are mixed with cotton, and are done up in rolls of thirty-six yards each, four to the gross. The widths are known as two-penny, three-penny, sixpenny, and eightpenny. Watered dobles are called pads. (*Dict. of Needlework*.)

doub'-le (le as el), **dob-e-lyn*, **dub-lyn*, **dub-ble*, v. t. & i. [DOUBLE, a.]

A. *Transitive*:1. *Ordinary Language*:

(1) To fold down or over; to lay one part of a thing on another.

"He bought her sermons, psalms, and graces,
And doubled down the useful places."
Prior: Hans Carvel.

(2) To increase or extend to twice the original size, extent, quality, or value.

"This was only the value of the silver; there was besides a tenth part of that number of talents of gold, which, if gold was reckoned in a decuple proportion, will just double the sum."—*Arbutnot: Coins*.

(3) To give or return twice the quantity or amount.

"Reward her even as she rewarded you, and double unto her double according to her works; in the cup which she hath filled fill to her double."—*Rev.* xviii. 6.

(4) To be double or twice the amount, size, or extent of; to contain or consist of twice as much or as many; to exceed by an equal number, amount, or quantity.

"Thus reinforced against the adverse fleet,
Still doubling ours, brave Rupert leads the way;
With the first blushes of the morn they meet,
And bring night back upon the newborn day."
Dryden: Annus Mirabilis, cxix.

(5) To redouble, to repeat, to add to a preceding..

"He saw proud Arcite and fierce Palamon
In mortal battle doubling blow on blow;
Like lightning flamed their fauchions to and fro."
Dryden: Palamon and Arcite, ii. 242-44.

(6) To make two of one.

"His face seems twain, each several limb is doubled."
Shakesp.: Venus and Adonis, 1,067.

*7. To make a duplicate or copy of; to copy.

"Some of the advertisement I have caused double."—*Batille: Letters*, i. 174.

(8) To increase by adding something equally great or important.

"With joy he will embrace you; for he's honorable,
And, doubling that, most holy."
Shakesp.: Cymbeline, iii. 4.

9. In the same sense as II. 2.

II. *Technically*:

1. *Milit.*: To unite two ranks or files in one.

2. *Naut.*: To sail round or by; to pass round a headland.

"We closed in with the Barnevelte, and running past Cape Deceit, with its stony peaks, about three o'clock doubled the weather-beaten Cape Horn."—*Darwin: Voyage round the World*, ch. x., p. 211.

B. *Intransitive*:1. *Ordinary Language*:1. *Literally*:

(1) To increase, extend, or become enlarged to twice the original size, amount, quantity, or value; to become twice as much or as great.

"'Tis observed in particular nations, that within the space of three hundred years, notwithstanding all casualties, the number of men double."—*Burnet: Theory*.

(2) To enlarge a wager or stake to twice the previous sum or amount.

"Throw Egypt's by, and offer in the stead,
Offer—the crown on Berenice's head;
I am resolved to double till I win."
Dryden: Tyrannic Love, iii. 1.

(3) To turn or wind in running to escape pursuit.

*2. *Fig.*: To use tricks or artifices; to scheme, to deceive.

"What penalty and danger you accrue
If you be found to double."
J. Webster.

II. *Technically*:

1. *Mil.*: To march or advance at the double. [DOUBLE, s. II. 2.]

2. *Print.*: To set up the same word or words a second time unintentionally.

*(1) To double back: To turn and proceed in an opposite direction.

(2) To double upon:

Mil.: To inclose or shut in between two fires.

(3) To double the ears: To close them, as with wearisome talk. (*Davies*.)

"That that I tell you is rather to solace your eares with pretie conceits after a sort of long scholastical precepts which may happen have doubled them."—*Puttenham: English Poesie*, bk. iii., ch. xxiv.

*Double or quits: When two parties toss or play for a stake equivalent to all that is at the time owing by the loser to the winner, so that if the same person loses again he has to pay double what he before owed; if he wins, the two parties are quits, i. e., neither pays or receives.

double-acting, a.

1. *Lit.*: Acting or exerting power in two directions.

2. *Fig.*: The same as DOUBLE-DEALING (q. v.).

Double-acting baling-press: One which has two boxes in which the material is compressed; sometimes a single follower acts upon them alternately, in other cases two followers act simultaneously.

Double-acting engine: An engine in which both motions of the piston are produced by the action of live steam, which bears upon the faces alternately; in contradistinction to single-acting, in which live steam is only admitted to one side of the piston, the weight of the pump-rod or the pressure of the atmosphere giving the return motion. This form of engine was invented by Watt. The piston of the Newcomen atmospheric engine, on which Watt was improving, was raised by steam at a moderate pressure, and depressed by the pressure of the atmosphere when the steam beneath the piston was condensed by a water-jet. Watt added the separate condenser, air-pump, and steam-jacket to the cylinder, and then sought for means for keeping the atmosphere from the inside of the cylinder when the piston was depressed. He added the cylinder-cover, adopted the stuffing-box invented by Sir Samuel Morland, and admitted steam above the piston to occupy the space formerly filled with air. The steam retreated as the piston rose, and was afterward utilized beneath the piston. Eventually the steam was regularly inducted above and below the piston alternately, in each case giving a positive pressure: here we have the double-acting engine.

Double-acting inclined plane: An inclined plane on which the loaded wagons, as they descend by their weight, pull up the empty wagons by means of a rope passing round a pulley or drum at the top of the inclined plane.

Double-acting pump: A pump which throws water at each stroke; contradistinguished from the ordinary lift-pump, in which the bucket only raises water at the up-stroke.

double-action.

Music: In a pianoforte movement, an arrangement of a jointed upright piece at the back end of the key, used to lift the hammer instead of the stiff wire or lifter of the single-action. The piece is called a hopper, and engages in a notch on the under side of the hammer to lift it, but, escaping or hopping therefrom, allows the hammer to fall away immediately from the string.

double avail of marriage, s. [AVAIL.]

double-backfall.

Music: An ornament in old music, e. g.:

(*Stainer & Barrett*.)

double-bank, v. t.

double-bass, or base, s.

Music: The largest of the stringed instruments played with a bow. Its invention is attributed to Gaspar di Salo, 1580. It is made with three or four strings. The strings are usually tuned a fourth apart to the notes F, B, E when three strings are employed, with the addition of the lower E when there are four strings. (Stainer & Barrett.)

double-bassoon, s.

Music: The deepest-toned instrument of the bassoon family; also called Contra-fagotto. It stands in the same relation to a bassoon as the double-bass does to the violoncello; that is to say, its sounds are actually an octave below those indicated. Its compass is from a flat below C to tenor F. Though this instrument was formerly used in military bands, and was played at the first Handel commemoration in Westminster Abbey, it had gone completely out of use till the Handel Festival in 1871. The great masters, however, have written for it largely. Haydn gives it an important part in several of his works, as do also Spohr, Beethoven, and Mendelssohn. (Stainer & Barrett, &c.)

Double-bass.

double-bead, s.

Joinery: Two beads placed side by side and separated by a quirk. [MOLDING.]

double-bearing, a.

double-beat, s. & a.

A. As substantive:

Music: An ornament of old music, consisting of a beat repeated. (Stainer & Barrett.)

B. As adj.: (See the compound.)

Double-beat valve: A valve so arranged that, on opening, it presents two outlets for the water; in closing, the valve drops upon two gun-metal rings, fixed in the seat, which is of cast-iron; this is cast with a cylindrical portion, which serves as guide to the valve, as do also the ribs. A cap limits the throw of the valve. It is so called from the fact that its lower edge beats upon a circular seat on the lower ring, and a flange on its upper edge upon a ring on the upper-plate of the valve-seat.

***double-beer, s.** [French *biere double*.] Strong beer or ale. [XX]

"Had he been master of good double-beer,
My life for his, John Dawson had been here."

Corbett: *On the Death of J. Dawson.*

Double-double-beer: Strong beer, much stronger than the double-beer. [XXX]

double-biting, a. Biting, that is, cutting, with either edge; two-edged.

"His double-biting ax, and beamy spear,
Each asking a gigantic force to rear,"

Dryden: *Palamon and Arcite*, iii. 480, 481.

double-bitted ax, s. An ax having two opposite bits or blades. It is an ancient form of battle-ax, being a favorite weapon with the Franks in the time of Clotaire (seventh century), and with the Danes in the time of Alfred the Great (ninth century). The double-bitted ax is found in the tumuli and barrows of this country. It is in three forms: 1, with a circumferential groove for the occupation of the withe or split handle to which it is lashed; (2) with an eye traversing the head; (3) with a socket for the handle.

double-block, s.

Naut.: A block with two sheaves, which are ordinarily placed on the same pin, but rotate in separate mortises in the shell. Other double-blocks have the sheaves arranged one above the other. [LONG-TACKLE BLOCK; SHOE-BLOCK; FIDDLE-BLOCK; SISTER-BLOCK.]

double-bodied microscope, s. A microscope invented by Nachet, to enable several observers to view the same object simultaneously. The rays from the objective are divided by a prism; the separated rays received by two other prisms, and the respective pencils directed through the respective bodies of the instrument. The principle is similar to that of the binocular microscope (q. v.).

double-book, s. A book printed on half sheets. (Hannet.)

double-bourdon, s.

Music: An organ-stop of 32 feet tone. On the manuals it rarely goes below middle c; on the pedals it extends, of course, through the whole compass. (Stainer & Barrett.)

double-breasted, a. Applied to a coat or waist-coat either side of which may be lapped over the other.

double-buttoned, a. Having a double row or two rows of buttons.

"Others you'll see, when all the town's afloat,
Wrapt in th' embraces of a kersey coat,
Or double-button'd frieze." Gay: *Trivia*.

double-cap, s. A flat (unfolded) writing or book paper, 17x27 inches.

double-chant, s.

Music: A chant in two parts, each in two strains, the first of three and the second of four bars in length.

***double-charge, v. t.** To load or charge doubly, to overcharge.

"Pistol, I will double-charge thee with dignities."—Shakesp.: *Henry IV., Pt. II., v. 3.*

double-chisel, s. A tool with two chisel-edges to cut the ends of a mortise simultaneously, while the chip extends into the depression between the bits. It is used in mortising sash-bars for windows.

double-chorus, s.

Music: A chorus for two separate choirs; the several themes may be distinct, or so constructed that united they form one harmony. [CHORUS.]

double-clasping, a. Fastened with a double clasp.

"The double-clasping gold the king confessed."
Pope: *Homer's Odyssey*, xix. 64.

***double-cloak, s.** A cloak which could be turned to serve as a disguise.

double-cloth loom, s. One for weaving two sets of webs simultaneously. These may be connected at certain parts, and cut apart subsequently, and so form a series of undergarments. In another form, the two webs are so knitted as to form a tube, being joined at their edges. At certain intervals, both webs are thrown into one flat web of double thickness, and then again separated, forming a tube as before. The completed web is then cut apart mid-length of the doubled portion, and also mid-length of the tubular portion, and the result is a number of bags with closed bottoms.

double-compass, s. An instrument whose legs are prolonged each way beyond the joint, so that either pair may be used; when the legs on one pair are double the length of the others, it answers as a bisecting-compass.

double-complaint, s. The same as DOUBLE-QUARREL (q. v.).

double-concave lens, s. A lens both faces of which are concave. [LENSES.]

double-convex lens, s. A lens both sides of which are convex, though they may differ in the radii of their curves. When the difference is as six to one, it is a crossed lens. [LENSES.]

double-coral stitch, s.

Needlework: An embroidery stitch much used in ticking work, and for ornamenting linen. It is composed of a straight center line, with long button-hole stitches branching from it on each side in a slanting direction, and at even distances. (Dict. of Needlework.)

double-counterpoint, s.

Music: A kind of artificial composition where the parts are inverted in such a manner that the uppermost becomes the lowermost, and vice versa; or, in other words, the art of making melodies grammatically convertible at certain intervals. [COUNTER-POINT.] The simplest form of double counterpoint is when a *canto-fermo* and its counterpart are convertible, e. g.,

The above is an example of double counterpoint at the octave, because the parts are inverted at this interval; but, when one part is transposed as well as inverted, it is called double-counterpoint at the 9th, 10th, 11th, 12th, &c., according to the interval of the transposition.

double-crotchet, s.

Music: A semiquaver.

double-crown, s.

*1. *Numis.:* An English gold coin, current in the early part of the seventeenth century. Its value was at first ten, and afterward eleven shillings, or £2.50 to £2.75.

2. *Print.:* A kind of paper, 20x30 inches, used for posters and bookwork.

double-curvature, s.

Geom.: A term applied to a line which so curves in such a manner that all parts of it are not in the same plane. Examples, the rhumb line and the loxodromic curve.

double-cut file, s. A file which has two rows of teeth, crossing each other at an angle, in contradistinction to the single-cut or flat, which has but one row.

double-cylinder press, s.

Print.: A press with one form, and receiving paper from two cylinders.

double-cylinder printing-machine, subst. A. A printing-press in which the form is placed on a flat bed, and the impression taken by two cylinders, each of which alternately takes a sheet and receives an impression from the form while it is passing under them.

double-cylinder pump, s. A pump having two cylinders in which the pistons act alternately. They may be single-acting or double-acting, that is, the cylinder may receive and deliver water at and from each end. The pumps of Heron of Alexandria, 150 B. C., were all single-acting, but one of them at least had a double cylinder.

double-cylinder steam-engine, s. A form of engine having two communicating cylinders of varying capacities; there are many modifications in the arrangements and modes of application of the steam. The first engine of this character was that of Hornblower, in which two piston-rods were connected to the same arm of the walking-beam, but at different distances from its center of oscillation. As usually understood, the double-cylinder engine involves the use of the same steam in two cylinders consecutively; first at a relatively high pressure in a smaller cylinder, and then at a lower pressure in a larger cylinder.

double-dagger, s.

Print.: A reference-mark (‡) next to the dagger (†) in order. Otherwise called a Diesis.

***double-damned, a.** Damned in two ways, or twice over.

"Therefore be double-damned."

Shakesp.: *Othello*, iv. 2.

"Double-dealers may pass muster for awhile; but all parties wash their hands of them in the conclusion."—*L'Esrange*.

double-dealing, a. & s.

1. *As adj.:* Deceitful, tricky, given to duplicity or double-dealing.

2. *As subst.:* Duplicity, deceitful actions; tricky; the conduct of a double-dealer.

"His dissimulation might have degenerated into wickedness and double-dealing."—Broome: *View of Epio Poetry*.

¶ For the difference between double-dealing and deceit, see DECEIT.

double-decker, s.

1. *Naut.:* A vessel which has two decks; especially a man-of-war having two gun decks.

2. A conveyance having seats for passengers on the roof; as, a two-story street car.

3. Two drams in one; a double drink. (*U. S. Slang.*)

double-demisemiquaver, s.

Music: A note whose value is one-half of a demisemiquaver.

double-demy, s.

Print.: A kind of paper, 35x22½ inches, used for posters and bookwork.

double-diamonds, s. pl. A stitch made in Macramé lace.

double-diapason, s.

Music:

1. [DOUBLE, s., II. 2.]

2. An organ stop of 16-feet pitch. (Stainer & Barrett.)

bóil, bóy; póut, jówl; cat, cèll, chorus, qhín, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shàn. -tion, -sion = shùn; -tíon, -sion = zhùn. -tious, -cious, -sious = shús. -ble, -dle, &c. = bèl, dél.

double-distress, s.

Scots Law: A name given to those arrestments which are used by two or more creditors, in order to attach the funds of their debtor in the hands of a third party.

double-door, s. Two pairs of folding-doors, hung upon the angles of the aperture, and each swinging inward so as to open against the reveal. The inner pair is frequently covered with baize.

double-d'or, s. A French style of jewelry; a plate of gold is soldered upon one of copper, the respective thicknesses being one and eleven; the plate is then thinned by rolling, and worked up into the required form.

double-drawing pen, s. A draughtsman's pen to rule two lines at once.

double-drill, s. A drill with two cutters, making a countersunk hole, so that the head of the screw or rivet placed therein shall not protrude.

double-drum, s.

Music: A large drum beaten at both ends. In contradistinction to other drums in which but one head is beaten; as side, snare, and kettle drums. [DRUM.]

double-dutch, s. Gibberish, jargon, or some tongue not understood by the hearer.

***double-dye, *double-die, v. t.** To dye doubly or with double the intensity.

"And double-die it with imperial crimson."

Dryden & Lee: Edipus, iv. 1.

double-dyed, a. Stained or tainted with infamy; doubly infamous; as, a double-dyed villain.

double-eagle, s.

1. An American gold coin of the value of twenty dollars.

2. A representation, as in the national arms of Russia and Austria, of an eagle with two heads.

double-edged, a.

1. *Lit.:* Having two edges.

"Your Delphic sword, the Panther then replied,

Is double-edged, and cuts on either side."

Dryden: Hind and Panther, iii. 191, 192.

2. *Fig.:* Acting in two ways, as an argument which makes both for and against the person using it; cutting two ways.

double-elephant, s. A size of drawing or flat writing-paper, measuring 26x40 inches.

double-ended bolt, s. A bolt having a screw-thread on each end for receiving a nut. It is used for binding together three parts or pieces independently of each other.

double-entendre, s. The use of a word or phrase which will bear two meanings or constructions, one of which is commonly indelicate or obscene.

"Selling of bargains and double-entendres."—*Arbutnot & Pope: Martin Scriblerus.*

double-entry, s.

Bookkeeping: A method of bookkeeping in which every transaction is entered twice, once on the creditor side of one book, and again on the debtor side of another, so as to serve as a check on each other.

double-expansion steam-engine, s. A form of engine in which steam, admitted to act upon a piston of relatively small area and cut off at a certain part of the stroke so as to work expansively from that point to the end of the stroke, is then admitted to the face of a larger piston, where it undergoes a farther expansion. One form has a large trunk-piston having two annular steam-spaces between the trunk and cylinder, affording two annular pistons of relatively small area; the ends of the trunk, which are of larger area, constituting two other piston heads to receive the force of the steam at the second expansion. (*Knight.*)

***double-eyed, a.** Watching in every direction; doubly watchful.

"Deceitful meaning is double-eyed."

Spenser: Shepherd's Calendar (May).

double-face, s.

1. Duplicity, trickery; the conduct of a double-dealer.

2. A double-faced person; a double-dealer.

double-faced, a.

1. *Ord. Lang.:* Double-dealing; hypocritical, full of duplicity.

"Like that Roman Janus, double-faced."

Wordsworth: Excursion, bk. II.

2. *Joinery:* A term applied to an architrave, or the like, having two faces.

***double-fatal, a.** Dangerous or deadly in two ways.

"Their bows of double-fatal yew."

Shakespeare: Richard II., iii. 2.

double-feather, s.

Needlework: A variety of feather-stitch (q. v.).

double-file, s. A compound file made of two files riveted together, one edge projecting beyond that of the other. Used by cutlers and gun-makers in checking their work, as on the small of the gun-stock.

double-first, s.

Universities:

1. One who takes his degree in the first class, both in classics and mathematics.

2. A degree taken in the first class, in both classics and mathematics.

double-flageolet, s.

Music: A flageolet having two tubes and one mouthpiece, admitting of the performance of simple music in thirds and sixths, &c. (*Stainer & Barrett.*)

double-flat, s.

Music: A sign (bb) used in music before a note already flattened in the signature, which depresses the note before which it is placed another half-tone. It is contradicted by a natural and a flat. (*Stainer & Barrett.*)

double-floor, s.

Carp.: A floor constructed with binding and bridging joists; a double-framed floor.

double-flower, s.

Bot.: [DOUBLE, a.]

double-flowered, a.

Bot.: Bearing or producing double-flowers.

double-fluid battery, s. A galvanic battery in which two fluids are used as exciting liquids. They are kept apart by a porous cup, as in the Daniell's battery, or by gravity, as in Calland's. Daniell was the inventor of this form of battery, and received therefor the Copley medal of the Royal Society in 1837. He used sulphuric acid in a porous cup placed in a glass cup containing sulphate of copper. (*Knight.*)

***double-formed, a.** Having two distinct forms or shapes.

"What thing thou art, thus double-formed,"

Milton: P. L., ii. 741.

***double-founded, a.** Having two sources or springs.

"The double-founded stream."—*Milton: P. L., xii. 144.*

double-fronted, a.

1. Having two fronts.

"He shrouds

His double-fronted head in higher clouds."

Wordsworth: Sonnets.

2. Applied to a house, shop, &c., in which there are rooms and windows on both sides of the entrance.

double-fugue, s.

Music: A common term for a fugue on two subjects, in which the two start together.

double-gear, s. The nests of variable-speed gear-wheels in the head-stock of a lathe; back-gear.

Double-gear wheel: A wheel which has two sets of cogs of varying diameter; these may drive two pinions, or be driven by one and drive the other.

double-gild, v. t.

1. *Lit.:* To gild with double coatings of gold.

2. *Fig.:* To excuse, to atone.

"England shall double-gild his treble guilt."

Shakespeare: Henry IV., Pt. II., iv. 5.

double-gilded, double-gilt, a. Gilt with double coatings of gold.

double-Gloucester, s. A superior kind of rich cheese, of double thickness, manufactured in Gloucestershire, England.

double half-round file, s. A file whose sides are curved, the edges forming cusps; the arcs of the sides being much less than 180°. Used for dressing or crossing-out balance-wheels, and hence known as a cross-file. The convex edges have usually different curvatures.

double-hammer, s.

Metal.: A forging device for operating upon a bloom or puddler's ball, striking it upon opposite sides simultaneously.

double-handed, a.

1. *Lit.:* Having two hands.

2. *Fig.:* Double-dealing; treacherous, deceitful.

"All things being double-handed, and having the appearances both of truth and falsehood, where our affections have engaged us, we attend only to the former."—*Glanville: Scepis Scientifica.*

double-headed, a.

1. *Ord. Lang.:* Having two heads.

2. *Bot.:* Having the flowers growing one to another.

"The double rich scarlet nonsuch is a large double-headed flower, of the richest scarlet color."—*Mortimer: Husbandry.*

Double-headed rail:

Rail.: A rail whose edges are bulbous and counterparts, so that when one is worn the other may be placed uppermost. This rail does not rest so securely on the sleepers, having no flat base like the foot-rail, or bridge-rail, but requires a chair on each sleeper. This greatly increases the expense in fastening to the sleepers.

Double-headed shot:

Ord.: A projectile formerly used, consisting of two shot united at their bases.

Double-headed wrench: A wrench having a pair of jaws at each end, one diagonal, the other right-angular. The shank of each outer jaw is connected to the sleeved inner jaw of the other pair, the sleeves slipping on the shanks of the jaws to which they are opposed. The double threads act in conjunction, to expand or close each pair simultaneously.

***double-hearted, a.** Having a double or deceitful heart; false-hearted.

"So double-hearted hypocrites, so they

Who God forget, shall in their prime decay."

Sandys: Job, p. 14.

***double-henned, a.** Having a false wife.

"Now, bull! now, dog! 'Loo, Paris, 'loo! now my double-henned sparrow! 'loo, Paris, 'loo! The bull has the game:—'ware horns, ho!"—*Shakespeare: Troilus and Cressida, v. 8.*

double-hung, s.

Carp.: A term applied to the sashes of a window when movable, the one upward and the other downward, by means of lines, weights, and pulleys.

Double-hung window: A window with two sashes, each having its complement of lines, weights, and pulleys.

double-image, a. (See the compound.)

Double-image micrometer: Suggested by Römer about 1678; brought into use by Bouguer about 1748. It is formed by dividing diametrically the object-glass of a telescope or microscope, the straight-edges being ground smooth, so that they may easily slide by one another. The parts are separable by a screw, which moves an index on a graduated scale. A double image of the object in the field of view is produced by the separation of the segments; and by bringing the opposite edges of the two images into contact, a measure of the diameter of the object is obtained in terms of the extent of the separation. A heliometer.

double-imperial, s.

Print.: A kind of paper 32x44 inches.

double-insurance, s.

Law, Commerce, &c.: The term applied when a person, being fully insured by one policy, effects another insurance on the same property with another office. In this case the law will allow him to be indemnified from one insurance or the other, but not to make a profit by claiming indemnification from both. Besides this, the office which meets his loss can claim part repayment from the other one. (*Arnold: On Insurance.*)

double-jointed, a. Having two joints.

Double-jointed compass: A compass having, in addition to the main joint, additional joints by which legs may be bent to secure a proper presentation of the feet to the paper.

double-knife, s. A knife having a pair of blades which may be set at any regulated distance from each other, so as to obtain thin sections of soft bodies. One form of this is known as Valentin's knife, from the inventor.

double-knitting, s.

Needlework: A stitch in knitting which, producing a double instead of a single web, is especially useful when light and yet warm articles are to be knitted.

double-knots, s. pl.

Needlework: A knot used in tatted crochet.

double-leaf, s.

Bot.: *Listera ovata*, from its two opposite and only leaves. (*Britten & Holland.*)

double-letter, s.

Print.: Two letters on one shank, as ff, fi; a binotype.

double-light, s. A variety of light as displayed for the warning and instruction of mariners from lighthouses. The light indicates land, rock, or shoal, and, by varying the characteristics of the light, the seaman is informed of the part of the coast he is on, and of his bearings as to his port or

fâte, fât, färe, amidst, whât, fâll, father; wê, wêt, hêre, camel, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôr, or, wôre, wôlf, wôr, wôr, sôn; mâte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = ē; ey = ä. qu = kw.

course. The other characters of light are known as Fixed, Revolving, Intermittent, Flashing, and Colored. These are variously combined. The double-light is usually exhibited from two towers, one of which is ordinarily higher than the other. The duplication of the lights affords a leading line as a guide to a channel, as well as furnishing another mode of varying the lights on a coast where they are numerous. [LIGHT.]

double-line, s.

Harness:

1. A form of driving-lines or reins in which supplementary reins are afforded, which may be brought into use in emergency, such as an attempt to bolt. In some cases it is an extra rein to pull the horses' heads together; a rein to pull a hood over the eyes of a horse; a gag-rein to pull the bit violently into the corners of his mouth; a choking-rein around the throat; a gripper on the muzzle; shutters on the nostrils, &c.

2. A description of driving-reins or lines in which each main branch has a check-line to the bit of the other horse. Distinguished from the Western teamster's single or check line.

double-lock, s. A canal-lock having two parallel chambers connecting by a sluice. Each chamber has a gate at each end connecting with the upper and lower pounds respectively. The object is to save one-half the water that would be used in locking boats.

double-lock, v. t. To fasten a door by shooting the lock twice; to fasten with double or extra security and caution.

"He immediately double-locked his door, and sat down carefully to reading and comparing both his orders."—Tatler.

double-locked, a. Fastened with double or extra security and caution.

double-long, a. (See the compound.)

Double-long treble:

Needlework: A stitch used in crochet.

double-manned, a. Furnished or equipped with twice the number of men.

double-margin, a. (See the compound.)

Double-margin door:

Joinery: A door framed in imitation of folding-doors, the central style being made double with an intervening bead.

***double-meaning, a.** Saying one thing and meaning another; double-dealing, double-faced, deceitful; speaking equivocally.

"He has deceived me, like a double-meaning prophet."—Shakespeare: *All's Well that Ends Well*, iv. 3.

double-medium, s.

Print: A kind of paper 24x38 inches.

double-milled, a.

Cloth Manufac: Twice milled or fullad, to render more compact and fine.

***double-minded, a.** Unsettled or wavering in mind; changeable, fickle, undetermined.

"A double-minded man is unstable in all his ways."—James i. 8.

double-moldboard plow, s.

Agric: A plow having a moldboard on each side of the sheath, so as to throw the soil away right and left. It is used in hilling up crops, such as potatoes and cabbages. Not used for corn; the rows are too wide apart. A double-moldboard plow was used by the Romans in ribbing the ground for wheat. This left the ground in ridges, whose summits were seeded by hand-drilling.

***double-mouthed, a.** Deceitful or untrustworthy in reports.

"Fame, if not double-faced, is double-mouthed."

Milton; *Samson Agonistes*, 971.

double-natured, a. Having a double or two-fold nature. (*Young: Night Thoughts*.)

double-octave, s.

Music: The interval of a fifteenth.

double pedal point, s.

Music: A portion of a fugue or melody in which two notes are long sustained, generally the tonic and dominant. (*Stainer & Barrett*.) [SUSTAINED NOTE.]

double pedro, s. [PEDRO, s.]

double pica, s.

Printing: A size of type double the size of Pica.

Double Pica.

double-piled fabric-loom, s. One in which a pile is formed on both sides of the foundation, and which may be produced from either the warp or weft.

double-piston pump, s. One which works two pistons from a single lever or handle. It may be double or single acting as to the separate pistons.

double piston-rod engine, s. A direct-action steam-engine designed for vessels of low draft and shallow holds, without exposing the machinery above deck. It is one of the numerous attempts to avoid the use of a beam or side-lever. [DIRECT-ACTION STEAM-ENGINE.] The double piston-rod engine has two piston-rods to each piston, the center of the cylinder-cover is plain, and this allows the crank when lowest to barely clear the said cover, thus saving the depth of a stuffing-box. The two piston-rods issue from opposite apertures, but neither in the longitudinal nor transverse line of the ship. It is said to afford the shallowest arrangement yet known with no beam above deck, and is used on the Rhone, the Indus, and the Sutlej. (*Knight*.)

double-piston square-engine, s. An engine having two square pistons at right angles to and one within the other.

double plane-iron, s.

Carp: A smoothing-plane iron having a counter-iron to bend up the shaving in working cross-grained stuff.

double-plea, s.

Law: A plea in which the defendant alleges for himself two several matters in bar of the action, whereof either is sufficient to effect his desire in debarring the plaintiff.

double-plow, s.

1. The double-plow, in which a shallow share preceded the deeper-running, longer plow, originated in England, where it is known as the skim-coulter plow. This has a share attached to the coulter to turn down the top soil with its weeds, to be covered with the main furrow-slice, which is turned over by the larger plow following. In this country another form of this plow has been used in which the precedent portion is not merely a flange on the coulter, but is a regular moldboard plow of small proportions, higher than and in front of the main plow. This is known as the "Michigan double-plow," and is an efficient implement requiring four horses.

2. The double-plow, having two plows to one stock or two stocks framed together so as to have but one pair of handles and be operated by one man, is mentioned by Walter Blythe, who wrote during the protectorate of Oliver Cromwell. [GANG-PLOW.]

double-quarrel, s.

Eng. Eccles. Law: A complaint made by any clerk or other to the archbishop of the province, against an inferior ordinary, for delaying justice in some cause ecclesiastical. The effect is, that the archbishop directs his letters, under the authentic seal, to all clerks of his province, commanding them to admonish the said ordinary within nine days to do the justice required, or otherwise to cite him to appear before him or his official; and lastly to intimate to the said ordinary, that if he neither performs the thing enjoined, nor appears at the day assigned, he himself will proceed to perform the justice required. And this seems to be termed a double-quarrel, because it is most commonly made against both the judge and him at whose petition justice is delayed. (*Cowel*.) [DUPLEX QUERELA.]

double-quartet, s.

Music: A composition for two sets of four voices or instruments, *sol*. (*Stainer & Barrett*.)

double-quick, a., s. & adv.

A. As adjective:

1. *Lit. & Mil.*: Performed in the time of the double-quick march; pertaining to double-quick.

2. *Fig.*: Very quick; as, He went in double-quick time.

B. As substantive:

Mil.: The same as DOUBLE, s.

C. As adv.:

In double-quick time; at the double.

double-quick, v. i. & t.

1. Intransitive:

Mil.: To march in double-quick time, to march at the double.

2. Transitive:

Mil.: To cause to march at the double.

double-reed, s.

Music:

1. The vibrating reed of instruments of the oboe class.

2. A reed stop on an organ of 16-feet pitch. (*Stainer & Barrett*.)

double-refracting, a.

Optics, Crystallog., &c.: Refracting twice over. [DOUBLE-REFRACTION.]

double-refraction, s.

Optics, Crystallog., &c. (of a crystal): The act of twice over refracting a ray of light, with the effect of making it bifurcate, and making objects seen

through it look double. Bodies destitute of crystallization—glass, for instance—have not this quality, nor have crystals formed on the cubic system. Those belonging to other systems all possess it to a greater or less extent. The substance in which it is best seen is Iceland spar, as was pointed out by Bartholin in 1669. Even those substances in which it is but obscurely discernible polarize light. The law of double-refraction was first enunciated clearly by Huyghens in his treatise on light, written in 1678, and published in 1690. (*Gannot*.)

Double-refraction micrometer: The Abbé Rochon first applied the principle of double-refraction to micrometrical measurements. His instrument had two prisms connected together so as to form a single crystal. The prisms are so disposed that the face of the first is perpendicular to the axis of the crystal, while in the second the axis is parallel to the line of intersection of the two faces, so that the axes of crystallization of the two prisms are at right angles to each other. The prisms are placed in perfect contact and cemented by mastic, and together form a plate, the opposite sides of which are parallel. As the ray enters the second prism the ordinary ray passes on, and the extraordinary ray is refracted. The angle of divergence of the rays is constant in the same prism, and is determined by experiment. The apparatus is placed in the tube of a telescope, where it may be slipped backward and forward. The determination of the diameter of the object is obtained by bringing the images in contact. (*Knight*.)

double-relish, s.

Music: An ornament in old music:

*double-ribbed, a. Great with child.

"Now over and besides these mischeifes, this comes also in the very nick; this same woman of Andros, whether she be wife to Pamphilus or but his love, I know not, but great with child shee is by him; shee is now double-ribbed."—Terence in English (1614).

double-root, s.

Music: [SHARP SIXTH.]

double-royal, s.

Print: A kind of paper, 26x40 inches.

***double-ruff, s.** A sort of game at cards. There were also games called English Ruff and Honors, French Ruff and Wide Ruff.

"I can play at nothing so well as double-ruff."

Woman Killed with Kindness (*Dodsley*, vii. 296)

double-salt, s.

Chem.: A compound salt, consisting of two salts in chemical combination; as common alum, which contains sulphate of alumina and sulphate of potash.

double-saw, s. A stock having two blades at a regulated distance, adapted to cut kerfs and space the intervals, as in comb-cutting. [COMB.]

double-seaming machine, s. A tool or machine for lapping the edges of sheet-metal one over the other, and then doubling over the lapped portions so as to preclude the possibility of the portions slipping apart. (*Knight*.)

double-seat valve, s. Perhaps another name for the double-beat valve, and the more appropriate term of the two.

double-security, s. Two securities held by a creditor for the same debt.

***double-shade, v. t.** To double the shade or darkness of; to make doubly dark or shady.

"Now began Night, with her sullen wings, to double-shade The desert." Milton; *P. R.*, i. 499-501.

***double-shaded, a.** Doubly or twice as dark or shady.

double-sharp, s.

Music: A sign (x) used before a note already sharp, to indicate that it is desired to raise the pitch by a semitone. It is contradicted by a natural and a sharp. (*Stainer & Barrett*.)

***double-shining, a.** Shining with double the luster or brightness.

"He was Among the rest that there did take delight To see the sports of double-shining day." Sidney.

double-shovel plow, s. A plow for tending crops, and having two small shovels on as many sheaths. They are arranged a little distance apart, and one a little behind the other. The left-hand plow is a little in the rear when the right is specially engaged in working the crop. (*Knight*.)

bôl, bôy; pout, jow1; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tlan = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

double-shuffle, *s.* A low dance.

double-speed pulley, *s.* A contrivance for giving what is termed double speed to the spindles of the self-acting mule.

double-square, *s.*

Needlework: An embroidery stitch, also known as Queen stitch.

double-standard, *s.* In economics the phrase Double Standard is used to signify a "Double Standard of Monetary Value." It implies the existence of what is known as the Gold Standard on the one hand, and the Silver Standard on the other. Wherever the Double Standard in its integrity is in use a creditor is bound to accept payment of any sum in coins of either of the metals, gold or silver, which the debtor may choose to tender. (*Bithell*.)

double-stars, *s. pl.*

Astron.: Two stars so close to each other as to appear one to the naked eye.

double-steam-engine, *s.* A steam-engine which has two cylinders acting coincidentally or alternately. Two double-acting oscillating cylinders, acting upon a two-cranked shaft, work coincidentally, and form a double-engine. (*Knight*.)

double-stopping, *s.*

Music: The stopping of two strings simultaneously with the fingers in violin-playing. The practice was first suggested by John Francis Henry Biber in 1681, in a set of solos for a violin and a bass: one of these pieces is written in three staves, two for the violin-playing in double-stopping, and the third for the bass. He also in the same work suggests a varied tuning in fourths and fifths for the purpose of making the double-stopping easy. (*Stainer & Barrett*.)

double super-royal, *s.*

Print.: A kind of paper, 27x42 inches.

double-tang file, *s.* A file with a tang at each end, to adapt it to receive the handles.

double-threaded, *a.* Consisting of or made of two threads twisted together.

double-tongue, *v. t.*

Music: To play a passage with double-tonguing (*q. v.*).

double-tongue, *s.*

Bot.: The plant Horsetongue.

double-tongued, *a.*

1. *Ord. Lang.*: Giving contrary accounts of the same thing; deceitful, double-dealing.

2. *Music*: Played with double-tonguing (*q. v.*).

double-tonguing, *s.*

Music: A peculiar action of the tongue against the roof of the mouth, used by flute players, to insure a brilliant and spirited articulation of staccato notes. The term is sometimes applied also to the rapid repetition of notes in trumpet and cornet-playing. (*Stainer & Barrett*.)

double-tooth, *s.*

Bot.: The composite genus *Bidens*. (*Withering*, in *Britten & Holland*.)

double-travale, *s.*

Music: A direction in tambourine-playing. [*TAMBOURINE*.]

double-tree, *s.* The bar which is pivoted to the tongue of a carriage, wagon, or sled, or to the clevis of a plow or other implement. To the ends of the double-tree the single-trees are attached, and to the ends of the single-trees the traces are connected. The double-tree varies in shape with the description of vehicle, but has such a length that its ends are immediately behind each horse, so that the traces of the animal may pull squarely upon them through the medium of the single-trees. In wagons, the double-tree is attached to the tongue by means of a bolt called the wagon-hammer, upon which it swings as one or the other horse pulls the more strongly upon it. Near the ends of the double-tree and behind it are loops for the stay-chains, which are connected to hooks in front of the fore-axle, so as to limit the sway of the double-tree. For plowing and similar duty, the double-tree is sometimes arranged with three clevises; by the middle one it swings from the clevis of the plow or cultivator, and by the end clevises the single-trees are attached. (*Knight*.)

double-trumpet, *s.*

Music: An organ reed stop, similar in tone and scale to, but an octave lower in pitch than, the 8-foot trumpet. (*Stainer & Barrett*.)

double-vantage, *v. t.* To benefit doubly or twofold.

double-vault, *s.*

Arch.: One vault built over another with a space intervening. Double-vaults are used in domes and

domical roofs, the interior dome being of less altitude, in order to harmonize with the proportions of the building internally, the external of greater altitude, to correspond with the proportions externally.

double-warp, *s.*

Fabric: A cotton cloth in which the warp and weft are of a uniform size. This kind of calico, being stout and heavy, is much in request for sheetings. The width varies from two to three yards. (*Dict. of Needlework*.)

double-waste, *s.*

Law: Waste committed when a tenant, bound to keep a house in repair, allows it to be wasted, and then illegally falls timber to repair it. (*Wharton*.)

double-water-wheel, *s.* An arrangement of two water-wheels on one shaft, as in the case of a double-headed turbine, which has a wheel at each end of a horizontal shaft.

double-window, *s.* One having two sets of sashes, inclosing a body of air as a non-conductor of heat and to deaden noise.

double X or XX, *s.* A name given to porter or beer of more than ordinary strength. According to Palmer, a survival, in a somewhat disguised form, of the Lat. word *duplex* (misunderstood as double X), which formerly was commonly applied to such.

doub'-led (led as *eld*), *pa. par. ora.* [*DOUBLE*, *v.*]

doub'-le-ness, ***doub-le-ness** (le as *el*), *s.* [*Eng. double*; *ness*.]

1. *Literally*:

1. The state of being double, duplicate, or two fold.

2. The state of being twice as great or twice as much.

*II. *Fig.*: Double-dealing, deceit, duplicity, treachery.

doub'-lér, ***dob-el-er**, ***dob-ler**, *s.* [*English double*(e); *-er*.]

I. *Ordinary Language*:

1. He who or that which makes double.

*2. A large dish, a charger.

"A dysche other a dobler that dryghtyn onez serued." *Early Eng. Allit. Poems*; *Cleanness*, 1, 145.

II. *Technically*:

1. *Elect.*: An instrument to increase the least conceivable quantity of electricity by continually doubling it, until it becomes perceptible upon a common electrometer or is made visible in sparks. It was first invented by Bennet, improved by Darwin, and afterward by Nicholson.

2. *Distill.*: A part of the still apparatus, or an appendage to a still in which the low wines, one of the products of the first distillation, are re-distilled. The operation is a turning back and repeating, and is known as doubling. A part of the still is arranged to condense and then intercept and return the less volatile vapors, while those of greater tenacity pass on.

3. *Fiber*: A machine in which slivers, stricks, or filaments of wool, cotton, flax, or silk are laid together, to be drawn out and again doubled and drawn to remove inequalities; or, in the case of silk, to increase the thickness of the strand. [*DOUBLING*.]

4. *Calico-print*: A blanket or felt placed between the cloth to be printed and the printing-table or cylinder.

doub'-lét, ***dob-bel-et**, ***dob-el-at**, ***doub-lette**, ***dub-let**, *s.* [*O. Fr. doublet*, dimin. from *double* = double (*q. v.*)].

I. *Ordinary Language*:

1. One of a pair.

"Those doublets on the sides of his tail seem to add strength to the muscles which move the tail-fins." *Grew: Museum*.

2. A duplicate form of a word.

3. In the same sense as II. 1.

II. *Technically*:

1. *Dress*: A close-fitting jacket or body-coat, covering the body from the neck to a little below the waist. Its use was introduced from France in the fourteenth century, and it continued to be worn by all ranks until the time of Charles II.

"Now the melancholy god protect thee; and the tailor make thy doublet of changeable taffeta, for thy mind is a very opal." *Shakesp.*: *Twelfth Night*, II. 4.

*2. *Games* (*pl.*): An old game, bearing some resemblance to backgammon.

"What? where's your cloak?"

"To tell you truth he hath lost it at doublets." *Cartwright: Ordinary* (1661).

Doublet.

3. *Lapid.*: A factitious gem made with a colorless front and a colored back, cemented together by clear mastic on the line of the girdle.

"You may have a brass ring gilt, with a doublet, for a small matter." *Bailey: Erasmus*, p. 330.

4. *Mil.*: A term applied to the tunic worn by the officers and rank and file of Scotch regiments.

5. *Print.*: One or more words or sentences accidentally set up a second time. [*DOUBLE*.]

6. *Optics*: An arrangement of lenses in pairs, invented by Wollaston. It consists of two plano-convex lenses having their focal lengths in the proportion of one to three, or nearly so, and placed at a distance determinable by experiment. Their curved sides are placed toward the eye, and the lens of shortest focal length toward the object. It is a reversal of the Huyghenian eye-piece, and its object is similar—to correct spherical aberration and chromatic dispersion. The stop placed between the lenses intercepts extreme rays that might mar the perfection of the image. An amplification of the idea is called a Triplet (*q. v.*). Sir John Herschel's doublet consists of a double convex lens having the radii of curvature as one to six, and of a plano-concave lens whose focal length is to that of the convex lens as thirteen to five. It is intended for a simple microscope, to be used in the hand. [*LENS*.]

doub'-lét te, *s.* [*Fr.*]

Mus.: A compound organ-stop, consisting of two ranks, generally a twelfth and a fifteenth. (*Stainer & Barrett*.)

doub'-lîng, ***doub-lyng**, *pr. par., a. & s.* [*DOUBLE*, *v.*]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As substantive*:

1. *Ordinary Language*:

I. *Literally*:

(1) The act of making double or folding.

(2) The act of making double or twice as much or as great; the act of increasing to twice the size, amount, value, or extent.

"Upon the coast of Holland he suffered shipwreck, and lost all his bookes, writings, and copies: to his hynderance and doubling of his labors." *Life of William Tyndall*.

(3) The state of becoming double or twice as much or as great.

(4) A fold, a plait.

2. *Figuratively*:

(1) A shift, or in-and-out course of conduct; a shifting.

"To trace all the turns and doublings of his course would be wearisome." *Macaulay: Hist. Eng.*, ch. xviii.

(2) A trick, an artifice, a shift.

(3) A turning or winding to avoid or baffle pursuit.

"He hunted us through every doubling, and gained upon us each moment." *Goldsmith: Essays*, 10.

II. *Technically*:

1. *Build.*: The double course of shingles or slates at the eaves of a house.

2. *Distill.*: The second distillation of low wines. These are the product of the first distillation, and they contain about one-fifth alcohol.

3. *Cotton or Wool*: Bringing two or more slivers of fiber together and forming them into one of greater thickness, to be again reduced by drawing; thus obtaining a sliver of uniform thickness. The slivers from the carding-machine, each in its separate can, are conducted between one pair of rollers, which causes them to coalesce; then through a second pair, revolving at an increased speed, which draws out and lengthens the sliver, and then through a third pair, which still attenuates the sliver. The operation is repeated as often as may be necessary to correct every inequality in the thickness of the sliver. The next process is roving, which is also performed by drawing-rollers; but as the sliver has become so reduced in thickness, it receives a slight twisting, to enable it to hold together. This was formerly obtained by giving a rapid revolution to the receiving-can. [*ROVING*; *DRAWING*.]

4. *Flax Manuf.*: The process with flax is similar to that described as pertaining to cotton. In the first place, the stricks or handfuls of hackled flax are spread on a traveling-apron and conducted to drawing-rollers, which bring the filaments to an attenuated sliver, and deliver it into cans. The slivers from a number of cans, from six to fifteen usually, are then conducted to drawing-rollers, being thereby doubled and drawn; the process is repeated, as with cotton, until the sliver is equalized and reduced to the required degree. [*DRAWING*.]

5. *Silk Manuf.*: The twisting together of two or more filaments of twisted silk. This process follows the first spinning of the filaments of silk, and precedes the throwing, which is a farther combining of threads and twisting them together. *First*,

fâte, fât, färe, amidst, whât, fäll, father; wê, wêt, hère, camêl, hër, thère; pine, pît, sîre, sîr, marine; gô, pô, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fûll; trÿ, sÿrian. æ, æ = é; ey = â. qu = kw.

bōl, bōy; pōut, jōw1; cat, çell, chorus, çhin, bench; go, gem; thin, ðis; sin, a; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün. -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bəl, dəl.

3. Ambiguous, not clear in its meaning; equivocal, dubious; as, a *doubtful* meaning or expression.

"By pronouncing of some doubtful phrase."
Shakesp.: *Hamlet*, l. 5.

4. Not secure or confident; suspicious.

"Our manner is always to cast a *doubtful* and a more suspicious eye toward that over which we know we have least power."—Hooker (*Dedic.*).

*5. Not without fear; timid, fearful.

"With *doubtful* feet, and wavering resolution,
I come, still dreading thy displeasure."

Milton: *Samson Agonistes*, 732, 733.

*6. Characterized by doubt or hesitation.

"Thus their *doubtful* consultations dark
Ended."

Milton: *P. L.*, ii. 486, 487.

*7. Breeding or giving rise to suspicion; suspicious.

"Her death was *doubtful*."—Shakesp.: *Hamlet*, v. 1.

Crabb thus discriminates between *doubtful*, *dubious*, *uncertain*, and *precarious*: "The *doubtful* admits of doubt; the *dubious* creates suspense. The *doubtful* is said of things in which we are required to have an opinion; the *dubious* respects events and things that must speak for themselves. In *doubtful* cases it is advisable for a judge to lean to the side of mercy; while the issue of a contest is *dubious*, all judgment of the parties or of the case must be carefully avoided. *Doubtful* and *dubious* have always a relation to the person forming the opinion on the subject in question: *uncertain* and *precarious* are epithets which designate the qualities of the things themselves. Whatever is *uncertain* may from that very circumstance be *doubtful* or *dubious* to those who attempt to determine upon them; but they may be designated for their *uncertainty* without any regard to the opinions to which they may give rise. A person's coming may be *doubtful* or *uncertain*; the length of his stay is oftener described as *uncertain* than as *doubtful*. The *doubtful* is opposed to that on which we form a positive conclusion; the *uncertain* to that which is definite or prescribed. The efficacy of any medicine is *doubtful*; the manner of its operation may be *uncertain*. While our knowledge is limited, we must expect to meet with many things that are *doubtful*; as everything in the world is exposed to change, and all that is future is entirely above our control, we must naturally expect to find everything *uncertain* but what we see passing before us. *Precairous*, from the Latin *precarus* and *precor*, to pray, signifies granted to entreaty, depending on the will or humor of another, whence it is applicable to whatever is obtained from others. *Precairous* is the highest species of *uncertainty*, applied to such things as depend on future casualties in opposition to that which is fixed and determined by design. The weather is *uncertain*; the subsistence of a person who has no stated income or source of living must be *precairous*. It is *uncertain* what day a thing may take place, until it is determined; there is nothing more *precairous* than what depends upon the favor of princes." (Crabb: *Eng. Synon.*)

doubt-fúl-lý (b silent), *adv.* [Eng. *doubtful*; -ly.]

*1. In a state of fear or alarm; fearfully, timidly.

2. In a doubtful or hesitating manner; without decision; hesitatingly.

Agains natur in the nycht I walk into weir,
I dar do nocht in the day bot droup as a doule."

Houlate, l. 5.

dôum, **dôom**, *s.* [A native word, current in Upper Egypt.]

doum-palm, **doom-palm**, *s.*

Bot.: *Hyphæne thebaica*, a species of palm, a native of Egypt, remarkable for the manner in which its trunk divides dichotomously, the branches terminating in tufts of large fan-shaped leaves. The pericarp is about the size of an apple, and is used as food by the poorer classes. It has a taste resembling that of gingerbread, whence the tree itself is sometimes called the Gingerbread-tree. The fibers of the leaf-stalks are made into ropes, and small ornaments are made of the seeds. An infusion of the rind is used in fevers, and as an aperient.

Doum-palm.

1. Fruit.

***doun-geoun**, *s.* [DONJON, DUNGEON.]

1. The strongest tower belonging to a fortress, being designed as a place of last resort during a siege.

"He send thiddyr to tumbill it doun,
Bath tour, and castell, and doungeoun."

2. *Fig.*: Used as a term of endearment or affection, or as the emblem of innocence.

II. Technically:

1. *Ornithology*:

(1) *Sing.*: The English appellation of the genus *Columbus*, or *Columba*. Thus the Stock-dove is *Columbus* or *Columba oenas*, the Ring-dove *C. palumbus*, the Rock-dove *C. livia*, and the Turtle-dove *C. turtur*. No very clear line of distinction is drawn between the words dove and pigeon, thus *C. livia* is often called the Rock-pigeon instead of the Rock-dove; yet *Ectopistes migratorius* is never called the Migratory Dove, but only the Migratory Pigeon.

(2) *Pl.*: The order *Columbæ* (q. v.). Sometimes it is made a sub-order of *Rasores*, in which case it is called *Columbacei* or *Gemitores*.

¶ *Ground dove*: [GROUND DOVE.]

2. *Art*: The Dove in Christian art is the symbol of the Holy Ghost (Matt. iii. 16); as such, it is represented in its natural form, the body of a snowy whiteness, the beak and claws red, which is the color natural to those parts in white doves. The nimbus which always surrounds its head should be of a gold color, and divided by a cross, which is either red or black. A radiance of light invests and proceeds from the person of the dove, and is emblematical of the Divinity. It is also sometimes represented, in stained glass, with seven rays, terminating in stars, significant of the seven gifts of the Holy Ghost. The dove is the emblem of love, simplicity, innocence, purity, mildness, compunction; holding an olive-branch, it is an emblem of peace. Doves were used in churches to serve three purposes: (1) Suspended over altars to serve as a pyx. (2) As a type or figure of the Holy Spirit over

altars, baptisteries, and fountains. (3) As symbolical ornaments. The dove is also an emblem of the human soul, and as such is seen issuing from the lips of dying martyrs and devout persons. (*Fairholt*.)

dove-cot, dove-cote, *dowfe-cote, s. A small house or box, elevated considerably above the ground and divided into compartments, in which tame pigeons breed.

*4. The gifts of a husband for a wife.

5. A gift, an endowment.

"For this she gave her ample dower,
To raise the convent's eastern tower,"

Scott: *Marmion*, ii. 3.

¶ **Tenancy in dower** is where a widow takes a third of such lands and tenements as her husband died entitled to, for seizin is not here necessary, and in which her title to dower has not been previously barred. This mode of providing for a widow seems to have been unknown in the early part of the Saxon constitution of England, from which country our laws are derived; for, in the laws of King Edmund, the wife is directed to be supported wholly out of the personal estate. Afterward, as may be seen in gavelkind tenure, the widow became entitled to an estate in one-half of the lands, provided she remained chaste and unmarried; as is usual also in copyhold dowers, or freebench. Some have ascribed dower to the Normans, but it was first introduced into the feudal system by the German Emperor Frederick II., who was contemporary with Henry III. of England. The person endowed must be the actual wife of the party at the time of his decease. If she be divorced a *vinculo* she shall not be endowed; but a judicial separation does not destroy the dower. dra-çs-nā, s. [Lat. *dracena*; Gr. *drakaina*=a she-dragon, from *drakōn*=a dragon. The genus is so named because the inspissated juice of the several species becomes a powder like dragon's blood.]

Bot.: A genus of Liliaceæ, tribe Asparagææ. Perianth inferior, six-partite, with nearly erect segments and stamens, six inserted in them; filaments thickened in the middle anthers; linear style one, stigma trifid; ovules, three-celled, three-seeded; fruit, a berry, with one, two, or rarely three perfect seeds. Formerly, the genus was so defined as to include nearly or quite thirty species. The well-known *Dracena draco*, or Dragon-tree, requires to be studied in its native country, the Canary Islands.

Commencing as an unbranched endogen with linear entire evergreen sheathing leaves, which leave annular scars as they fall annually, it continues to advance slowly to maturity, the process, it is said, taking twenty-five to thirty years. Then the leaf scars are gradually obliterated, and branches begin to be put forth. Next a glorious panicle of inflorescence appears at the apex of the stem, the individual flowers of which, however, are small and greenish-white. At an indefinitely long period it begins to decay, which in some cases it does so slowly that it seems as if death would never supervene. The celebrated Dragon-tree of Teneriffe was one of the wonders of the world. Bethencourt in 1402 or 1406 described it as old and hollow. It had changed but little from that time till its destruction in 1867. (*Dragon's-blood tree*.) It was between 70 and 75 feet high, with a circumference at the base of about 46½. *D. draco* furnishes one of the resins called *Dragon's-blood* (q. v.). The tree called *D. terminalis*, mentioned by Lindley and others as furnishing the T plant of the Sandwich Islands, was next named *Cordylone terminalis*, and is now denominated *Calodracon terminalis*.

drā-cōn-ī-dā, s. pl. [Lat. *draco* (genit. *draconis*)=a dragon, and fem. pl. adj. suff. -iæ.]

Zool.: In some classifications, a family of lizards, type *Draco*. It is generally, however, merged in the Agamidæ.

drā-cōn-ī-nā, s. pl. [Lat. *draco* (genit. *draconis*), and fem. pl. adj. suff. -iæ.]

Zool.: A sub-family of Agamidæ, type *Draco*. [**DRACON**.]

drā-cōn-ī-nē, s. [Gr. *drakōn*=a dragon, and Eng. suff. -ine (*Chem.*) (q. v.).] The same as **DRACONIC** (q. v.).

***drā-cōn-tic, a.** [From Lat. *caput draconis*=the dragon's head, a name given to one of the nodes of the lunar orbit.]

Astron.: Belonging to that space of time in which the moon performs one entire revolution.

***drā-cōn-tine, a.** [Gr. *drakōn* (genit. *draconis*)=a dragon, and Eng. adj. suff. -ine.] Belonging to, or of the nature of, a dragon.

drā-cōn-ti-ūm (ti as shi), s. [Lat. *draconitium*; Gr. *Drakonitōn*=a plant, *Dracunculus vulgaris*: this is not the modern genus *Dracontium*.]

Bot.: A genus of Orontiaceæ, tribe Oronticeæ. The spathe is cymbiform, the spadix cylindrical, covered with hermaphrodite flowers, perianth 7 to 8-parted, stamens 7 to 9, anthers 2-celled, ovary 2 to 3-celled, each cell containing a pendulous ovule, fruit baccate, 1 to 3-seeded. *Dracontium polyphyllum* is an antispasmodic and an expectorant. It grows in India, Japan, &c. The American skunk cabbage was formerly referred to this genus; it is now called *Symplocarpus fetidus*.

drā-cōn-ŷl, s. [**DRACON'S-BLOOD**.]

drā-cūn-cū-lē-s, s. pl. [Lat. *dracunculus*, and fem. pl. adj. suff. -ce.]

Bot.: A tribe of Araceæ. Stamens and pistils numerous, with the rudimentary organs interposed; spadix naked at the extremity. Cells of the anthers larger than the connective. (Lindley.)

drā-cūn-cū-lūs, s. [Lat., dimin. of *draco*=a dragon. A plant the same as *Dracontium*. Modern botanists make the two genera different.]

1. *Bot.*: A genus of Araceæ, the typical one of the tribe *Draconticeæ* (q. v.). *Dracunculus vulgaris*, formerly called *Arum dracunculæ*, is well known. It has a spotted stem and petiole leaves.

2. *Ichthy.*: A fish belonging to the genus *Callionymus*; also called **DRACONET** (q. v.).

3. *Zool.*: A species of worm, *Filaria medinensis*, which insinuates itself under the human skin, causing a suppurating sore. It is found on the coast of Guinea, thence it is sometimes called the Guinea-worm. It is a nematoid, measuring from one to six feet in length, and having the thickness of one-tenth of an inch. The body is cylindrical, tail pointed, and head convex, with a central mouth, surrounded by papillæ.

***draff-ty**, *a.* [Eng. *draff*; -y.] Worthless, like draff, coarse.

"The dregs and draffy part, disgrace and jealousy."
Beaum. & Fllet: Island Princess, iii. 3.

drafft, ***drafte**, *s. & a.* [A corruption of draught (q. v.).]

A. As substantive:

1. *Ordinary Language*:

1. *Literally*:

(1) The act or process of drawing or dragging a load or vehicle; draught.

(2) A drawing, plan, or delineation of a design on paper.

(3) The first sketch or outlines of any writing or document, containing the heads and principal details of the contents.

"In the original drafft of the instructions was a curious paragraph."—*Macaulay: Hist. Eng.*, ch. xxiii.

(4) In the same sense as II. 1.

(5) A current of air; a draught.

(6) In the same sense as II. 3.

* (7) A jakes, a privy. [DRAUGHT.]

"This communication hadde he sitting on a drafte."—*Hall: Richard III.* (an. 1).

*2. *Fig.*: Aim, purpose, stratagem, allurements.

"By his false allurements' wylie drafft,
Had thousand women of their love beraft."

Spenser: F. Q., IV. ii. 10.

II. *Technically*:

1. *Banking, &c.*:

(1) A written order for the payment of a sum of money addressed to some person who holds money in trust, or who acts in the capacity of agent or servant of the drawer. Documents of this kind often pass between one department of a bank or mercantile house and some other department, and are distinguished from bills of exchange and checks, in not being drawn upon a debtor. (*Bithehl*.)

"It is essential to the character of a bill that it should be addressed to a person who owes the money as a debtor. If the order be addressed to a person who merely holds the money as a depositum, as a bailee, or trustee, or agent, or servant of the writer, it is not a bill but a draff."

—*McClellan*.

(2) It is loosely and improperly used in the sense of a check.

2. *Comm.*: An allowance made for waste in goods sold by weight; also an allowance made at the custom-house upon excisable goods.

3. *Mil. & Naval*: A number of men selected for some special purpose; a selection of men to serve from an army or part of an army, or from a ship or depot to serve in some other place or ship.

*4. *Naut.*: A chart.

"The drafts or sea-plats being first consulted."—*Dampier: Voyages* (an. 1699).

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camel, hêr, thêre; pine, pît, sîre, sîr, marine; gô, pôr, or, wôre, wôlf, wôrk, whô, sôn; mâte, cûb, cûre, unite, cûr, râle, fûll; trý, sýrian. æ, œ = é; ey = â. qu - kw.

5. *Shipbuilding*: The depth a vessel sinks in the water; the draught of a ship.

6. *Hydraul. Eng.*: The combined sectional area of the openings in a turbine water-wheel; or the area of opening of the sluice-gate of a fore-bay.

¶ In all senses the two spellings *drafft* and *draught* are used, the former being general in this country. In England, except in the senses I. 4, 6, II. 1, 3, *draught* is the more common spelling.

B. *As adj.*: Employed for drawing a cart, vehicle, &c. (now written *draught*).

drafft-horse, *s.* [DRAUGHT-HORSE.]

***drafft-house**, *s.* [DRAUGHT-HOUSE.]

drafft-ox, *s.* [DRAUGHT-OX.]

"Ulysses and old Nestor yoke you like drafft-oxen, and make you plow up the wair."—*Shakesp.: Troilus and Cressida*, ii. 1. (Folio.)

drafft, v. t. [DRAFT, *s.*]

I. *Ordinary Language*:

1. To draw a drafft or outline of, to delineate.

2. To draw up a first sketch or outline of a document, giving the heads and principal details.

(4) To draw or haul up.

"And the other disciples came in a little ship . . . dragging the net with fishes."—*John* xxi. 8.

(5) To search or explore, as a river, a pond, &c., with a hooked instrument, to recover a body or article lost.

*6. To put a drag on, to retard with a drag.

"Our endeavors must be to drag the wheels."—*Southey: Letters*, iv. 156.

II. *Figuratively*:

1. To draw, to impel.

"My affairs drag me homeward."—*Shakesp.: Winter's Tale*, I. 2.

2. To draw along contemptuously as a thing unworthy to be carried.

"He triumphs in St. Austin's opinion; and is not only content to drag me at his chariot-wheels, but he makes a show of me."—*Stillfleet*.

3. To draw along or consume slowly or painfully.

"'Tis long since I, for my celestial wife,
Loathed by the gods, have dragged a lingering life."
Dryden: Virgil's Æneid, ii. 876, 877.

*4. To keep back, to retard.

"What impediments drag back our expedition."
Shakesp.: Henry IV., Pt. I., iv. 3.

"While I dragged my brains for such a song."
Tennyson: Princess, iv. 136.

6. To execute or perform too slowly; to perform in too slow time.

B. *Intransitive*:

I. *Ordinary Language*:

1. *Literally*:

(1) To trail or be drawn along the ground, as a dress.

"From hence are heard the groans of ghosts, the pains
Of sounding lashes, and of dragging chains."
Dryden: Virgil's Æneid, vi. 752, 753.

(2) To fish, or search for anything with a hooked instrument or drag, as in a river, pond, &c.

2. *Figuratively*:

(1) To move slowly or heavily, to linger.

"The day drags through, though storms keep out the sun."
Byron: Child Harold, iii. 32.

(2) To go too slowly; to keep behind in singing.

II. *Technically*:

1. *Naut.*: To give way and lose hold: said of an anchor.

2. *Carpentry*: (See extract.)

"A door is said to drag when by its ill hanging upon its hinges, the bottom edge of the door rides in its sweep upon the floor."—*Moxon: Mechanical Exercises*.

¶ For the difference between *to drag* and *to draw*, see DRAW.

¶ *To drag the anchor*:

Naut.: Applied to a ship which moves from its moorings, owing to the anchor failing to keep its hold on the bottom.

dräg, ***drägg**, *s.* [DRAG, *v.*]

I. *Ordinary Language*:

1. *Literally*:

(1) Anything which serves to retard the progress of a moving body [II. 2, 3 (1)].

(2) A net or four-clawed grapple used in dragging a pond or harbor to recover the body of a drowned person, or property which has been lost overboard; a creeper.

"You may in the morning find it near to some fixed place, and then take it up with a drag, or otherwise."—*Walton*.

(3) A drag-net (q. v.).

"Casting-nets were spread in shallow brooks,
Drags in the deep, and baits were hung on hooks."
Dryden: Virgil; Georgic i. 213, 214.

2. *Figuratively*:

(1) An obstacle to one's progress or prosperity; a drawback.

(2) Slow or laborious motion or progress; as, a heavy drag up-hill.

* (3) Anything serving to draw or attract; an attraction.

"Which they used as drags to draw him into such sin."
Goodwin: Works, vol. iii., pt. I., p. 446.

II. *Technically*:

1. *Husbandry*:

(1) A heavy description of harrow.

(2) An implement with hooking tines to haul manure along the surface; a manure-drag.

2. *Naut.*: A floating anchor, usually a frame of spars and sails, to keep a ship's head to the wind, and lessen the speed of drifting. [DRAG-ANCHOR.]

3. *Vehicles*:

(1) A shoe to receive the wheel of a vehicle to stop its revolution, and by friction on the ground lessen the speed down-hill. [WAGON-LOCK.]

(2) A rough, heavy sled for hauling stones, timber, &c., off a field, or to a foundation; a stoneboat.

"The drag is made somewhat like a low car; it is used for the carriage of timber, and then is drawn by the handle by two or more men."—*Moxon: Mechanical Exercises*.

(3) A kind of four-horse vehicle almost entirely used by sporting characters.

4. *Molding*: The bottom part of a mold, as distinguished from the cope.

5. *Hydr. Engin.*: A scoop having a long flexible handle, and operated by a winch, for deepening a channel, scraping a place for a submerged foundation, or removing the mud, &c., from the inside of a coffer-dam; a form of dredging-machine.

6. *Sawing*: The carriage on which a log is dogged in a veneer saw-mill. It has two motions, one past the saw to yield a veneer, and the other at right angles to the same and equal to the thickness of the veneer, plus the width of the kerf. [VENEER-SAW.]

7. *Masonry*: A thin, indented plate for scraping and finishing the surface of soft stone.

8. *Marine Engineering*:

(1) The difference between the speed of a screwship under sail, and that of the screw when the ship outruns the latter. [SIP.]

(2) The difference between the propulsive effects of the different floats of a paddle-wheel.

9. *Fishery*: A frame of iron with an attached net to scrape up and gather oysters by dragging upon the bed. [DREDGE.]

10. *Hunt.*: The same as DRAG-HUNT (q. v.).

11. *Music*:

(1) An ornament consisting of descending notes in lute music.

(2) A *rallentando* (q. v.). (*Stainer & Barrett.*)

drag-anchor, s.

Naut.: A frame of wood, or of spars clothed with sails, attached to a hawser, and thrown overboard to drag in the water and diminish the lee-way of a vessel when drifting, or to keep the head of a ship to the wind when unmanageable through loss of sails or rudder. It was patented under the name of a drag-sheet, by Burnet, in England, in 1826. When constructed and carried as a part of the ship's equipment, it is made to serve as a raft or drag as may be required; but the peculiarities are generally confined to means for compact stowage and to spilling-lines for their recovery, either by collapse or reversal of position, to enable them to be readily drawn in and hauled on board after having served their purpose. One edge of the drag may be weighted, as it is essential that it be submerged, and that it should assume a position at right angles to the taut cable which connects it to the ship.

drag-bar.

Rail. Engin.: A strong iron rod with eye-holes at each end, connecting a locomotive-engine and tender by means of the drag-bolt and spring.

drag-bench, s. A bench on which filets of gold or silver are drawn through an aperture, to bring them to even and exact proportions. [DRAW-BENCH.]

drag-bolt, s. The strong removable bolt coupling the drag-bar of a locomotive engine and tender together.

drag-box, s.

Molding: The same as DRAG, s., II. 4 (q. v.).

drag-chain, s.

Rail. Engin.: A strong chain attached to the front of the locomotive-engine buffer-bar to connect it with any other engine or tender; the chain attached to the drag-bar of goods wagons.

drag-hook, s. The drag-hook and chain are the strong chain and hook attached to the front of the engine buffer-bar, to connect it with any other locomotive-engine or tender.

drag-hunt, s. A name given to a hunt when the trail has been prepared beforehand along a certain course, by means of dragging a fox skin, herring, or other strongly-scented substance over the line.

drag-link, s. A link for connecting the cranks of two shafts; it is used in marine engines for connecting the crank on the main-shaft to that on the inner paddle-shaft.

drag-saw, s. A cross-cut sawing-machine in which the effective stroke is on the pull motion, not the thrust. The log is clamped by levers. The saw is held aloft by a stirrup while the log is fed forward for another cut.

drag-sheet, s.

Naut.: A sail stretched by spars and thrown over to windward to drag in the water and lessen the lee-way of a drifting vessel. [DRAG-ANCHOR.]

drag-spring, s.

Railway:

1. A spring attached to the drag-bar to lessen the jerk when starting up or increasing speed.

2. A strong spring placed near the back of the tender. It is attached by the ends to the drag-bar which connects the engine and tender, and by the center to the drag-bar which connects the train to the tender.

drag-staff, s.

Vehicles: A pole pivoted to the hind axle and trailing behind a wagon or cart in ascending a hill or slope. Used to hold the vehicle from rolling backward when temporarily stopping on a hill to rest the team.

"The coach wanting a drag-staff, it ran back in spite of all the coachman's skill."—*De Foe: Tour through Great Britain*, II. 297.

drag-gân-tin, s. [DRACANTH.] A mucilage obtained from or consisting of gum-tragacanth.

***drägge** (1), ***drage, s.** [O. Fr. *dragée*, *dragee*, from Low Lat. *dragetum*.] Dredge, a mixture of oats and barley sown together. [DREDGE, s.]

[TRAUCHMAN, TARGUM.]

dräg-ôn, *drag-oun, *drag-un, s. & a. [Fr. *dragon*, from Lat. *dracōnem*, accus. of *draco*; Gr. *drakon*=a dragon, lit. the seeing one, from *derko*=to see; Sp. *dragon*; Port. *dragone*; Ital. *dragone*, *drago*, *draco*; O. H. Ger. *dracho*, *tracho*; Ger. *drache*; Dut. *draak*; Dan. *drage*; Sw. *drake*.]

A. *As substantive*:

I. *Ordinary Language*:

1. *Literally*:

(1) In the same sense as II. 8.

"Lamented chief! it was not given
To thee to change the doom of Heaven,
And crush that dragon in its birth."
Scott: Marmion, III. (Introd.)

(2) A standard. [DRAGON, s.]

† The Red Dragon was by Henry VII. selected as the device of his standard. In compliment to that Tudor monarch the landlords of English public houses made the Red Dragon the sign of their houses, many of which remain to this day.

2. *Figuratively*:

(1) A violent, spiteful person, especially a woman; a virago, a duenna.

(2) A fiery shooting meteor.

"Swift, swift, you dragons of the night!"

Shakesp.: Cymbeline, II. 2.

II. *Technically*:

1. *Scripture*:

(1) The rendering of the Hebrew word *tannin*.

(a) Some species of venomous serpent.

(b) Some huge serpent taken as the symbol of the king of Babylon.

(c) The crocodile (the leviathan of Job), either literally or taken as the symbol of Pharaoh, king of Egypt.

"I am against thee, Pharaoh, king of Egypt, the great dragon that lieth in the midst of his rivers."—*Ezek.* xxx. 8. (Cf. also Psalm cxlv. 13, 14; Isa. xxvii. 1, II. 9.)

(2) The rendering of the Hebrew word *tan* (pl. *tannim*). Some desert animal, probably a quadruped capable of snuffing up the wind (Jer. xiv. 6), living in a den, especially in ruined cities (Isa. xlii. 22; Jer. ix. 11, x. 22, xli. 33, li. 37), holding companionship with "owls"—which should be rendered "ostriches"—(Job xxx. 29; Isa. xxxiv. 13, xlii. 20),

and wailing, if not even howling (Micah i. 8). The animal thus indicated may be the jackal, the voice of which, if like anything earthly, resembles the cry of a half-stifed child. This is more nearly "wailing" than is . . . the moan.

Of the hyena fierce and lone."

(3) The New Testament rendering of the Greek word *drakon*.

(a) *Lit.*: Some one of the animals described under (1) and (2) (Rev. xiii. 11)

(b) *Fig.*: Satan.

"And the great dragon was cast out, that old serpent, called the Devil, and Satan."—*Rev.* xii. 9. (Cf. also Rev. xii. 3, 7, 9, 13, 16, 17; xiii. 2, 4; xvi. 13; xx. 2.)

2. *Mythol.*: A fabulous animal, found in the mythology of nearly all nations, generally as an enormous serpent of abnormal form. Ancient legends represent the dragon as a huge Hydra, watching as sentinel the Garden of the Hesperides, or guarding the tree on which was hung the Golden Fleece at Colchis. In other places he appears as a monster, making the neighborhood around his cave unsafe, and desolating the land; his death being ascribed to a hero or god made for the task, which was a service to all mankind. The dragons which appear in early paintings and sculptures are invariably representations of a winged crocodile.

3. *Art*: In Christian art the dragon is the usual emblem of sin. It is the form under which Satan, the personification of sin, is usually depicted, and is met with in pictures of St. Michael and St. Margaret, when it typifies the conquest over sin; it also appears under the feet of the Savior, and under those of the Virgin, both conveying the same idea. The dragon also typifies idolatry. In pictures of St. George and St. Sylvester it serves to exhibit the triumph of Christianity over paganism. In pictures of St. Martha it figures the inundation of the Rhone, spreading pestilence and death. St. John the Evangelist is sometimes represented holding a chalice, from whence issues a winged dragon. As a symbol of Satan we find the dragon nearly always in the form of the fossil Ichthyosaurus. (*Fairholt.*)

4. *Her.*: The dragon appears on the shield of the most famous of the early Grecian heroes, as well as on the helmets of kings and generals. It is found on English shields after the time of William the Conqueror. In modern heraldry it appears on the shield and helmet; and as supporter it is called a lindworm when it has no wings, and serpent when it has no feet; when it hangs by the head and wings it means a conquered dragon.

5. *Astron.*: A constellation of the northern hemisphere, consisting, according to Flamsteed, of eighty stars, one of which, Gamma Draconis, is that used in determining the coefficient of aberration of the fixed stars.

*6. *Mil.*: A short musket hooked on to a swivel attached to a soldier's belt; so called, according to Meyrick, from a representation of that monster's head at the muzzle (the old fable being that the dragon spouted fire). The soldiers who carried these arms were thence called Dragoons (q. v.).

7. *Bot.*: The popular name of the genus *Dracontium* (q. v.).

8. *Zoölogy*:

(1) *Singular*:

(a) Any of the Monitors properly referred to under (2) (a) (q. v.).

(b) The Lizard, genus *Draco*. It has the first six ribs extended in a nearly straight line, and supporting an expansion of the skin on each side which acts like a pair of parachutes. This enables these animals to take long leaps, if need be, about thirty paces from branch to branch, but there is no beating of the air, and consequently no flying, in the ordinary sense of the word. There are various species in this country, Africa, Java, &c. They are small, harmless animals, quite unlike the flying dragons of mythology, to which nothing similar is found in nature, though a distant resemblance to them is presented by the Pterodactyls of Mesozoic times.

(2) *Plural*:

(a) In Griffith's *Cuvier*, the first sub-division of the Monitors properly so called. The scales are raised with ridges as in the Crocodiles, forming crests on the tail, which is compressed. Best known species, the Great Dragon (*Monitor crocodilinus*) from Guiana. Its flesh is eaten.

(b) The typical name of the genus *Draco*, the sub-family Draconinae, or the family Draconidae.

9. *Ornith.*: A species of carrier pigeons.

B. *As adj.*: Fit for, characteristic of, or pertaining to a dragon; dragonish. [A. II. 2.]

"Beauty . . . had need the guard
Of dragon watch with unenchanted eye."

Milton: Comus, 395.

dragon-bushes, s. pl.

Bot.: Linaria vulgaris. (Britten & Holland.)

dragon-fish, s.

Ichthy.: The same as DRAGONET, 2 (q. v.).

dragon-fly, s.

Entom.: A popular name given to the family Libellulidae, the second family of the tribe Subulcornia, in which the hind wings are approximately of the same size as the anterior, a character which serves to distinguish them from the Ephemeridae. These insects have a large broad head, very freely attached to the thorax, and large, convex, prominent eyes, which often meet upon the crown of the head. The organs of the mouth comprise a pair of strong, horny, toothed mandibles, and a pair of maxillae, showing a single horny lobe, and a palpus of one joint. The wings are closely reticulated, and the legs of moderate length, terminated by three-jointed tarsi. Some 1,400 species have been described from all parts of the world. They are divided into three groups—Agonitidae, Echnidae, and Libellulidae. *Aeschna grandis*, the Great Dragonfly, is nearly three inches long. *Libellula depressa* is the Horse Stinger, an insect nearly two inches long and of a yellowish-brown color.

"The body of the cantharides is bright colored; and it may be that the delicate colored dragon-flies may have likewise some corrosive quality."—*Bacon: Natural History.*

dragon-leech, s. *Hirudo interrupta*, a species of leech used in medicine.

dragon-shell, s.

Conchol.: A name given to a species of *Patella* or limpet, *Cypræa stolidæ*.

***dragon-tree, s.**

Bot.: Dracæna draco. [Dragon's-blood tree.]

***dragon-water, s.** A medicinal remedy which appears to have been very popular in the earlier half of the seventeenth century.

"Mop. Shut up your doors then; Cardus Benedictus or Dragon-water may do good upon him.

Thes. What means you, Mopsus?

Mop. Mean I? what mean you?

To invite me to your house when 'tis infected?"

Randolph: Amynas (1640).

dragon-well, s. An old well in the suburbs of Jerusalem in Nehemiah's time. The word in Hebrew is *tannin*. Why the well was so called is unknown. [DRAGON, II. 1.]

"And I went out by night by the gate of the valley, even before the dragon-well."—*Neh. ii. 13.*

dragon-wort, s.

Botany:

1. *Polygonum bistorta*, a name given, like Snake-weed and Adderwort, on account of its writhed root.

2. *Arum dracunculæ.* (Britten & Holland.)

dragon's-blood, s.

1. *Botany:*

(1) *Calamus draco*, a wing-leaved, slender-stemmed palm, similar in habit to that which furnishes the chair canes. It is a native of Sumatra and other Malayan islands. The fruits, which grow in bunches, are about the size of a cherry, and are covered with imbricating scales of a red color, coated with a resinous substance, which is collected by placing the fruits in a bag and shaking them; the friction loosens the resin, which is then formed into sticks or cakes, and constitutes the best dragon's-blood of commerce. (Smith.)

(2) *Geranium robertianum.* (Britten & Holland.)

2. *Comm.: Sanguis draconis*, a resin, so called on account of its red color. It exudes from various trees, either spontaneously or from incisions. There are three kinds in commerce: (1) East Indian dragon's-blood, which is found on the ripe fruits and leaves of several palms of the genus *Calamus*—viz., *Calamus rotang*, *C. draco*, and *C. petraeus*; (2) American, obtained from incisions in *Pterocarpus draco*, indigenous to the West Indies; and (3) Canary dragon's-blood, from *Dracæna draco*. Dragon's-blood is dark-red brown, opaque, tasteless, scentless, and brittle; it yields by trituration a cinnabar-red powder. When pure it dissolves with a fine red color in alcohol and in ether, and in oils both fixed and volatile; alkalis also dissolve it more or less completely. Nitric acid oxidizes dragon's blood, forming oxalic acid, but dilute nitric acid heated with the resin, yields nitrobenzoic acid. Dragon's-blood, when heated, melts and gives off up to 210° a small quantity of acid watery distillate, containing acetone and benzoic acid. As the heat increases the resin swells up and gives off CO and CO₂, while water is formed, and thick white vapors are evolved, which reduce to a reddish-black liquid. The oily distillate contains two hydrocarbons—dracyl, said to be identical with toluene; and

draconyl, identical with metacinnamene. Dragon's-blood is used for coloring varnishes, for preparing gold lacquers, for tooth tinctures, and for giving a fine red color to marble. (Watts: *Dict. Chem.*)

"Take dragon's-blood, beat it in a mortar, and put it in a cloth with *aquæ vitæ*, and strain them together."—*Peachment.*

† Dragon's-blood tree:

Bot.: Dracæna draco, a tree of the Lily family (Liliaceæ), a native of the West Coast of Africa, Canaries, and adjacent islands. It grows into a large tree, and after attaining a certain height produces branches. The famous dragon-tree of Orotava, in Teneriffe, believed to be the oldest vegetable organism in the world, is stated to have been seventy feet high, and forty-eight in circumference; its stem was hollow, and had a staircase in it as high as the point where its branches commenced. It was destroyed in 1867, having previously suffered much from storms. The red resinous substance, called dragon's-blood is a secretion of matter that collects at the base of the leaves, which, after the leaves fall, hardens, and is then scraped off. (Smith.) [DRACÆNA.]

dragon's-head, s.

1. *Bot.:* The popular name of several plants of the genus *Dracocephalum* (q. v.), of which word it is a translation.

2. *Astron.:* The ascending node of a planet, indicated in almanacs by the symbol \nearrow .

† Dragon's head and tail:

Astron.: The nodes of the planets, or the two points in which the orbits of the planets intercept the ecliptic.

dragon's-heads, s.

Bot.: Antirrhinum majus. (Britten & Holland.)

dragon's-mouth, s.

Bot.: (1) *Digitalis purpurea*, (2) *Antirrhinum majus.* (Britten & Holland.)

dragon's-plant, s.

Bot.: Dracunculus vulgare (*Arum dracunculæ*, Linn.), a tuberous-rooted herb of the Arum family, having a snake-like, mottled stem and pedate leaves, and attaining a height of about three feet. It produces a large dark-colored spathe, which emits an offensive odor, and while the pollen is discharging it gives off sufficient heat to be felt on putting the hand into the spathe. It is a native of the south of Europe, and is common in botanic gardens. (Smith.)

dragon's-skin, s. A familiar term among miners and quarrymen for the stems of *Lepidodendron*, the rhomboidal leaf-scars of which somewhat resemble the scales of reptiles in their form and arrangement. (Page.)

dragon's-tail, s.

1. *Ord. Lang.:* A name given in palmistry to the line making the separation between the hand and the arm. [DISCRIMINAL.]

2. *Astron.:* The descending node of a planet, indicated by the symbol \searrow . [DRAGON'S-HEAD, 2.]

dragon's-teeth, s. pl. Subjects of civil strife; whatever rouses citizens to rise in arms for internecine war. The allusion is to the dragon that guarded the well of Arès. Cadmus slew it, and sowed some of the teeth, from which sprang up the men called Spartans, who killed each other, except five, who were the ancestors of the Thebans.

dragon's-water, s.

Bot.: Calla palustris.

dräg-ôn-ët, *drag-on-ette, s. [A dimin. from *dragon* (1) (q. v.).]

*1. *Ord. Lang.:* A little dragon.

"Or in his womb might lurk some hidden nest Of many dragonettes."—*Spenser: F. Q. I. xii. 10.*

dräin, *drayn, v. t. & i. [A. S. *drehnigean, drehnian, drenian*; cogn. with *drag* (q. v.).]

A. Transitive:

I. Ordinary Language:

1. Literally:

(1) To draw off gradually.

"The fountains *drain* the water from the ground adjacent, and leave but sufficient moisture to breed moss."—*Bacon.*

(2) To filter or pass through some porous substance.

"Salt water *drained* through twenty vessels of earth doth become fresh."—*Bacon: Natural History.*

(3) To make dry by drawing off moisture in channels, pipes, &c.; to draw away moisture from. [II.]

"Sinking waters, the firm land to *drain*,
Filled the capacious deep, and formed the main."
Roscommon.

***(4) To suck dry.**

"The royal babes a tawny wolf shall *drain*;
Then Romulus his grandsire's throne shall gain,
Of martial towers the founder shall become,
The people Romans call, the city Rome."
Dryden: Virgil's Æneid, l. 874-77.

(5) To make dry by pouring the liquid contents away from.

"Then to the gods the rosy juice he pours,
And the *drained* goblet to the chief restores."
Pope: Homer's Odyssey, xviii. 179, 180.

2. Fig.: To empty, to exhaust, to draw off gradually.

"And what hope would there be for Holland, *drained* of her troops, and abandoned by her Stadtholder."—*Macaulay: Hist. Eng.*, ch. vii.

II. Agriculture: To free land from superfluous moisture by means of drains, open channels, &c. [DRAIN, s.]

B. Intransitive:

1. To flow off gradually.

"It was laid in such a position as to permit the juices to *drain* from it."—*Cook: Voyages*, vol. vi., bk. iii., ch. viii.

(2) To be emptied of moisture; to discharge the superfluous moisture.

(3) To become dry by the gradual flowing or dropping off of liquor.

¶ For the difference between *to drain* and *to spend*, see SPEND.

dräin, *dreane, s. [DRAIN, v.]

I. Ordinary Language:

1. Literally:

(1) The act of draining or drawing off superfluous moisture.

(2) In the same sense as II. 1.

(3) [Plural:] The grains from a mash-tub; as, brewers' *drains*.

2. Figuratively:

(1) The act of drawing or exhausting gradually; the process of becoming gradually drawn off or exhausted. [¶]

(2) A drink, a dram. (*Slang.*)

"Two old men, who came in just to have a *drain*."—*Diokens: Sketches by Boz.*

II. Technically:

1. Agric.: A water-course to remove surface water, or so much from the subsoil as interferes with the fertility of that above it. Covered drains are made in a variety of ways: (1) A layer of stones in the bed, covered by the earth which had been removed in digging. (2) Where flat stone is obtainable, two side stones and a cap, covered in with the soil. (3) A duct formed with a flat tile and an arched semi-cylindrical tile, covered in with stones, to allow percolation of water, and closed with soil. (4) In tenacious soils a shoulder may be made in the drain to support flat stones which bear the superincumbent earth. (5) Assorted large stones in the bottom, covered in by smaller stones and a filling of soil. (6) In peaty soils the drain may be covered in with blocks of peat or by turfs which

will preserve their position for a considerable time if laid properly. (7) A bed stone and side stones to form a triangular duct covered in by stones, a layer of turf, and the filling of soil. (8) A duct formed of two semi-cylindrical tiles, respectively above and below a flat tile; the whole covered in by stones and the earth as before. (9) A perforated drain-pipe of circular or oval section covered in by stones and earth.

2. Founding: The trench which conducts the molten metal to the gate of the mold.

¶ **Drain of bullion:** By a drain of bullion is meant the flowing away of gold and silver in coins or in bars, to such an extent as to leave insufficient in the country to meet the requirements of trade. The three principal circumstances which may lead to a drain of bullion from a country are: (1) The relative indebtedness of the country to others with which it trades; (2) a depreciated paper currency; (3) a lower rate of interest for money than prevails in neighboring countries. (*Bithell.*)

drain-pipe, s.

1. Brewing: The pipe through which the wort is drawn from the mash-tub to the under-back.

2. Agric.: A clay pipe, or drain-tile, laid beneath the surface of the soil lower than plow depth, in order to carry off superfluous water and increase the fertility and ease of working the soil. [TILES.] The tempered clay being placed in a cylinder, the piston is depressed and the clay exudes through the annular throat of the do, forming a continuous cylinder which is cut by a wire into sections of the required length. (*Knight.*)

drain-tile, s. A hollow tile used in the formation of drains. Drain-tiles are of many forms. [TILE.] They are usually laid by opening a cutting in the ground as narrow at top as can be conveniently worked, and at bottom forming a smooth bed in which the tile fits. The spades for this purpose are made tapering, and of different sizes.

drain-trap, s. A device for allowing water to pass off without admitting the passage of air through the duct. [SEWING-TRAP.]

drain-well, s. A pit sunk through an impervious stratum of earth to reach a pervious stratum and form a means of drainage for surface water, or a means of discharge of such liquid waste from manufactories as would foul the running water of streams.

drä in-a-ble, a. [Eng. *drain*; -able.] That may or can be drained; capable of drainage.

drä in-age (age as ig), s. [Eng. *drain*; -age.]

1. The act of draining or drawing off the superfluous water; the gradual flowing off of superfluous water.

2. The art or science of draining land; as, a person skilled in *drainage*.

3. The system of drains, sewers, &c., by which any town, land, &c., is drained.

4. The mode or system under which any town, land, or district is drained.

5. That which flows or is carried away through drains or natural channels.

6. A district drained by any particular system.

dräin'ed, pa. par. or a. [DRAIN, v.]

"A draught
Of cool refreshment, *drained* by feverish lips."
Thomas N. Talfourd.

drä in-ër, s. [Eng. *drain*; -er.]

I. Ordinary Language:

1. Literally:

(1) One who or that which drains.

(2) One who constructs or lays out drains for the carrying off of the superfluous water from lands, the drainage of towns, &c.

2. Fig.: One who or that which exhausts, empties, or draws off gradually.

II. Cookery: A plate perforated so as to allow the water, &c., from vegetables, &c., placed upon it, to escape; a strainer.

drä in-ing, pr. par. a. & s. [DRAIN, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. Lit.: The act, art, or process of drawing off the superfluous water, sewage, &c., from lands or towns; drainage.

"The great plague of 1665 induced them to consider with care the defective architecture, *draining*, and ventilation of the capital."—*Macaulay: Hist. Eng.*, ch. iii.

2. Fig.: The act of emptying or exhausting gradually.

draining-auger, s. A horizontal auger occasionally used for boring through a bank to form a channel for water. It is also used for cutting an opening for laying lead-pipe or drain-pipe. In each case it is intended to save the labor of opening a trench. It is also used for draining marl-pits or cellars, when the circumstances of the level suit.

The mode of operation is as follows: the level having been determined, a spot is leveled on the downhill side for placing the machine. The horizontal axis above is turned by two men at the hand-cranks, rotating the vertical shaft and bevel pinion which turns the larger wheel on the shaft of the auger. When the pot of the auger is full, it is withdrawn by rotating the other handle. If hard stones be encountered, the auger is withdrawn, and a chisel or drill substituted.

draining-engine, s. A pumping-engine for removing water from mines, lowlands, &c.

draining-machine, s. A form of filter or machine for expediting the separation of a liquid from the magma or mass of more solid matter which it saturates. It consists of a revolving vessel with perforated or wire-gauze outer surface, which allows the fluid portion to escape while it retains the solid particles. It is much used in draining sugar. [CENTRIFUGAL-MACHINE.]

draining-plow, s. A ditch-digging plow.

draining-pot, s.

Sugar Manufac.: An inverted conical vessel in which wet sugar is placed to drain.

draining-pump, s. A pump (*pompe castraise*) for elevating water containing sand and gravel. The single cylinder is open both at top and bottom, and is traversed by a piston without a valve. The cylinder is inclosed in a larger vessel, water-tight, which is itself filled with water. This larger vessel is divided into two equal parts vertically, by a partition which joins the working cylinder, so that the cylinder itself forms a part of the division. One extremity of the cylinder communicates with the cavity on one side of the partition, and the other with the opposite. The four valves are large balls of india-rubber, loaded in the interior with lead. They are contained in separate boxes by the side of the principal box, and are in communication by pairs with the two cavities into which that box is divided.

draining-tile, s. [DRAIN-TILE.]

dräke (1), s. [A contraction of *ened-rake* or *ened-rake*, a masc. form from A. S. *ened*=a duck; O. II. *Hist., &c.*: A poem or other literary composition intended to present a picture of real life, and to be represented in character on a stage. *Drama* consists of two principal species—tragedy and comedy; the minor species are *tragi-comedy*, *farce*, *burlesque*, and *melodrama*. Both tragedy and comedy were invented by the Greeks. The first comedy was performed at Athens, by *Susarion* and *Dolon*, on a movable scaffold, in B. C. 562. Tragedy followed in B. C. 536, its first writer being *Thespis*. Dresses and the stage were introduced by *Æschylus* in B. C. 486. The drama was introduced into Rome in B. C. 364. The greatest writers of the ancient drama were *Æschylus*, *Sophocles*, and *Euripides* (tragedy), and *Aristophanes* (comedy) among the Greeks; and *Plautus* and *Terence* (comedy), and *Seneca* (tragedy) among the Romans. The modern drama took its rise from the mysteries or sacred plays, by the medium of which the clergy in the Middle Ages endeavored to impart a knowledge of the Christian religion. [MYSTERY.] The first English comedy was *Ralph Roister Doister*, written by *Nicholas Udall*, head-master of Westminster School, before 1551. The greatest of English dramatists were *William Shakespeare*, born 1564, died 1616; *Ben Jonson*, born 1574, died 1637; *Marlowe*; *Beaumont* and *Fletcher*. [MIRACLE PLAY, TRAGEDY, COMEDY.]

*24. A draw-bridge.

"Thay let down the grete draught."—*Gawaine, 817.*

II. Technically:

1. Domestic and Engineering:

(1) The current of air which supplies a fire. When this is not mechanically aided, it is called a natural draught. When driven mechanically, it becomes a forced draught or blast. It is also known as cold or hot blast, according to the temperature; that of the external atmosphere, or artificially heated.

(2) The course or direction of the hot air and smoke; as, a direct, a reverting, a split, or a wheel draught.

2. *Masonry*: Chisel-dressing at the angles of stones serving as a guide for the leveling of the surfaces.

3. *Pattern-making*: The amount of taper given to a pattern to enable it to be withdrawn from the mold, without disturbing the loam.

4. *Weaving*: The arrangement of the heddles so as to move the warp for the formation of the kind of ornamental figure to be exhibited by the fabric. Known also as Drawing, Reeding-in, Cording of the loom. In every species of weaving, whether direct or cross, the whole difference of pattern or effect is produced either by the succession in which the threads of warp are introduced into the heddles, or by the succession in which those heddles are moved in the working. The heddles being stretched between two shafts of wood, all the heddles connected by the same shafts are called a leaf; and as the operation of introducing the warp into any number of leaves is called drawing a warp, the plan of succession is called a draught.

5. *Comm.*: An allowance for waste made on goods sold by weight; also an allowance on excisable goods.

6. *Med.*: A medicine prepared to be taken as a drink.

7. *Games (pl.)*: A game slightly resembling chess, and played on a chess-board with twelve pieces or men on each side. The men are played on each alternate square, and the object of each side is to capture all the pieces of the opponent. The pieces move forward diagonally, one square at a time, except when capturing a piece, which is done by jumping over any piece the square behind which is unoccupied. Any piece which succeeds in reaching the extreme end of the board is "crowned," and is then termed a king, and has the power of moving in any direction backward or forward. The game was unknown to the ancients. It is mentioned in A. D. 1551. It was also called *jeu des dames*, or *dame* (q. v.).

8. *Shipbuilding*: The drawing or design by which the ship is to be built, which is generally on a scale of one-fourth of an inch to the foot.

*9. *Banking*: The same as DRAFT, A. II. 1.

B. As adjective:

1. Used or adapted for the draught of vehicles, loads, &c.

"The most occasion that farmers have, is for draught horses."—*Mortimer: Husbandry*.

2. Written or given in outline; of the nature of a draught.

"Having stated in the said draught note."—*Trial of W. Humphreys (1839), p. 5.*

3. Drawn from a cask or barrel; as, draught ale.

¶ (1) *Angle of draught*: The angle made with the line of motion in a plane, over which a body is drawn, by the line of draught, when the latter has the direction best adapted to overcome the obstacles of friction and the weight of the body.

(2) *On draught*: Supplied or drawn direct from the cask.

draught-bar, draft-bar, s.

1. A swingle-tree, double or single.

2. The bar of a railway-carriage with which the coupling is immediately connected.

draught-board, s. The board on which the game of draughts is played.

"Evangeline brought the draught-board out of its corner."—*Longfellow: Evangeline, i. 3.*

draught-box, draft-box, s. An airtight tube, invented by Parker, by which the water from an elevated wheel is conducted to the tail-race. It is a means of rendering the whole fall available without placing the wheel at the bottom. It is sometimes used to avoid extreme length of wheel-shaft; at other times to conform the arrangements to the peculiar location, rendering it necessary to place the wheel at a distance above tail-water.

draught-compasses, s. pl. Compasses with movable points, used for drawing the finer lines in mechanical drawings, plans, &c.

draught-engine, draft-engine, s.

Mining: An engine (usually steam) for elevating ore, coal, miners, &c., or for pumping out water.

draught-equalizer, draft-equalizer, s. A treble tree; a mode of arranging the whiffletrees when three horses are pulling abreast, so that they may all exert an equal amount of force.

draught-furnace, draft-furnace, s. A reverberatory air-furnace; one in which a blast is employed.

draught-hole, draft-hole, s. The hole whereby a furnace is supplied with air.

draught-hook, draft-hook, s. One of the hooks on the cheeks of a gun-carriage to maneuver it, or attach additional draught-gear in steep places.

draught-horse, s. A horse used for drawing heavy loads.

***draught-house, s.** A house where filth is deposited; a jakes, a privy.

"And they brake down the image of Baal, and brake down the house of Baal, and made it a draught-house."—*2 Kings x. 27.*

draught-net, s. [DRAFT-NET.]

draught-ox, s. An ox employed in drawing heavy loads.

draught-regulator, draft-regulator, s. A means for opening and closing furnace-doors, or dampers in the air, draught, or discharge flue, so as to urge the fire or moderate its intensity, respectively, as it may lag below or quicken above the desired standard. Automatic devices for this purpose are actuated by arrangements known as thermostats. These usually depend upon the expansion of metal by heat and its consequent contraction as it cools. The lengthening or shortening of a metallic rod is the actuating force which is communicated by levers or other mechanism to the door, register, or damper. As a certain relation exists—under ordinary conditions—between the heat of steam and its pressure, the heat or pressure of steam acting on a column of mercury may be made by electric connection to actuate a magnet, and so operate the device which governs access of air to the furnace, or determines the area of the flue by which the volatile results of combustion are discharged. [DAMP-ER.]

draught-rod, draft-rod, s.

Plow: A rod extending beneath the beam from the clevis to the sheath and taking the strain off the beam.

draught-spring, draft-spring, s. A spring intervening between the tug or trace of a draught animal and the load, whereby a jerking strain upon the animal is avoided. Draught-springs are connected to the draw-bars of railway-carriages, to lessen the violence of the jerk communicated to them in starting.

draught (as draft), v. t. [DRAFT, s.]

1. To draw out.

"You saw all the great men . . . draughted out one by one, and baited in their turns."—*Addison: Freeholder, No. 19.*

2. To draw up, to sketch, to compose in outline, to draft.

3. To detach and send elsewhere for service; to draft.

"Greater hulks *draw* deep."

Shakespeare: *Titulus and Cressida*, ii. 3.

¶ Crabb thus discriminates between to *draw*, to *pull*, to *haul*, to *drag*, to *pluck*, and to *tug*: "Draw expresses here the idea common to the first three terms, namely, of putting a body in motion from behind one's self or toward one's self; to *drag* is to draw a thing with violence, or to *drag* that which makes resistance; to *haul* is to draw it with still greater violence. We *draw* a cart; we *drag* a body along the ground; or *haul* a vessel to the shore. To *pull* signifies only an effort to draw without the idea of motion: horses *pull* very long sometimes before they can *draw* a heavily-laden cart up hill. To *pluck* is to pull with a sudden twitch, in order to separate; thus, feathers are *plucked* from animals. To *tug* is to pull with violence; thus, men *tug* at the oar. In the moral application we may be *drawn* by anything which can act on the mind to bring us nearer to an object; we are *dragged* only by means of force; we *pull* a thing toward us by a direct effort. To *haul*, *pluck*, and *tug* are seldom used but in the physical application." (Crabb: *Eng. Synon.*)

draw-bridge, *drau-bridge, *draw-bridg, *draw-brugge, s. A form of bridge in which the span is removable from the opening to allow masted vessels to pass, or to prevent crossing. Draw-bridges were in medieval times used to span the fosse or moat, the movable part being made to rise vertically, so as to present a two-fold obstacle to any enemy, a chasm and a strengthened barrier. In most modern draw-bridges the movable part is made to move horizontally. Draw-bridges are used in crossing canals, rivers, and dock entrances, which are occasionally traversed by masted vessels. They are also used in crossing the ditches, fosses, and moats of fortifications. They are of four kinds: (1) The lifting-bridge is used in Holland upon the canals and in fortifications, in places where the roadway is near the level of the water. The bridge is lifted bodily and supported by a heavy framework, while the vessel passes. [LIFTING-BRIDGE.] (2) The turning-bridge or swing-bridge moves on a vertical pivot, being sometimes in two sections which meet halfway across the water-course. The portion on land is a counterpoise for that projecting over the water, and the bridge moves in arc-shaped tracks, resting on cannon-balls. [SWING-BRIDGE.] It is sometimes supported by a central post and swings 90°, opening two passages for vessels, one on each side. This is a pivot bridge. (3) The bascule-bridge turns on a horizontal pivot, standing in a vertical position on the side of the water-way while the vessel passes by. Specimens of the last two kinds with slight modifications are to be seen in Chicago over the Chicago river. The inner end of some bascule-bridges is in excess of the weight of the roadway, and descends into a pit built with hydraulic masonry. This pit is not material, perhaps, in fortifications, and is not desirable in ordinary road or dock work. When it is omitted the bridge is called a jack-knife bridge. [BASCULE-BRIDGE.] (4) The rolling-bridge has been introduced on some English railways. The bridge passes laterally upon a carriage until it has passed the junction of the line of rails, and then rolls inward to leave the water-way clear.

Draw-bridge.

"There is not of that castle-gate,
Its draw-bridge and portcullis weight,
Stone, bar, moat, bridge, or barrier left."
Byron: *Mazeppa*, x.

draw-cut, s. An oblique motion of a knife, so as to move lengthwise across an object as well as cutting into it.

draw-filing, s. Drawing a file longitudinally up and down a piece of metal, without giving the tool any movement in the direction of its length.

draw-gate, s. The valve of a sluice, either of a canal, a flushing arrangement, or a flume or penstock of a water-wheel.

draw-gauge cutter, s. A harnessmaker's tool for cutting strips of leather of any set width. [GAUGE-KNIFE.]

draw-gear, s. The coupling parts of railway carriages.

***draw-gloves, s.** A sort of trifling game, the particulars of which the learned have not yet discovered. Herrick has mentioned it several times, and made it the subject of the following epigram:

"At draw-gloves we'll play,
And prethee let's lay
A wager, and let it be this:
Who first to the sum
Of twenty shall come,
Shall have for his winning a kiss."
Hesper: *Draw-gloves*.

draw-head, s.

1. *Rail:* The projecting part of a draw-bar in which the coupling-pin connects with the link.
2. *Spin:* A device in spinning in which the slivers are lengthened and receive an additional twist.

draw-kiln, s. A lime-kiln arranged to afford a continuous supply of lime from below, fuel and limestone being fed in above from time to time. Also called a Running kiln, or Continuous kiln.

***draw-latch, *draw-latches, s.** A thief.

"Well, phisitian, attend in my chamber heere, till Stile and I return; and if I pepper him not, say I am not worthy to be caid a duke, but a draw-latch."—*Tragedy of Hoffman* (1691).

draw-link, s. A connecting-link for railway carriages.

draw-loom, s.

Weaving: The draw-loom was the predecessor of the Jacquard, and is used in figure weaving. The number of the heddles being too great to be worked by the feet of the weaver, the warp-threads are passed through loops formed in strings, arranged in a vertical plane, one string to every warp-thread; and these strings are arranged in separate groups, which are pulled by a draw-boy, in such order as may be required to produce the pattern. The groups are drawn by pressure on handles, the required order being determined by reference to a design, painted on paper, which is divided up into small squares. A mechanical draw-boy has been contrived, to dispense with human assistance. It consists of a half-wheel with a rim grooved so as to catch into the strings requiring to be pulled down. The half-wheel travels along a toothed bar, with an oscillating motion from right to left, and draws down the particular cords required for the pattern. [Knight.]

draw-net, s. A net with large meshes, used for catching the larger varieties of fowls.

draw-pedro, s. [PEDRO, s.] A game at cards.

draw-plate, s. A drilled steel plate or ruby through which a wire or ribbon of metal is drawn to reduce and equalize it. The draw-plate is made of a cylindrical piece of cast-steel, one side being flattened off. Several holes of graduated sizes are punched through the plate from the flat side, and the holes are somewhat conical in form. The wire is cleaned of its oxide in a tumbling-box, and is then annealed. It is then drawn through as many of the holes in succession as may be necessary to bring it to the required size. The wire is occasionally annealed to remove the hardness incident to compression in the plate, and pickled to remove scale. The sharpened end being passed through a hole in the plate, it is drawn through sufficiently to attach it to the wheel. This, being revolved, draws the wire through the plate and resists it up as drawn. The coil from which it is drawn is dampened with starch-water or beer-grounds as a lubricator. For fine work, such as the drawing of gold and silver wire, the draw-hole is made of a drilled ruby. Wire for balance-springs of watches is drawn through a pair of flat rubies with rounded edges.

draw-point, s.

Engrav: The etching-needle used on the bare point; also called Dry-point.

draw-poker, s. [POKER, s.] A game at cards.

draw-spring, s. The spring of a draw-head; a spring coupling-device for railway carriages.

draw-tube, s. The adjustable tube of a compound microscope, having the eyepiece at its outer end, and the erecting-glass (if any) at its inner end.

draw-well, s. A deep well from which water is drawn by means of a rope and bucket.

draw'-a-bie, a. [Eng. *draw*; -able.] That may or can be drawn.

"By a magic might
Drawable here and there."
More: *Song of the Soul*.

draw'-back, s. [Eng. *draw*, and *back*.]

I. Ordinary Language:

1. *Lit.:* In the same sense as II.

2. *Fig.:* A cause of loss of profit or advantage; a disadvantage, an inconvenience, an obstacle.

"I am not insensible that third nights are disagreeable drawbacks upon the annual profits of the stage."—*Goldsmith: Potite Learning*, ch. xii.

II. Comm.: An amount of money paid back or allowed; specifically, a certain amount of customs or duties refunded or remitted to an exporter of goods which have been previously imported, and on which duty has been paid; a certain allowance of excise duty on the exportation of goods of home manufacture.

"In poundage and drawbacks I lose half my rent."
Swift.

***Draw'-cān-sīr, s. & a.** [See definition.]

A. As substantive:

C. As substantive:

I. Ordinary Language:

1. The act of pulling, dragging, or hauling by force.

"Without the *drawing* forth of his sword."—*Holinshed: Henry II. (an. 1171)*.

2. The act or art of delineating or representing figures, &c., on a flat surface by means of lines drawn with a pencil, crayon, pen, &c. The making or copying of plans, and views of buildings, machinery, and other structures. It is divisible into Geometrical or Linear, and Mechanical drawing, in which instruments are used, and Free-hand drawing.

3. A picture, a sketch, a representation.

"Masterly rough *drawings* which are kept within."—*Shaftesbury: Advice to an Author*, pt. i., § 3.

4. The act of distributing prizes in a lottery by lots drawn; the selection of certain numbers by drawing them out of a box or wheel.

5. The amount of money taken in any establishment for goods sold; takings, receipts. (Generally in the plural.)

II. Technically:

1. *Metal:* The operation of hammering, rolling, or drawing through a die, by which a bar or rod of metal or a wire is extended in length to form a rod, tube, or plate.

2. *Founding:* Said of a pattern whose shape is such that it may be withdrawn from the sand without breaking the molded form. [DRAUGHT, s., A. II. 3.]

3. *Spinning:* The gaining of the mule-carriage; its progress after the feed is stopped draws out the yarn.

4. *Fiber:* Extending a sliver for the purpose of drawing its fibers parallel and increasing its length. The drawing and doubling process first draws out the slivers as produced by the finishing card by means of drawing-rollers, and then unites several of these into one. The object of the first operation is

fāte, fāt, fāre, amidst, whāt, fāl, father; wē, wēt, hēre, camel, hēr, thēre; pīne, plt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trȳ, sȳrian. æ, œ = ē; ey = ā. qu = kw.

to draw each fiber past the next one, thus placing them still more completely parallel to each other; while that of the second is to neutralize the inequalities in each separate sliver, and to strengthen them after having been extended. [DRAWING-FRAME.]

drawing-account, s.

Comm.: A sum of money left in a banker's hands, upon which checks can be drawn at any time without notice; a deposit account.

drawing-awl, s.

Leather: A leather-worker's awl, having a hole near the point in which the thread is inserted and pushed through in sewing, &c.

drawing-bench, s. An apparatus invented by Sir John Barton, formerly comptroller of the British Mint. Strips of metal are brought to an exact thickness and width by being drawn through a gauged opening, made by two cylinders in the required proximity and prevented from rotating.

drawing-board, s. A square frame, with either a continuous surface or a movable panel, for holding a sheet of paper while plotting, projecting, &c.

drawing-compass, s. An instrument with two legs, used for striking circles and curves. One leg has a pen or pencil, and it has several modifications, such as Bow-pen, Bow-pencil, Beam-compass, &c. Compasses for measuring and transferring measurements are called Dividers, Bisection compass, Proportional-compass, &c. [COMPASS.]

drawing-frame, s.

1. **Spinning:** A machine in which the slivers of cotton or wool from the carding-machine are attenuated by passing through consecutive pairs of rollers, each successive pair rotating at a higher speed than its predecessor. The device was first invented by Leon Paul, patented 1738; and perfected by Arkwright, patent 1769. It was called a water-frame, from the circumstance that Arkwright's machinery was driven by water-power. It was named a throstle, from the brisk singing or humming sound made by it. [THROSTLE.] It is used in the process of doubling slivers [DOUBLER], and is indispensable in the bobbin-and-fly frame and the mule (q.v.). The drawing-frame, disconnected with any spinning operation, is a machine to elongate the spongy slivers produced by the carding-machine, to straighten the filaments and lay them parallel. The drawing-frame is also used to equalize slivers by condensing a number into one [DOUBLING], and then elongating them so as to overcome special defects. Filaments which have become doubled over the teeth of the carding-machine are also straightened in the process of doubling and drawing. The drawing-frame consists of three pairs of rollers, the upper ones being covered with leather and the lower ones fluted longitudinally. The upper ones have an imposed weight, and the lower ones are driven by power, and carry those above. The rollers are driven with varying degrees of velocity; the second say, at a speed double that of the first, and the third or delivery rollers at a speed five times that of the second.

2. **Silk-mach.:** A machine in which the fibers of floss or refuse silk are laid parallel, preparatory to being cut into lengths by the cutting-engine, to be afterward worked like cotton.

drawing-in, s.

Weaving:

1. The process of arranging the yarn threads in the loops of the respective heddles.

2. The arrangement of the heddles in accordance with the requirements of the ornament to be exhibited; the draft or cording of the loom.

drawing-knife, s.

1. A blade having a handle at each end, and used by coopers, wagou-makers, and carpenters. It is usually operated in connection with a shaving-horse, which holds the stave, spoke, shingle, ax-handle, or other article which is being shaved.

2. A tool used for cutting a groove as a starting for a saw-kerf.

drawing-machine, s.

1. One for elongating the soft roving of fiber. [DRAWING-FRAME.]

2. One for drawing a strip of metal through a gauged opening to equalize its size. [DRAWING-BENCH.]

3. A form of spinning-machine for ductile sheet-metal.

drawing-master, s. One whose profession it is to teach the art of drawing.

drawing-paper, s. A variety of large white paper, made preferably of linen stock, and of fourteen sizes. The sizes of drawing-paper are—Cap, 13 by 16; Demy, 15½ by 18½; Medium, 18 by 22; Royal, 19 by 24; Super-royal, 19 by 27; Imperial, 21½ by 29; Elephant, 22½ by 27½; Columbia, 23 by 33½; Atlas, 26 by 33; Theorem, 28 by 34; Double Elephant,

26 by 40; Antiquarian, 31 by 52; Emperor, 40 by 60; and Uncle Sam, 48 by 120 inches. These are about the usual sizes, but the scales of different makers vary to some extent.

drawing-pen, s. A pen for ruling lines, consisting, in its most usual form, of a pair of steel blades, between which the ink is contained, the thickness of the line being determined by the adjustment as to distance of the said blades. The ends of the steel blades are elliptical, sharp, and exactly even. A dotting-pen makes a succession of dots, being formed of a roulette rotating in a stock. [DOTTING-PEN.]

drawing-pencil, s. A black-lead pencil of hard quality, made especially for drawing lines. [LEAD-PENCIL.]

drawing-pin, s. A flat-headed tack for temporarily securing drawing-paper to a board. A thumb-tack.

drawing-pliers, s.

Wire-drawing: The nippers whereby the wire is grasped when pulling through the draw-plate.

drawing-point, s. A steel tool for drawing straight lines on metallic plates. A scriber for metal. The draw-point or dry-point of an engraver makes its mark directly upon the metal, and not as the etching-point, which makes a mark through a ground, the line being subsequently eaten into the metal by acid. [ETCHING.]

drawing-roller, s. The fluted roller of the drawing-machine, elongating the sliver. [DRAWING-FRAME.]

drawing-slate, s. A fine variety of slate, used for the manufacture of slate-pencils, &c. It is fine-grained and compact, and contains a large amount of carbonaceous ingredients. It is also called Black-chalk.

draw-ing-room, s. [A contraction for *withdrawing-room*, i. e., the room to which company withdraws from the dining-room.]

1. A room in a house reserved for the reception of company.

"What you heard of the words spoken of you in the *drawing-room* was not true: the sayings of princes are generally as ill related as the sayings of wits."—Pope.

2. A formal reception by a queen, or person of high rank.

"The Queen's *drawing-room* was, on that day, deserted."—Macaulay: *Hist. Eng.*, ch. xvii.

(1) A sound, music.

"The bemene *drem* the engles blewen."

Old Eng. Homilies, II. 115.

(2) A phantasm of sleep; the thoughts, or series of thoughts, of a sleeping person, in which he seems to see things real and substantial.

"What, what, my lord, are you so choleric

With Eleanor, for telling but her dream?"

Shakesp.: *Henry VI., Pt. II., i. 2.*

2. *Figuratively:*

(1) An unfounded or idle fancy; an unreality, a wild conceit.

"Let him keep

At point a hundred knights; yes, that on every *dream*,

Each buzz, each fancy, each complaint, dislike,

He may enguard his dotage with their powers."

Shakesp.: *Lear*, I. 4.

(2) A vague vision.

"But in the porch the king and herald rest;

Sad *dreams* of care yet wand'ring in their breast."

Pope: *Homer's Iliad*, xxiv. 844, 845.

II. Technically:

1. *Scrip.:* Two kinds of dreams are referred to in the Bible: these may be called ordinary and extraordinary, or natural and supernatural dreams. The first are thus philosophically accounted for: "A dream cometh through the multitude of business" (Eccl. v. 3); in other words, a man in business who is full of projects and perplexed with anxieties, goes to bed with his mind so excited that he sleeps imperfectly, and has vivid dreams which remain in his memory after he awakes. The method of operation in the extraordinary or supernatural dreams is thus stated: "For God speaketh once, yea twice, yet man perceiveth it not. In a dream, in a vision of the night, when deep sleep falleth upon men, in slumberings upon the bed; then he openeth the ears of men, and sealeth their instruction" (Job xxxiii. 14-16). God gave directions as to conduct or duty by this method to Abimelech (Gen. xx. 3-7), to Jacob (Gen. xxxi. 11-13), to Laban (Gen. xxxi. 24), to Joseph, the spouse of the Virgin Mary (Matt. i. 20), and to others. There were also many prophetic dreams: as those of Joseph (Gen. xxxvii. 5-11), of Pharaoh's chief butler and his chief baker (Gen. xl. 5), and of Nebuchadnezzar (Dan. ii. 1-45), &c.

2. *Mental Phil.:* It is a matter of dispute whether the mind sleeps or whether trains of ideas are interruptedly passing through the former at all times, by night as well as by day. If the latter hypothesis be accepted, then we continually dream when asleep, though only a fraction of our nightly visions, being those which we see when half awake, leave deep enough traces in the memory to be afterward recalled. In sleep every train of ideas seems to us a series of events passing before the eyes, or of objects affecting the senses; and as, on the principle of association, ideas are linked together in various ways, like the meshes of a net rather than the links of a chain, the sleeper is capable of calling up before him the absent, the dead, distant times and places as he fancies them to be, with no sense of anachronism or incongruity. Some external cause—a sudden noise, for instance, falling upon the ear so loudly as to compel partial attention to its occurrence—will set in motion a long train of ideas, each following its predecessor "with the quickness of thought." Each of these ideas being mistaken for an occurrence, one will fancy he has lived through exciting days, weeks, months, or even years, when in reality not ten minutes, or perhaps seconds, have elapsed since the noise was heard. Health, and especially proper digestion, with absence of remorse, tends to make dreams pleasurable; the presence of one or all of these has the contrary effect. (For the dreams of Scripture see 1.) Various instances of apparently prophetic dreams are on record, and every one hears others from his acquaintances. Opinions are divided as to the explanation of these perplexing phenomena.

*Crabb thus discriminates between *dream* and *reverie*: "Dreams and reveries are alike opposed to the reality, and have their origin in the imagination; but the former commonly pass in sleep, and the latter when awake: the *dream* may, and does commonly, arise when the imagination is in a sound state; the *reverie* is the fruit of a heated imagination; *dreams* come in the course of nature: *reveries* are the consequence of a peculiar ferment. When the *dream* is applied to the act of one that is awake, it admits of another distinction from *reverie*. They both designate what is confounded, but the *dream* is less extravagant than the *reverie*. Ambitious men please themselves with *dreams* of future greatness; enthusiasts debase the purity of the Christian religion by blending their own wild *reveries* with the doctrines of the Gospel. He who indulges himself in idle *dreams* lays up a store of disappointment for himself when he recovers his recollection, and finds that it is nothing but a *dream*; a love of singularity operating on an ardent mind will too often lead men to indulge in strange *reveries*." (Crabb: *Eng. Synon.*)

dream-determined, a. That which comes to pass or is determined by a dream.

"In what veiled hour or *dream-determined* place."

A. C. Swinburne: *Tristram of Lyonesse*, I.

dream-like, a. Faint, unreal, unsubstantial.

consists of a square-ended, broad-bottomed scow, in the hull of which is contained a powerful steam engine, and sprocket-wheels around which are wound the chains used in the gearing of the lifting scoop. At each side and on the rear end of the vessel are adjustable posts, which can be raised and lowered from and to the bottom of the water, thus affording, when driven into the bed of the harbor, a secure anchorage. To the front end is attached the crane carrying the scoop. This latter swings both vertically and horizontally, being fixed on the end of a long, stout beam, which is plunged end foremost into the water, and then scraped along the bottom after the manner of a shovel, and from its point of starting from the bottom describing in its rise the segment of a circle. The raising is effected by means of chains run over sprocket-wheels with horizontal axes, while the lateral swing of the arm bearing the scoop is effected by having the crane which carries it pivoted, and geared with chains controlled by horizontal sprockets. The bottom of the scoop is hinged to the body, with a downward swing, being fastened in its place when closed by a spring snap-catch, which is operated by a line from the scow, enabling the workman to empty the load of the scoop into the tender, over which the arm of the crane is swung for the purpose. When the scoop strikes the water again the pressure closes the bottom, and the spring-bolt engages the mortise intended to receive it. From twenty to thirty feet depth can be secured with this machine. In England the steam dredging-machine, now so commonly in use in harbors liable to become silted up, has a succession of buckets on an endless chain, which traverses on a frame whose lower end is vertically adjustable, so as to regulate the depth at which it works. It was first successfully used in England by Hughes, in 1804. The machine is driven by a steam-engine through the intervention of gearing, steadied by a fly-wheel. A long shaft amidships conveys the motion from the gearing about the engine to the upper drum, around which the endless chain works. The buckets discharge at the stern of the vessel, dropping the mud into a lighter. The lower end of the swinging-frame is adjusted as to depth by means of a suspensory chain, which is wound upon a drum rotated by clutch-connection with the spur-gearing when necessary. (Knight.)

dredging-vessel, s. The same as DREDGE-BOAT (q. v.).

"Abhorrence of those druggy, low delights."—*Bates: Christian Religion proved by Reason*, ch. i.

drégg, *dregges, s. pl. [Icel. *drégg* (pl. *dréggjar*); cogn. with Sw. *drägg*; prob. from Icel. *draga*=to draw. (*Skeat.*)]

1. *Lit.*: The sediment, lees, or grounds of liquor; feculence. (Obsolete now in the singular.)

"I kan selle dregges and draf."

P. Plowman, 13,760.

II. *Figuratively*:

1. The end, the bottom, the last.

"I will here shroud till the dregs of the storm be past."—*Shakesp.: Tempest*, ii. 2.

2. Worthless refuse or vile matter; the refuse or most worthless part of anything.

"Major-generals sprung from the dregs of the people."—*Macaulay: Hist. Eng.*, ch. vi.

¶ Crabb thus discriminates between *dregs*, *sediment*, *dross*, *scum*, and *refuse*: "All these terms designate the worthless part of any body; but *dregs* is taken in a worse sense than *sediment*: for the *dregs* is that which is altogether of no value, but the *sediment* may sometimes form a necessary part of the body. The *dregs* are mostly a *sediment* in liquors, but many things are a *sediment* which are not *dregs*. After the *dregs* are taken away, there will frequently remain a *sediment*; the *dregs* are commonly the corrupt part which separates from compound liquids, as wine or beer; the *sediment* consists of the heavy particles which belong to all simple liquids, not excepting water itself. The *dregs* and *sediment* separate of themselves, but the *scum* and *dross* are forced out by a process; the former from liquids, and the latter from solid bodies rendered liquid or otherwise. *Refuse*, as its derivation implies, is always said of that which is intentionally separated to be thrown away, and agrees with the former terms only in as much as they express what is worthless. Of these terms, *dregs*, *scum*, and *refuse* admit likewise of a figurative application. The *dregs* and *scum* of the people are the corrupt part of any society; and the *refuse* is that which is most worthless and unfit for a respectable community." (Crabb: *Eng. Synon.*)

II. Technically:

1. **Arch.** The push, shoot, or horizontal thrust of an arch or vault upon the abutments.

2. **Geol.** A loose aggregation or accumulation of transported matter, consisting of sand and clay, with a mixture of angular and rounded fragments of rock, some of large size having occasionally one or more of their sides flattened or smoothed, or even highly polished. The smoothed surfaces usually exhibit many scratches parallel to each other, one set often crossing an older one. The drift is generally unstratified, in which case it is called Till (q. v.). This may be in places 50 or even 100 feet thick. As a rule, the sand, gravel, pebbles, and boulders have been derived from rocks existing in the immediate vicinity, but in some cases there are blocks which have traveled far, and are of quite different material from any to be found where they lie. [ERRATICS, DRIFT-PERIOD.]

3. **Ordnance:** A priming-iron to clean the vent of a piece of ordnance from burning particles after each discharge.

4. **Mach.** A round piece of steel, made slightly tapering, and used for enlarging a hole in a metallic plate by being driven through it. The drift may have a cutting edge merely upon its advance face, or it may have spirally cut grooves which give the sides of the drift a capacity for cutting.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hère, camel, hër, thère; pine, plit, sire, sir, marine; gö, pöt, or, wöre, wöf, wörk, whö, sön; müte, cüb, cüre, unite, cür, räle, füll; trÿ, Sÿrian. æ, œ = é; ey = ä. qu = kw.

5. Mining:

(1) A passage in a mine, horizontal or nearly so, forming a road for the extraction of ore, or a drain for carrying off the water. The name is derived from its being driven in. Driving is horizontal work; sinking and rising refer to the direction of work either in shafts or in following the course of a vein. [ADIT, GALLERY.]

(2) The course or direction of a tunnel or gallery.

6. *Naut.*: The direction of a current; the leeway of a ship.

7. *Pyrotech.*: A stick used in charging rocket-cases.

8. Shipbuilding:

(1) Drifts in the sheer draft are where the rails are cut off and ended with a scroll. Pieces fitted to form the drifts are called drift-pieces.

(2) The difference in size between a treenail and its hole, or a hoop and the spar on which it is driven.

(3) The part of the upper strake between the coach and the quarter-deck.

9. *Drift of the forest*:

Old Law: An exact view or examination of what cattle are in the forest, that it may be known whether it be overcharged or not, and whose the beasts are, and whether they are commonable beasts. (Blount.)

drift-anchor, s.

Naut.: A triangular frame of wood or other similar contrivance, having just sufficient buoyancy to float, to which a line that leads from the bows of the ship is attached. It keeps the vessel's head to wind when dismasted, or when it is impossible to carry sail. [DRAG-ANCHOR.]

drift-bolt, s. A rod used to drive out a bolt.

drift-land, s.

Old Law: A yearly rent paid by some tenants for the privilege or right of driving cattle through a manor.

drift-net, s. A fishing-net about 120 ft. long and 20 ft. deep, corked at the upper edge. Several of these may be connected lengthwise and attached to a drift-rope. Meshes 2½ in. and upward, according to the size of fish.

drift-period, s.

Geol.: The period during which the drift described under DRIFT, II. 2, was deposited. Though there is no reason why it should not have recurred time after time during bygone geological ages, and perhaps it may be ultimately proved conclusively that it has done so, yet the term "drift-period" as a measure of duration is limited to the time commencing during the Newer Pliocene or Pleistocene, and terminating with the Post Pliocene or Post Pleistocene, during which drift was deposited in the latitudes in which we find it now. That it is essentially a glacial phenomenon is apparent from the fact that while becoming more marked in its character on this side the equator the further north one goes, it dies out about 30° N. latitude in Europe and 40° in North America. Hence it is often called Northern Drift. A corresponding development of it, however, exists in the Southern hemisphere. This becomes more marked as one approaches the Southern pole, and disappears between 40° and 50° S. latitude. Where it exists nearer the equator it is deposited around some giant mountain, the scratches and striations on the boulders and pebbles radiating from the mountain on every side.

The drift is now universally attributed, as Agassiz long ago suggested, to the action of ice; the only controversy remaining being whether land ice or floating icebergs took the chief part in its distribution. Hence it is often called, as by Sir Charles Lyell, Glacial Drift. In the Tabular view of the Fossiliferous Strata given in his *Students' Elements of Geology*, "the Glacial drift of Northern Europe" is arranged as the oldest deposit of the Post Pliocene (q. v.). [GLACIAL PERIOD.]

drift-piece, s.

Shipbuild.: One of the upright or curved pieces of timber that connect the plank-sheer with the gun-wale.

drift-pin, s. A hand tool of metal driven into a hole to shape it; as the drift which makes the square socket in the watch-key. (2) A droning, monotonous noise or sound: as of a bagpipe.

"The drone of a Lincolnshire bagpipe."—*Shakesp.: Henry IV.*, Pt. I., i. 2.

(3) The humming sound made by a bee.

II. Technically:

1. Music:

(1) The monotonous bass produced from the larger of the three pipes of bagpipes. As there are no governing holes in the drone, the sound it gives forth serves as a continuous bass to any melody; the pipe second in size is tuned to give out the fifth above the drone; and the smaller pipe, called the chanter, has ventages by which the melody is made. [BAGPIPES.] (*Stainer & Barrett*.)

(2) A name given to the three lower pipes of the bagpipe, which each emit only a single tone; usually two octaves of the key-note D, and the fifth A. They are distinguished from the chanter, which has the power of producing a melodious succession of notes. (*Grove*.)

(3) The chorus or burden of a song.

(4) The term has been transferred to continuous bass in a composition, usually of a pastoral kind. (*Grove*.) Also called Drone-bass.

drop-hammer, s. A hammer in which the weight is raised by a strap or similar device, and then released so as to drop upon the object below, which rests upon the anvil. It is used in swaging, die-work, striking up sheet-metal, jewelry, &c. The hammer-strap is drawn upward by means of two pulleys, which are brought together so as to compress the strap between them. One of these, the driving-pulley, is fast upon its axle and turns in fixed bearings, while the other turns loosely upon an eccentrically journaled axis, arranged also in fixed bearings, but so as to be incapable of turning therein except as force is applied to it to effect that object. To one end of the latter shaft there is attached a horizontal arm, the outer end of which is connected to a hand-lever or treadle by a connecting-rod. By means of these appliances the eccentrically journaled shaft can be turned at will, so as to remove its roller from contact with the strap, and allow the hammer to fall through any length of space desired, within the limits of the machine. (Knight.)

Other forms are *Ascites* (q. v.), *Renal*, *Cardiac*, *Hepatic*, and *Dropsy* from pressure of tumors on veins, or coagula in veins. When it occurs in a cavity, *hydro* is prefixed, as *hydrocephalus*, *hydrothorax*. There is also spurious dropsy, as in *bursæ* and *hydrocele* (q. v.).

2. Bot.: A disease in plants caused by an excess of water.

***dropsy-dry, *dropsy-drie, a.** Thirsty through dropsy.

"Many dropsy-drie forbore to drinke
Because they know their ill 'twould aggravate."
Davies: Microcosmos, p. 25.

drôpt, pret. & pa. par. [DROF, v.]

drosh-ka, s. [DROSKY.]

drôs-ër-a, s. [Gr. *droseros*=dewy, from *droso*=dew. So named because these plants are covered with glandular hairs, looking like minute dew-drops.]

Bot.: Sundew, a genus of plants, the typical one of the order *Droseraceæ*. Styles three to five, so divided as to look like six to ten; capsule one-celled, many-seeded. The species are numerous, and widely distributed over the globe. *Drosera rotundifolia*, the Common Sundew, has leaves obovate or orbicular, as broad as long. *D. longifolia*, the Oblong Sundew, has leaves obovate-oblong, three or four times as long as broad, and it is less common. *D. anglica*, the English Sundew, has leaves that are linear spatulate, five or more times as long as broad. Sir Joseph Hooker considers that *D. longifolia* is not a genuine species. He is of the opinion that it partly belongs to what he calls *D. intermedia*, and partly to *D. anglica*. The viscous matter on the leaves of the *Droseras* is fatal to small insects, whose feet become entangled with it. *D. rotundifolia* is used in Italy to make a liquor called *rossoli*. It is acrid, and has been applied to corns, bunions, and warts. Linnæus observes that in Sweden the flowers of *D. rotundifolia* open at 9 A. M. and shut at noon. Several foreign species of the genus are said to furnish a yellow pigment used in dyeing.

Drosera.

1. Flower. 2. Stamens and Ovary.

drôs-ër-â-ÿ-è-æ, s. pl. [Mod. Latin *drosera* (a) (q. v.), and Lat. fem. pl. adj. suff. -acæe.]

Bot.: Sundews, an order of Hypogynous Exogens, alliance *Berberales*. It consists of delicate herbaceous plants, often covered with glands. The leaves are alternate, with stipular fringes and circinate venation. The peduncles when young are also circinate. Sepals five, equal persistent, imbricated in estimation; petals five, hypogynous, also imbricated; stamens, once, twice, thrice, or four times as many as the petals; styles three to five; capsule three- to five-valved; seeds indefinite in number. Found all over the world. Known genera, seven; species (in 1854) ninety (*Lindley*); (in 1870) 110 (*Hooker*). [DROSERA.]

drôs-ký, s. [Russ. *drojki*, a dimin. of *drogi*=a kind of carriage.] A Russian and Prussian four-wheeled vehicle in which the passengers ride astride a bench, their feet resting on bars near the ground. It has no top.

Drosky.

drô-sôm-ët-ër, s. [Gr. *droso*=dew, and *metron*=a measure.] An instrument for measuring the quantity of dew that collects on the surface of a body exposed to the open air during the night. Weidner's instrument was a bent balance, which marked in grains the additional weight acquired by a piece of glass (or a pan) of certain dimensions, owing to the globules of dew adhering thereto; on the other end of the balance was a protected weight. Another drosometer is substantially like a rain-gauge. Wells' drosometer was a tussock of wool weighed when dry, and again after the accession of dew.

drôss, *dros, *drosse, s. [A. S. *drôs*, from *drôsan*=to fall; Goth. *drisusan*; cf. Dan. *droesem*=dregs; Ger. *drusen*=drugs, *druse*=ore decayed by the weather. (*Skeat*.)]

-cian, *-tian* = *shan*. *-tion*, *-sion* = *shün*;

¶ When a person dies from drowning, the breathing and the heart's action cease entirely; the eyelids are generally half closed, the pupils dilated; the tongue approaches to the under edge of the lips, which are covered with a frothy mucus, as are the nostrils. Finally, coldness and pallor of the surface increase. When one in whom the vital spark may possibly not yet have fled is taken out of the water, two objects should be aimed at—viz., first to restore breathing, and, second, to promote warmth and circulation. On the method of Dr. Marshall Hall, Dr. H. R. Silvester, the English Royal National Lifeboat Institution, &c., the patient should be laid on the floor or the ground, with the face downward and one of the arms under the forehead. The mouth must then be wiped and cleansed. To excite breathing, the patient should for a brief period be turned on the side, the head being supported. The nostrils should then be excited with snuff, hartshorn, and smelling-salts, or the throat tickled with a feather. If no success follow, imitate breathing by turning the body very gently on the side and a little beyond, and then briskly on the face, taking but four or five seconds for the process. Dry the hands and feet, clothe the body with dry vestments, and enwrap in blankets. Dr. Silvester's method is to draw forward the patient's tongue till it projects beyond the lips, remove the braces, stand at the patient's head, grasp the arms just above the elbows, draw them gently and steadily upward above the head, keep them stretched upward for two seconds, then press them against the sides of the chest. Let no hot bath be used unless under medical direction. If breathing be restored, rub the limbs upward, using handkerchiefs, flannels, &c. Apply hot flannels, bottles or bladders of hot water, heated bricks, &c., to the pit of the stomach, the armpits, between the thighs, the soles of the feet, &c. Persevere in this treatment for some hours. If the patient be restored, place him in a warm bed, let plenty of fresh air into the room, and encourage sleep.

2. *Fig.*: The act of overwhelming or overpowering.

drowning-bridge, *s.* A sluice-gate for overflowing meadows.

drowse, ***drowze**, *s.* [DROUSE, *v.*] A slight or light sleep or slumber; a nap.

drü-id, ***dru-yd**, *s.* [Lat. *druides* (s. pl.), a Latinized form of Ir. *draoi*, *druidh*=a magician, an augur; Gael. *draoi*, *draoidh*, *druidh*=a magician, a sorcerer; Wel. *derwydd*=a druid (Skeat). By some connected with Ir. & Gael. *darach*, *darag*; Wel. *derw*=an oak; cf. Gr. *drus*.]

1. A priest of the ancient Britons and Gauls. The religion of the Druids is supposed by some to have been similar to that of the Brahmans of India, the Magi of Persia, and the Chaldeans of Syria. They worshiped in groves, and offered human sacrifices. The education of the young was entirely in the hands of the Druids, and they exercised complete control over the minds of lay people. They also acted as judges. The Chief Druid was elected from the body of priests, and held his office for life. They are believed to have had some knowledge of philosophy, geometry, &c. The oak was looked upon as a sacred tree, and mistletoe, when found growing on it, was an object of veneration.

2. A poet, a bard. (Collins.)

3. A member of a secret society or order instituted in London about 1780, for the mutual benefit of the members. The branches or lodges are called Groves.

I. Ordinary Language:

1. Literally:

(1) In the same sense as II. 1.

A drum, a drum;

Macbeth doth come."

Shakespeare: *Macbeth*, i. 3.

(2) A drummer.

"I was brought from prison into the town of Xeres by two *drums* and a hundred shot."—Peake: *Three to One* (1825).

2. Figuratively:

(1) A rout; an evening party at which card-playing was carried on. Specially noisy drums were humorously called *Drum-majors*.

(2) A tea before dinner; a kettle-drum. [KETTLE-DRUM.]

II. Technically:

1. *Mus.*: A musical instrument formed by stretching parchment over the heads of a cylinder of wood or over a bowl-shaped metallic vessel. The skin of the ass is a very superior article for the purpose. There are three kinds of drums: (1) the long drum or bass drum with two heads, held laterally and played on both ends with stuffed-knob drumsticks. (2) The side-drum, having two heads, the upper one only being played upon by two sticks of wood; the lower head has occasionally strings of catgut stretched across its surface, and then it is called a

Kettle-drums.

modification of the ordinary drum, with the diameter greatly increased, and the length of the cylinder lessened. It is struck on one side only. (2) Is the side-drum of the life and drum bands. It is occasionally employed in the orchestra, for special effects. (3) Are either the small kettle-drums of the cavalry band, played on horseback; or the proper orchestral drums, larger in size, but similar in construction. They are generally tuned to the tonic and dominant of the composition in which they are used, but this rule is not without exceptions.

The tambourine is a species of drum, consisting of a single skin on a frame or vessel open at bottom. The heads are tightened by cords and braces, or by rods and screws.

The drum was a martial instrument among the ancient Egyptians, as the sculptures of Thebes testify. Their long drum was like the Indian tam-tam, and was beaten by the hand. It was about

eighteen inches long, had a case of wood or metal, and heads of prepared skin, resembling parchment. These were braced by cords in a manner somewhat similar to the modern. The instrument was carried by a belt, and was slung behind the back on a march.

The invention of the drum is ascribed to Bacchus, who according to Polygenus, gave his signal of battle by cymbal and drum. It was, however, known in very early ages, and in some form or other among almost all nations.

2. *Arch.*: The bell-formed part of the Corinthian and Composite capitals.

3. *Anat.*: The tympanum or barrel of the ear; the hollow part of the ear behind the membrane of the tympanum or membrane which closes the external passage of the ear, and receives the vibration of the air.

fâte, fât, färe, amidst, whât, fäll, father; wê, wêt, hère, camêl, hêr, thêre; plîne, pît, sîre, sîr, marine; gô, pôť, or, wôre, wolf, wôrġ, wôrġ, sôn; mâte, cûb, cûre, ûnite, cûr, rûle, fûll; trÿ, Sÿrian. æ, œ = ē; ey = ā. qu = kw.

4. *Comm.*: A small cylindrical box for holding fruit. A keg with straight sides.

5. *Mach.*: A cylinder over which a belt or band passes. When the cylinder bears a load, it becomes a roller. A roller frequently has gudgeons to allow it to be dragged, as the agricultural and garden rollers. Such a roller (having gudgeons or axle), by the diminishing of its length sufficiently, becomes a wheel. A narrow drum (belt-bearing cylinder) becomes a sheave, pulley or rigger. The barrel of a crane, windlass, winch, or capstan on which the rope or chain winds. The cylinder on which wire winds, and whose rotation pulls it through the draw-plate. The grinding-cylinder or cone of some mills, as the coffee or the plantation mill, &c. The cylindrical part of a thrashing machine, upon which are fixed the pieces of wood that beat out the grain.

"The sheaves were carried between an indented drum, and a number of rollers of the same description ranged round the drum."—*Agri. Surv. E. Loth.*, p. 74.

6. *Paper-making*: A washing-drum for rags consists of a framework covered with wire gauze, in the interior of which, connected with the shaft or spindle, which is hollow, are two suction-tubes by which the water, after circulating through the rags, is carried away in a constant stream.

7. *Calico-printing*: One name of the cask in which steam is applied to printed fabrics in order to fix the colors. It consists of a hollow wooden cylinder with interior conveniences for suspending the cloths and covering them with flannel; after which the cover is applied and steam admitted for twenty or thirty minutes.

8. *Mech.*: A chamber of cylindrical form used in heaters, stoves, and flues. It is hollow and thin, and generally forms a mere casing, but in some cases, as steam-drums, is adapted to stand considerable pressure. The drums are radiators, and the calorific current is compelled to follow a sinuous course through the drum.

9. *Ichthy.*: The same as DRUM-FISH (q. v.).

10. *Meteor.*: An abbreviation for STORM-DEUM (q. v.).

"Tom or John Drum's Entertainment: A kind of proverbial expression for ill-treatment, probably alluding originally to some particular anecdote. Most of the allusions seem to point to the dismissing of some unwelcome guest, with more or less ignominy and insult.

"His porter or other officer durst not for both his ears give the simplest man that resorted to his house Tom Drum's entertainment, which is, to hale a man in by the head, and thrust him out by both the shoulders."—*Hollinshed: Hist. of Ireland*, B 2, col. 1. (Nares.)

drum-curb, *s.* A cylinder of wood or cast-iron inserted in a hole which forms the commencement of a shaft, to support a brick structure or shaft-lining. The earth is dug away below the edge of the drum, and as the latter sinks the courses of brick are continually added at the top.

drum-cylinder press, *s.*

Print.: One having a large hollow cylinder. A feature in several forms of presses.

drum-fish, *s.* A popular name for a genus of fishes, so called from the peculiar drumming or grunting noise which they make under water. There are two species, one of which, *Pogonias chromis*, is found on the coast of Florida and Georgia.

"The under-jaw of the drum-fish from Virginia."—*Woodward*.

drum-head, *s.*

1. *Ord. Lang.*: The head or top of a drum.

2. *Naut.*: The head of the capstan, having square holes to receive the bars.

Drum-head court-martial:

Mil.: A court-martial hastily summoned, as in the field, or on some sudden emergency. The expression is sometimes used figuratively, to express any sharp and summary method of procedure.

drum-major, *s.*

Military:

1. The chief or first drummer of a regiment.

2. The name of an officer in the British army who is responsible for the instruction of drummers in the various roll-calls, and for the invention and construction of new beats, communicated by order of the major of the regiment to the drummers. The office does not appear to be older than the time of Charles II. There was formerly an officer in the royal household called the drum-major general, who granted licenses to other than the royal troops for the use of drums in their regiments. (*Stainer & Barrett*.)

3. In this country the name given to a leader or conductor of a military or marching band, who precedes the other members of the band, and marks the time of the composition being played by various evolutions with a long globe-topped staff which he carries.

drum-maker, *s.* One who makes or deals in drums.

"The drum-maker uses it, and the cabinet-maker."—*Mortimer*.

drum-slade, *s.*

Music.: A drummer.

drum-stick, *s.* The stick with which a drum is beaten; those for the bass-drum have stuffed knobs.

"Drum-stick of a fowl: The pestle-like thighbone. (*U. S. Colloq.*)

drum-wheel, *s.* A very ancient Oriental form of water-raising wheel which was originally drum-shaped, but afterward had scoop-shaped buckets, which dipped up water and conducted it toward the axis, at or near which it was discharged. [*TYMPANUM*]

drüm, *v. i. & t.* [*DRUM*, *s.*]

A. Intransitive:

I. Literally:

1. To beat or play a tune on a drum.

"I'll no more drumming; a plague of all drums."—*Shakesp.: All's Well*, iv. 3.

2. To attract or beat up recruits by the sound of drums, &c.

II. Figuratively:

1. To make a noise like that of a drum.

2. To beat with the fingers, with a rapid succession of strokes, as though beating on a drum; as, to drum on the table.

"He would invite me to the garden by drumming upon my knee, and by a look of such expression as it was not possible to misinterpret."—*Cowper: Treatment of his Hares*.

*3. To beat or throb.

"His drumming heart cheers up his burning eye."—*Shakesp.: Rape of Lucrece*, 495.

"Drummer, strike up, and let us march away."—*Shakesp.: Henry VI., Pt. III.*, iv. 7.

2. *Fig.*: One who solicits custom for a wholesale house; a commercial traveler. (*American*.)

II. Entom.: *Blatta gigantea*, the largest of all the species of Blattidae, or Cockroaches. It measures about three inches in length. It is an inhabitant of South America and the West Indies, and obtains its name from its habit of producing a noise with its head resembling a sharp knocking with the knuckles against wainscoting. It is said sometimes to devour the extremities of the dead, and even to attack people when asleep. It is a handsome insect, being of a pale yellow color, like bone, a nearly square spot on the pronotum, and a sort of dash near the base of the tegmina, black or brown.

drüm-möck, *s.* [Etym. doubtful.] A mixture of meal and water.

Drüm-mönd, *s.* [A proper name, see compound.]

Drummond-light, *s.* A light invented by Lieutenant Drummond, about 1826, to supply a deficiency which was found to exist in the means of making distant stations visible from each other. It is made by exposing a small ball of quicklime to the action of the oxy-hydrogen blow-pipe, or the lime may be placed in the flame of a spirit-lamp fed by a jet of pure oxygen gas. Drummond's apparatus was so constructed that the lamp fed itself automatically with spirit and with oxygen, supplying itself with balls of lime as they were gradually consumed, and was provided with a parabolic silvered mirror. With this apparatus the light produced by a ball of lime not larger than a boy's marble was visible at a distance of nearly seventy miles, in a direct line. Subsequently, Col. Colby made a lime-light signal visible a distance of ninety-five miles in a straight line. It is stated that, intensified by a parabolic reflector, it has been observed at a distance of 112 miles.

***drüms-lêr**, *s.* [*DRUM*, *s.*] A drummer.

Drũse (2), **Drũze**, **†Der-uz**, **†Dor-ouz**, s. [*Deruz* is the Arab. pl. of *Deraz*. Named after Ed-Derazi, who preached the apotheosis of the Khalif El-Hakim. See def.]

Hist., &c.: A politico-religious sect of Mohammedan origin, but deemed by orthodox Moslems heretical. El-Hakim Biamr-Allah, the sixth Fatimite Caliph of Egypt, a cruel and fanatical man, who lived in the eleventh century, proclaimed himself an incarnation of God, and established a secret society. When walking in the vicinity of Cairo, his capital, he disappeared from his subjects' view, the most natural explanation being that he was assassinated and his body hidden somewhere. His followers believed in his return to this earth to reign over it, and propagated their faith in the adjacent lands. Two of the most notable missionaries were the

Persian messengers Hamzah and Mohammed ben Ismail ed Derazi. The latter proclaimed the Druse tenets with such zeal in Lebanon that the converts to belief in El-Hakim were called not Hakimites but Druses. In 1838, De Saey published, at Paris, a work in two volumes called *Exposé de la Religion des Druzes*, which contains a great fund of information from which subsequent writers have profited. Part of a Druse catechism, a copy of which was made in the original Arabic by Dr. De Forest, and translated into English by Mr. Graham, may be found in the Rev. Dr. Wilson's *Lands of the Bible*, ii., 715-721. The Druses believe in the unity of God, who they think was manifested in the person of several individuals, the last of them Hakim. They believe in the constant existence of five superior spiritual ministers, the greatest of them being Hamzah and Jesus, and hold the transmigration of souls. They are divided into the 'Okkal or Initiated, and the Juhhal or Ignorant. Their day of worship is Thursday. Ethnologically they are Arabs who came from the eastern parts of Syria and settled in Lebanon and Antilebanon in the eleventh century. Their territory on the Lebanon is south of the Maronites. They extend thence to the Hauran and to Damascus. In 1860 they attacked the Maronites, about twelve thousand of whom they cruelly massacred, not sparing even women or male children in their fury. This outburst was fast passing into a general rise of the Mohammedans on the Christians of Syria, when the arrival of Turkish and French troops, in August and September, 1860, and the execution of 167 Druses, more deeply criminal than others, restored at least the semblance of tranquillity. No similar outbreak has since occurred.

drũsed, a. [Eng. *drus(e)* (1); *-ed*.]

dry-press, s.

Printing: One in which the printed sheets are pressed smooth.

dry-rent, s.

Law: A rent reserved without clause of distress.

dry-rot, s. A name given to a decay in timber caused by the mycelium of several species of fungus, which under certain conditions of heat and moisture attack woodwork in ships, houses, and wooden erections in general, growing in the dark, and rapidly increasing in bulk, first covering the surface with a series of thread-like filaments, which are continually being added to, and ultimately forming a thick, leathery, white substance, such as is often found behind the partitions of walls, and under floors. It penetrates the wood in all directions, reducing it to powdery rottenness, in many cases doing irreparable mischief before it is observed. The perfect plant is only occasionally seen issuing from a crevice or some opening in the woodwork. The following are the names of two of the principal dry-rot fungi: *Polyporus hybridus*, which affects oak timber in ships, and *P. destructor*, as also *Thelephora puteana*, chiefly in pine-wood, in dwelling-houses and other buildings. *Merulius lacrymans* differs from the preceding in the thick mycelium being moist, often dripping like tears, hence its name *lacrymans* (weeping). *Dædalea quercina* grows on decaying stumps of trees, often attaining a large size. (Smith.)

dry-sand, s.

Casting: A mixture of sand and loam which is employed in making molds subsequently dried in an oven.

"A hunting, Sir Oliver, and *dry-foot*, too!"
L. Barry: *Ram Alley*, iii. 1.

***C. As subst.:** A dog which pursues game by the scent of the foot.

"The truth is, my old master intends to follow my young *dry-foot* over Moorfields to London."—*Ben Jonson: Every Man in his Humor*, ii. 2.

dry-ing, pr. par., a. & s. [DRY, v.]

A. As pr. par.: (See the verb.)

B. As adjective:

1. Having the quality or property of absorbing moisture; as, a *drying* wind.

2. Having the quality of becoming dry rapidly; as, a *drying* oil.

C. As substantive:

I. Ordinary Language:

1. The act or process of making dry, or of absorbing moisture from.

2. The act or state of becoming dry, or of losing moisture.

II. Sugar-making: The exposure of crystallizing magma syrup in a centrifugal machine, where the molasses is drained from it by mechanical action. [CENTRIFUGAL-MACHINE.]

drying-house, s. An apartment in which anything is exposed to a current of air moderately heated; it is not easy to draw the line between an oven, a dryer, and a kiln; the words are used with some degree of carelessness, and have become technical in trades. Cores are dried in ovens; pottery in ovens or bis-closets; feathers in renovators. The drying chamber comprises a central chamber and one or more wings hinged thereto, and mounted on wheels or castors for the purpose of ready access to the chambers and for removal from place to place. On one side is a suitable provision for drying clothes, and on the other for drying fruits. In the central chamber is a stove and apparatus for heating.

drying-machine, s.

Calico-making: A machine for drying printed calicoes. The apparatus is in a hot room, and has a series of heated steam chests and cylinders with upper and lower rollers, over which the cloth is exposed to the drying air of the apartment. Similar drying cylinders are used in paper-making machines, both the cylinder machines and those of the Fourdrinier pattern, in which the sheet of pulp is felted on an agitated horizontal web. Drying machines are also used in bleaching, drying, and laundry works; the cylinders, in which the articles to be dried are placed, being made to revolve with great speed, the moisture is thus driven away by the action of centrifugal force.

drying-off, s. The operation in gilding by which the amalgam of gold is evaporated.

drying-oil, s.

Paint: A term applied to linseed and other oils, heated with oxide of lead, and used as the bases of many paints and varnishes. On exposure to the air they absorb oxygen, and become a hard, tough, dry varnish. A colorless oil may be obtained by combining linseed or nut oil with litharge, and triturating them together for a considerable time.

drying-room, s. The apartment in which articles or materials are dried; as, gunpowder, calico, cores, and what not. Sometimes a kiln.

drying-stove, s. A place where cores for casting are dried; a stove for desiccating fruit, drying clothes, &c.

dry-ite, s. [Gr. *drus* (genit. *dryos*) = a tree, an oak; Eng. suff. -ite (*Minn.*) (q. v.).]

Geol.: A name applied to fragments of petrified or fossil wood, in which the structure of the wood is recognizable.

dry-ly, dri-ly, adv. [Eng. *dry*; -ly.]

"It looks ill, it eats *dryly*. Marry 'tis a withered pear."—*Shakesp.:* *All's Well*, ii. 1.

II. Figuratively:

1. Coldly, frigidly, without affection, sympathy, or encouragement.

"For virtue is but *dryly* praised, and starves."
Dryden: Juvenal, sat. i.

2. Severely, sarcastically, satirically, cynically, harshly.

"Conscious to himself how *dryly* the king had been used by his council."—*Bacon: Henry VII.*

3. Jejunely; barrenly, without embellishment, or anything to interest or adorn; uninterestingly.

"Some *dryly* plain, without invention's aid,
With dull receipts how poems may be made."
Pope: Essay on Criticism, 114, 115.

dry-ness, *dri-ness, s. [Eng. *dry*; -ness.]

I. Ordinary Language:

1. Literally:

(1) An absence or want of moisture; siccidity, aridity.

(2) An absence, want, or loss of natural juice, sap, or succulence.

"The marrow supplies an oil for the innation of the bones and ligaments in the articulations, and particularly of the ligaments, preserving them from dryness and rigidity."—*Ray: On the Creation*.

(3) An absence of rain.

2. Figuratively:

(1) Coldness, frigidly, absence or lack of affection or warmth of feeling.

"That for any dryness was betwixt them the Earl of Murray should have been so unkind."—*Spalding*, i. 17.

(2) An absence or want of enthusiasm or want of sensibility; coldness.

"It may be, that by this dryness of spirit, God intends to make us the more fervent and resigned in our direct and solemn devotions."—*Taylor*.

3. An absence or want of that which embellishes, enlivens, or interests; jejuneity, baldness.

"Be faithful where the author excels, and paraphrase where penury of fancy or dryness of expression ask it."—*Garth*.

II. Art.: A term by which artists express the common defect of the early painters in oil, who had but little knowledge of the flowing contours which so elegantly show the delicate forms of the limbs and the insertions of the muscles; the flesh in their coloring appearing hard and stiff, instead of expressing a pleasing softness. The draperies of those early painters, and particularly of the Germans, concealed the limbs of the figures, without truth or elegance of choice; and even in their best masters the draperies very frequently either deformed or encumbered the figures. (*Weale*.)

dry-nurse, s. [Eng. *dry*, and *nurse*.]

I. Ordinary Language:

1. Lit.: A woman who rears a child without giving it the breast.

2. Figuratively:

(1) One who attends on another in sickness, &c.

"Mrs. Quickly is his nurse, or his drynurse, or his cook, or his laundry, his washer, and his wringer."—*Shakesp.:* *Merry Wives*, i. 2.

(2) One who has to look after and instruct another; one who takes charge of, brings up, or looks after another.

"Grand caterer and drynurse of the Church."
Cowper: Task, ii. 371.

II. Mil.: Applied to an inferior officer, who has to instruct his superior in his duties.

dry-nurse, v. t. [DRYNURSE, s.]

1. Lit.: To bring up or rear without the breast.

"As Romulus a wolf did rear,
So he was drynursed by a bear."
Butler: H. libras.

2. Mil.: (See extract.)

"When a superior officer does not know his duty, and is instructed in it by an inferior officer, he is said to be drynursed. The inferior nurses the superior as a drynurse rears an infant."—*Brewer: Phrase and Fable*.

dry-ö-bäl'-an-öps, s. [Gr. *drus* (genit. *dryos*) = a tree; *balanos* = an acorn; and *opsis* = sight, appearance. (*Worcester*.)]

Bot.: A genus of plants belonging to the natural order Dipteraceæ (q. v.). They are natives of the Indian Archipelago. *D. camphora*, or *aromatica*, supplies the hard camphor or Camphor-oil of Borneo. The leaves are large and coriaceous. There are three species.

Masonry: Fissures in a stone intersecting it at various angles to its bed, and rendering it unfit to support a load. (*Ogilvie*.)

dry-sält-ër, s. [Eng. *dry*, and *salter*.]

***1. A dealer in dried and salted meats, pickles, sauces, &c.**

"Almost thirty years have elapsed since I heard by accident of a *drysalter*, who had acquired a great reputation as a large fortune, from possessing a secret that had enabled him to send out to the Indies, and other hot countries, beef and pork, in a better state of preservation than any of the trade. As he was observed to pour into each cask a small bottle of transparent liquor, it occurred to me, that this could be no other than the spirit of sea-salt."—*Sir W. Fordeyce: On the Muriat. Acid* (1790), p. 7.

2. A dealer in dye-stuffs, chemical products, &c.

dry-sält-ër-ÿ, s. [Eng. *dry*, and *salter*; -ÿ.]

"The whole roof and symmers of that said kill were consumed; old Robert Baillie being *dryster* that day, and William Lundy, at that tyme, measter of the mill."—*Lamont: Diary*, pp. 179, 180.

2. One whose business is to dry cloth at a bleach-field.

"Dryster Jock was sitting cracky
Wi' Pate Tamson o' the Hill."

A. Wilson: Poems (1816), p. 3.

***dü-äd, s.** [Lat. *dualis*, from *duo* = two, *l* changing to *d* as a nominal ending.] The union of two; the number two, duality.

dü-äl, a. & s. [Lat. *dualis*, from *duo* = two.]

A. As adjective:

1. Ord. Lang.: Double, consisting of two parts.

"Here you have one-half of our dual truth."—*Tyndall: Frag. of Science* (3d ed.), vi. 119.

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hëre, camel, hër, thëre; pine, plit, sîre, sir, marine; gö, pöt, or, wöre, wëlf, wörk, whö, sön; müte, cüb, cüre, unite, cür, räle, füll; try, Sÿrian. w, æ = é; ey = ä. qu = kw.

2. *Gram.*: Expressing the number two or duality; a term applied to that inflection in certain languages of a verb, adjective, pronoun, or noun. Greek, Sanscrit, and Gothic had dual inflections; English also had dual forms for the personal pronouns. Arabic and Lithuanian still preserve these inflections. As the idea of two necessarily preceded that of a larger number, the dual form is older than the plural.

"Modern languages have only one variation, and so the Latin; but the Greek and Hebrew have one to signify two, and another to signify more than two; under one variation the noun is said to be of the *dual* number, and under the other of the plural."—Clarke: *Lat. Gram.*

B. As substantive:

Gram.: That number of a verb, adjective, &c., which is used when only two persons or things are spoken of.

dū-al-ine, *dū-al-in*, *s.* [Latin *duo*=two, and *Eng.*, &c. (*glycer*) (q. v.).]

Chem.: An explosive compound. Carl Ditmar inventor. The composition is: Nitro-glycerine, 50 per cent.; fine sawdust, 30 per cent.; nitrate of potassa, 20 per cent. Compared with dynamite, it is: (1) More sensitive to heat, and also to mechanical disturbances, especially when frozen, when it may even be exploded by friction. (2) The sawdust in it has little affinity for the nitro-glycerine, and at best will hold but 40 to 50 per cent. of nitro-glycerine, and on this account very strong wrappers are needed for the cartridges. (3) Its specific gravity is 1.02, which is 50 per cent. less than that of dynamite, and as nitro-glycerine has the same explosive power in each, its explosive power is 50 per cent. less than that of dynamite (bulk for bulk). (4) The gases from explosions, in consequence of the dualine containing an excess of carbon, contain carbonic oxide, and other noxious gases. Lithofracture and dualine, however, can be exploded, when frozen, by means of an ordinary fulminating cap, which is not the case with dynamite. (*Journal of Applied Chemistry.*)

dū-al-ism, *s.* [Eng. *dual*; -ism.]

I. *Ord. Lang.*: A dividing or division into two; a twofold division.

II. Technically:

1. *Phil.*: Any system which admits the existence of mind as distinct from matter. (Opposed to Monism, q. v.)

"Haeckel recognizes but one force in Nature—the mechanical; and hence he calls his profession of faith Monism, in contradistinction to Dualism, which implies a belief in soul or spirit, or some force or efficient cause other than mechanical."—*Contemporary Review.*

2. *Metaph.*: Any system which differentiates man from the lower animals, by endowing him with a soul.

3. *Theol.*: That system which accounts for the existence of evil in the world by supposing two co-eternal principles; one good, the other evil; specially Manicheism (q. v.). Dualism has always been condemned by the Christian Church, though the doctrine of the Fall, brought about by Satanic agency, is in reality a modified species of dualism. The *raison d'être* of dualism cannot be better shown than by the words of St. Augustine, who was for a short time a Manichean: "There can be no more difficult question than this, if God be all-powerful, how comes it there is so much evil in the world, if he be not the author of it?"

4. *Phys.*: The theory that each cerebral hemisphere acts independently of the other.

dū-al-ist, **dū-al-ist*, *s.* [Eng. *dual*; -ist.]

1. One who holds the doctrine of dualism; a supporter of dualism.

*2. One who holds two offices.

dū-al-is-tic, *a.* [Eng. *dualist*; -ic.]

1. Consisting of two parts; twofold. The dualistic system of philosophy taught by Anaxagoras and Plato held that there were two principles in nature, the one active and the other passive.

2. Pertaining or relating to dualism.

dualistic system, *s.*

Chem.: The view that salts are formed by the action of two binary compounds.

dū-āl-i-tŷ, **dū-al-i-tie*, *s.* [Low Lat. *dualitas*, from Lat. *dualis*=dual, from *duo*=two.] The quality or state of being two or twofold; double division.

"This dualité after determination, is found in every creature."—Chaucer: *Testament of Love*, bk. ii., § 14.

**dualm* (u as w), **dualm*, **dwaum*, *s.* [Prob. connected with *Eng. equal* (q. v.).]

dūc-at, s. [Fr., from Ital. *ducato* = a ducat, a duchy, from Low Lat. *ducatus* = a duchy, so called from the fact

that when first coined in the Duchy of Apulia, about A. D. 1140, ducats bore the legend, "Sitt tibi, Christe datus, quem tu regis, iste ducatus." *Sp. & Port. ducado*.]

Comm.: The name of a coin current in several countries. It is no longer the monetary unit in any country. It was formerly a favorite coin with the Dutch, and, owing to the excellence of the pieces struck, they were sought for and imitated by several other countries, and especially Russia. Ducats now everywhere circulate at a valuation, where they circulate at all, or are bought and sold simply as bullion. The following are some of the best known:

Dutch Ducat.

(1) The gold ducat of Holland, weighing 3.494 grammes, '983 fine, value 9s. 4½d. sterling, or about \$2.33.

(2) The gold ducat of Russia, which is of precisely the same weight, fineness, and value as the Dutch ducat.

(3) The gold ducat of Austria-Hungary, weighing 3.4904 grammes, '986 fine, value 9s. 4½d., or \$2.34.

(4) The gold ducat of Sweden, weighing 3.486 grammes, '966 fine, value 9s. 3¼d., or \$2.31.

(5) The gold ducat of Hamburg, valued at 5 marks banco, or 7s. 5d., or \$1.85.

(6) The silver ducat of Sicily, weight 22.943 grammes, '333 fine, value 3s. 4½d., or 84 cents.

dūc-at-ōon, duc-at-one, s. [Fr. *ducaton*, from *ducatus* = a ducat (q. v.).]

Commerce: 1. An old silver coin, worth about 5s. 3¼d. sterling, or \$1.27, sometimes found still circulating in the Netherlands.

2. A silver coin current in Parma, value 4s. 3d., or about \$1.00. Called also a Scudo (q. v.).

"What mean the elders else, those kirk dragoons,
Made up of ears and ruffs like Ducatons?"
Cleveland: *Poems* (1661).

dūc-da-mē, s. [Etym. unknown.] This word is only used in the following passage, and is described by Jacques as "a Greek invocation to call fools into a circle."

"Ducdāme, ducdāme, ducdāme;
Here shall he see
Gross fools as he,
An' if he will come to me."
Shakespeare: *As You Like It*, ii. 5.

"Five wickets for eighty-one, Mr. Wilson's contribution being a duck."—London Echo.

II. Ornithology:

1. The popular name given to various Anatidæ, and especially to those of the two sub-families Anatinae and Fuliginæ. The former are called, by Swainson, River ducks, or sometimes also True ducks, and the latter Sea ducks. A similar distinction into Sea ducks and Pond ducks had long ago been made by Willughby, who, however, admitted that for it "we are beholden to Mr. Johnson." The Anatinae have the bill broad and lengthened, the nostrils basal, the legs very short, and the hinder toe slightly lobed. The Fuliginæ have the hinder toe very broad. The Anatinae, or True ducks, are migratory birds, coming and going in large flocks. They build near fresh-water lakes, placing the nest among reeds, sedges, &c., or sometimes in hollow trees.

2. A book-name for the family Anatidæ, which, in addition to the ducks properly so called, contains the Geese, the Swans, &c. [ANATIDÆ.]

¶ A lame duck: On the Stock Exchange, a defaulter.

duck-and-drake, ducks and drakes, s. A popular name for a game in which a flat piece of stone,

slate, &c., is thrown so as to skip along the surface of water. This is only a part of the name formerly given to this puerile amusement.

"Epostracismus. Lusum quo testulam aut lamellam sive lapillum distringunt super aquam aquor, numerumque saltum, quos facit priusquam desidat, ineunt: victoria penes illum relicta, qui saltum multitudinem superet. ["Epostracismus: A game in which a small shell, a thin plate of metal or a flat stone is projected along the face of the water and the number of skips it makes before it sinks noted: the victory is his who makes the greatest number of skips."] Greek, *Epostrakismos*. A kind of sport or play with an oyster shell or a stone thrown into the water, and making circles yer it sink, &c. It is called a *duck* and a *drake*, and a *half-penie cake*."—Nomenclator. (Nares.)

¶ To make ducks and drakes of: To squander, to waste, to throw away foolishly.

duct, s. [Lat. *ductus* = a leading or guiding, a pipe; *duco* = to lead or draw.]

***I. Org. Lang.**: Guidance, direction, lead.

"This doctrine leaves nothing to us but only to obey our fate, to follow the duct of the stars."—*Hammond*.

II. Tech.: A tube, canal, or passage by which a fluid or other substance is conveyed or conducted: used—

1. *Anat.*: One of the vessels or canals by which the blood, chyle, lymph, &c., are conveyed from one part of the body to another.

2. *Bot. (Pl.)*: Tubular vessels marked by transverse lines or dots. They constitute one of the two principal kinds of vascular tissue, the other being spiral vessels, of which, however, four varieties of them—viz., the closed, the annular, the reticulated, and the scalariform ducts—are modifications. Another type of duct, called dotted ducts, constitutes bothrenchyma (q. v.). (*Lindley*.)

***duct-i-ble**, a. [Lat. *ductibilis*, from *ductus*, pa. par. of *duco* = to lead, to draw.] The same as DUCTILE (q. v.).

"It [iron] is malleable and ductible with difficulty."—*Fuller: Worthies, Shropshire*.

duct-ile, a. [Fr., from Lat. *ductilis* = easy to be led; *duco* = to lead.]

I. Literally:

1. That may be drawn out into threads or wire.

"Twice ten of tin, and twelve of ductile gold."
Pope: Homer's Iliad, xi. 32.

*2. Pliant, capable of being molded.

"The ductile wax with busy hands I mold."
Pope: Homer's Odyssey, xii. 208.

*3. Flexible, pliable.

"The ductile rind and leaves of radiant gold."
Dryden: Virgil's Æneid, vi. 211.

***II. Fig.**: Tractable, pliable; yielding to persuasion or advice.

"Their designing leaders cannot desire a more ductile and easy people to work upon."—*Addison: Freeholder*.

¶ For the difference between ductile and docile, see DOCILE.

***duct-ile-ly**, adv. [English *ductile*; -ly.] In a ductile manner.

duct-ile-ness, **duct-il-ness**, s. [Eng. *ductile*; -ness.] The quality of being ductile; ductility, pliability.

"I, when I value gold, may think upon

The ductileness, the application,
The wholesomeness, the ingenuity,
From rust, from soil, from fire ever free."
Donne: Elegy 18.

duct-il-lym-è-tér, s. [Eng. *ductility* (ty), and Gr. *metron* = a measure.]

Metal.: An instrument invented by M. Regnier for ascertaining the relative ductility of metals. The metal to be tested is subjected to the action of blows from a mass of iron of given weight attached to a lever, and the effect produced is shown upon a graduated arc.

duct-il-ly, s. [Latin *ductilis* = easily led, ductile.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II.

"Yellow color and ductility are properties of gold."—*Watts: Logic*.

2. *Fig.*: The quality of being pliant or yielding to persuasion or advice.

"There is not yet such a convenient ductility in the human understanding."—*Burke: Tracts on the Popery Laws*.

II. Metal.: The quality of adaptedness for drawing into wire; as malleability is for being beaten into leaves. The order of metals in these two respects is as follows: Ductility—Gold, Silver, Platinum, Iron, Copper, Zinc, Tin, Lead, and Nickel; Malleability—Gold, Silver, Copper, Tin, Platinum, Lead, Zinc, Iron, and Nickel. The less ductile soft metals, such as magnesium, which cannot be drawn, are converted into wire by the process of pressing or squinting.

***duc-tion**, s. [Lat. *ductio*, from *ductus*, pa. par. of *duco*.] Leading, guidance.

"The meanly wise and common ductions of bemisted nature."—*Feltham: Resolves*, ii. 66.

dūlc-a-ma-rā, s. [Latin *dulcis* = sweet, and *amarus*=bitter.]

Bot.: *Solanum dulcamara*, a plant commonly called Bitter-sweet, or Deadly or Woody Nightshade. [BITTER-SWEET.]

Pharm.: The dried young branches of *Solanum dulcamara*, order Solanaceæ, Bitter-sweet, from indigenous plants which have shed their leaves. They are light, hollow, cylindrical, about the thickness of a goosequill; bitter and subsequently sweetish to the taste. They are used to prepare *Infusum dulcamaræ*, infusion of dulcamara. Dulcamara acts on the skin and kidneys, and is given in chronic skin diseases, as lepra and psoriasis.

dūlc-a-mar-ē-tin, s. [Eng., &c., *dulcamar*(a); suff. -etin (Chem.) (q. v.).]

Chem.: $C_{16}H_{26}O_6$. Dulcamaretin and glucose are formed by the action of dilute acids on Dulcamaria.

dūlc-am-ā-rin, s. [Eng., &c., *dulcamar*(a); suff. -in (Chem.) (q. v.).]

Chem.: $C_{22}H_{34}O_{10}$. An amorphous substance obtained from the stalks of *Solanum dulcamara*. It forms a yellow, transparent, resinous mass, which is sparingly soluble in ether, but readily in alcohol.

dūlc-āy-nās, s. [Sp.] The name of a larger sort of oboe, or small bassoon. "Se usa un genero de Dulcaynas que parecen nuestras Chirimias." [He used a sort of Dulcaynas which is like our bassoon.]—Don Quixote. As it is supposed that the instrument was brought into Spain by the Moors, the word may be derived from the same root as the Egyptian Dalmir, both instruments being of the oboe or reed kind. (Stainer & Barrett.)

***dūlcē**, v. t. [O. Fr., from Lat. *dulcis*=sweet.] To sweeten, to moderate, to soften.

"Assuage their dulcetness."—Bradford: Works, i. 398.

dūlc-ī-an, **dūlc-ī-nō**, s. [Ital.]

Music: The name of a species of small bassoon.

dūlc-ī-a-nā, s. [Ital.]

Music: A word now applied solely to a soft and delicate-toned organ stop, consisting of very small-scale flue pipes. Originally, a dulciana (dulcan, dulcian, dolcan, dolcin, or dulzain) was a kind of hautboy, and these terms are still found on some foreign stops as the names of soft reed stops, as at Rotterdam, The Hague, and elsewhere, but in some cases the stop is not actually reed, but the pipes by their peculiar shape, narrow at the mouth, and widening gradually toward the top, produce a reedy quality of tone. The dulciana stop was invented by the celebrated organ-builder Snetzler. Stops of this kind are most commonly found on the choir organ. (Stainer & Barrett.)

***dūlc-ī-ci-cā-tion**, s. [Eng. *dulcify*, c connective, and suff. -ation.] The act or process of sweetening or making sweet; the act of freeing from acidity, acrimony, or saltiness.

dūlc-ī-mēr, ***dūlc-cl-mere**, s. [Sp. *dulcemell*; Ital. *dolcimello*, from Lat. *dulce melos* = a sweet song; *dulce* (neut. of *dulcis*)=sweet, and *melos*, Gr. *melos*=a melody. (Skeat.)]

1. **Mus.**: One of the most ancient musical instruments, used by various nations in almost all parts of the world, and in shape and construction, having probably undergone fewer changes than any other instrument. In its earliest and simplest

form it consisted of a flat piece of wood, on which were fastened two converging strips of wood, across which strings were stretched tuned to the natural scale. The only improvement since made on this type are the addition of a series of pegs, or pins, to regulate the tension of the strings, and the use of two flat pieces of wood formed into a resonance-box, for the body. The German name, *Hucktret* (chopping-board), points to the manner in which it was played, the wires being struck by two hammers, one held in each hand of the performer. The fact which makes the dulcimer of the greatest interest to musicians is that it is the undoubted forefather of our pianoforte. A modern grand pianoforte is, in reality, nothing more than a huge dulcimer, the wires of which are set in vibration, not by hammers held in the pianist's hands, but by keys; it is, in fact, a keyed dulcimer. It is by some supposed to be identical with the psalter of the Hebrews.

"Here [at the puppet play in Covent Garden], among the fiddlers, I first saw a dulcimer played on with sticks knocking of the strings, and is very pretty."—Pepys: Diary, May 24, 1662.

Dulcimer.

*2. A kind of lady's bonnet.

"Malt gathereth a sweetness to the taste, which appeareth in the wort: the dulcoration of things is worthy to be tried to the full; for that dulcoration importeth a degree to nourishment; and the making of things inalimental to become alimental, may be an experiment of great profit."—Bacon.

dūlc-cōse, s. [Lat. *dulcis*(e)=sweet, and Eng., &c., (glucose) (q. v.).]

Chem.: $C_6H_{12}O_6$, also called Dulcin, Dulcite, and Melampyrite. A saccharine substance which occurs in Dulcite-manna from Madagascar, also by mixing the aqueous decoction of *Melampyrum nemorosum* with lime, concentrating, adding hydrochloric acid in excess, and evaporating; crystals separate out on cooling; also by the action of sodium amalgam on milk sugar. Dulcose crystallizes in large monoclinic prisms, which melt at 188°. Dulcose heated with hydriodic acid yields secondary hexyl iodide. Oxidized with nitric acid, it yields mucic acid.

***dūlc-coŷr**, s. [Lat. *dulcor*, from *dulcis*=sweet.] Sweetness.

"This sort of viand is at this time made use of, out of no less mystery, than by its color and dulcor they might be remembered of the purity and delicateness of the law."—L. Addison: State of the Jews, p. 176.

Eccles.: In the Roman Catholic Church the lowest of the three degrees of worship or adoration recognized. It is that reverence or homage paid to angels, saints, images, and pictures.

"Papists invent a distinction of many kinds and degrees of worship, and very accurately assign to each object of worship its proper amount of reverence. The lowest degree is the *dūlla*, which is given to saints and angels. Hyperdulia is reserved for the Blessed Virgin alone; and latria is given to the Lord himself, and to each person in the ever-blessed and glorious Trinity. Images of either of these receive a relative worship of the same order. An image of a saint or angel relative *dūlla*; an image of the Blessed Virgin relative hyperdulia; an image of either person of the Blessed Trinity relative latria."—*Hook: Church Dict.*

dumb-plate, *s.*

Steam Eng.: The dead-plate or portion of the furnace bottom close to the doors, which has no air apertures or spaces.

dumb-show, *s.*

1. A part of a dramatic representation shown pantomimically, chiefly for the sake of exhibiting more of the story than could be otherwise included; but sometimes merely emblematical. Dumb-shows were very common in the earliest of our dramas, but gradually fell into disrepute, by the improvement of taste; so that in Shakespeare's time they seem to have been in favor only with the lower classes of spectators, the "groundlings," as he calls them.

"Who for the most part are capable of nothing but inexplicable *dumb-shows* and noise."—*Hamlet*, iii. 2.

2. Gestures without speech; pantomime.

dumb-singles, *s. pl.* Silk thread formed of several spun filaments, associated and twisted together. Several dumb-singles combined and twisted together form thrown-singles.

dumb-waiter, *s.* A movable frame for conveying food, &c., from one story or room of a building to another. The ordinary form is a suspended, counterpoised cupboard, moving within a vertical chute, which has openings at the respective stories, at which the dishes may be placed on the shelves and removed therefrom.

dūmb-l'y (*b* silent), *adv.* [Eng. *dumb*; *-ly*.] Mutely, silently, without words, in silence.

dūmb-nëss (*b* silent), ***domb-ness**, ***dumbe-ness**, ***dum-ness**, *s.* [A. S. *dumnyse*; O. Fries. *dumnisse*; O. H. Ger. *tumbness*.]

1. Ordinary Language:

1. Inability or incapacity to speak or utter articulate sounds [II].

2. Muteness, silence; abstention from speech.

"There was speech in their *dumbness*."—*Shakesp.*: *Winter's Tale*, v. 2.

3. Refusal or unwillingness to speak.

"'Tis love, said she; and then my downcast eyes,
And guilty *dumbness*, witnessed my surprise."

Dryden: *Ovid*; *Heroides* xi.

***4. Show or gesture without words; pantomime; dumb-show.**

"To the *dumbness* of the gesture one might interpret."
Shakesp.: *Timon*, i. 1.

II. Path.: Inability to speak; incapacity to articulate sounds. In a very large number of cases dumbness arises from no malformation of the organs of speech, but is a necessary sequence of congenital deafness, the latter arising from some morbid affection of the ear. A child acquires language by listening to and imitating the speech of its relatives or other people who talk in its presence, and picks up not merely the language of its country, but the exact pronunciation of the locality in which it for the time is. If, however, it labors under total deafness, the process now described is impossible, and the infant naturally remains dumb. If disease or accident produce total deafness when the child is four or five years old, it will gradually lose the power of speech which it has already acquired, and become dumb. Dumbness without deafness is a much more rare affliction. Hence the institutions designed for the benefit of this class of sufferers are generally said to be for the "deaf and dumb," or for "deaf-mutes." Dactylogy, or the use of finger alphabets, affords a ready means of enabling these afflicted persons to communicate with each other; besides which they can be taught to take note of the exact movements made by a speaker, and imitate them.

The first school for the deaf and dumb was opened in Edinburgh about 1763. Lately a great deal of attention has been given to teaching the deaf to speak and to understand what is said to them by a close attention to the muscular action of the lips of the speaker. The advocates of the new system declare that it is greatly superior to dactylogy, and the different states of the Union are more or less interested in introducing it among their pupils in the various asylums. In Philadelphia there is already (1894) in operation a school which receives state support.

dū-mō-tōge, *a.* [Lat. *dumet* (um)=a thicket, and Eng. *adj.* suff. *-ose*.]

2. Coarseness and thickness. (Applied to cloth.)

dūmp-līg, pr. par., a. & s. [*DUMP, v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of emptying earth, &c., from wagons, carts, &c., by tilting them.

dumping-bucket, s.

Mining: A hoisting bucket in a shaft so swung as to be tipped for the discharge of its load, or having a bottom which is closed by a latch, but may be swung open for dropping the contents.

dumping-car, s. Dumping cars are used in constructing and ballasting railroads, excavating and filling in, canal and dock building, for carrying ores, &c. The car has shutters in the bottom which are allowed to fall when a bolt or button is withdrawn. The tilting car has a bed secured by a longitudinal bolt to the frame, and may be tilted sideways so as to discharge its load over the wheels outside the track. Hooks retain the bed in a level position till the car reaches the place to dump the gravel. Dumping-cars are made to discharge at end or side, or to swivel and dump in any direction. The load is about 2½ cubic yards.

dumping-cart, s. A cart having a bed hinged to the axle and capable of being tipped to discharge its load. As the cart or wagon body is tipped up to dump the load, the tail-board will be raised automatically, and will drop back again into place and fasten itself as the said body is again raised into a horizontal position.

dumping-ground, s. A piece of ground where earth, &c., may be deposited or dumped.

dumping-reel, s. A mechanism in a harvester for dropping the gavels of grain. The cut grain falls against one of the reel-bars, which hold it up till a gavel is collected. The reel then makes a partial rotation, dropping what has been collected in the rear of the cutter-bar, and bringing another bar into position for collecting another gavel.

dumping-sled, s. A sled with an arrangement for sliding back the bed so that it may overbalance and tip over the load. The box is hinged to the rear bolster so as to tip and dump the contents when the bed is run back. This is done by removing a catch, when the draft of the team on the tongue draws upon a rope and runs the box to the rear.

dumping-wagon, s. A wagon with an arrangement for discharging the contents, similar to that made use of in the dumping-cart (q. v.). (*Knights*.)

***dūmp-līg, s.** [Eng. *dump, a.*; -ing.] Dullness.

"The brutish grossness and *dumping* of the mind."

1. To make of a dun color; to darken.

"*Duns* the ayre with misty smokes."
Thasault of Cupide.

2. To cure fish, as cod-fish, so as to give them a dun color. This is effected by laying them in a pile, after salting, in a dark apartment covered with salt, grass, or other like substance. In two or three months they are opened, and then piled again in a compact mass for two or three months longer, when they are fit for use.

dūn (1), *s.* [*DUN* (1), *v.*]

1. A troublesome, persistent, or importunate creditor; one who presses or urges for payment.

"Long, long beneath that hospitable roof,
Shall *Grub Street* dine, while *duns* are kept aloof."
Byron: English Bards and Scotch Reviewers.

2. An importunate or pressing demand for payment of a debt.

dūn (2), *s.* [*DOWN, DUNE*.] A hill, a mound, a fort. It is largely used in composition in place-names: as *Dunmore*, *Dunedin*, *Dundee*, *Donegal*, &c.

***dūn-ā-kēr, *dūn-na-kēr, s.** [Etym. unknown.] A cant term for a stealer of cows and calves.

"Mercury is in a conjunction with Venus, and when such conjunctions happen, it signifies a most plentiful crop that year of hectors, trappanners, gills, pads, biters, prigs, divers, lifters, filers, bulkers, droppers, famblers, donnakers, cross-biters, kidnappers, vouchers, millikers, pymeres, decoys, and shop-lifters; all Newgate birds whom the devil prepares ready fitted for Tyburn; ripe fruit, ready to drop into the hangman's mouth."—*Poor Robin*, 1603.

dūnce, s. [Ger. *duns*. A word introduced by the Thomists, or disciples of Thomas Aquinas, in ridicule of the Scotists, or disciples of John Duns Scotus, schoolman, who died A. D. 1305. (*Skeat*.)]

1. Originally: A subtle sophist given to caviling where he cannot refute. This was the sense in which the Thomists employed the term.

"Whoso surpasseth others either in caviling sophistry or subtle philosophy, is forthwith named a *Duns*."—*R. Stanhurst: Ireland till A. D. 1286, in Holinshed*.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, there; pine, pīt, sīre, sīr, marine; gō, pōt, or, wō wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trī, sīrian. æ, œ = ē; ey = ā. qu = kw.

"When the reaction against the schoolmen took place at the Reformation, the merits of those acute metaphysicians were temporarily decried, and the celebrated John Duns Scotus coming in for a more than ordinary share of disparagement, he, though a man of very subtle intellect, was held by the more ignorant or prejudiced of the Reforming party to be a man of invincible stupidity. He was therefore made to stand as the prototype of all modern dunces. Now that we are able to estimate the events of the sixteenth century with greater calmness and impartiality than the actors in the exciting scenes of that period were able to do, while gratefully acknowledging the inestimable services rendered to the church and world by the Reformers, we have yet felt constrained to reverse the unfavorable verdict which they passed on the cultivators of scholastic philosophy. The schoolmen were the intellectual leaders of the age in which they lived, and rendered good service to humanity, though eclipsed by the greater attainments of subsequent centuries.

"Remember ye not how, within this thirty years, and far less, and yet duredth unto this day, the old barking curs, *Dunces*' disciples, and like draft, called Scotists, the children of darkness, raged in every pulpit against Greek, Latin, and Hebrew?"—*Tyndale: Works* (1875), p. 278.

2. *Subsequently and Now*: A man of measureless stupidity, not, as at first, of perverted subtlety, but of mental obtuseness or intellectual deficiency,

"In school divinity as able
As he that might Irrefragable;
A second Thomas, or at once
To name them all, another Dunc."—*Butler: Hudibras*, I. i.

"He . . . has much contempt for the *dupery* and weakness of the sufferers."—*Smith*: Moral Sentiments, pt. vi., § 1.

dūp-īng, pr. par., a. & s. [DUPE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of making a dupe of another.

dūp-l-ōn, s. [Fr. *douppion*; Ital. *doppione*, from *doppio*, and Lat. *duplus*=double.] A double cocoon, formed by two or more silkworms.

***dū-ple**, a. [Lat. *duplus*; Gr. *diplōs*=double.]

1. Double, twofold.

2. Duplicate, alike, corresponding.

"The same nation also is separated from the Belgæ by *Matrona* and *Sequana*, rivers of a *duple* bigness."—*P. Holland*: *Ammianus Marcellinus* (1609).

† (1) *Duple ratio* is that of 2 to 1, 6 to 3, &c.

(2) *Sub-duple ratio* is that of 1 to 2, 3 to 6, &c.

***dū-ple**, v. t. [DUPE, a.] To double, to duplicate.

***dū-plēt**, s. [DUPE, a.] A doublet (q. v.).

dū-plēx, a. [Lat., from *duo*=two, and *plico*=to fold.]

1. *Ord. Lang.*: Double, twofold.

2. *Hor.*: Constructed with duplex escapement (q. v.).

"Lever, duplex, and horizontal watches."—*London Times*.

duplex-escapement, s.

Hor.: An escapement so called from the double character of its scape-wheel, which has spur and crown teeth. It was invented by Dr. Hooke about 1658, and improved by Dyer and Breguet. The balance-arbor carries a pallet which at each oscillation receives an impulse from the crown-teeth. In the arbor is a notch into which the spur-teeth fall in succession as the crown-teeth consecutively pass the impulse-pallet. [ESCAPEMENT.]

duplex-lathe, s.

Turnery: A lathe invented by Fairbairn for turning-off, screwing, and surfacing. Its peculiarity consists in the employment of a cutting-tool at the back of the lathe in addition and opposite to the tool in front, but in inverted positions to each other. The transverse forces are thus balanced, and time is saved. [LATHE.]

duplex-pumping-engine, s. An arrangement in which two steam-engines of equal dimensions are placed side by side, one operating the steam-valves of the other.

duplex-punch, s.

1. A punch having a counter-die mounted on an opposite jaw, as the ticket-punch.
2. A punch having a force derived from the rolling action of two levers on a common fulcrum, forming a toggle.

duplex-querela, s. [Lat.]

Ecol. Law: The same as DOUBLE-QUARREL (q. v.).

duplex-ratio, s.

Math.: The product of a ratio.

duplex-telegraph, s. A telegraph so arranged that messages can be simultaneously transmitted in opposite directions on the same line-wire. The first telegraph of this kind was devised by Dr. Gentl. of Austria, in 1853, and modified by Frieschen and Siemens-Holske in 1854; but it was not till some years later that any duplex systems were put into successful operation.

duplex-type, s.

Phot.: A name given to a mode of taking two photographs of the same person in different positions by two operations, so that he shall appear in two characters: say, for instance, playing the piano and—accompanying himself—on the violin. It is done by two exposures, with some skillful mode of hiding the division line. Shive's duplicating reflector is constructed for this purpose.

dū-plicā-tē, a. & s. [Lat. *duplicatus*, pa. par. of *duplico*=to double; *duplex* (genit. *duplicis*)=double.] [DUPLEX, DOUBLE.]

A. As adjective:

1. Double, twofold.

"The estates of Bruges little doubted to admit so small a number into so populous a company, yea, though the number were duplicate."—Hall: Henry VII. (an. 6).

2. Corresponding exactly with another; made in duplicate.

B. As substantive:**I. Ordinary Language:**

1. Another exactly correspondent to the first; a second thing of the same kind.

"Yet is their form and image here expressed
As by a duplicate."

Wordsworth: Excursion, bk. iv.

2. An exact copy or transcript of a document.

"Presenting a duplicate of his observations to Lord Oxford."—Walpole: Life of Mr. George Vertue.

3. A pawnbroker's ticket for goods pledged with him.

"Entering the duplicate he had just made out in a thick book."—Dickens: Sketches by Boz; Pawnbroker's Shop.

II. Law: A document corresponding exactly in all essential points with another, and differing from a copy only in having all the validity of the original; as, the duplicate of a lease, &c.

¶ Duplicate proportion or ratio: The same as the square of the ratio; as, the duplicate ratio of a to b is a^2 to b^2 .

"Duplicate proportion is the proportion of squares. Thus, in a rank of geometrical proportions, the first term to the third is said to be in a duplicate ratio of the first to the second, or as its square is to the square of the second: so on in 2, 4, 8, 16, the ratio of 2 to 8 is a duplicate of that of 2 to 4, or as the square of 2 to the square of 4."—Philips.

dū-plicā-tē, v. t. [DUPLICATE, a.]

I. Ordinary Language:

*1. To fold together.

2. To double; to make double or twice as great.

"And some alterations in the brain duplicate that which is but a single object to our undisturbed sentiments."—Glanville.

3. To make a duplicate or copy of.

"Which it was hoped would have been duplicated in the Bay of Bengal."—Transit of Venus, in London Times.

II. Phys.: To divide or branch into two, either by natural growth or by spontaneous division.

dū-plicā-tēd, pa. par. or a. [DUPLICATE, v.]

dū-plicā-tēd, pr. par., a. & s. [DUPLICATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of folding together, doubling, or making a duplicate or copy of; duplication.

dū-plicā-tion, s. [Lat. *duplicatio*, from *duplicatus*, pa. par. of *duplico*=to make double; French *duplication*.]

I. Ordinary Language:

1. The act of folding together.

2. The act of doubling or making twice as great or large; the multiplication of a number by two.

"If they had exercised a separate inspection or guard over the plebeians, the duplication of their number might have given additional protection to the plebeians."—Lewis: Cred. Early Roman Hist. (1855), ch. xii., pt. iii., § 41.

*3. A fold.

"The peritonæum is a strong membrane, everywhere double; in the duplications of which all the viscera of the abdomen are hid."—Wiseman: Surgery.

II. Phys.: The act or process of dividing or branching into two by natural growth or spontaneous division.

¶ Duplication of the cube: The operation of finding a cube whose volume is equal to double that of a given cube. The solution of this problem cannot be effected geometrically, as it requires the construction of two mean proportionals between two given lines. It may be solved by higher geometry, but its solution in this manner is rather curious than useful. It is also called the Delian problem (q. v.).

dū-plicā-tive, a. [English *duplicat(e)*; -ive.] Having the power or quality of becoming duplicated; specifically in physiology, having the quality of dividing into two by natural growth or spontaneous division.

dū-plicā-tō, in compos. [Lat. *duplicatus*.] [DUPLICATE.]

Bot., &c.: Doubly.

diculato-crenate, a.

Bot.: Doubly crenate; having each crenel itself crenate.

diculato-dentate, a.

Bot., &c.: Doubly toothed.

diculato-pinnate, a.

Bot., &c.: Doubly pinnate, bipinnate.

diculato-serrate, a.

Bot.: Doubly serrate, having each serrature itself serrated.

diculato-ternate, a.

Bot.: Ternate (q. v.).

dū-plicā-tūre, s. [Fr., from Lat. *duplicatus*.] A folding, a fold.

"The lymphducts, either dilacerated or obstructed, exonerate themselves into the foldings, or between the duplicatures of the membranes."—Ray: On the Creation, pt. ii.

dū-plīc-i-tŷ, *dū-plīc-i-tē, *dū-plīc-i-tē, s. [Fr. *duplicité*, from Lat. *duplicitas*=doubleness; *duplex* (genit. *duplicis*)=double; Sp. *duplicidad*; Ital. *duplicità*.]

I. Ordinary Language:

1. **Lit.:** The state of being double or in two; a division into twos.

"In other words, the *duplicity* thus conjectured does not exist; and of the *duplicity* or principal division of the ring which does exist those observers had no idea."—Athenæum, Oct. 14, 1882.

2. **Fig.:** Doubleness of heart or speech; double-dealing, deceit; the act or habit of assuming a false appearance or character for the purpose of deceit; a want or absence of straightforwardness; dissimulation.

"He was compelled to abandon it by the refractory temper of the soldiers, and by the incurable duplicity of the king."—Macaulay: Hist. Eng., ch. i.

***II. Law:** The pleading of two or more distinct matters or single pleas.

dū-plō, adv. [Lat. *duplus*=double, twofold.]

Chem.: A prefix used to express twofold or twice as much; as, *duplo-carburet*=twofold carburet.

dū-plŷ, s. [Formed from Lat. *duo*=two, and *plico*=to fold, on analogy of reply (q. v.).]

Scots Law: A second reply; a pleading formerly in use in inferior courts.

dūppe, *dūp-pen, v. t. & i. [DIP, v.]

dūp-pēr, s. [DUBBER.]

dūr-a-bil-i-tŷ, s. [Fr. *durabilité*, from Lat. *durabilitas*, from *durabilis*=durable (q. v.); Ital. *durabilità*.] The quality or condition of being durable; the power or property of lasting or continuing in any given state; endurance, continuance, durability; especially applied to the lasting or continuing of substances without change, perishing, or wearing out.

"Stones, though in dignity of nature inferior unto plants, yet exceed them in firmness of strength or durability of being."—Hooker.

dūr-a-ble, a. [Lat. *durabilis*, from *duro*=to last, to endure; *durus*=hard; Fr. & Sp. *durable*; Ital. *durabile*.] Having the quality of endurance or continuance in any given state; lasting, enduring, permanent; not subject to change or decay.

"Though his life be a dream, his enjoyments, I see,
Have a being less durable even than he."

Cuoper: Poplar Field.

dūr-a-ble-nēss, s. [Eng. *durable*; -ness.] The quality or condition of being durable or lasting; durability.

"A bad poet, if he cannot become immortal by the goodness of his verse, may, by the durability of the metal that supports it."—Addison: Ancient Medals.

dūr-a-blŷ, adv. [Eng. *durab(ile)*; -ly.] In a durable, lasting, or enduring manner; lastingly, permanently; so as to be durable or lasting.

"There indeed he found his fame flourishing, his monuments engraved in marble, and yet more durably in men's memories."—Sidney.

dūr-a-mā-tēr, s. [Lat., the hard mother, so called from its hardness in comparison to the underlying membrane.]

Anat.: The first of the three lining membranes of the brain, the others being the arachnoid and pia mater (q. v.). It is a strong membrane, composed of white fibrous tissue, lining also the interior of the skull and penetrating the spinal column, there called *thea vertebralis*, but not adherent to the bones, as in the cranium. Its external surface is rough, the internal smooth, and lined by the serous arachnoid membrane.

"The cerebro-spinal center is inclosed in certain membranes, or meninges, which are three in number: the *dura mater*, the arachnoid, and the pia mater."—Todd & Bowman: Physiol. Anat., vol. i., ch. x.

dū-rā-mēn, s. [Lat.=hardness, from *durus*=hard.]

Bot.: The heart-wood or central wood in the trunk of exogenous trees. It is hard and dense, and often colored, with its tubes dry and thick. Thus in the Ebony the duramen is black, and is the part used for furniture, &c.; the albumen, or outer wood, is pale. In the Beech the heart-wood is light-brown, in the Oak deep-brown, in the Judas-tree yellow, and in Guaiacum greenish. The relative proportion of duramen and albumen differs in different trees.

dūr-ānge, *dūr-aunce, s. [Fr. *durant*, pa. par. of *durer*; Lat. *duro*=to last.]

I. Ordinary Language:

*1. Endurance, continuance, duration, lastingness.

"Some writers accompt the terme of the *durance* of thys kyngdome from Cerdicus to Egbert."—Fabyan: Chronicle, vol. i., ch. cv.

2. Imprisonment, confinement, custody; a prison.

"And the grim guards that to his *durance* led,
In silence eyed him with a secret dread."

Byron: Corsair, li. 8.

***II. Fabric:**

1. A term applied to the leathern dresses worn by the lower orders.

"He, sir, that takes pity on decayed men, and gives them suits of *durance*."—Shakespeare: Comedy of Errors, iv. 3.

2. A stout woollen stuff formerly made in imitation of buff leather, and used for garments. Also called Durant and Tammy.

***dūr-an-ŷ, s.** [Lat. *durans*, pr. par. of *duro*=to last.] Durability, lastingness.

"The soul's ever *durancy* I sung before,
Yetruck with mighty rage."

More: Song of the Soul, pt. iii., c. i., § 1.

dūr-ant, *dūr-aunt, a. & s. [Fr. *durant*, pr. par. of *durer*=to last.]

A. As adj.: Lasting, continuing.

B. As substantive:

Fabric: In the same senses as DURANCE, II. 1 and 2.

dūr-ān-tē, pr. par. [Lat. abl. sing. of *durans*, pr. par. of *duro*=to last.]

¶ (1) *Durante bene placito*: During pleasure.

(2) *Durante vita*: During life.

dū-ra-tē, s. [Ital.]

Music: With harshness, roughly.

dūr-a-tion, s. [Lat. *duratus*, pa. par. of *duro*=to last; Sp. *duración*; Ital. *durazione*.]

1. The power or quality of continuing or lasting; durability, continuance.

"Duration is a circumstance essential to happiness."—Rogers.

2. The length of continuance or of existence; continuance in time.

"The misery that after death attends the misspent present life, overbalanceth all the good that this life can yield, both in degree and duration."—Hall: Contempl., vol. i. Victory of Faith over the World.

bōil, bōŷ; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aŷ; expect, Xenophon, exist. ph = f. -cian, -tlan = şan. -tion, -sion = şūn; -tion, -şion = zhūn. -tious, -cious, -sious = şhūs. -ble, -dle, &c. = bēl, dēl.

dār-bar, *s.* [Hind. & Pers. *darbār*, lit.=door of admittance; Pers. *dar*=a door, and *bār*=admittance.]

1. The audience-chamber in the palaces of the native princes of India; an audience.

2. An official levee or reception held by the Governor-General of India, or by one of the native princes.

dūr-dēn, *s.* [Corrupted from Wel. *dyffryn*, a valley (?).] A copse, a thicket in a valley. (Whar-ton.)

dūre, dōur, a. [Ir. *dur*=dull, obstinate; Gael. *dūr*; cogn. with Lat. *durus*=hard.] Sour, obstinate, sulky, stubborn.

"Dure enough in casting up their nonsense to them."—Scott: *Antiquary*, ch. xxi.

***dūre, *doure, *duri**, *v. i.* [Fr. *durer*; Lat. *duro*, from *durus*=hard; Sp. & Port. *durar*; Ital. *durare*.]

1. To last, to continue, to endure.

"Al thane day long dured that fith strong."—Layamon, iii. 62.

2. To endure, to exist, to survive.

"Why ne dyghttes thou me to dighe, I dure to longe."—E. Eng. *Allit. Poems*; *Patience*, 488.

3. To delay, to stop, to remain.

"Wonder me thunke . . . why we dure here."—Destruction of Troy, 5,598.

4. To endure, to hold out.

"The Sarezynes myghten nought dūre."—Richard Cœur de Lion, 2,937.

5. To reach, to extend.

"The desert that durethe unto Syrye."—Maunderville, p. 46.

***dū-re-fūl, *dū-re-fūll, a.** [Eng. *dure*; *full*.] Enduring, lasting.

"For neither factions stone, nor durefull brasse,
Nor shining gold, nor mouldering clay it was."—Spenser: *F. Q.*, IV, x. 39.

***dū-re-lēss, a.** [Eng. *dure*; *less*.] Not lasting or durable; fading, transitory, short.

"Yet were that aptitude natural, more inclinable to follow and embrace the false and dureless pleasure of the stage-play world, than to become the shadow of God."—Raleigh: *History* (Pref.).

***dūr-ēne, s.** [Lat. *durus*=hard; Eng., &c., suff. *-ene* (Chem.) (q. v.).]

Chemistry: Tetramethyl-benzene, $C_6H_2(CH_3)_4$, (1-2-4-5), is formed by the action of sodium on methyl iodide and monobromo-pseudocumene, $C_6H_2Br(CH_3)_3$, dissolved in ether. Durene is a crystalline compound, melting at 80°, and boiling at 190°. It is soluble in alcohol, ether, and benzene. Durene is the only known hydrocarbon of the benzene series that is solid at ordinary temperatures. Durene, when oxidized by nitric acid, yields cumylic acid, $C_6H_2(CH_3)_3COOH$, or durylic acid and cumic acid, $C_6H_2(CH_3)_2(COOH)_2$.

***dūr-ēss, *dūr-esse, s.** [O. Fr. *duressse*; Span. & Port. *dureza*; Ital. *durezza*, from Lat. *duritia*=hardness, harshness; *durus*=hard.]

1. *Ord. Lang.*: Harshness, strictness, constraint, imprisonment, restraint of liberty, pressure.

"In truth, the Parliament was under duress."—Macaulay: *Hist. Eng.*, ch. xx.

2. *Law*: Duress may be either physical, that is, by actual confinement or restraint of liberty, or moral, that is, by threats or menaces, *duress per minas*; in either case the overt act must be to compel a person to do some act, as to execute a deed or commit an offense: in such cases the act is invalid and excusable. Thus, if a man be violently assaulted, and has no other possible means of escaping death, he is permitted to kill his assailant; for here the law of nature and self-defense, its primary canon, have made him his own protector.

***dūr-ēss, v. t.** [DURESS, *s.*] To place in or subject to duress or restraint; to imprison.

"If the party duressed do make any motion."—Bacon.

***dū-rēs-sōr, s.** [Eng. *duress*; *-or*.]

Law: One who subjects another to duress.

***dū-rēt, s.** [Etym. unknown.] A kind of dance.

"The knights take their ladies to dance with them galliards, dūrets, corantes."—Beaumont: *Masque at Gray's Inn*.

***dū-rēt-tā, s.** [Lat. *durus*=hard.] A coarse kind of stuff, so called from its wearing well.

"Duretta and serge."—Maine: *City Match*, i. 5. (Davies.)

dūr-gā, s. [DOORGA.]

dūr-i-an, s. [DURIQ.]

dūr-ing, *dūr-ynge, *dūr-ynge, prep. [Properly the pr. par. of the verb to dure (q. v.), used prepositionally, and the construction corresponding originally to the Latin ablative absolute; as, *durante vita*=while life lasts, *during life*.] In the time or throughout the course or existence of; while some certain thing or state of things lasts.

"Our soul is but a smoke or airy blast,

Which, during life, doth in our nostrils play."

Davies: *Immortality of the Soul*, st. 30.

dūr-i-ō, dūr-i-an, dūr-i-ōn, s. [Malay *durion*.]

Bot.: A genus of plants belonging to the natural order Sterculiaceae. There is but one species, *Durio zibethinus*, a lofty tree, a native of the Malayan Archipelago. It furnishes the fruit called Durian, which is highly prized for its delicious flavor, although associated with a fetid odor, which has given rise to the name Civet Durian. It grows to a size as large as a man's head, and comes into season in May or June; occasionally a second crop is gathered in November. The flowers are large and of a yellowish-green color.

***dūr-i-tŷ, s.** [Lat. *duritas*, from *durus*=hard; Fr. *durété*; Ital. *durità*.]

1. Hardness, firmness, solidity. (Of material substances.)

"Ancients did burn fragments of marble, which in time became marble again, at least of indissoluble durability, as appeareth in the standing theaters."—Wotton: *Architecture*.

2. Hardness, firmness, or sternness of mind or disposition.

dūr-ōm-ē-tēr, s. [Lat. *durus*=hard, and Eng. *meter* (q. v.).] An instrument invented by Behrens, designed for testing the relative hardness of steel rails. It is virtually a small drilling-machine, working by hand or machine power, which registers the number of revolutions of the drill-spindle and also the amount of feed, the latter being given by the application of a known weight to the back of the drill-spindle. The friction of the machine and the state of the cutting edges are supposed to be constant quantities, and, as such, are thrown out of the calculation. The hardness of a metal is considered to be inversely proportionate to the depth of feed obtained with a given number of revolutions. (Knight.)

***dūr-ōus, a.** [Lat. *durus*=hard.] Hard.

"They all of them vary much from their primitive tenderness and bigness, and so become more *durous*."—Smith: *Port. of Old Age*, p. 186.

dū-rōŷ, s. [Fr.]

Fabric: A common quality of woollen serge.

dūr-rā, s. [DOURA (2), *s.*]

***dūrs-lēŷ, s.** [Etym. doubtful.] Blows without wounding or bloodshed. (Blount.)

dūrst, pref. of v. [DARE.]

***dūrst-igh-lŷ** (*gh* silent or guttural), ***dūrst-i-igh, *dūrst-igh-like, adv.** [A. S. *dyrstig*=bold, daring.] Boldly, daringly.

"Ther he *dyrstightlike* draff all ut
That folle of Godes temple."—Ormulum, 16,162.

***dūrst-īng-lŷ, adv.** [DURST.] Daringly, boldly.

"Dirstelle, bold, or, as we might say, *durstingly*, of one daring to do a thing of hazard or difficulty."—Verstegan: *Restitution of Deceased Intelligence*, c. vii.

dū-rŷl-ic, a. [Eng., &c., *dur(ene)*; *-yl(e)*, *-ic*.]

durylic acid, s.

Chem.: Cumylic acid, $C_6H_2(CH_3)_3COOH$. A monatomic monobasic acid obtained by oxidizing durene, $C_6H_2(CH_3)_4$, with dilute nitric acid. It crystallizes in hard prisms, which melt at 150°. By further oxidation, it is converted into cumic acid, $C_6H_2(CH_3)_2(COOH)_2$, which crystallizes in long transparent prisms, which sublime at high temperatures.

***dus-i, a. & s.** [DIZZY.]

A. As adj.: Dizzy.

B. As subst.: Dizziness, folly.

"That he heere *dusi* alogge?"—Old English Homilies, p. 111.

dūsk, *deosc, *deosk, *dosk, a. & s. [Cogn. with Sw. dial. *duska*=to drizzle, *dusk*=a slight shower, and *daskug*=misty; A. S. *theostre*=darkness.]

A. As adjective:

1. Tending to darkness; moderately or rather dark.

"A pathless desert, *dusk* with horrid shades."—Milton: *P. R.*, i. 296.

2. Tending to blackness or a dark color.

"The hills, to their supply,
Vapor and exhalation, *dusk* and moist,
Sent up again."—Milton: *P. L.*, xi. 740-42.

3. Not clear or plain; mysterious.

"This word is *deosk*."—Ancient Rite, p. 148.

B. As substantive:

1. A tendency to darkness; incipient or slight obscurity.

2. A tendency to a black color; darkness of color.

"Some sprinkled freckles on his face were seen,
Whose *dusk* set off the whiteness of his skin."—Dryden: *Palamon and Artoite*, iii. 76, 77.

3. Twilight; the period of time just between light and darkness.

"Blue, through the *dusk*, the smoking currents shine."—Thomson: *Summer*, 56.

***dūsk, *dusk-en, *dosk-in, v. t. & i.** [DUSK, *s.*]

***A. Transitive**:

1. *Lit.*: To make dusky or somewhat dark.

"Hire cote armure is *duskyd* read."—Lydgate: *Minor Poems*, p. 204.

"Withdrawen his devocion
And *dusken* his herte."—P. Ploughman's Crede, 1,119.

B. Intransitive:

1. To become dusk or dark; to be darkened.

2. To become dim.

"Thine ehnen schulen *doskin*."—Halt Meidenhad, p. 35.

***dūsked, pa. par. or a.** [DUSK, *v.*]

dūsk-ēn, v. t. & i. [Eng. *dusk*; *-en*.]

***A. Trans.**: To make dusk or dark; to darken.

"The said epigram was not utterly defaced, but only *duskened* or *rased*."—Nicolli: *Thucydides*, fol. 163.

***B. Intrans.**: To become or grow dusk.

"Till twilight *duskened* into dark."—J. R. Lowell.

***dūs-ke-nesse, s.** [DUSKNESS.]

dūsk-i-lŷ, adv. [Eng. *dusky*; *-ly*.] In a dusky or somewhat dark manner or degree.

"Night, with dusky mantle, covers
The skies (and the more *dusky* the better)."—Byron: *Beppo*, ii.

dūsk-i-nēss, s. [English *dusky*; *-ness*.] The quality or state of being dusky or somewhat dark.

"Time had somewhat sullied the color of it with such a kind of *duskiness*, as we may observe in pictures that have hung in some smoky room."—Trans. of Boetius (1674), p. 8.

***dūsk-īng, *dusk-ynge, pr. par., a. & s.** [DUSK, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of making dark or dim; the state of becoming dark or dim.

"Whereof is engendered *duskynge* of the eyes."—Sir T. Elyot: *Castel of Helth*, bk. iii.

***dūsk-īsh, a.** [Eng. *dusk*; *-ish*.]

1. Inclining to darkness; rather dark, obscure.

"With many *duskyish* vapors cled."—Stirling: *Aurora*, st. 16.

2. Inclining to blackness; somewhat black.

"Sight is not contented with sudden departments from one extreme to another, therefore rather a *duskyish* tincture than an absolute black."—Wotton: *Architecture*.

***dūsk-īsh-lŷ, adv.** [Eng. *duskyish*; *-ly*.] In a rather dusky or dark manner; somewhat darkly or mistily.

"The sawdust burned fair, till part of the candle consumed: the dust gathering about the snout made the snout to burn *duskyishly*."—Bacon: *Natural History*, § 369.

***dūsk-īsh-nēss, *dusk-ysh-nes, s.** [Eng. *duskyish*; *-ness*.] The quality or state of being dusky; duskiness.

"For who can it unfold, and read aright
The divers colors, and the tinctures fair,
Which in this various vesture changes write
Of light, of duskiness, of thick, of rare
Consistencies?"—More: *Song of the Soul*, i. 1, 22.

dūsk-nēss, *duske-nesse, *dusk-nesse, s. [Eng. *dusk*; *-ness*.] The quality or state of being dusk or somewhat dark; duskiness.

"Of satiety or fullness be ingendered painful diseases and sicknesses—great bleedings, cramps, *duskness* of sight."—Sir T. Elyot: *Governor*, 191 b.

dūs-kŷ, a. [Eng. *dusk*; *-y*.]

1. Tending to darkness or duskiness; somewhat dark.

"Midnight brought on the *dusky* hour
Friendliest to sleep and silence."—Milton: *P. L.*, v. 667, 668.

2. Tending to blackness in color; somewhat or rather black.

"*Dusky* they spread, a close embodied crowd,

Dutch Church, s.

Ecclesiol. & Church Hist.: The Church to which the majority of the people of Holland adhere. In the sixteenth century the ancestors of the present Dutch wavered for a time between the Lutheran and the Reformed churches. In 1571 they publicly professed their allegiance to the latter by embodying its doctrines in the Belgic Confession of Faith, published in that year. As long as they were under the sway of the Spaniards they, however, abstained from the use of the word Reformed, which had been introduced by the French, and styled themselves "Associates of the Augsburg Confession." The Spaniards considering Lutherans more easy to govern than Calvinists. One of the most notable events in the history of the Dutch Church, after the yoke of Spain was broken, was the Synod of Dort, in 1618. James Arminius, Professor of Theology at Leyden, having rejected the Calvinistic tenets and adopted those which were destined to be called after himself, Arminian, a synod was convened at Dort to examine and, if need be, condemn his views. This was done, but with little effect, the views of Arminius prevailing to a greater extent after than they had done before their condemnation. The present Dutch Church remains nominally Reformed, but a good deal of rationalism exists within its pale. Its government is Presbyterian.

Bot.: *Trifolium repens*, also called White Clover. It springs up frequently on lands recently cleared. It is a valuable pasture plant. The root is creeping; leaves broad, obovate, with a horse-shoe mark in the middle; flowers white or pinkish, forming a globular head. [CLOVER.]

Dutch concert, s. A so-called concert in which every man sings his own song at the same time that his neighbor is also singing his, a practice not necessarily so national as convivial. There is another form of Dutch concert, in which each person present sings in turn one verse of any song he pleases, some well-known chorus being used as a burden after each verse. When every person has sung his song, all sing their respective songs simultaneously as a grand finale. (Stainer & Barrett.)

Dutch courage, s. False or fictitious courage, usually applied to the bravado inspired by partial intoxication. The phrase probably originated in the seventeenth century, when England's wars with the Dutch, and especially the naval reverses England suffered at their hands in the reign of Charles II., rendered in England the very name of the Dutch a synonym for all that was bad.

"The Dutch their wine and all their brandy lose,
Disarmed of that from which their courage grows."
Waller. *Instructions to a Painter*, 43, 44.

***Dutch defense, s.** A sham defense.

"Mr. Jones maintained a kind of Dutch defense."

1. A spider, skillet, or camp-oven used by those who cook by hot coals on the hearth. A mode yet common in the Western States of the Union, and unsurpassed in its results with skillful housewives. The pot stands in hot embers, and more of the same are piled on the dish-shaped lid.

2. A cooking-chamber suspended in front of a fire so as to cook by radiation. Also eminently satisfactory in its results, in just such degree as toasting exceeds baking, and grilling or broiling exceeds frying.

Dutch pink, s. Chalk or whiting dyed with a decoction of birch-leaves, French berries, and alum. Dutch pink, English and Italian pinks, are bright yellow colors used in distemper and for paper staining, and other ordinary purposes. The pigment called "stil," or "stil de grain" is a similar preparation, and a very fugitive yellow, the darker kind of which is called Brown Pink.

Dutch roots, s.

Bot.: *Hyacinthus nutans*.

Dutch rushes, s.

Bot.: *Equisetum hyemale*, the largest species of horse-tail reeds. It contains a large amount of silica, and is therefore used for polishing mahogany, alabaster, &c. The silica is deposited in a regular manner, forming an integral part of the structure of the plant. It is exported from Holland, whence its name.

Dutch School, s.

Paint. This school of art cannot be said to possess the perfections that are to be observed in the Flemish school; their subjects are principally derived from the vulgar amusements of the peasants. The expressions are sufficiently marked; but it is the expression of passions which debase, instead of ennobling human nature. It must be acknowledged, at the same time, that the Dutch painters have succeeded in several branches of the art. If they have chosen low subjects of imitation, they have represented them with great exactness. If they have not succeeded in the most difficult parts of the chiaroscuro, they at least excel in the most striking, such as in light confined in a narrow space, night illuminated by the moon, or by torches, and the light of a smith's forge. The Dutch have no rivals in landscape painting, considered merely as the faithful representation of a particular scene. Among the chief master painters of this school are Rembrandt, Ruysdael, the Teniers, Ostade, the Breughels, Vandemere, Berghem, Both, Bakhuyzen, and the Vanderveldes. (Weale.)

Dutch scoop, s. A box shovel suspended by cords from a tripod and used for irrigation.

4. **Mining:**

(1) That portion of ore which is claimed by the owner of the soil, the lord of the mine.

(2) The useful work actually done by a steam-engine pumping water. This is represented by the number of pounds lifted one foot high by the consumption of, formerly, one bushel of coal of 94 lbs., now of 112 lbs. [DUTY OF AN ENGINE.]

† *On duty*: Assigned or appointed to the performance of some particular act, service, or duty.

† *Crabbs* thus discriminates between *duty* and *obligation*: "All duty depends upon moral obligation, which subsists between man and man, or man and his Maker; in this abstract sense, therefore, there can be no duty without a previous obligation, and where there is an obligation it involves a duty; but in the vulgar acceptance, duty is applicable to the conduct of men in their various relations: obligation only to particular circumstances or modes of action: we have duties to perform as parents and children, as husbands and wives, as rulers and subjects, as neighbors and citizens: the debtor is under an obligation to discharge a debt; and he who has promised is under an obligation to fulfill his promise; a conscientious man, therefore, never loses sight of the obligations which he has at different

times to discharge. The *duty* is not so peremptory as the obligation; the obligation is not so lasting as the *duty*; our affections impel us to the discharge of *duty*; interest or necessity impels us to the discharge of an obligation; it may, therefore, sometimes happen that the man whom a sense of *duty* cannot actuate to do that which is right, will not be able to withstand the obligation under which he has laid himself." (Crabb: Eng. Synon.)

duty-free, a. Not liable to duty, tax, or custom.

duty of an engine. The term was first explained in a definite and precise manner by Davies Gilbert, in a paper read in 1827. "The criterion of the efficiency of ordinary machines is force, multiplied by the space through which it acts; the effect which they produce, measured in the same way, has been denominated *duty*, a term first introduced by Mr. Watt in ascertaining the comparative merit of steam-engines, when he assumed one pound raised one foot high, for what has been called in other countries the dynamic unit; and by this criterion one bushel of coal has been found to perform a *duty* of thirty, forty, and even fifty millions." This has been more than doubled since the writing of the paper of Mr. Gilbert. The *duty* is not an expression of the work done, as this would include the power to overcome friction and other resistances, but is the actual useful effect, expressed in pounds weight, of water actually raised.

***dū-ūm-vīr-ā-qy, s.** [Eng. *duumvir*; -acy.] The same as *DUUMVIRATE* (q. v.).

¶ *Dwarfs* are described by several ancient classical writers. Herodotus gives an account of a race of *dwarfs* living in Libya and the Syrtis, to which Aristotle and Pliny also refer. Mr. H. M. Stanley, in his journey across Africa in 1888, came upon a *dwarfish* race, which he thought might be descended from that mentioned by Herodotus. Philotas of Cos, distinguished about 330 B. C., as a poet and grammarian, was jocularly said to have carried weights to prevent his being blown away. He was preceptor to Ptolemy Philadelphus. (*Ælian*.) Julia, niece of Augustus, had a *dwarf* named Coropas, two feet and a hand's breadth high; and Andromeda, a freedmaid of Julia's, was of the same height. (*Pliny*.) The best known of modern *dwarfs* was Charles S. Stratton, or, as he was popularly called, Tom Thumb. He was born in Bridgeport, Ct., and traveled extensively abroad and at home under the management of P. T. Barnum. Wherever he went he attracted great attention, even from such personages as Queen Victoria and Napoleon III.

*3. An attendant on a lady or knight; a page.

"The champion stout
Eftsoones dismounted from his courser brave,
And to the *dwārf* awhile his needles spear he gave."

*dy-ās, s. [*Gr. dyas*=the number two.]

Geol.: A term proposed by M. Marcon for the Permian formation. What was formerly called the "New Red Sandstone" was divided into two distinct formations, the Trias and the Permian—the former mesozoic, the latter paleozoic. The name Dyas, proposed for the Permian, was designed to correspond in sound and in etymology to the name Trias, for the more recent formation. The term Dyas implied that the rocks so called were naturally divided into two series. Three, however, are now admitted, as by Lyell in his *Students' Elements of Geology*—an Upper, a Middle, and a Lower Permian.

Dyaus, s. [*Sansc.*]

Hind. Myth.: A divinity of the Vedas, the god of the sky, and hence of rain. The name is the same as the Greek Zeus, and Latin Jupiter=Greek Zeus patrēr=Father Zeus.

dye-ing (2), pr. par., a. & s. [*DYE, v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The art of dyeing consists in impregnating fiber, in the state of cloth or otherwise, with coloring substances. Fibrous materials differ in their relative disposition to take color. Their disposition to absorb and retain color is in the following order, beginning with the one which has the greatest attraction for color: Wool, silk, cotton, flax, and hemp. Woolen goods dyed before weaving are called wool-dyed; if after weaving, piece-dyed. Dye colors are substantive or adjective. The former act directly, imparting their tints by simple immersion in their infusions or decoctions; the latter, which are the more numerous, immediately, requiring fixing or striking. The intermediate substances are called mordants. The mordant is first applied, and causes the dye which follows to adhere to the fiber, often singularly affecting its tint. Thus, cotton and dipped in a solution of copperas (mordant) and then in a solution of logwood (dye) becomes black. If a solution of tin (mordant) be substituted for the salt of iron, the tint imparted by the logwood will be violet. Mordants were used in China and India from very distant periods, and are described by Pliny. [*CALICO-PRINTING.*] The invention of dyeing is attributed to the Phœnicians. Solomon (B. C. 1000) sent to Hiram of Tyre for a man "capable to work in . . . purple, and crimson, and blue." Ezekiel speaks, in his burden of Tyre, of the "blue and purple from the isles of Elisha," which may mean the Peloponnesus and adjacent islands. The most celebrated dye of antiquity was the Tyrian purple, derived from a species of murex. Pliny cites two, the *buccinum* and *purpura*. A single drop of fluid was obtained from a sac in the throat of each animal. A quantity was heated with sea-salt, ripened by exposure for three days, diluted with five times its bulk of water, kept warm for six days, being occasionally skimmed; then clarified and applied as a dye to white wool previously prepared by the action of lime-water or fucus. The wool was first plunged into the *purpura*, and then into the *buccinum*. Sometimes a preliminary tint was given with *coccus* (kermes). The dye and dyed goods are celebrated in the Hebrew and other ancient scriptures. Prussian blue was discovered by Diesbach, at Berlin, 1710; aniline, in 1826, by Unverdorben. In 1856 Perkin, experimenting with aniline, treated it with bichromate of potassa, and obtained mauve. Arsenic tried as a substitute for bichromate of potassa produced magenta, blue, green, violet, and other colors were subsequently produced. Hats (black) are dyed in a solution of sulphate of iron, verdigris, and logwood, at a temperature of 180° F. They are alternately dipped and aired, the process being repeated perhaps a dozen times.

dý-nám-ê-tër, s. [Fr. *dynamètre*, from Gr. *dynamis*=power, and *metron*=a measure.]

Optics: An instrument for measuring the magnifying power of a telescope. This power is the ratio

of the solar focal distance of the object glass to the focal distance of the eye-piece considered as a single lens; this being the same as the ratio of the diameter of the aperture of the telescope to the diameter of its image or disc formed at the solar focus, and seen through the eye-piece, the object of the instrument is to measure the exact diameter of this image, which can be either projected on mother-of-pearl or measured by optical means. Ramsden proposed for this purpose the double-image micrometer, an instrument formed by dividing the eyepiece of a positive eye-piece into two equal parts, and mounting them so that the divided edges are made, by means of a fine screw apparatus, to slide along each other. Each semi-lens thus gives a separate image; and the distance of the two centers, measured by the revolutions of the screw, when the borders of the two images are brought exactly into contact, gives the distance of the centers of the images, or the diameter of one of them. (Knight.)

dý-na-mët-ric, dý-na-mët-ri-cal, a. [Fr. *dynamétrique*.] [DYNAMETER.] Of or pertaining to a dynameter.

dý-nám-ic, dý-nám-i-cal, a. [Gr. *dynamikos*, from *dynamis*=power.]

1. Pertaining or relating to power, strength, or dynamics.

"Its immensity is *dynamic*, not divine."—*J. Martineau*.

2. Pertaining or relating to the effect of the forces or moving agencies in nature.

"The sources of those great deposits of *dynamical* efficiency which are laid up for human use in our coal strata."—*Herschel: Astronomy* (1858), § 399.

dynamic-absorption, s.

Nat. Phil.: The absorption of heat when dynamic chilling (q. v.) takes place. (Tyndall.)

dynamical electricity, s. Current electricity. [GALVANISM.]

dynamic-chilling, s.

Nat. Phil.: The chill or cold produced when a tube full of gas or vapor is rapidly exhausted. The missing heat has gone to produce motion. (Tyndall.)

dynamic-energy, s.

Nat. Phil.: The force contained in a moving body.

dynamic-heating, s.

Nat. Phil.: The heat imparted to the particles of a gas when the latter is entering an exhausted tube. It is produced by the collision of the particles against the sides of the vessel. (Tyndall.)

dynamic-radiation, s.

Nat. Phil.: The radiation of heat when the dynamic heating of gas takes place. [DYNAMIC HEATING.] (Tyndall.)

dynamic theory, s.

Physics:

† 1. An hypothesis broached by Kant that all matter originated from the action of two mutually antagonistic forces—attraction and repulsion. All the predicates of these two forces are attributed by Kant to motion.

2. (Of heat): A theory or hypothesis—that now generally accepted as the correct one—which represents a heated body as being simply a body the particles of which are in a state of vibration. This vibratory movement increases as the body is still more heated, and diminishes proportionately as it more or less rapidly cools. It is called also the Mechanical theory of heat.

dý-nám-i-cal-lý, adv. [Eng. *dynamical*; -ly.] In a dynamical manner; as regards dynamics.

"A straight line, *dynamically* speaking, is the only path which can be pursued by a body absolutely free."—*Herschel: Astronomy* (1858), § 491.

dý-nám-ics, s. pl. [DYNAMIC, a.]

1. *Nat. Phil.*: The science which treats of the action of force. It is divided into two branches: Statics, i. e., that branch which investigates the action of force in causing rest, or preventing change of motion; and Kinetics, that branch which deals with the action of force in producing or changing motion. The whole science is popularly called Mechanics, dynamics being restricted to the branch properly called kinetics. [KINETICS, MECHANICS, STATICS.]

2. *Phil.*: The moving moral as well as physical forces of any kind, as well as the laws which relate to them.

3. *Music*: That branch of musical science which treats of or relates to the force of musical sounds.

† *Geological dynamics*:

Geol.: A term sometimes employed to characterize the branch of geology which treats of the aqueous, igneous, or other agencies which have brought about the long series of changes culminating in the present system of things.

dý-nám-ism, s. [Gr. *dynamis*=power; English suff. -ism.] The doctrine of Leibnitz, that all substance involves force.

dý-ná-mit-ard, s. [Eng. *dynamit(e)*, -ard.] A dynamiter (q. v.).

"The dynamitards are again going to attempt to wreck buildings in London."—*London Daily Telegraph*.

dý-nám-ite, s. [Greek *dynamis*=power, force; Eng. suff. -ite.]

Chem.: An explosive compound invented by Nobel. It is a mixture of 75 per cent. of nitro-glycerine with 25 per cent. of infusorial silica. The silica renders the powder less liable to explode from concussion. This is dynamite proper, but dynamite is also used as a generic name for other mixtures of nitro-glycerine: as colonial powder, which is gunpowder with a mixture of 40 per cent. of nitro-glycerine; dualine, which contains 30 to 40 per cent. of nitro-glycerine, mixed with sawdust saturated with nitrate of potassa; lithofracteur, which contains 35 per cent. of nitro-glycerine mixed with silica, and a gunpowder made with nitrate of baryta and coal.

dý-nám-ite, v. t. To use dynamite as a means of intimidation.

"Land owners plan to *dynamite*. They hope by so doing to stop railroad building."—*Chicago Inter Ocean*, Feb. 17, 1894.

dynamite-policy, s. The policy advocated by the extreme section of the Fenians in the United States, that destruction of property and life by means of dynamite should be resorted to in order to secure "Home Rule" for Ireland.

dý-ná-mit-ër, s. [Eng. *dynamit(e)*; -er.]

1. A supporter of the dynamite-policy (q. v.).

"The work of Irish dynamiters."—*London Echo*.

2. One who unlawfully uses dynamite to destroy life or property.

dý-ná-mô, subst. A dynamo-electric generator (q. v.).

dý-ná-mô-e-léc-tric, a. [Gr. *dynamis*=power, and Eng. *electric*.] Pertaining to the production of electrical currents by mechanical power.

dynamo-electric generator, s. A machine for generating electric currents by the conversion of motive power into electricity. [ENGINE DYNAMO.]

dý-ná-mô-gráph, s. A printing telegraph in which the message is printed at both transmitting and receiving ends. (Sloane.)

dý-ná-môm-ê-tër, dý-nôm-ê-tër, s. [Gr. *dynamis*=power, and *metron*=a measure.] [DYNAMETER.] A power measurer. Leroy's dynamometer is a spiral spring in a tube. Power is applied to condense the spring, and the pressure indicated by a graduated bar. Regnier's dynamometer consists of an elliptic spring whose collapse in the direction of its minor axis is made to move an index-finger on graduated arcs. The sector dynamometer is made of a bar of steel, bent in the middle, and having a certain flexibility. To each limb is attached an arc which passes through a slot in the other limb. Loops at the ends of the arcs permit the device to be placed between the power and the load, so that the limbs are drawn together when power is applied. When the problem is to ascertain the force transmitted through a revolving shaft, a break loaded with known weights is used.

dý-ná-mô-mët-ric, dý-ná-mô-mët-ri-cal, a. [Eng. *dynamometer*; -ic, -ical.] Of or pertaining to a dynamometer, or the measuring of force.

dynamometrical brake, s. Form of Dynamometer (q. v.). Prony's friction-brake is a test which involves the loss of power, as it consists in opposing a frictional impediment to the motion. The measure is relative as compared with other machines similarly tested, and is determined by the power evinced to resist given frictional opposition to the continuance of the motion. Thompson's friction-brake dynamometer has been contrived for estimating the amount of power transmitted through a shaft by means of clamping-blocks, a lever, and suspended weights. The requirement of a perfect dynamometer is that it shall not be itself a charge upon the power; that is, that by its interposition the expenditure of driving force required shall not be sensibly increased. This property belongs to all that class in which the power of the motor acts directly with all its force to produce flexure in springs, while the springs by their effort of recoil transmit it undiminished to the machine.

***dý-nást, s.** [Gr. *dynastês*=a ruler.]

1. A ruler, a chief, a prince.

"The ancient family of Des Ewes, *dynasts* . . . or lords of Kessel."—*Anthony a Wood*.

2. A dynasty, a government.

***dý-nás-tá, s.** [Lat., from Gr. *dynastês*=a ruler.] A tyrant, a despotic ruler.

"He had cut down *dynasts* or proud monarchs. — *Milton: Tenure of Kings and Magistrates*.

bôl, bôy; pôut, jôwl; cat, çell, chorus, çhîn, bench; go, gem; thin, thîs; sin, aș; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shûn; -tîon, -çion = zhûn. -tious, -cious, -sious = shûs. -ble, -die, &c. = bəl, dəl

dŷ-nās-tēs, *s.* [Greek *dynastēs* = a master, or ruler.]

Entom.: A genus of Coleoptera, the typical one of the family Dynastidae (q. v.). They are the largest beetles of the order, and come from South America, India, &c. [DYNASTIDÆ.]

dŷn-ās-tic, *a.* [Gr. *dynastikos*, from *dynasteia* = a government.] Of or pertaining to a dynasty or line of kings.

dŷ-nās-ti-dæ, *s.* [Mod. Lat. *dynastes* = Greek *dynastes* = a ruler, a master, and Lat. fem. pl. adj. suff. -ide.]

Entom.: A family of lamellicorn coleopterous insects. They are remarkably powerful, and may be regarded as the giants of the Coleoptera. They burrow in the earth and in putrescent timber, on which they chiefly feed. They are principally natives of tropical countries. They include the Atlas-beetle, the Elephant-beetle, the Hercules-beetle, &c.

dŷ-nās-ti-dan, *s.* [Mod. Lat. *dynastidæ*], and Eng. suff. -an.]

Entom.: A member of the coleopterous family DYNASTIDÆ (q. v.).

dŷ-nas-tŷ, *s.* [Gr. *dynasteia* = lordship; *dynastes* = a lord or ruler; *dynamai* = to be strong or able; Fr. *dynastie*.]

- *1. Government, rule, sovereignty
- *2. A kingdom, a separate government.

"Greece was divided into several *dynasties*, which our author has enumerated under their respective princes."—Pope.

3. A line, race, or succession of sovereigns of the same family who reign over a particular country; also the period during which a certain family reigns.

"Some account him fabulous, because he carries up the Egyptian *dynasties* before the flood, yea, and long before the creation."—Hale: *Origin of Mankind*.

dŷne, *s.* [For etym. see ¶.] The force which, acting upon a gramme for a second, generates a velocity of a centimeter per second. It is the C. G. S. unit of force. Or it may be defined as the force which, acting upon a gramme, produces the C. G. S. unit of acceleration. Or again, as the force which, acting upon any mass for one second, produces the C. G. S. unit of momentum. (Everett: *C. G. S. System of Units* (1875), ch. iii., p. 12.)

¶ The extract which follows explains at once the etymology, the origin, and the meaning of the word *dŷne*.

As regards the name to be given to the C. G. S. unit of force, we recommend that it be a derivative of the Greek *dynamis*. The form *dynamy* appears to be the most satisfactory to etymologists. The shorter form *dŷne*, though not fashioned according to strict rules of etymology, will probably be generally preferred in this country. Bearing in mind that it is desirable to construct a system with a view to its becoming international, we think that the termination of the word should for the present remain an open question. But we would earnestly request that whichever form of the word be employed, its meaning be strictly limited to the unit of force of the C. G. S. system—that is to say, the force which, acting upon a gramme of matter for a second, generates a velocity of a centimeter per second." [DYNAM.]

"The *dŷne* is about 1.02 times the weight of a milligramme at any part of the earth's surface."—Brit. Assoc. Report (1873), p. 224.

dŷ-ōx-ŷ-lite, *s.* [Ger. *diorylith*; Gr. *dyo* = two; *oxys* = sharp . . . and *lithos* = stone.]

Min.: The same as LANARKITE (q. v.).

dŷs, *pref.* [Gr. *dys* = ill, bad; cogn. with Sansc. *duḥ*, *dur*; Goth. *tus*, *tuz*; O. H. Ger. *zur*; Ger. *zer*.] An inseparable prefix, denoting ill, bad, unlucky, hard, &c.

dŷs-ās-thēs-l-a, *s.* [Greek *dys* = ill, &c., and *aisthēsis* = perception; *aisthanomai* = to perceive.]

Path.: Insensibility, impaired feeling or sensitiveness.

dŷs-as-tēr, *s.* [Gr. *dys* = bad, ill, and *astēr* = a star.]

Palæont.: A genus of irregular Echinoids, the type of the family Dysasteridae (q. v.).

dŷs-as-tēr-l-dæ, *s. pl.* [Mod. Lat. *dysaster*, and Lat. fem. adj. pl. suff. -ide.]

Palæont.: A family of irregular Echinoids, found in the Oolite and Chalk. Also called Collyritidæ (q. v.).

dŷs-chrō-æ, *s.* [Gr. *dyschroia* = a bad color; *dys* = ill, &c., and *chroia* = color.]

Med.: A discoloration or discolored state of the skin.

dŷs-cla-sīte, *s.* [Greek *dys* = ill, hard, &c., and *klasis* = a breaking; *klaoō* = to break.]

Min.: A mineral composed of a congeries of minute acicular crystals, commonly fibrous, but also found compact. Luster, sub-pearly; color, white,

with a shade of yellow or blue; frequently opalescent. It is very tough. It occurs in trap or related eruptive rocks in the Farø Islands, Iceland, Greenland, &c. It is also called Okerrite (q. v.). (Dana.)

dŷs-cōl-ōus, *a.* [Gr. *dyskolos* = hard to satisfy with food; *dys* = hard, and *kolon* = food.]

Med. (of diseases): Harassing, wearing.

***dŷs-crā-gī-æ**, ***dŷs-crā-gŷ**, *s.* [Gr. *dyskrasia*: *dys* = bad, ill, and *krasis* = a mixture.]

Med.: An unequal mixture of elements in the blood or nervous juice; a distemperature, when some humor or quality abounds in the body.

"In this pituitous dyscrasy of blood, we must vomit off the pituita, and purge upon intermissions."—Floyer: *Humors*.

dŷs-crā-site, *s.* [Gr. *dys* = bad, ill, &c., and *krasis* = a mixing; *kerannymi* = to mix.]

Min.: The same as DISCRASE (1), &c.

dŷs-ēn-tēr-lc, **dŷs-ēn-tēr-l-cal**, *a.* [Gr. *dysenterikos*.] [DYSENTERY.]

Medical:

1. Pertaining to, or of the nature of dysentery.

"Almost as useful in dysenteric complaints."—Grainger: *Sugar-Cane* (Note to v. 144).

2. Accompanied by, or proceeding from dysentery.

"A flux, for the most part dysenterical."—Boyle: *Works*, iv. 766.

3. Affected with, or suffering from dysentery.

***dŷs-ēn-tēr-l-ōus**, *a.* [Eng. *dysentery*; -ous.]

Med.: Suffering from dysentery; dysenteric.

"All will be but as delicate meats dressed for a dysenteric person that can relish nothing."—Gataker.

dŷs-ēn-tēr-ŷ, *s.* [Gr. *dysenteria* = a bowel complaint, from *dys* = bad, ill, and *enteron*, pl. *entera* = the bowels, from *entos* = within.]

Med.: A febrile, infectious, tropical disease, not common in this country. It may be acute or chronic, or again complex, and is very intractable and highly dangerous. It is seated in the large intestines, the lower part of the bowel, but sometimes extends upward into the small intestine above the ileo-colic valve. Dysentery is accompanied by straining, and scanty mucous and bloody stools, containing little or no feces. The most frequent complication is with the liver and disease of the kidney. There is feverishness throughout, dry skin, furred tongue, thirst, sleeplessness, quick pulse, despondency, and so forth, slow convalescence, rarely complete, leaving the patient frequently a complete wreck. Ipecacuanha is the chief remedy, especially in the acute cases; opium is more useful in the chronic stage, with warm baths and careful regimen. In the scorbutic form, the Bael fruit is the best remedy. Dysentery usually commences with griping diarrhoea and excruciating tormina, shooting or cutting pains, and leaves behind tenesmus, or the exhausting sensation that there is still something in the bowel to pass. In favorable cases recovery may take place in from three to four weeks, but death sometimes occurs in ten or twelve days, or the case may extend over months or years, till the patient becomes like a living skeleton. Altogether it is one of the most hopeless complaints which human flesh is heir to, and gives rise to many chronic abdominal diseases, for which death is the only physician.

dŷs-gē-nēs-lc, *a.* [DYSGENESIS.] Barren, sterile, opposed to fecund. (Darwin.)

dŷs-gēn-ē-sis, *s.* [Gr. *dys* = with difficulty, and *genesis* = generation.] The condition of not breeding freely, infecundity, sterility.

dŷs-kō-lite, *s.* [Gr. *dyskolos* = . . . wearying, harassing (†), and suff. -ite (Min.) (q. v.).]

Min.: The same as SAUSSURITE (q. v.).

dŷs-lō-gist-lc, *a.* [Formed with Gr. *dys* = ill, bad, on analogy of *eulogistic* (q. v.).] Expressing or conveying disapproval, censure, or opprobrium; opprobrious, censorious.

"Whenever he is in any *dyslogistic* extremity."—Blackwood's Magazine.

dŷs-lō-gist-l-cal-lŷ, *adv.* [Eng. *dyslogistic*; -al; -lŷ.] In a dyslogistic or censorious manner; so as to convey censure, disapproval, or opprobrium.

"Transcendentalist . . . is now *dyslogistically* employed among us."—T. H. Green. (Ogilvie.)

***dŷs-lō-gŷ**, *s.* [Formed with Gr. *dys* = ill, bad; on analogy of *eulogy* (q. v.).] Dispraise.

"In the way of eulogy and *dyslogy*."—Carlyle: *Miscell.*, iv. 117.

dŷs-lū-ite, *s.* [Gr. *dys* = ill, hard, &c., *lyō* = to loose, and Eng. suff. -ite (Min.).]

Min.: A mineral of yellowish-brown or grayish-brown color, a variety of Gahnite (q. v.), containing zinc, iron, and manganese.

dŷs-lŷs-lŷ, *s.* [Greek *dys* = difficult, and *lysis* = soluble, a loosening or dissolving.]

Chem.: An amorphous substance, $C_{24}H_{36}O_3$. Obtained by decomposing choloidic or cholic acid

by heating them to 300°, or treating them with dilute sulphuric acid. Dyslysin is insoluble in water, acids, potash, and alcohol (hence its name), but soluble in ether. Alcoholic potash converts it into choloidic acid.

***dŷs-nō-mŷ**, *a.* [Gr. *dysnomia* = lawlessness; *dys* = bad, ill, and *nomos* = a law.] The enactment of bad laws, bad legislation.

dŷs-ō-dile, *s.* [Gr. *dysōdēs* = ill-smelling; *dys* = bad, ill, and *odō* = to smell.] A species of coal which while burning emits a very fetid smell. It is found in masses of thin layers, of a greenish or yellowish-gray color.

***dŷs-ō-pl-æ**, *s.* [Gr. *dysopia*.]

Med.: The same as DYSOPSIA (q. v.).

dŷs-ōp-sŷ, *s.* [Gr. *dys* = bad, ill, and *opsis* = the sight; *optomai* = to see.]

Med.: Dimness or weakness of sight.

dŷs-ō-rēx-l-a, **dŷs-ō-rēx-ŷ**, *s.* [Gr. *dys* = bad, ill, and *orexis* = a longing, desire; *oregō* = to stretch out after.]

Med.: A want of appetite; a bad or depressed appetite.

dŷs-pēp-sī-æ, **dŷs-pēp-sŷ**, *s.* [Lat. *dyspepsia*, from Gr. *dyspepsia*, from *dyspeptos* = bad or hard to digest; *dys* = bad, ill, hard, &c., and *peptō* = to cook, to digest.]

Med.: Indigestion (q. v.).

"He told me that I've got a *dyspepsy*."—Southey: *The Doctor*, ch. xiii.

dŷs-pēp-tic, *a. & s.* [Gr. *dyspeptos* = bad or hard to digest.]

A. As adjective:

1. Pertaining to or of the nature of dyspepsia.

2. Suffering from or subject to dyspepsia.

"The only great writer who has disparaged Scott is his *dyspeptic* countryman, Carlyle."—Fraser's Magazine.

B. As subst.: A person suffering from or subject to dyspepsia.

***dŷs-phā-gī-æ**, ***dŷs-phā-gŷ**, *s.* [Gr. *dys* = bad, ill, and *phagēin* = to eat.]

Med.: A difficulty of swallowing.

***dŷs-phō-nī-æ**, ***dŷs-phō-nŷ**, *s.* [Gr. *dysphōnia*, from *dysphōnos*, from *dys* = bad, ill, and *phōnē* = a voice.]

Med.: A difficulty in speaking, arising from a disease or malformation of the organs.

dŷs-phōr-l-a, *s.* [Gr. *dysphoria* = pain hard to be borne; *dysphoros* = hard to bear; *dys* = hard, bad, &c., and *phoros* = bearing, carrying; *pheroō* = to bear.]

Med.: Morbid restlessness, producing wakefulness at night; the disease or morbid symptoms colloquially termed the Fidgets (q. v.). (Cheyne: *Wakefulness*, in *Cycl. Pract. Med.*)

***dŷs-phŷ-lŷ-lc**, *a.* [Formed with Greek pref. *dys* = bad, ill, &c., on analogy of *euphuistic* (q. v.).] Not euphuistic; not refined.

"It contains . . . two of the most execrably euphuistic or *dysphuistic* lines ever indited on us by man."—Swetnam: *A Study of Shakespeare*, ch. I., p. 62.

dŷs-pnō-æ, *s.* [Gr. *dyspnoia*, from *dys* = bad, ill, &c., and *pnōē* = breath; *pnōō* = to breathe.]

Med.: Difficulty of breathing.

***dŷs-pnō-lc**, *a.* [Greek *dyspnoikos* = short of breath.]

Med.: Suffering from shortness of breath; resulting from dyspnoea.

dŷss-nite, *s.* [Etym. not obvious.]

Min.: Sesquisulfate of Manganese. Dana considers it altered Fowlerite.

***dŷs-tēl-ē-ōl-l-ō-gŷ**, *s.* [Gr. *dys* = bad, ill; *telos* (genit. *teleos*) = end, purpose, and *logos* = a word, a discourse.] A word invented by Professor Haeckel, of Jena, to express that branch of physiology which treats of the apparent "purposelessness" observable in living organisms, such as the multitudinous cases of rudimentary and apparently useless structures. (Ogilvie.)

dŷs-thēt-lc, *a.* [Gr. *dysthetos* = ill-conditioned, from *dys* = bad, ill, and *thetos* = placed, situated; *tithēmi* = to place.]

Med.: Relating to a morbid state of the blood-vessels, or to a bad state of the body, dependent mainly upon the state of the circulating system.

dŷs-tōme, *a.* [Gr. *dys* = bad, ill, and *tomē* = a cutting; *temnō* = to cut.]

Min.: Having an imperfect fracture or cleavage.

dŷs-tōm-lc, **dŷs-tōm-ōus**, *a.* [Eng. *dystome* (e); -ic, -ous.]

Min.: The same as DYSTOME (q. v.).

dŷs-ūr-l-a, *s.* [DYSURY.]

dŷs-ūr-lc, *a.* [Gr. *dysourikos* = pertaining to dysuria; Fr. *dysurique*.] [DYSURY.]

Med.: Of or pertaining to dysuria.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

dys-u-ry, **dys-ū-rī-a**, ***diss-u-ry**, *s.* [Greek *dysouria*, from *dys*=bad, ill, and *ouron*=urine.]

Med.: Difficulty and pain in passing urine; when extreme it is called stranguria, and entire suppression or retention is known as ischuria.

dys-yn-trī-bite, **dys-syn-trī-bite**, *s.* [Greek *dys*=with difficulty, and *syntribō*=to rub together.]
Mtn.: The same as GIESECKITE (q. v.).

dys-tic-i-dæ, *s. pl.* [Mod. Lat. *dytic(us)*, and Lat. fem. pl. adj. suff. *-idæ*.]

Entom.: A family of predaceous Beetles, abundant in stagnant water. When inactive or hibernating they conceal themselves in the thick tufts of aquatic herbage or in the soft mud. They become active in the early spring, and may be then seen moving in the water by the propulsion of their strong hind legs, and coming at intervals to the surface to breathe. The antennæ are smooth, and destitute of pubescence. There are three sub-families. They have the same faculty as the Carabidæ of emitting a fetid liquid for defensive purposes through the interval between the head and thorax. They are able to make good use of their wings, flying a considerable distance from pond to pond. Commonly, but erroneously, written *Dytiscidæ*.

dýt-i-cūs, *s.* [Gr. *dytikos*=fond of diving; *dyō*=to plunge.]

Entom.: A genus of predaceous water-beetles, the type of the family Dyticidæ (q. v.). *Dyticus marginalis* is one of the commonest pond insects, and the favorite tenant of many a juvenile aquarist's tank. Commonly, but erroneously, written *Dytiscus*.

Dytiscus.

dý-vóur, *s.* [Fr. *devoir*.] A debtor who cannot pay; a bankrupt who has made a *cessio bonorum* to his creditors.

"Thief, beggar, and dyvour were the softest terms."—Scott: *Red-gauntlet*, lett. ii.

dý-yn-is-tre, *s.* [Eng. *divine*, and suff. *-ster*.] A diviner, a soothsayer, a fortune-teller.

"As I can never, I can nat tellen wher.

Therfore I stynte, I nam no *dyvynistre*."—Chaucer: C. T., 2,812, 2,813.

džer-én, **džer-ón**, *s.* [A Tartar word.]

Zool.: *Procarpa gutturosa*, an antelope from Central Asia.

džig-gě-tal, *s.* [DJIGGETAL.]

tread, &c. The combination *ei* has two sounds, the first the same as long *e*, as in *receive*, *deceive*, &c.; the second that of long *a*, or French *è*, as in *reign*, *feign*, &c. The digraph *ie* has the sound of long *e*, as in *siege*, *believe*, &c.

E. As an initial is used for East, as in charts: *E*. by S.=East by South.

E. As a symbol is used:

1. In numerals: For 250.

2. In Chem.: For the element Erbium.

3. In Music:

(1) For the note Hypate in Greek music (q. v.).

(2) The key-note of the Church mode, called Phrygian.

(3) The note Elami in the system of Hexachords.

(4) The third note of the diatonic scale, corresponding to *mi* of the Italians.

(5) Properly restricted to the *E* above tenor C, the octave above it being represented by *e* and the octave below it by *EE*.

(6) The key having four sharps in its signature.

4. In Church Calendar: For the fifth of the Domical letters.

E. As a prefix (Lat. *e*, *ex*) is used to signify from, out of, or away from, and also privation. [Ex-.]

**e*, **ee*, *s.* [EYE.]

"About hya hals ane quhissil hung had he,

Was all his solace for tinsale of his *E*."

Douglas: *Virgil*, 90, 42.

¶ *Ee* of the day: Noon, midday.

ee-bree, *s.* Eye-brow.

ěagh, **ech*, **echē*, *a. & pron.* [A. S. *ælc*, or *ēlc*,

the latter being probably the correct form, from *ā* + *lic*, or *d* + *ge* + *lic*=aye-like or ever-like; Dut. *elk*; O. H. Ger. *ēogalth*; M. H. Ger. *iegetich*; Ger. *geglich*.]

A. as adj.: Every one of a number considered separately; all.

"Each man's happiness depends upon himself."—Sterne: *Letters*, No. 71.

B. as pron.: Every one of a number taken or considered separately.

"Let each

His adamantine coat gird well, and each

Fit well his helm." Milton: *P. L.*, vi. 541-43.

¶ The correspondent word to *each* is *other*; as,

"Let each esteem other better than himself."—Philippians ii. 3.

The two words are used elliptically; as,

"Tis said they eat each other."—Shakespeare: *Macbeth*, ii. 4.

That is, they eat, each eats the other.

**each-whēre*, *adv.* [Eng. *each*, and *where*.] Everywhere.

"The cases questioned are for the most part only such as you will confess, before the suspicion of anti-christian apostasy, to have obtained *eachwhere* in the church."—Bp. Hall: *Remains*, p. 309.

ēad, *ēd*, [A. S. *ēd*, *ed*.] An element in English names, signifying happiness, good fortune, or blessedness. Thus *Edward* (Eadward) signifies happy preserver, *Edgar* (Eadgar) happy power, *Edwin* (Eadwin) happy conqueror.

**ēad-ish*, *s.* [EDDISH.]

ē-a-gēr, **ē-gre*, *a.* [O. Fr. *eigre*, *aigre*; Fr. *aigre*=acid, sharp; Lat. *acerem*, accus. of *acer*=sharp, keen; Sp. *agrio*; Ital. & Port. *agro*.]

1. Sharp, acrid.

"She was like thing for hunger dead,

That had her life only by bread,

Kneden with eisel strong and egre."—

Romance of the Rose, 145-7.

*2. Sour, acid.

"It doth posset

And curd like eager droppings into milk."—

Shakespeare: *Hamlet*, i. 5.

*3. Sharp, keen, biting.

"A nipping and an eager air."—

Shakespeare: *Hamlet*, i. 4.

4. Full of asperity, bitter.

"Vex him with eager words."—

Shakespeare: *Henry VI.*, Pt. III., ii. 6.

5. Impetuous, vehement, ardent.

(1) Of persons:

"Hunger will enforce them to be more eager."—

Shakespeare: *Henry VI.*, Pt. I., i. 2.

(2) Of things:

"What shrill-voiced suppliant makes this eager cry?"—

Shakespeare: *Richard II.*, v. 3.

6. Ardently desirous; excited by an ardent desire to attain, obtain, or succeed in anything.

"Many whom shame would have restrained from leading the way to the prince's quarters were eager to imitate an example which they never would have set."—Macaulay: *Hist. Eng.*, ch. ix.

¶ It is now followed by *for*, or an infinitive, but *of*, *on*, and *after* were formerly also used.

"His Numidian genius

Is well disposed to mischief, were he prompt

And eager on it." Addison: *Cato*, i. 1.

*7. Brittle, not ductile.

"Gold will be sometimes so eager, as artists call it, that it will as little endure the hammer as glass itself."—Locke.

¶ Crabb thus discriminates between *eager*, *earnest*, and *serious*: "*Eager* is used to qualify the desires or passions; *earnest* to qualify the wishes or sentiments; the former has either a physical or moral application, the latter altogether a moral application: a child is *eager* to get a plaything; a hungry person is *eager* to get food; a covetous man is *eager* to seize whatever comes within his grasp; a person is *earnest* in solicitation; *earnest* in exhortation; *earnest* in devotion. *Eagerness* is most faulty; it cannot be too early restrained; we can seldom have any substantial reason to be *eager*: *earnestness* is always taken in the good sense; it denotes the inward conviction of the mind, and the warmth of the heart when awakened by important objects. A person is said to be *earnest*, or in *earnest*; a person or thing is said to be *serious*: the former characterizes the object itself. In regard to persons, in which alone they are to be compared, *earnest* expresses more than *serious*; the former is opposed to lukewarmness, the latter to unconcernedness; we are *earnest* as to our wishes or our persuasions; we are *serious* as to our intentions: the *earnestness* with which we address others depends upon the force of our conviction; the *seriousness* with which we address them depends upon our sincerity, and the nature of the subject; the preacher *earnestly* exhorts his hearers to lay aside their sins; he *seriously* admonishes those who are guilty of irregularities." (Crabb: *Eng. Synon.*)

eager-hearted, *a.* Of eager heart.

"Every dog is eager-hearted,

All the four are in the race."

Wordsworth: *Incident Characteristic of a Dog*.

ē-a-gēr, **ea-gre*, **hi-gre*, **a-ker*, **ai-ker*, **ack-er*, **a-gar*, *s.* [A. S. *ēgor*, *ēdgor*, in compos. *ēgor-streām*, *ēdgor-streām*=ocean-stream; Icel. *ęgir*=ocean. (*Skeat.*)] The bore in a river, the commotion and high wave produced by the influx of the water of the ocean into the mouth of a river at the flow of the tide. [AKER, BORE (2), *s.*]

Like an eagle rode in triumph o'er the tide."

Dryden: *Threnodia Augustalis*, 135.

ē-a-gēr-lý, *adv.* [Eng. *eager*; *-ly*.]

*1. Sharply, keenly, bitterly.

"Abundance of rain froze so eagerly as it fell, that it seemed the depth of winter had of a sudden been come in."—Knolles: *History of the Turks*.

2. In an eager manner, ardently; with alacrity, eagerness, or impetuosity.

"The tidings were eagerly welcomed by the sanguine and unsuspicious people of France."—Macaulay: *Hist. Eng.*, ch. ix.

ē-a-gēr-něss, *s.* [Eng. *eager*; *-ness*.]

*1. Sharpness, acidity, tartness, sourness.

"Asproa: full of sourness or eagerness."—Florio: *New World of Words*.

2. Impetuosity, vehemence, violence, ardor, zeal.

3. The state or quality of being eager or ardently desirous for anything; ardent desire.

"She knew her distance, and did angle for me

Madding my eagerness with her restraint."

Shakespeare: *All's Well*, v. 3.

ē-a-gle (1), *s. & a.* [Fr. *aigle*, from Lat. *aquila*=an eagle, so called from its color; *aquilus*=brown, dark-colored.]

A. As substantive:

I. Ord. Lang.: In the same sense as II. 1.

II. Technically:

1. Ornithology:

(1) *Sing.*: Any bird of the sub-family Aquilinae. For details see ¶ (1), (2), &c.

(2) *Pl.*: The English name of the Aquilinae, a sub-family of Falconidæ. The beak is long, hooked only at the apex; the fourth quill is the largest. The average size of the species is larger than that of the other Falconidæ, but the greatest perfection of raptorial structure is in the sub-family Falconinae and its typical genus *Falco*. Compared with them the Aquilinae are cowardly birds. The eagles are generally distributed over the world. They lay about two eggs, white and spotted, especially at the thicker end.

2. *Her.*: The eagle, borne upon a spear, was used by the Persians as a standard in the battle of Cunaxa, B. C. 401. The Romans used eagles of silver, or more rarely of gold, carried in the same way as standards. They were first introduced about B. C. 104. The Napoleon dynasty of French rulers also adopted the eagle as their symbol. A double-headed eagle is the emblem of Russia, of Austria, and of Prussia. It is said to have been introduced as early as A. D. 802, by Charlemagne, who meant to suggest by it that the government, both of the Roman and German empires, was in his hands. The American White-headed or Bald Eagle (*Haliaeetus leucocephalus*) is the emblem of the United States. Thero

THE fifth letter and the second vowel in the English language. It has three principal sounds, the first long, and corresponding to the sound of *i* in French and Italian, as in *me*; the second short, as in *men*; and the third like *a* or the French *è*, as in *there*. There is also the modification caused by the short or long *e* being followed by *r*, as in *her* and *here*.

The *u* or dropped sound of it, as in *camel*. *E* occurs in words more frequently than any other letter of the English alphabet, this being in a great measure due to the fact that it represents in many instances the Anglo-Saxon *a*, *e*, *o*, and *u*. It is pronounced with a medium opening of the mouth, the tongue being expanded to touch the upper molars, and the voice gently exhaled. *E* is largely used as a final vowel to lengthen the preceding syllable, being itself silent: as *man*, *mane*; *can*, *cane*. Sometimes, however, it exercises no influence on the preceding vowel, as in *gone*, *give*. It is also used after *c* and *g* to denote the softened sounds of those letters: *c* followed by *e* being pronounced as *s*, and *g* followed by *e*, as *je*. Up to the end of the fourteenth century the final *e* was in most cases pronounced, except before a vowel, or letter *h*: thus the first line of Chaucer's *Canterbury Tales* was pronounced as follows:

"When that Aprilē with his shourē swotē."

When the letter *e* is doubled the sound is the same as that of the long single *e*; as in *deem*, *seem*, &c. The digraph *ea* is, in most cases, sounded as long *e*, but occasionally as short *e*; as in *lead* (the metal),

bōl, *bōy*; *pōut*, *jōwl*; *cat*, *cell*, *chorus*, *ghin*, *bench*; *go*, *gem*; *thin*, *this*; *sin*, *as*; *expect*, *Xenophon*, *exist*. *ph* = *f*.
-*clan*, -*tian* = *shan*. -*tion*, -*sion* = *shūn*; -*tion*, -*sion* = *zhūn*. -*tious*, -*cious*, -*sious* = *shūs*. -*ble*, -*dle*, &c. = *bəl*, *dəl*.

is a White Eagle Order of Knighthood in Russia, and there are Orders of the Black, Golden, and Red Eagles in Germany.

¶ The eagle played a conspicuous part in the apotheosis of Roman Emperors. Herodian (iv. 2), after describing the firing of the funeral pile, says, "From the highest and smallest story, as from a pinnacle, an eagle is let loose to mount into the sky, which is believed by the Romans to carry the soul of the Emperor from earth to heaven, and from that time he is worshipped with the other gods." The medals struck in honor of an apotheosis show an altar with fire thereon, and the eagle, the bird of Jupiter, taking flight. Dryden refers to this custom in the opening lines of his *Heroic Stanzas on the late Lord Protector*.

8. *Numis.*: Various royal individuals and dynasties have placed the eagle on their coins. This was done notably by the Seleucids in Syria and the Ptolemies in Egypt. The following are the coins most frequently called Eagles:

(1) An old Irish coin, current about A. D. 1272. It was suppressed under Edward I.

(2) A gold coin current in the United States, equal to ten dollars; weight, 16.718 grammes, or 258 grains; fineness, .900. In 1870 coins of the same fineness and of proportional weight were struck, called the Double-eagle, Half-eagle, and Quarter-eagle.

4. *Astron.*: A constellation in the northern hemisphere. [AQUILA, 2.]

5. *Ecclesiology*: A lectern or reading-desk in churches, in the form of an eagle with outstretched wings.

B. *As adj.*: Of or pertaining to an eagle: as, eagle wings.

¶ (1) *American Bald Eagle*: The same as *American White-tailed Eagle* (q. v.).

(2) *American White-tailed Eagle*: *Haliaeetus leucocephalus*. [EAGLE, II. 2.]

(3) *Booted Eagle*: *Aquila pennata*.

(4) *Cinereous Eagle*: The same as the *White-tailed Sea Eagle* (q. v.).

(5) *Crested Eagle*: The same as *Harpy Eagle* (q. v.).

(6) *Golden Eagle*: *Aquila chrysaetos*. The adults are colored differently from the young birds, the latter not attaining their mature colors till their third year. In the former the summit of the head and nape is of a lively golden red, the rest of the body dark brown, the tail gray barred with brown, the bill horn-color, the iris brown, the cere and feet yellow. There is, in the young birds, a great deal of white which ultimately disappears. Length of the adult, about three feet; expanse of wing, seven to eight feet. The golden eagle is a solitary bird. It breeds generally on the ledges of rocks. It is distributed over this country and Europe, the North of Asia, and is found also in India and the North of Africa. It feeds on the smaller quadrupeds, sometimes carrying off lambs. When it cannot obtain animals which itself has killed, it has no scruple about feeding on carrion. The longevity of the eagle is proverbial; one kept in confinement in Vienna is said to have lived 104 years.

(7) *Harpy Eagle*: *Thrasaetus harpyia*. It is called also the *Crested Eagle*. [HARPY.]

(8) *Martial Eagle*: *Spizaetus bellicosus*.

(9) *New Holland White Eagle*: *Astur Novæ Hollandiæ*.

(10) *Pondicherry Eagle*: *Haliastur Indus*. A small eagle found in India. It is called by Anglo-Indians the *Brahminy Kite*.

(11) *Ring-tail Eagle*: The same as *Golden Eagle* (q. v.).

(12) *Rough-footed Eagle*: *Aquila nævia*. A small eagle, a native of Central and Southern Europe, Western Asia, and India.

(13) *Sea Eagle*: [SEA EAGLE.]

(14) *White-tailed Sea Eagle*: *Haliaeetus albicilla*. Its length slightly exceeds that of the *Golden Eagle*, though its expansion of wing is less.

(5) A disposition to like or dislike what is heard; judgment, opinion, taste.

(6) A window, a door.

"My house's ears, I mean my casements."

Shakespeare: *Merchant of Venice*, ii. 5.

II. *Technically*:

1. *Anatomy*:

(1) *Human Anat.*: The organ of hearing is divided into three parts, the external ear, the middle or tympanum, and the internal or labyrinth. The external consists of the pinna or funnel, which collects the vibrations of the air producing sound, and the meatus or tube which conveys the vibrations to the tympanum; in its lining-membrane are the ceruminous glands, which secrete the wax of the ear. The middle ear or tympanum is an irregular bony cavity within the petrous bone, having behind it the mastoid cells; it contains three small bones, the malleus or hammer, the incus or anvil, and the stapes or stirrup, covered by the membrana tympani extending from the meatus in three layers, an external, epidermal; middle, fibrous and muscular; internal, mucous. The ligaments are three in number, the muscles four, and the foramina or openings ten, five large and five small. The labyrinth or internal ear is very complex, and consists of a membranous and osseous part, the latter showing a series of cavities tunneled through the petrous bone, and divided into vestibule, semicircular canals, and cochlea, the first lying nearest the tympanum, the others beneath, the last about one and a half inches in length, making two and a half spiral turns round the modiolus or central axis, and divided into two passages by a thin porous bony plate: the zonula ossea lamina spiralis. The auditory nerve divides at the bottom of the meatus auditorius internus into two, the vestibular and the cochlear; the arteries arise chiefly from the auditory branch of the superior cerebellar artery.

(2) *Comp. Anat.*: The simplest form of ear, as in some crustacea and fishes, is simply a cavity in the solid part of the head filled with liquid and lined by a membrane on which the auditory nerve is distributed; these live in water, but those crustacea chiefly living in air, and most fishes, have the vestibule open on its external side, covered in by a membrane. In this simple form, the force of the vibrations is increased by minute stony concretions, otoliths, suspended in the fluid of the cavity. In all vertebrate animals above the inferior reptiles, we have the tympanum or drum with its membrane and chain of bones in addition to the internal ear, and in the mammalia, we have in addition the external ear, and also prolonged from the vestibule or first portion of the internal ear, we have the semicircular canals, and the cochlea. In birds the cochlea is nearly straight instead of spiral, though like that of man it is divided by a membranous partition, the organ which enables us to judge of the pitch of sounds. The cochlea is quite rudimentary in reptiles, and in fishes it does not exist at all.

2. *Physiol.*: [HEARING.]

3. *Machinery*:

(1) The loop or ring on the ram of a pile-driver, by which it is lifted.

(2) One of the two projecting parts on the portions of an eccentric strap by which they are bolted together.

ear-like, a. Like an ear.

ear-mark, s.

1. A distinguishing mark of any kind, whether intentional or otherwise.

"I know he has had it—it bears his ear-mark."—*G. W. Conklin: Manual.*

2. A distinguishing mark, as the cutting of the ear of a sheep, by which its owner may identify it as his property.

"Money is said to have no ear-mark."—*Wharton.*

ear-muff, s. A small velvet or woolen covering to protect the ears in cold weather. They are generally held in place by a wire spring or an elastic band.

ear of Dionysius, s. An acoustic instrument named after the sound-conducting orifice in the roof of the dungeons where the old Sicilian tyrant kept his prisoners. It has a large mouthpiece to collect the sound, which a flexible tube conducts to the ear of the person. It is especially adapted for enabling the very deaf to hear general conversation, lectures, sermons, &c.

ear-pick, s.

Surge.: A small scoop to extract hardened cerumen from the *meatus auditorius*, or foreign matters from the external ear.

ear-piercing, a. Shrill.

"The ear-piercing fife."—*Shakespeare: Othello, iii. 3.*

**ear-reach, s.* Hearing distance, ear-shot.

"Within the ear-reach of his words."—*Fuller: Holy State, v. 18.*

**ear-rent, s.* Payment made by mutilation or loss of the ears.

"A hole to thrust your head in, for which you should pay ear-rent."—*Ben Jonson.*

ear-ring, s. A pendant or ornament worn hanging from the ears. This ornament has been worn by both sexes from the earliest times in Oriental countries, but among the Greeks and Romans its use was confined to females. It was usually constructed of gold, of various forms, very finely wrought, and set with pearls and precious stones. The ears in the statue of the Medicean Venus are pierced, and probably were at one time ornamented with earrings. (*Fairholt.*)

"With gold and silver they increase his store,
And gave the precious ear-rings which they wore."

Sandys.

ear-shell, s.

Zoology.

1. *Sing.*: The English name of the gasteropodous genus *Helix*. It is so called from the ear-shaped character of its shell. About 75 recent species are known. [*HALIOTIS.*]

2. *Pl.*: The family *Haliotidae*, of which *Haliotis* is the type.

Surge.: An instrument for distending the exterior canal of the ear, in removing indurated wax, or other explorations and operations; an otoscope.

**ear-sports, s. pl.* Entertainments of song or music. (*Holland: Plutarch.*)

ear-syringe, s. An instrument for injecting the ear with a liquid or medicated vapor. An ordinary syringe may answer the usual purposes of cleanliness, softening indurated wax, &c., but this instrument has a further capacity. It consists of an india-rubber air-bag, a flexible tube, a bulb of hard-rubber, made in two pieces, which screw together, and contain a sponge to hold chloroform or other liquid; and a perforated bulb. It is particularly used in treating diseases of the middle ear. The sponge being previously moistened, the nozzle of the bulb is placed in one nostril, the other is closed by the finger of the surgeon, the mouth is also closed, and the patient, having previously taken a mouthful of water, is told to swallow, and just as he is doing this, the surgeon compresses the air-bag, and sends the iodized air into the faucal orifice of the eustachian tube, and if the drum be perforated, into the cavity of the tympanum.

ear-trumpet, s. An instrument designed for the collection and conduction of sounds. By increasing the size of the auricle, a much larger volume of sound is gathered than by the natural ear without such aid. The ear-trumpet for the assistance of the partially deaf is believed to have been invented by Baptista Porta about 1600. Kircher describes the funnel and tube for conveying sound, the device which is now so common for conveying intelligence

between apartments and shops, in dwellings, warehouses, and factories. Dr. Arnott, a physician, who became partially deaf from a cold contracted in traveling, first devised the pair of shells or artificial ears which extend the surface displayed to gather the tremulous air. There are two qualities required in a speaking-tube: that it shall concentrate a large amount of sound in a small space; and, secondly, that it shall not stifle the sounds within the tube itself.

Gutta-percha seems to answer the latter conditions better than any other material. Ear-trumpets are of several descriptions; their essential characteristic is that they have a narrow aperture at one end to be placed close to the ear, while the other opening is large and bell-shaped. The waves of sound collected from the wide expanse of the one extremity are concentrated as they flow toward the other, and in that state enter the ear. The ear-trumpet is a speaking trumpet reversed.

ear-wax, s. [CERUMEN, EARWAX.]

**ear-witness, s.* One who attests or can attest anything as heard with his own ears. [Cf. EYE-WITNESS.]

"All present were ear-witnesses, even of each particular branch of a common indictment."—*Hooker.*

***ëarl**, ***erl**, ***erle**, *s.* [A. S. *eorl* = a warrior, a hero; cogn. with Icel. *jarl*, *earl* = a warrior; O. S. *erl* = a man. "Earl", the same as the Danish *jarl*, was, I believe, originally a contraction of *aldor* (senior), elder, and, therefore, *aldor* or alderman were originally the same word. On this Max Müller appends a note: "That A. S. *earl* was a contraction of *aldor* is first pointed out by Lappenberg in his *History of England*. *Ealdor* or *aldor* in Anglo-Saxon denotes princely dignity, without any definition of function whatever." (*Max Müller: Science of Language* (6th ed.), vol. ii., p. 280.)] An English title of nobility, the third in rank, being next below that of marquis, and next above that of viscount. It is the representative of the Norman title of count (q. v.), and originally the earls, like the counts, had jurisdiction over a certain district or shire, whence they were called also Shiremen. The title now is wholly unconnected with any territorial jurisdiction. The earl's coronet consists of a richly-chased circle of gold, having on the upper edge eight strawberry leaves, between each pair of which is a pearl on a spire rising above the leaves; the cap is similar to that of a duke. [DUKE.]

Earl's Coronet.

Henceforth be *earls*, the first that ever Scotland
For such an honor named."—*Shakesp.: Macbeth*, v. 8.

***ëarl-marshāl**, ***erle-marshāl**, ***ëarl-marshāl**, *s.*

1. An English officer of state, ranking eighth in precedence. His office is one of great antiquity, and was formerly of considerable importance. He is the head of the college of arms, with whom resides the determination of all questions relating

to arms and grants of armorial bearings. The office is now hereditary, being held by the Dukes of Norfolk.

*2. One who has the chief care of military solemnities.

"The marching troops through Athens take their way,
The great *earl-marshāl* orders their array."
Dryden: Palamon and Arcite, iii. 530, 531.

***ëar-lāp**, *s.* [Eng. *ear*, and *lap*.] The tip of the ear.

***ëarl-dōm**, *s.* [Eng. *earl*; -*dom*.]

*1. *Ord. Lang.*, &c.: A little ear.

2. (*Pl. Bot.*): Peculiar indentations in the leaves of the *Foliosae hepaticae*. (Thomé.)

***ëar-li-nēss**, *s.* [Eng. *early*; -*ness*.] The quality or state of being early, forward, or in advance.

"The goodness of the crop is a great gain, if the goodness answer the earliness of coming up."—*Bacon*.

***ëarl-ish**, *a.* [Eng. *earl*; -*ish*.] Like an earl.

***ëarl-ish-nēss**, *s.* [Eng. *earlish*; -*ness*.] The qualities or characteristics of an earl.

"'Earliness!' I never heard of such a word." "If there is not such a word, there ought to be. Girl is represented by girlishness; why not earl by earliness?"—*Mortimer Collins: Two Plunges for a Pearl*, vol. iii., p. 114.

***ëar-lōck**, *s.* [Eng. *ear*, and *lock*.] A lock or curl of hair worn on the cheek near to the ear by men of fashion in the early part of the seventeenth century; a love-lock.

"These love-locks, or earlocks, in which too many of our nation have of late begun to glory."—*Prynne: Unloveliness of Love-locks*, p. 3.

***ëar-lȳ**, ***ëar-lich**, ***ëer-li**, ***ëre-liche**, ***erliche**, ***ëare-ly**, ***ëre-ly**, *adv. & a.* [A. S. *ærlīce* = early (*adv.*), from *ær*=sooner, and *līc*=like.]

2. Coming before or in advance of the usual time.

"As an *early* spring we see."

Shakesp.: *Henry IV.*, Pt. II., i. 3.

3. First, toward, in or near the beginning.

"But, as he lay in the morning light, his face for a moment
Seemed to assume once more the forms of its earlier
manhood."

Longfellow: *Evangeline*, ii. 5.

4. In good time, not advanced in the day.

"At these early hours shake off
The golden slumber of repose."

Shakesp.: *Pericles*, iii. 2.

early English, *a. & s.*

A. As adjective:

1. *Arch.*: [Early English Architecture.]

2. *Philol.*: An epithet most properly employed to designate the period between 1250 A. D. and 1350 A. D. but commonly used to express any period between 1250 A. D. and the close of the fifteenth century. [ENGLISH.]

B. As subst.: The language of England in the periods described in A. 2.

Early English Architecture: The first of the pointed or Gothic styles of architecture used in England. It immediately succeeded the Norman

toward the end of the twelfth century, and gradually merged into the Decorated at the end of the thirteenth. The moldings consist of alternated rounds and deeply-cut hollows, with small fillets, producing a strong effect of light and shadow.

The arches are usually equilateral or lancet-shaped, though drop-arches are frequently met with, and sometimes pointed segmented arches; trefoil and cinquefoil arches are also often used in small openings and panelings. The doorways of this style, in large buildings, are often divided into two, by a single shaft or small pin, with a quatrefoil or other ornament. The windows are almost universally of long and narrow proportions, and are used singly, or in combinations of two, three, five, and seven; when thus combined, the space between them sometimes but little exceeds the width of the mullions of the latter styles. Groined ceilings are very common in this style. The pillars usually consist of small shafts arranged round a larger circular pier, but others of a different kind are sometimes found. The capitals consist of plain moldings, or are enriched with foliage and sculpture characteristic of the style.

Early English Architecture.
West Front of Salisbury Cathedral.

earm, *v. i.* [YIRM.] To whine, to complain.

***ëar-mark**, *s.* [Eng. *ear*, and *mark*.]

I. Ordinary Language:

1. *Lit.*: A mark on the ear by which a sheep is known and identified.

"Sir J. Perrot [in 1584] ordered the Irish to mark all their cattle with pitch or earmark, on pain of forfeiture."—*Cox: Hist. of Ireland*.

*2. Any distinguishing or distinctive mark or feature.

"The very earmark of the age we live in."—*Stephens: Add. to Speim. Hist. Sac.* (1698), p. 235.

earn, s. [ERNE.] An eagle.

"They gleamed on many a dusky tarn,
Haunted by the lonely earn."
Scott: *Lay of the Last Minstrel*, iii. 29.

earn-blitter, earn-bleater, s. The snipe; *Scolopax gallinago*.

"The earn-bleater, or the snipe's crow,
Was like to melt her very heart awa."
Ross: *Helenore*, p. 58.

earned, pa. par. or a. [EARN (1), v.]

ĕar-nĕst, s. & a. [A. S. *earnest*=seriousness; cogn. with Dut. *ernst*; O. H. Ger. *ernust*; M. H. Ger. *ernest*; Ger. *ernst*.]

A. As substantive:

1. Seriousness; a serious reality, as distinguished from jesting or a feigned appearance; most frequently found in the phrase, in *earnest*.

"Take heed that this jest do not one day turn to earnest."—Sidney.

2. A serious or earnest object or business.

"But the main business and earnest of the world is money, dominion, and power."—L'Estrange.

B. As adjective:

1. Ardent, eager, or zealous in the performance of any act or the pursuit of any object; warm, importunate.

"He which prayeth in due sort, is thereby made the more attentive to hear; and he which heareth, the more earnest to pray for the time which he bestow."—Hooker.

2. Intent, fixed, eager.

"On that prospect strange,
Their earnest eyes they fixed."
Milton: *P. L.*, x. 552, 553.

*3. Serious, important, grave.

"They whom earnest lets do often hinder from being partakers of the whole, have yet this the length of divine service, opportunity for access unto some reasonable part thereof."—Hooker.

4. Heartfelt, sincere; as, an *earnest* prayer.

¶ For the difference between *earnest* and *eager*, see **EAGER**.

ĕar-nĕst, *er-nĕs, *er-nĕs, s. [Wel. *ernes*=an earnest-penny; *ern*=a pledge; *erno*=to give a pledge; cogn. with Gael. *earlas*=an earnest; Prov. Eng. *arles*. (Skeat.)]

I. Ordinary Language:

1. In the same sense as II.

2. Anything which gives assurance; pledge, or promise of something to come.

"It is an earnest of a farther good
That I mean to thee."
Shakesp.: *Cymbeline*, i. 6.

II. Law: Something given by a buyer to a seller as a token or pledge to bind the bargain; a part or portion of goods delivered into the possession of the buyer at the time of the sale as a pledge or security for the complete fulfillment of the contract.

"But if any part of the price is paid down, if it be but a penny, or any portion of the goods delivered by way of earnest, the property of the goods is absolutely bound by it; and the vendee may recover the goods by action, as well as the vendor may the price of them. And such regard does the law pay to earnest as an evidence of a contract, that, by the Statute of Frauds, 29 Car. II. c. 3, no contract for the sale of goods, to the value of £10 or more, shall be valid, unless the buyer actually receives part of the goods sold, by way of earnest on his part; or unless he gives part of the price to the vendor by way of earnest to bind the bargain, or in part of payment; or unless some note in writing of the bargain be made and signed by the party, or his agent, who is to be charged with the contract."—Blackstone: *Comment.*, bk. ii, ch. 38.

¶ (1) Crabb thus discriminates between *earnest* and *pledge*: "In the proper sense, the *earnest* is given as a token of our being in earnest in the promise we have made; the *pledge* signifies a security by which we are engaged to indemnify for a loss. The *earnest* has regard to the confidence inspired; the *pledge* has regard to the bond or tie produced; when a contract is only verbally formed, it is usual to give *earnest*; whenever money is advanced, it is common to give a *pledge*. In the figurative application the terms bear the same analogy; a man of genius sometimes, though not always, gives an *earnest* in youth of his future greatness; children are the dearest *pledges* of affection between parents." (Crabb: *Eng. Synon.*)

earnest-money, s. The same as **EARNST, s.** II.

***ĕar-nĕst-fŭl, *er-nĕst-fŭl, a.** [Eng. *earnest*; *-ful*(1).] Full of or deserving earnestness, attention, or anxiety.

(6) This word, as opposed to other scenes of existence.

"What are these,
So withered, and so wild in their attire,
That look not like the inhabitants o' th' earth,
And yet are on 't?"
Shakesp.: *Macbeth*, i. 3.

(7) A country, a district, a land.

"In ten set battles have we driven back
These heathen Saxons, and regained our earth,
As earth recovers from the ebbing tide."
Dryden: *King Arthur*, i. 1.

* (8) Landed property.

"She is the hopeful lady of my earth."
Shakesp.: *Romeo and Juliet*, i. 2.

2. Figuratively:

(1) The inhabitants of this globe.

"And the whole earth was of one language."—Gen. xi. 1.

* (2) A term of reproach, expressive of grossness, dullness, or stupidity.

"Thou earth, thou, speak."—Shakesp.: *Tempest*, i. 2.

* (3) The act of plowing or turning over the ground.

"Such land as ye break up for barley to sow,
Two earths, at the least, ere ye sow it, bestow."
Tusser: *Husbandry*.

II. Technically:

1. *Astron.:* To the eye it appears as if this earth was in the center of the universe, the sun and the stars revolving round it. The phenomena are much better accounted for by supposing the apparent revolution of the celestial vault to be produced by an actual rotation of the earth on its axis in about twenty-four hours, producing day and night. [DAY.] Similarly the succession of the seasons is best accounted for by assuming the sun to be stationary in one of the foci of an ellipse, and the earth moving round in that ellipse with the poles always slanted at a particular angle to the same point in the heavens. [SEASONS, YEAR.] In possessing a satellite (the moon) the earth resembles various other planets, except that they have more attendant bodies than one. In fact the earth is a planet, and, like other planets, its figure is not far from spherical, as is proved by its having been sailed round. Magellan (Fernando Magelhaens) led the way, having circumnavigated a great part of the globe between A. D. 1519 and 1521, being killed in the Philippine Islands in the last-named year. Sebastian del Cano, one of his officers, completed the enterprise. Sir Francis Drake returned alive from a similar enterprise successfully carried out between A. D. 1577 and 1579 or 1580. Now so many people have gone round the world that to have done so confers no material increase of celebrity. The sight of the masts of a vessel appearing before the hull comes in sight is a proof that at least that portion of the world visible to us is a curve. Moreover, in an eclipse of the moon the shadow of the earth obscuring the face of the luminary is found to be circular, and there are other arguments in the same direction. Only in a broad sense can the earth be described as spherical; it is really an oblate spheroid—i. e., the distance between the two poles is less than that between two extremities of a diameter drawn through the equator. This form may have been produced by the rotation of a partially fluid sphere. According to Bessel, the greater or equatorial diameter is 7,925,604 miles, the lesser or polar one 7,899,114 miles; the difference of diameter, or polar compression, is 26,471 miles, and the proportion of the equatorial to the polar diameter as 299.15 to 298.15. The dimensions given by Sir R. Airy slightly differ from these. The force of gravity at the poles is to that at the equator very nearly as 180 to 179. It is not of uniform density, the French mathematician Clairvault assuming it to consist of ellipsoidal strata increasing in density as they approached the earth's center, and, taking it for granted also that the attractive force might be calculated on the law of liquids, proved that the amount of gravity at the poles to that at the equator is as 180 to 179, and that the earth's polar axis was to its equatorial one as 299 to 300, which almost exactly agrees with the result of observation. Clairvault believed the mean density of the earth, taken as a whole, to be about twice that of the parts near the surface. Experiments conducted during last century having shown that the mountain Schehallion in Scotland deflected the pendulum 12" from the perpendicular, it was inferred by Dr. Maskelyne that the density of the mountain was $\frac{1}{3}$ that of the globe, and that the density of the earth was about five times that of water. Mr. Henry Cavendish, Dr. Reich, and Mr. Francis Baily, trying other experiments, considered the density of the earth to be 5.67, and Sir R. Airy believed it 5.656, that of water being 1. The number of cubic miles in the earth is about 259,800,000,000, each cubic mile containing 147,200,000,000 of cubic feet.

2. *Geog.:* The surface of the land is to that of the water on the earth in the proportion of one to three. The land is unequally distributed, most of it being in the northern hemisphere. A great circle, with Falmouth, England, for a center and its circumference enclosing exactly half the surface of the globe, would include more land than could be embraced within a similar circle described around any other center.

bŏil, bŏy; pŏut, jŏwĭ; cat, çell, chorus, çhin, bench; go, çem; thin, this; sin, aç; expect, Xenophon, exĭst. ph = f. -cian, -tian = çan. -tion, -sion = çhün. -tious, -cious, -sious = çhüs. -ble, -dle, &c. = bel, del.

3. *Geol.*: The universal opinion of geologists is that the earth is of immeasurable antiquity, and though some natural philosophers believe that there is not at what may be called the credit of geologists an unlimited fund of time on which to draw, yet they cheerfully accord them a few millions of years. The old view that our planet is but a few thousand years old now exists only among the uninformed. It is not yet proved that astronomical changes have ever taken place since the first establishment of the solar system seriously to modify the state of things existing on the earth; the present distribution of land and water has not been, geologically viewed, of remote origin; when differently proportioned, it must have produced different climates from those now existing. (For details see Lyell's *Principles of Geology*.)

4. *Magnetism*: The action of the earth on magnetic substances is like that of a magnet, and it has two poles different from the ordinary poles. [POLE.]

5. Chemistry:

*1. *Originally*: In the opinion of the ancient chemists, or alchemists, one of the four elements of which all material things in the world were held to be composed, the others being fire, air, and water. Not even one of the four is really a simple substance.

(2) *Later*: A name given to various substances, opaque, insipid to the taste, incombustible, and, when dry, friable, i. e., easily separated into particles. Five divisions of them were recognized: (a) Boles, (b) Clays, (c) Marls, (d) Ochres, and (e) Tripolis. Under these categories were ranked the oxides of the metals, cerium, aluminium, beryllium, zirconium, yttrium, erbium, thorium, &c. These oxides are insoluble in water, and are all very rare except aluminium. They are difficult to separate from each other, occurring together in rare minerals, and hence the number of metals belonging to this class is not known, several of those recently discovered having not yet been properly investigated, as holmium, scandium, thulium, &c.

† For the chemical constituents of vegetable soil, see SOIL.

6. *Sports*: The hole or retreat of a fox.

B. *As adj.*: Pertaining or relating to, or in any way having to do with earth or with the earth.

(1) *Crust of the Earth*: [CRUST.]

(2) *Earth to earth burial*: A burial designed to aid in resolving a corpse as soon as possible into its constituent elements, instead of taking measures to impede its rapid decay. In 1875 this system was advocated by Mr. Seymour Haden. Discarding leaden and even wooden coffins, he advocated that wicker-work should be the material used.

earth-apple, s.

1. A potato.
2. A cucumber.

earth-bag, s.

Mil.: A bag filled with earth, used for defense in war.

earth-balls, s. pl.

Botany:

1. *Gen.*: Balls which grow under the earth. {Prior.}

2. *Spec.*: *Tuber cibarium*. (Britten & Holland.)

earth-bank, s. A bank or mound of earth.

earth-bath, s.

Med.: A literal bath of earth is occasionally used on the Continent as a remedy.

earth-battery, s.

Elect.: A large plate of zinc and a plate of copper, or a quantity of coke, buried at a certain distance asunder in damp earth. The moisture of the earth acts as the exciting fluid on this voltaic couple, and a feeble but constant current is produced.

earth-bedded, a. Fixed in the earth as in a bed.

"Sole stay his foot may rest upon,
Is yon earth-bedded jetting stone."

Scott: *Rokeby*, li. 15.

earth-borer, s. A form of auger for boring holes in the ground, where the strata are sufficiently soft and loose. The shaft has a screw-point and a cutting-face. The twisted shank revolves inside a cylindrical case, which retains the earth till the tool is withdrawn. The valve opens to admit the earth, and closes as the tool is lifted. [AUGER.]

earth-car, s. A car for transporting gravel and stone in railway operations. [DUMPING-CAR.]

earth-chestnut, s.

Bot.: *Bunium flexuosum*. (Withering, &c.)

earth-closet, s. A commode or night-stool in which a body of earth receives the feces, or is dropped upon them to absorb the effluvia; the resultant is to be utilized as a fertilizer.

earth-crab, s. A name sometimes given to the Mole-cricket.

earth-created, a. Formed or created of the dust of the earth.

"And an eternity, the date of gods,
Descended on poor earth-created man!"
Young: *Night Thoughts*, ix. 219, 220.

earth-despising, a. Despising this earth or earthly things.

"A self-forgetting tenderness of heart
And earth-despising dignity of soul."

Wordsworth: *Excursion*, bk. v.

*earth-din, *erthe-dene, s. [EARTHDIN.]

*earth-drake, s.

Anglo-Saxon Myth.: A mythical monster corresponding to the dragon of chivalry and romance. [DRAKE.]

"He sacrifices his own life in destroying a frightful earth-drake or dragon."—W. Spalding.

earth-embracing, a. Embracing or surrounding the earth as the sea does.

"Earth and air, and earth-embracing sea."

Wordsworth: *View from Black Comb*.

earth-engendered, a. Rising or springing from the earth.

"If that speak, it is
A thundering voice; and if it sigh, the hiss
Of earth-engendered winds."

Fanshawe: *Pastor Fido*. (Transl.)

†earth-fall, s. A depression of a portion of the land during earthquake action.

earth-fast, s. Fast, fixed, or bedded in the earth.

"The Douglas rent an earth-fast stone
From its deep bed."

Scott: *Lady of the Lake*, v. 23.

†earth-flax, s. [EARTHFLAX.]

earth-flea, s. [So named because it frequents the earth of gardens, &c., whence, however, it makes its way when it can into the human foot, usually under the toe-nails, where it lays its eggs. If neglected, it multiplies rapidly, and causes great suffering and sometimes death.] The Chigre or Chigoe, *Pulex penetrans*. [CHIGRE.]

†earth-fly, s. [Fly is probably a corruption for flea, the animal being wingless at every stage of its development.] A Chigre, *Pulex penetrans*. (Rossiter.) [EARTH-FLEA.]

*earth-foam, s.

Min.: An old name for Aphrite (q. v.).

earth-fork, s.

Agric.: A pronged fork for turning up the earth.

earth-gall, s.

Botany:

1. *Gen.*: The Gentian tribe of plants, one characteristic of which is bitterness.

2. *Specialty*:

(1) *Erythraea centaurium*. (Britten & Holland.)

(2) The rendering of the name given by the Malays to a cinchonaceous plant, *Ophiorhiza munoca*. The taste resembles that of Gentian, but is more penetrating. (Lindley.)

earth-house, eird-house, erd-house, *eorth-hus, s.

1. *Lit.*: A subterranean dwelling known in Scotland as "Picts' houses" or "Picts' dwellings." The description as given below corresponds with that given by Tacitus of the buildings of the ancient Germans.

"At the same place, and also in another part of the parish, are what the country people call *eird-houses*. These are below ground, and some of them said to extend a great way. The sides of these subterraneous mansions are faced up with dry stones to the height of about five feet; they are between three and four feet wide, and covered above with large stones laid across. They may have been either receptacles for plunder or places of shelter from the inclemency of the weather, before houses were built, or of concealment from an enemy."—P. Strathdon: *Aberd. Statist. Acc.*, xlii. 182, N.

2. *Fig.*: The grave.

"Loathsome is that earth-house,
And grim within to dwell."

Longfellow: *Grave*.

earth-hunger, s.

1. An inordinate desire to become the possessor or tenant of a small holding; specif. the intense feeling evinced by the Irish in favor of a peasant proprietary.

2. The desire of a great power to enrich itself at the expense of its neighbors, especially if they be smaller and weaker.

"Some may think they [the Government] have done enough in the way of annexation, remembering what they said about earth-hunger when out of office."—London Echo.

earth-light, s.

Astron.: Light reflected from the earth upon the dark part of the moon, when the latter is either very young or has waned considerably. The perfectly illuminated portion of the moon derives

its enlightenment from the sun, while the light reflected from the earth makes the circle faintly complete. As the moon gains age it offers a less portion of the bright side, and the phenomenon dies away to reappear again when the luminary has considerably waned. It is called also Earth-shine (q. v.). (Herschel: *Astronomy*, § 417, &c.)

earth-metals, s. pl. [EARTH, s. II., 5 (2).]

† *Reactions of the earth-metals*: They are precipitated from solutions of their salts by ammonium sulphide, as hydrates and not as sulphides. The hydrates of aluminium and beryllium are soluble in caustic soda; the other earth-metals—zirconium, thorium, cerium, lanthanum, didymium, erbium, and yttrium—are insoluble; zirconium and thorium are precipitated as thiosulphates, by boiling the solution with sodium thiosulphate, the other metals remaining in solution.

earth-moss, s.

Bot.: The genus *Phascum*. (Prior, Britten & Holland.)

earth-oil, s. The same as ROCK-OIL or PETROLEUM (q. v.).

earth-pea, s.

Bot.: *Lathyrus amphicarpos*. (Loudon.)

earth-pillars, earth-pyramids, s. pl.

Geog. & Geol.: Pillars or pyramids of earth in Switzerland, &c., from twenty to one hundred feet high, occurring in the Canton of Valais, near Botzen, in the Tyrol, &c. Sometimes they are capped by a single stone. They have been separated by rain from the terrace, of which they once formed a part. (Lyell: *Prin. Geol.* (11th ed.), ch. xv.)

earth-plate, s.

Telegr.: A plate buried in the earth, or a system of gas or water-pipes utilized for the purpose, connected with the terminal or return wire at a station, so as to utilize the earth itself as a part of the circuit, instead of using two wires, as was the practice previous to 1837.

earth-puff, s.

Bot.: A species of *Lycopodium*. (Nomenclator, 1535, in *Nares*.)

earth-pyramids, s. pl. [EARTH-FILLARS.]

earth-quadrant, s. A quadrant, a fourth part, or 90° of the earth's circumference.

"A velocity of one earth-quadrant per second."—Everett: *The C. G. S. System of Units* (1875), ch. xi., p. 70.

earth-quake, s. An earthquake.

earth-shine, s.

Astron.: The same as EARTH-LIGHT (q. v.).

*earth-shock, s. An earthquake.

"All the living things that heard
That deadly earthquake disappeared."

Byron: *Siege of Corinth*, xxxiii.

earth-smoke, s.

Bot.: The *Fumitory*, *Fumaria officinalis*. It is called, especially in the northern counties of England, Smoke of the earth or Fume of the earth.

*earth-stars, s. pl.

1. *Ord. Lang.*: Stars made by the scattering of burning fragments during an explosion on earth.

"Into countless meteors driven
Its earth-stars melted into heaven."

Byron: *Siege of Corinth*, vi.

2. *Bot.*: Various species of Geaster. They are so called from their star shape when burst and lying on the ground. (Prior.)

earth-stopper, s. A man engaged to stop up the earths or holes of foxes to prevent them from taking refuge in them, when hunted.

earth-table, s.

Arch.: The lowest course of stone that is seen in a building, level with the earth.

*earth-tiller, *eorth-tillie, *erthe-tillier, s.

A tiller of the ground; a farmer.

"Theos richen anen that both eorth-tillien."—Ancren Riwle, p. 416.

*earth-tilth, *erthe-tilthe, s. Cultivation of the ground. (Wycliffe.)

earth-tongue, s.

Bot.: A popular name given to club-shaped fungi of the genus *Geoglossum*, of which word it is a literal translation. They are found on lawns and grassy pastures.

earth-wolf, s.

Zool.: The same as AARD-WOLF (q. v.).

earth's crust, s. [CRUST.]

Earth, v. t. & i. [EARTH, s.]

A. Transitive:

1. To cover with earth. (Generally followed by up.)

"Earth up with fresh mold the roots of those arbutus which the frost may have covered."—Evelyn: *Kalendar*.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camel, hēr, there; pine, pīt, sire, sir, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāl; try, sŷrian. æ, œ = ē; ey = ā. qu = kw.

*2. To hide or place under the earth; to inter, to bury.

"This [lord]
Who shall be of as little memory
When he is earthed."

Shakesp.: *Tempest*, ii. 1.

*3. To fix in the earth.

"My root is earthed."—Massinger: *Fatal Dowry*, ii. 1.

*B. *Intrans.*: To retire underground; to hide in the earth.

"Hence foxes earthed, and wolves abhorred the day,
And hungry churls ensnared the nightly prey."

Tickell: *Poem on Hunting*.

Earth-board, *s.* [Eng. earth, and board.]

Agric.: The moldboard of a plow, which turns over the earth.

"The plow reckoned the most proper for stiff black clays, is one that is long, large, and broad, with a deep head and a square earthboard, so as to turn up a great furrow."—Mortimer.

Earth-born, *a.* [Eng. earth, and born.]

1. *Lit.*: Born of the earth; terrigenous, earthsprung.

"The wounds I make but sow new enemies;
Which from their blood like earthborn brethren rise."

Dryden: *Indian Emperor*, v. 1.

II. *Figuratively*:

1. Relating to or arising from earthly things or objects.

"All earthborn cares are wrong."

Goldsmith: *Vicar of Wakefield*, ch. viii.

2. Human, mortal, belonging to this world.

"Into our room of bliss thus high advanced
Creatures of other mold, earthborn perhaps,
Not spirits."

Milton: *P. L.*, iv. 359-61.

3. Of mean birth, low-born.

"Earthborn Lycen shall ascend the throne."—Smith.

Earth-bound, *a.* [Eng. earth, and bound.]

1. *Lit.*: Fixed or fastened in the earth.

"Who can impress the forest, bid the tree
Unfix his earthbound root?"

Shakesp.: *Macbeth*, iv. 1.

2. *Fig.*: Fixed on earthly objects and cares.

*Earth-brēd, *a.* [Eng. earth, and bred.] Of mean or low birth; low-born, abject, groveling, despicable.

"Peasants, I'll curb your headstrong impudence,
And make you tremble when the lion roars;
Yea, earthbred worms."—Brewer: *Lingua*, i. 6.

*Earth-din, *erthe-dyn, *erthe-dene, *s.* [Eng. earth, and din.] An earthquake.

"The neghday day gret erthedyn sal be."

Hampole: *Prick of Conscience*, 4, 790.

Earthed, *pa. par. or a.* [EARTH, v.]

Earth-en, *earth-en, *erth-en, *a.* [Eng. earth; suff. -en.] Made of earth, clay, or similar substance.

"They took it up, and put it into an earthen pot."—Bunyan: *Pilgrim's Progress*, pt. ii.

¶ Now passing out of use, the place being supplied by the substantive earth used adjectively, as, earth work, not often now earthen work. (Trench: *English Past and Present*, 117.)

earthen-pipe, *s.* The Romans for the conduction of water used earthen pipes where economy was an object. They preferred lead. The earthen-pipes had a thickness of at least two inches, and the ends were respectively contracted and enlarged to fit into and to receive the adjacent pipes. The joints of the pipes were luted with quicklime and oil. The thickness was increased at the bottom of a bend, as in crossing a valley or hollow, or the pipe at this part was "secured by ligatures or a weight of ballast." Earthen pipes are found in the walls of the baths and the Coliseum, of various diameters, none however, less than two inches.

earthen-ware, *s.* A general expression which covers all ceramic work, such as stoneware, delft, porcelain, &c. [POTTERY.] The term, as far as it may have a less general meaning, includes merely the commoner classes of clay-ware, otherwise known as crockery. The clay, having been properly tempered, is formed on the wheel and dried under cover until it has acquired considerable solidity. The glaze, of the consistence of cream, is then put on as evenly as possible by means of a brush. Small articles are glazed by pouring in the glaze and then pouring it out again, sufficient adhering for the purpose. The glaze consists of galena ground to powder and mixed with "slip;" that is, a thin solution of clay. This is a clear glaze, and is made black and opaque by the addition of manganese: 1 part of manganese to every 9 of galena. The glaze having dried, the ware is piled in the kiln. A low heat, applied for twenty-four hours, drives off the moisture; an increased heat for another twenty hours, as high as can be borne without fusion, bakes the clay, drives off the sulphur from the galena, and causes the lead to form a glass with the clay to

which it adheres. With increase of heat this glass spreads over the surface of the ware. After the furnace is cooled, the ware is removed. The glaze, consisting of oxide of lead, is soluble in acids, such as vinegar and those of fruit, and is destroyed, rendering injurious the food with which it combines. A more refractory clay admits the use of a less fusible glaze of a harmless character. Earthen-ware is found among almost all nations and tribes, though all have not the art of glazing, nor have all the art of baking. Drying is not baking, and it requires great heat to make a good ringing article. The Egyptians and Etruscans had pottery at a date before the historic period. We know more of the former than of the latter at early periods. The resemblance of the Greek and Etrurian ceramic works is remarkable. Glazing came from China. Wedgwood obtained his patents about A. D. 1762.

"In the midst of stones and a moss,
And wreck of particolored earthen-ware,"

Wordsworth: *Excursion*, bk. ii.

*Earth-fēd, *a.* [Eng. earth, and fed.] Feeding or living upon earthly things; carnal, low, groveling.

"Such earthed minds,
That never tasted the true heaven of love,"

Ben Jonson: *Volpone*, iii. 6.

†Earth-flāx, *s.* [Eng. earth, and flax.]

Mineralogy:

1. A popular name sometimes given to Amianthus, from its long flaxen fibers.

2. A fibrous kind of talc.

"Of English talc, the coarser sort is called plaister or parget; the finer, earthflax, or salamander's hair."—Woodward.

Earth-i-nēss, *s.* [Eng. earthy; -ness.]

1. *Lit.*: The quality of being earthy; the state of consisting of or containing earth or earthy matter.

"He freed rainwater . . . from its accidental, and, as it were, feculent earthiness."—Boyle: *Works*, iii. 103.

*2. *Fig.*: Grossness, meanness, coarseness.

"So long as they have only light enough to hate light, they may upon the first glimpse retire into their earthiness."—Byron: *Enthusiasm* (Introd.).

Earth-līg, *pr. par., a. & s.* [EARTH, v.]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: The act of covering up with earth or mold.

Earth-ll-nēss, *s.* [Eng. earthy; -ness.]

1. *Lit.*: The quality of being earthy, or of the earth.

*2. Worldliness, strong attachment to worldly things.

*3. Perishableness; want of durability, frailty.

*Earth-llīg, *s.* [Eng. earth; -ling.]

1. An inhabitant of the earth; a mortal; a poor, frail creature.

"To earthlings, the footstool of God, that stage which he raised for a small time, seemeth magnificent."—Drummond.

2. One who is attached to things of this earth; an earthly-minded person.

Earth-lŷ, *earth-ly, *erthe-ll, *erth-ly, *erth-lych, *erth-y-ly, *a.* [Eng. earth; -ly.]

1. Made or consisting of earth; earthy.

"A scepter or an earthly sepulcher."

Shakesp.: *Henry VI.*, Pt. III., i. 4.

*2. Resembling earth or clay; lifeless.

"Doth shine upon the dead man's earthly cheeks."

Shakesp.: *Titus Andronicus*, ii. 8.

3. Of or pertaining to this world; mortal, human, as opposed to immortal.

"The earthly author of my blood."

Shakesp.: *Richard III.*, i. 3.

4. Pertaining to this life or our present state, worldly, carnal, as opposed to spiritual.

"It must be our solemn business and endeavor, at fit seasons, to turn the stream of our thoughts from earthly toward divine objects."—Atterbury.

5. Pertaining to this life, as opposed to a future life.

"Joyed an earthly throne."

Shakesp.: *Henry VI.*, Pt. II., iv. 9.

6. Corporeal, not mental.

"Great grace that old man to him given had,
For God he often saw, from heaven high,
All were his earthly eyes both blunt and bad."

Spenser: *F. Q.*, I. x. 47.

7. Living or existing on the earth.

"[He] shal come att laste,
And culle all erthly creatures."

Langland: *P. Plowman*, p. 128.

8. Among things conceivable as possible in this world; possible, conceivable.

"Who would learn one earthly thing of use?"

Pope: *Rape of the Lock*, v. 22.

earthly-minded, *a.* Having a mind fixed on this earth; unspiritual, destitute of spirituality.

"The earthly-minded antichrists and hypocrites."—Bale: *On the Revel.*, pt. ii., bk. ii.

earthly-mindedness, *s.* The quality of being earthly-minded, unspirituality, grossness, sensuality, devotion to earthly or worldly objects.

"The earthly-mindedness came from this animated earth, the body; and is to shrink up again into its own principle, and to perish."—More: *Conf. Cabb.*, p. 75.

Earth-nŭts, *s. pl.* [Eng. earth, and nuts.]

Botany:

1. *Generally*:

(1) Plants which, when their flowers are succeeded by fruit, bury the latter under the ground. Example: *Arachis hypogæa*.

(2) Subterranean tubercles of fleshy-rooted plants. Example: *Lathyrus tuberosus*.

2. *Specifically*:

(1) *Arachis hypogæa*. (Loudon.) [1 (2).] One of the underground tubers of *Carum bubocastanum*. It is called also Pig-nut (q. v.). (Bentham.)

(2) The globular tuber of the Tuberous Bunium, *Bunium flexuosum*. (Bentham.)

(3) The genus *Conopodium*. (Sir Joseph D. Hooker.) His *Conopodium denudatum* is what is more generally known as *Bunium flexuosum*. [2 (2).] (4) *Emanthe pimpinelloides*. (Britten & Holland.)

Earth-quāke, *s. & a.* [Eng. earth, and quake.]

A. *Assubstantive*:

I. *Ordinary Language*:

1. *Lit.*: In the same sense as II. (q. v.).

2. *Fig.*: Any convulsion in the political world.

II. *Geol. & Hist.*: A quaking, vibratory, undulating, or other movement of a portion of the earth's crust produced by forces acting from beneath. Certain premonitory symptoms are believed to herald the approach of a great earthquake. These are: irregularities in the seasons, sudden gusts of wind interrupted by dead calms; violent rains at unusual seasons, or in countries where they rarely occur; a reddening of the sun's disc and a heaviness in the air continuing, it may be, for months; an evolution from the soil of electric matter, inflammable gas, with sulphurous and mephitic vapors; subterranean noises like those of carriage-wheels, artillery, or thunder; cries of distress emitted by animals; and drowsiness with a feeling of seasickness in men.

When the fatal moment arrives, the ground at some spot is heaved up, and becomes the center of vibration, or undulations, reminding us of those produced by the ripple wave propagated in a continually enlarging circle around the spot where a pebble has been cast into a pond. The earth swells and heaves like a rolling sea; cracks and rents are produced in all directions, like those on a window pane. Great funnel-like holes yawn open. New lakes are formed. The houses and other erections may, with their inhabitants, be destroyed over the greater part of a city in a few moments, though it is a suggestive fact that this destruction is often limited to those built on geological stratum. Precipitous cliffs fall into adjacent seas or rivers, in the latter case more or less damming them up and producing floods. Landslips take place with similar consequences. Cattle feeding on cliffs fall into the sea and are drowned. The sea becomes agitated, and after first receding from the land, then rolls in upon it with a wave of enormous height. This is more especially the case if the focus of agitation be beneath the sea. The sensation on board ship when an earthquake occurs is as if the vessel had struck a rock.

There are certain regions to which both the points of volcanic eruption and the movements of great earthquakes are confined. [VOLCANIC REGION.] The two, therefore, have probably a common origin, steam, molten matter, &c., which have forced exit to the external atmosphere, generating a volcano, and similar explosive material still seeking for vent, producing an earthquake. Connected with the latter, as with the former, are such phenomena as the ejection from the ground of torrents of water discolored by mud, and emitting mephitic vapors which, if intense, are fatal to animal life. Not uncommonly an old volcano goes into eruption, or, more rarely, its upper part and crater fall in and a new one is generated in the midst of an earthquake. Great upheavals of land are its normal effects, though in exceptional cases there are subsidences instead of elevation.

It is supposed that, on a very moderate estimate, an earthquake occurs somewhere every day. What runs up the number of such occurrences is that there is generally a series of shocks at a place instead of a single one. Most of these are on a small scale; but others affect a wide area, and are most destructive.

Among the most notable earthquakes have been the following: A. D. 17, Pompeii and Herculaneum; accompaniment of eruption of Vesuvius. 742, Syria, Palestine, and Asia; 500 towns destroyed.

boil, boy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -mon, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

1531. Lisbon; 1,500 houses and 30,000 persons destroyed. 1692. Jamaica; Port Royal was totally destroyed; 3,000 lives lost. 1693. Sicily; 54 towns and 300 villages affected; more than 100,000 lives lost. 1703. Aquila, Italy; 5,000 perished. 1703. Jeddo, Japan; 200,000 lives lost. 1716. Algiers; 20,000 deaths. 1726. Palermo, Italy; 6,000 lives lost. 1731. Pekin; estimated loss of life, 100,000 persons. 1746. Peru; 18,000 deaths. 1754. Cairo; 400,000 lives lost. 1755. Lisbon and Portugal generally; 50,000 died in Lisbon alone; this earthquake extended 500 miles, and was felt even in Scotland. 1759. Syria, over a large area; 20,000 lives lost. 1773. Guatemala; 31,000 perished. 1780. Mauritius; 75,000 lives lost. 1783. Messina; 60,000 lives lost. 1797. Quito; 41,000 lives lost. 1812. Caracas; 12,000 lives lost. 1822. Aleppo; 22,000 lives lost. 1829. Murcia (Spain); 6,000 killed. 1830. Canton; loss, 6,000 lives. 1842. St. Domingo; between 4,000 and 5,000 lives lost. 1857. Calabaria; 10,000 lives lost; Lacaita estimates the loss of life in the Kingdom of Naples from earthquakes between 1783 and 1857 at 111,000, out of an average population of 6,000,000. 1859. Erzeroum; 15,000 killed. 1859. Quito; 5,000 lives lost. 1861. Mendoza, S. America; 7,000 killed. 1863. Manila, 10,000 killed. 1868. Peru and Ecuador; 25,000 killed, 30,000 rendered homeless, and loss of property estimated at \$300,000,000. 1875. Colombia; 14,000 lives lost. 1881. Seio; 4,000 killed. 1885. Cashmere; more than 3,000 deaths, 70,000 buildings destroyed. 1887. Several shocks in Southern France and the United States. 1888. Yunnan, China; 4,000 killed.

*B. As adj.: Shaking the earth.

"The earthquake voice of Victory,
To thee the breath of life."

Byron: *Ode to Napoleon*.

earthquake-alarm, s. An alarm founded on the discovery or supposition that a few seconds previous to the occurrence of an earthquake the magnet temporarily loses its power. To an armature is attached a weight, so that upon the magnet becoming paralyzed, the weight drops, and, striking a bell, gives the alarm.

earth-wōrk, s. [Eng. earth, and work.]

Engin. & Fort.: Mounds of earth raised as a defense, or to form the banks of canals, or the embankments for railways.

"The white tower . . . is blocked up with a double line of earthworks pierced for guns."—*W. H. Russell: Crimean War*, ch. xxxiii.

earth-wōrm, s. [Eng. earth, and worm.]

1. Literally:

(1) A well-known annelid (*Lumbricus terrestris*). Its elongate form, naked skin, and fleshy or bluish coloring, and viscous trail, are familiar to all. It consists of many narrow rings in contact with each other. Between the thirtieth and fortieth segments is a thickened portion called the clitellum, an organ of reproduction. There are no tentacles, no eyes, and no teeth, but the mouth has a short proboscis. When the decaying parts of animals and vegetables are swallowed, there is taken with them into the ground a quantity of vegetable soil which is subsequently ejected in small heaps called worm casts. The attention of Mr. Charles Darwin having been called to the habits of this despised animal, that great naturalist read a paper before the Geological Society on the "Formation of Mold" (which was published in the second series of the *Transactions*, p. 505), showing that vegetable soil in its present aspect and distribution was largely produced by the earthworms. Darwin recurred to the subject in his old age, and his last great work was on *Worms*.

(2) (*Pl.*): The English name of the *Terricola*, a tribe of Annelids, order Oligochaeta.

2. Fig.: A mean, sordid, worldly-minded person.

"Thy vain contempt, dull earthworm, cease;
I won't for refuge fly."—*Norriæ*.

earthworm-oil, s.

Phar.: A green oil obtained from the common species of earthworm. It is used medicinally as a remedy for earache.

earth-ŷ, a. [Eng. earth; -y.]

I. Ordinary Language:

1. Literally:

(1) Consisting or composed of earth; terrene.

"All water, especially that of rain, is stored with matter, light in comparison of the common earthy matter."—*Woodward*.

(2) Pertaining or relating to the earth; mortal, human.

"Flaming ministers to watch and tend
Their earthy charge."—*Milton: P. L.*, ix. 167.

(3) Inhabiting this earth; terrestrial.

"Those earthy spirits black and envious are:
I'll call up other gods of form more fair."—*Dryden: Indian Emperor*, ii. 1.

(4) Relating to earth.

"Mine is the shipwreck in a watery sign;
And in an earthy the dark dungeon mine."—*Dryden: Palamon and Arcite*, iii. 401, 402.

(5) Resembling earth, or any of its properties: as, an earthy taste or smell.

2. Figuratively:

(1) Resembling earth; cold and lifeless as earth; turned to clay.

"To survey his dead and earthy image,
What were it but to make my sorrow greater."—*Shakesp.: Henry VI.*, Pt. II., iii. 2.

(2) Gross, carnal, worldly, not refined.

"Lay open to my earthy gross conceit,
Smothered in errors, feeble, shallow, weak,
The folded meaning of your words' deceit."—*Shakesp.: Comedy of Errors*, iii. 2.

II. Min.: Dull, dead, without luster.

earthly calamine, s.

Earthly cobalt bloom: A variety of Erythrite (q. v.).

earthly fracture, s.

Min.: Fracture exhibiting a rough surface, with minute elevations and depressions.

earthly manganese, s.

Min.: The same as BOG MANGANESE (q. v.).

earthly minerals, s.

Min.: In the arrangement of Mr. William Phillips, F. L. S., F. G. S., the first great class of minerals, those consisting largely of such "earths" as siliceous or silica, alumine or alumina, lime, magnesia, &c. These are followed by the Alkaline-earthly minerals in which potash, soda, &c., appear; and next by the Acidiferous-earthly minerals which have in their composition sulphuric acid, phosphoric acid, &c., to which follow the Acidiferous alkaline-earthly minerals, such as alum and its allies. The arrangement of Dana is different.

ear-wāx, s. [Eng. ear, and wax.] Cerumen, a thick viscous substance, secreted by the glands of the ear into the outer passage.

"Therefore hath nature loricated or plastered over the sides of the hole with earwax, to entangle insects."—*Ray: On the Creation*.

ear-wig, ***eare-wick**, ***ear-wick**, s. [A. S. *eor-wicga*, *ear-wicga*, so called from a belief that it crept into the ear; A. S. *eare*=an ear, and *wicga*=a horse.]

I. Ordinary Language:

1. Lit.: The popular name for the insect described under II. 1.

*2. Fig.: A whisperer; a prying, insinuating informer or talebearer.

"Hearken not to Relliboam's earwigs."—*Hacket: Life of Williams*, i. 50.

II. Technically:

Entomology:

1. Sing.: *Forficula auricularia*. A well-known insect, somewhat like a Staphylinus, but having a forceps at its tail; this in the males is considerably curved, and has a toothlike process. The earwig is found under the bark of trees, under stones, &c., and in damp situations generally; it also frequents flowers, devouring the petals and the ordinary leaves of the several plants. The female sits on her eggs like a hen, and is a patient and affectionate mother. The earwig will go into the ear as into any other cavity, but it has no special love for that hiding-place more than others, and when it enters it, does so without evil intent. [*FORFICULA*.]

"Earwigs and snails seldom infect timber."—*Mortimer: Husbandry*.

2. Pl.: The family Forficulidæ (q. v.). These were considered to be orthopterous insects, belonging to the sub-order Cursoria. Now they are placed under the order Dermaptera or Euplexoptera (q. v.).

¶ (1) *Common Earwig: Forficula auricularia*. [*EARWIG*.]

(2) *Great Earwig: Labidura gigantea*.

(3) *Little Earwig: Labia minor*.

ēar-wīg, v. t. [*EARWIG*, s.] To gain over or influence by whispered or covert insinuations; to raise a bias or prejudice by insinuations.

"He was so sure to be earwigged in private."—*Marryat: Sharleygon*.

ēage, ***ese**, ***else**, ***eyse**, s. [O. Fr. & Fr. *aise*, a word of doubtful origin; cf. Gael. *adhais*=leisure, ease.]

I. Literally:

1. A state of rest or quietness; an undisturbed state of quiet, either of the body or mind.

(1) *Of the body*: Freedom from disturbance, annoyance, pain, or labor; repose, rest.

"Here dwells kind *Ease* and unrepining Joy."

Thomson: *Castle of Indolence*, i. 2.

(2) *Of the mind*: Tranquillity, freedom from anxiety, concern, or solitude.

"His soul shall dwell at ease."—*Psalms xxv*. 13.

2. Rest or repose after labor; intermission of labor.

"Give yourselves *ease* from the fatigue of waiting."—*Swift*.

*3. That which produces or tends toward quiet, repose, or freedom from anxiety or solitude.

"It is a small crime to wound himself by anguish of heart, to deprive himself of all the pleasures, or *eases*, or enjoyments of life."—*Temple*.

II. Figuratively:

1. Freedom from constraint, formality, or close attention to form.

2. Freedom from harshness, stiffness, or artificiality of style.

"True ease in writing comes from art, not chance,
As those move easiest who have learned to dance."—*Pope: Essay on Criticism*, 362, 363.

3. Facility, readiness; a freedom or absence of difficulty.

"The willing metal will obey thy hand,
Following with ease, if favored by thy fate."

Dryden: Virgil's Aeneid, vi. 220, 221.

4. Use, avail, utility, advantage. (*Scotch*.)

"I've on gie them leg-bail, for there's nae ease in dealing w' quarrelsome fowk."—*Scott: Guy Mannering*, ch. iii.

¶ (1) *At ease*: In a state free from anything likely to disturb, annoy, or cause anxiety.

(2) *To stand at ease*:

Mil.: To stand in the ranks in a certain posture which gives ease or rest.

(3) *Ill at ease*: In a state of mental or bodily discomfort or disturbance.

¶ (1) Crabb thus discriminates between *ease*, *quiet*, and *repose*: "The idea of a motionless state is common to all these terms: *ease* and *quiet* respect action on the body: *rest* and *repose* respect the action of the body: we are *easy* or *quiet* when freed from any external agency that is painful; we have *rest* or *repose* when the body is no longer in motion. *Repose* is a circumstance of necessity; the weary seek *repose*; there is no human being to whom it is not sometimes indispensable. We may *rest* in a standing posture; we can *repose* only in a lying position: the dove which Noah first sent out could not find *rest* for the sole of its foot; soldiers who are hotly pursued by an enemy, have no time or opportunity to take *repose*: the night is the time for *rest*; the pillow is the place for *repose*. *Ease* denotes an exemption from any painful agency in general: *quiet* denotes an exemption from that in particular which noise, disturbance, or the violence of others may cause, we are *easy*, or at *ease*, when the body is in a posture agreeable to itself, or when no circumjacent object presses unequally upon it; we are *quiet* when there is an agreeable stillness around; our *ease* may be disturbed either by internal or external causes; our *quiet* is most commonly disturbed by external objects; we may have *ease* from pain, bodily or mental; we have *quiet* at the will of those around us; a sick person is often far from enjoying *ease*, although he may have the good fortune to enjoy perfect *quiet*; a man's mind is often *uneasy* from its own faulty composition; it suffers frequent *disquietudes* from the vexatious tempers of others.

(2) He thus discriminates between *ease*, *easiness*, *facility*, and *lightness*: "*Ease* denotes either the abstract state of a person or quality of a thing: *easiness*, from *easy*, signifying having *ease*, denotes simply an abstract quality which serves to characterize the thing; a person enjoys *ease*, or he has an *easiness* of disposition: *ease* is said of that which is borne, or that which is done; *easiness* and *facility*, from the Latin *facilis*, easy, most commonly of that which is done; the former in application to the thing as before, the latter either to the person or the thing: we speak of the *easiness* of the task, but of a person's *facility* in doing it: we judge of

fāte, fāt, fāre, smīdst, whāt, fāll, fāther; wē, wēt, hēre, camēl, hēr, thēre; pīne, pīt, sīre, sīr, marīne; gō, pōt, ȳr, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāll; trȳ, ŷīryan. æ, œ = ē; ey = ā. qu = kw.

the *ease*ness of a thing by comparing it with others more difficult; we judge of a person's *facility* by comparing him with others, who are less skillful. *Ease* and *lightness* are both said of what is to be borne; the former in a general, the latter in a particular sense. Whatever presses in any form is not *easy*; that which presses by excess of weight is not *light*: a coat may be *easy* from its make; it can be *light* only from its texture. The same distinction exists between their derivatives, to *ease*, to *facilitate*, and to *lighten*. To *ease* is to make *easy* or free from pain, as to *ease* a person of his labor; to *facilitate* is to render a thing more practicable or less difficult, as to *facilitate* a person's progress; to *lighten* is to take off an excessive weight, as to *lighten* a person's burdens." (Crabb: Eng. Synon.)

ēase, **ese*, v. t. & i. [EASE, s.]

East India, s. & a.

Geog.: A term rarely used except in compounds (See those which follow.)

East India Company:

Hist.: In its original form "The Governor and Company of Merchants of London trading to the East Indies;" so the Company is described in its charter, dated December 31, 1600. Afterward, on July 22, 1702, "The United Company of Merchants trading to the East Indies." In 1749 the Company plunged into the native wars of the Carnatic, and commenced a career of conquest which placed nearly the whole of India either directly or indirectly under the British rule. The victory of Clive, at Plassey (June 23, 1757), over Suraj-u Dowla, laid the foundations of the Anglo-Indian Empire.

The rise of such power excited in the Home Government a desire to reduce it under their control; and when as early as 1789 the Company wished the loan of two ships of the line and some frigates, the ministry in granting their request intimated their intention of vesting in the Admiral powers to treat independently on all maritime affairs. In 1773 the Home Government claimed that the territorial acquisitions of the Company should be transferred after six years' grace to the Crown, and change made in the Constitution of the Company, a Supreme Court of Judicature being also appointed in India. Pitt's Act (1784) established a Board of Control over the directors, which completely destroyed the independence of the latter body. [CONTROL.] The Company's charter was renewed with few changes in 1793; subsequently at intervals of twenty years. In 1813 they lost the monopoly of the Indian trade, retaining that of China. This last was taken away in 1833. The next renewal that of 1853, was the last that took place. The Indian mutinies of 1857, 1858, having discredited the Company's administration, its political government was brought to an end on August 13, 1858.

On November 1, 1858, a proclamation made at Calcutta announced that Queen Victoria herself assumed the government of India. Finally the East India Stock Redemption Act, passed, on May 13, 1873, but not operative till June 1, 1874, at the latter date, dissolved the Company itself, and the association which had had such a brilliant but checkered career ceased to exist.

C. As substantive:

Rowing: A relaxation of effort; a diminution of speed.

"[He] started for Baitsbite, which was reached with the accustomed *easies*."—London Daily Telegraph.

¶ Crabb thus discriminates between *easy* and *ready*: "*Easy* marks the freedom of being done; *ready* the disposition or willingness to do; the former refers mostly to the thing or the manner, the latter to the person; the thing is *easy* to be done, the person is *ready* to do it: it is *easy* to make protestations of friendship in the ardor of the moment; but every one is not *ready* to act up to them, when it interferes with his convenience or interest. As epithets both are opposed to *difficult*, but agreeably to the above explanation of the terms, the former denotes a freedom from such difficulties or obstacles as lie in the nature of the thing itself, the latter an exemption from such as lie in the temper and character of the person: hence we say a person is *easy* of access whose situation, rank, employments, or circumstances do not prevent him from admitting others to his presence: he is *ready* to hear when he himself throws no obstacles in the way, when he lends a willing ear to what is said. So likewise a task is said to be *easy*; a person's wit, or a person's reply, to be *ready*: a young man who has birth and fortune, wit and accomplishments, will find an *easy* admittance into any circle: the very name of a favorite author will be a *ready* passport for the works to which it may be affixed. When used adverbially, they bear the same relation to each other. A man is said to comprehend *easily* who, from any cause, finds a thing *easy* to be comprehended: he pardons *readily* who has a temper *ready* to pardon." (Crabb: *Eng. Synon.*)

***easy-borrowed**, *a.* Assumed with ease; counterfeited with the appearance of naturalness.

"This is a slave, whose *easy-borrowed* pride Dwells in the fickle grace of her he follows."—Shakesp.: *Lear*, ii. 4.

ē-bēl-i-aŋg, s. pl. [Named after Ebel, a Prussian archdeacon, one of the founders.]

Ch. Hist.: A revivalist sect which arose in Königsberg, Prussia, about A. D. 1836, the Archdeacon Ebel and Dr. Diestel being its leaders. They believed in spiritual marriage. In 1839 sentence was passed against their leaders, who were charged with unsound doctrine and impure lives, but it was removed in 1842. Their enemies called the sect Muckers, i. e., in German, Hypocrites. (*Hepworth Dixon*, &c.)

ēb-ēn-ā'-gē-s, s. pl. [Lat. *ebenus*; Gr. *ebenos*=the ebony-tree (*Diospyros ebenum*), ebony, and Lat. fem. pl. *adj. suff. -acea*.]

Bot.: Ebenads. An order of plants, alliance Gentianales. It consists of trees or shrubs without milk and with heavy wood. The leaves, which are entire and coriaceous, are alternate; stipules 0; inflorescence axillary; flowers with the sexes separate or occasionally hermaphrodite; calyx in three to seven divisions; persistent corolla, monopetalous, hypogynous, deciduous, its limb with three to seven divisions; stamens twice or sometimes four times as many, rarely the same number as the segments of the corolla; stigma simple, sessile, radiating; ovary sessile, with several cells, each having one or two pendulous ovules; fruit round, fleshy, sometimes by abortion few seeded. The species come from India and the other parts of the tropics; a few are found as far north as Switzerland. In 1845 Lindley enumerated nine genera, and estimated the known species at 160. They are known by the hardness of their timber, called ebony and ironwood (q. v.). The unripe fruit is very sour. There is no genus *Ebenum*, the typical genus of the order is *Diospyros* (q. v.).

ē-bē-naḡs, s. pl. [Lat. *eben(us)*, and Eng., &c., pl. *suff. -ads*.] [**EBENACEÆ**.]

Bot.: The name given by Lindley to the order Ebenaceæ (q. v.).

***ēb-ēn-ē-ōūs, a.** [Lat. *ebenus*=ebony.] Of or pertaining to ebony; of the color of ebony.

ē-bī-ōn-iteg, s. pl. [*Etym. doubtful*.] Some derive it from a person called Ebion, supposed to have been a founder or the founder of the sect, others consider it to be the Hebrew *ebionim*=poor people. Why they were so called is not known.]

Ecclesiol. & Ch. Hist.: A Christian sect consisting of those Jewish converts who considered the Mosaic law as still binding. In the first century they were in communion with their fellow Christians, whether these were more liberal-minded Jews or converts from some Gentile faith. In the second century they withdrew from communion with the rest of the church and formed a sect called Nazarenes or Ebionites. Then the Nazarenes and the Ebionites became distinct sects, the latter being the more extreme of the two, they believing Jesus to have been a mere man. They admitted, however, that He was an ambassador from God, and Himself possessed of Divine power. They not merely observed the Mosaic law, but superadded all the traditions of the Pharisees. They limited the number of the apostles to twelve, to leave no room for St. Paul, to whom they felt antipathy for having refused to impose the yoke of the Mosaic ritual upon the Gentile churches. (*Mosheim*; *Ch. Hist.*, cent. iii.)

ēb-la-nine, s. [*Etym. doubtful*.]

Chem.: A volatile crystalline spirit, obtained from crude pyroxylic spirit. [**PYROXANTHINE**.]

Muhammedan Theol.: The Prince of Darkness, the Devil or Satan of the Musselmans.

"And from its torments 'scape alone
To wander round lost Eblis' throne."

Byron: *Glaour*.

ē-bōe, s. & a. [A West Indian word.]

A. As *substantive*:

Ethnol.: The name given in the West Indies by planters and others, to the slaves brought from the Bight of Benin, who were a sickly, despondent race.

B. As *adj.*: Pertaining to the Eboes or their country.

eboe-tree, s.

Bot.: *Dipterix eboensis*, a large tree with heavy timber growing in the Mosquito country in Central America. The natives use the oil for anointing their hair.

ē-bōl-i'-tion, s. [Probably a corrupt of *ebullition*.] A particular method of smoking. Gifford says: "I regret my inability to furnish any information on this term, which is almost peculiar to Jonson. From the expression itself we may conjecture that it meant a forcible and rapid ejection of the smoke." It is, however, more likely that a method of expelling the smoke in balls or rings—a feat much affected by veteran smokers—is meant.

"The rare corollary and practice of the Cuban ebollition."—Ben Jonson: *Every Man out of his Humor*, iii. 1.

***ēb-ōn, a. & s.** [**EBONY**.]

A. As *adjective*:

1. Consisting of ebony; made of ebony.

***ēb-ōn-ist, s.** [**Eng. ebon(y)**; -ist.] A worker in ebony.

ēb-ōn-ite, s. [**Eng. ebon(y)**; -ite.] Mr. Good-year's name for what is generally known as hard rubber. It is a vulcanite with a larger proportion of sulphur and certain added ingredients. The proportion of sulphur is from thirty to sixty per cent., and to this may be added certain amounts of shellac, gutta-percha, sulphates of zinc, antimony, or copper. It is used of many colors, as may be gathered from the above list of ingredients, and of hardness and consequent facility for taking polish. The compound, despite its name, may resemble horn, ivory, bone, wood, &c. It is also called Vulcanite (q. v.).

***ēb-ōn-ize, v. t.** [**Eng. ebon(y)**; -ize.] To make of the color of ebony; to make black.

***ēb-ōn-ized, pa. par. or a.** [**EBONIZE**.]

ēb-ōn-y, ēb-ōn-le, *ebon, *ebene, s. & a. [*Fr. ébène*; Prov. *eba*; Sp., Port. & Ital. *ebano*; Lat. *ebenus*; Gr. *ebenos*; Pers., Arab. & Hind. *abnoos*, *abnus*, all from Heb. *habhenim*, *habni*=stony; *eben*=a stone, with reference to the hardness of the wood.]

A. As *substantive*:

1. *Ord. Lang., Bot., &c.*: The wood of various species of *Diospyros*, especially *Diospyros ebenus*, *D. ebenaster*, *D. melanoxylon*, *D. mabalo*, *D. tomentosa*, and *D. roylei*. (*Lindley*.) Ebony is noted for its solidity and for its black color. It is susceptible of a fine polish, and is exceedingly durable. It is used chiefly for mosaic work and inlayings.

2. *Scripture*: The rendering of the Hebrew word *habhenim*. The translation is probably correct. [*Etym.*]

"The men of Dedan were thy merchants . . . they brought these for presents horns of ivory and ebony."—*Ezek.* xxvii. 16.

"Giving rise to the ebracteated inflorescences of *Cruciferae* and some *Boraginaceae*."—*Balfour: Botany*, § 345.

ē-brāc'-tē-ō-lāte, a. [Lat. *e=* without, and *bracteola*=a thin leaf of gold.]

Bot.: Destitute of bracteoles, not having small or secondary bracts.

***ē-brā'-like, e-brayk, a.** [Lat. *ebraicus*.] Hebrew.

"That kept the popl *Ebrayk* fro her drenchyng."
Chaucer: *C. T.*, 4, 909.

ē-brī'-ēt-ŷ, s. [Fr. *ébrété*, from Lat. *ebrietas*, from *ebrius*=drunk.] Drunkenness; intoxication by strong spirituous liquors.

"'Tis quenchless thirst
Of ruinous *ebriety*, that prompts
His every action, and imbrutes the man."
Cooper: *Task*, iv. 459-61.

ē-brīl'-lāde, s. [Fr.]

Manège: A check of the bridle which a horseman gives a horse, by a jerk of one rein, when he refuses to turn.

***ē-brī-ōs'-ī-tŷ, s.** [Lat. *ebriositas*, from *ebriosus*=sottish, drunk.] Habitual drunkenness; an addictedness to strong drink; sottishness.

"That religion which excuseth Noah in surprisal, will neither acquit *ebriosity* nor *ebriety* in their intended perversion."—*Brownie: Vulgar Errors*, bk. v., ch. xxi.

***ē-brī-ōūs, a.** [Lat. *ebrius*.]

1. Drunk, intoxicated.

"They found at the door an *ebrious* Irish lad."—*Mortimer Collins: From Midnight to Midnight*, vol. iii., ch. xi.

2. Given or addicted to strong drink; sottish.

3. Intoxicating.

"Twas no *ebrious* fluid."—*Mortimer Collins: Blacksmith and Scholar*, vol. ii., ch. xi.

***ē-būl'-lī-āte, v. i.** [Lat. *ebullio*=to bubble up.] [EBULLITION.] To boil or bubble up; to burst out, to overflow.

"Whence this 29 poppung argument will *ebullitate*."—*Frynne: 1 Hystrio-mastic*, vi. 3.

***ē-būl'-lī-ēnce, *ē-būl'-lī-ēn-ŷ, s.** [Lat. *ebulliens*, pr. par. of *ebullio*=to bubble up.] [EBULLITION.] A boiling over; a bursting up or forth; an overflow.

"The natural and enthusiastic fervor of men's spirits, and the *ebullieny* of their fancy."—*Cudworth: Sermons*, p. 93.

***ē-būl'-lī-ēnt, a.** [Latin *ebulliens*, pr. par. of *ebullio*.] Boiling over; bursting forth or up; overflowing.

"They scarce can swallow their *ebullient* spleen."
Young: *Night Thoughts*, viii. 1,320.

ē-būl'-lī-ō-scōpe, s. [Latin *ebullio*=to bubble up, and Gr. *skopeō*=to see, to observe.] An instrument for determining the strength of a liquid by ascertaining its boiling-point.

ē-būl'-lī-tion, s. [Fr. *ébullition*; Lat. *ebullitio*, from *ebullio*=to bubble up; *e=ex*=out, and *bullio*=to boil, to bubble; *bulia*=a bubble; Sp. *ebulicion*; Ital. *ebullizione*.]

1. Ordinary Language:

1. Literally:

(1) The act of boiling; the condition into which a liquid is thrown by the application of heat, which causes an agitation or bubbling, arising from the escape of portions of the liquid in an aeriform state.

(2) Effervescence arising from the mingling together of an alkali and acid liquor; any intestine violent motion or agitation of the parts of a fluid, occasioned by the opposition of particles of different properties; fermentation.

"If sal ammoniac, or any pure volatile alkali, dissolved in water, be mixed with an acid, an *ebullition*, with a greater degree of cold, will ensue."—*Arbuthnot: On Alterations*.

2. Fig.: A sudden bursting forth or display of feeling, &c.

"Overwhelmed with the *ebullition* of my thoughts."—*Looke: Second Reply to Bishop of Worcester*.

II. Nat. Phil.: The rapid production of elastic bubbles of vapor in the mass of a liquid itself. The following are the laws as determined experimentally: (1) The temperature of ebullition, i. e., the boiling point, increases with the pressure. (2) For a given pressure ebullition commences at a certain temperature, which varies in different liquids, but which for equal pressures is always the same in the

same liquid. (3) Whatever be the intensity of the source of heat, as soon as ebullition commences, the temperature of the liquid remains stationary. (*Gannot*.)

Crabb thus discriminates between *ebullition*, *effervescence*, and *fermentation*: "These technical terms have a strong resemblance in their signification, but they are not strictly synonymous; they have strong characteristic differences. *Ebullition* marks the movement of a liquid acted upon by fire, and in chemistry it is said of two substances, which by penetrating each other occasion bubbles to rise up. *Effervescence* marks the movement which is excited in liquors by a combination of substances; such as of acids, which are mixed and commonly produce heat. *Fermentation* marks the internal movement which is excited in a liquid of itself, by which its components undergo such a change or decomposition, as to form a new body. *Ebullition* is a more violent action than *effervescence*; *fermentation* is more gradual and permanent than either. Water is exposed to *ebullition* when acted upon by any powerful degree of external heat; iron in aqua fortis occasions an *effervescence*; beer and wine undergo a *fermentation* before they reach a state of perfection. These words are all employed in a figurative sense, which is drawn from their physical application. The passions are exposed to *ebullitions* in which they break forth with all the violence that is observable in water agitated by excessive heat; the heart and affections are exposed to *effervescence* when powerfully awakened by particular objects; minds are said to be in a *ferment* which are agitated by conflicting feelings; the *ebullition* and *effervescence* is applicable only to individuals; *fermentation* to one or many." (*Crabb: Eng. Synon.*)

ē-būr'-nē, s. [Lat. *eburneus*, *eburnus*=of ivory, from *ebur*=ivory.]

Zool.: Ivory Shell, a genus of Mollusks, family Buccinidae. The shell when young is umbilicated; when adult the inner lip is callous, spreading, and covering the umbilicus; the operculum is pointed. Nine species are known from the hotter parts of the Eastern Hemisphere.

ē-būr'-nē-tion, s. [Fr. *éburnation*, from Latin *eburnus*=of ivory, and Eng., &c., suff. -ation.]

Path.: An excessive deposition of compact osseous matter, sometimes found in a diseased state of the bones, and especially of the joints.

***ē-būr'-nē-an, a.** [Latin *eburnus*, from *ebur*=ivory.] Of or pertaining to ivory; made of ivory.

***ē-būr'-nī-fī-cā-tion, s.** [Latin *eburnus*=pertaining to ivory; *ficio*=to make; and English suff. -ation.] The act of converting substances into others which have the appearance or characteristics of ivory.

ē-būr'-nīne, a. [Latin *eburnus*=of ivory, and Eng., &c., suff. -ine.] Of or belonging to ivory.

"She lay reclined,
And, pensive, read from tablet *eburnine*."
Scott: *Lay of the Last Minstrel*, vi. 19.

ē-cāl'-cār-āte, a. [Lat. *e=ex*=without; *calcar*=a spur, and Eng. adj. suff. -ate.]

Bot.: Without a calcar or spur.

ē-cār'-ī-nāte, a. [Latin *e=ex*=without, and *carina*=a keel.]

Bot.: Without a carina or keel.

ē-car'-tē, s. [Fr., lit.=discarded.]

Cards: A game of cards played by two persons with thirty-two cards, the twos, threes, fours, fives, and sixes of each suit being discarded from the pack. The cards rank in the following order: King (the highest), queen, knave, ace, ten, &c. The parties cut for deal, and the dealer deals out five cards each, turning up the eleventh for trump. The non-dealer may claim, before a trick is played, to discard any of the cards from his hand, and to replace them with others from the pack, but it is in the option of the dealer to allow or disallow the claim. The players must follow suit if they can. Three tricks count one point, five count two; and five points make the game. If the dealer turns up the king, he counts one for it, and if either player has a king in his hand, he may score one for it if he claim it before the first trick.

ē-cāu'-dāte, a. [Lat. *e=* without, and *cauda*=a tail.]

1. *Zool.*: Without a tail.

2. *Botany*:

(1) Spikeless. (*Paxton*.)

(2) Without a stem. (*Paxton*.)

ē-cāl'-ī-ūm, s. [Gr. *ekballō*=to throw out, with reference to the fact that the seeds when ripe are expelled from the fruit with considerable force.]

Bot.: A genus of Cucurbitaceae. *Ecbalium agreste*, sometimes called *Momordica elaterium*, is the Squirting Cucumber (q. v.). [ELATERIUM.]

ecballi fructus, s.

Phar.: The fruit of *Ecbalium officinarum*, or *Momordica elaterium*, a small elliptical pepo about

one and a half inches long, covered with soft prickles containing the seed, surrounded by a juicy tissue. When ripe, the seeds are expelled forcibly, hence the English name of the plant. The juice of *Ecbalium* is used in medicine as *Elaterium* (q. v.).

ēc'-bā-sīs, s. [Gr.=a going out, a result, from *ekbainō*=to go out; *ek*=out, and *bainō*=to go.]

Rhet.: A figure of speech in which the speaker treats of things according to their events and consequences.

ēc'-bāt'-ic, a. [As if from a Gr. *ekbatikos*, from *ekbais*=a going out, an issue, result.]

Gram.: Relating to a result, issue, or consequence. It is opposed to *telic* (q. v.), which denotes purpose or intention.

ēc'-blās-tē-sīs, s. [Gr. *ekblastēsis*, from *ekblas-tanō*=to shoot or sprout out.]

Bot.: The production of buds within flowers, or on inflorescences, in consequence of monstrous development.

ēc'-bō-lē, s. [Greek *ekbolē*=a throwing out, a digression; *ekballō*=to throw out; *ek*=out, and *ballō*=to throw.]

1. *Rhet.*: A digression, in which the speaker introduces another person speaking in his own words.

2. *Music*: The sharpening of sounds to adapt them to a change of key-note.

ēc'-bōl'-ic, a. & s. [Gr. *ekbolē*=a throwing out; *ekbolion*=a medicine for causing abortion; *ek*=out, and *ballō*=to throw.]

A. As adj.: A term applied to any medicine which excites uterine contractions, and promotes the expulsion of the fetus.

B. As subst. (pl.): Medicines which cause contraction of the uterus, and promote the expulsion of the fetus, as ergot, digitalis, savin, borax, &c.

ēc'-bō-līne, s. [Eng. *ecbol*(ic); suff. -ine (Chem.) (q. v.).]

Chem.: A principle said to be found in Ergot, probably the same as Ergotine (q. v.).

ēc'-cāl-ē-ō-bī-ōn, s. [Gr. *ekkalēō*=to call out; *ek*=out; *kaleō*=to call, and *bios*=life.] A chamber for hatching eggs by artificial heat. [INCUBATOR.]

ēc'-cē-dēn-tē, a. [Ital.]

Music: Exceeding, augmented; a term applied to intervals.

ēc'-cē hō-mō, phr. (often used as subst.) [Lat. =Behold the man.]

Art: A name given to paintings representing our Lord crowned with thorns and bearing the reed. The name is given to these pictures because the Vulgate (Latin) New Testament thus rendered Pilate's language at the moment when he had caused Christ to be decked with thorns and robe and led forth and delivered to the people—"Then came Jesus forth, wearing the crown of thorns and the purple robe, and Pilate saith unto them, Behold the man." [Ecce homo (Lat.).]—*John* xix. 5.

ēc'-cēn'-tric, *ēc'-cēn'-tric-al, *ēc'-cēn'-trick, a. & s. [O. Fr. *eccentrique*; Fr. *eccentrique*, from Low Lat. *eccentricus*; *ec=ex*=out, away from, and *centrum*=the center, from Gr. *ekkentros*.]

A. As adjective:

I. Ordinary Language:

1. Literally:

(1) Deviating from the center.

"Mystical dance, which yonder starry sphere
Of planets, and of fixed, in all her wheels
Resembles nearest, mazes intricate,
Eccentric."—*Milton: P. L.*, v. 620-23.

(2) In the same sense as II.

"Whence is it that planets move all one and the same way in orbs concentric, while comets move all manner of ways in orbs very eccentric?"—*Newton: Optics*.

(3) Pertaining to eccentricity or an eccentric.

2. Figuratively:

* (1) Not directed toward or terminating in the same point or end; divergent.

"Whate'er affairs pass such a man's hands, he crooketh them to his own ends; which must needs be often *eccentric* to the ends of his master."—*Bacon: Essays*.

(2) Departing from the usual practice, or established forms or laws; not following the ordinary course; peculiar or odd in manner or character.

(a) Of persons:

"The passion of this brave and *eccentric* young man for maritime adventure was unconquerable."—*Macaulay: Hist. Eng.*, ch. xx.

(b) Of manners, conduct, &c.:

"With this man's knavery was strangely mingled an *eccentric* vanity which resembled madness."—*Macaulay: Hist. Eng.*, ch. v.

II. *Geom.*: Not having the same center; a term applied to circles and spheres, which have different centers. It is opposed to Concentric (q. v.).

bōl, bōy; pōut, jōwl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shān. -tion, -sion = shūn; -tīon, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, dgl.

B. As substantive:**I. Ordinary Language:****1. Lit.:** In the same sense as II. 1.

"Thither his course he bends
Through the calm firmament (but up or down,
By center or eccentric, hard to tell)."
Milton: *P. L.*, iii. 573-75.

2. Figuratively:

(1) That which deviates from the usual or common occurrence.

"Let the lot decide the main of the controversy and reserving somewhat as it were for the universal motion of the whole body, somewhat for *eccentricity*."—Hammond: *Works*, iv. 551.

(2) A person of eccentric, odd, or peculiar habits; an oddity.

II. Technically:**1. Astronomy:**

* (1) A circle, the center of which does not correspond with that of the earth.

(2) In the Ptolemaic system the supposed circular orbit of a planet about the earth, but with the earth not in its center.

(3) A circle described about the center of an elliptical orbit, with half the major axis for radius.

2. *Mech.*: A term applied to a group of mechanical contrivances for converting circular into reciprocating rectilinear motion: they consist of variously shaped discs, attached to a revolving shaft, and according to the shape of the working surfaces are distinguished as triangular, heart-shaped, toothed, or circular eccentrics. The term is more especially applicable to the latter form, the others being only particular varieties of cam; it consists of a circular disc attached to the shaft, but having its center at a small distance from that of the axis of the shaft. The distance between these points is called the *eccentricity*, and corresponds to the radius of the circle described by the disc in its revolution or half the length of the path described by the end eccentric rod. Practically there is no difference between the crank and the eccentric; the latter may be considered as a crank in which the radius of the crank-pin is greater than that of the crank-arm. The motion of the eccentric is communicated to the rod by a hoop or strap closely fitted round the circumference of the disc which revolves within it. Eccentrics are used for moving heavy shears in iron forges, and the feed-pumps, and occasionally the air-pumps in steam-engines. For the latter purpose they are often of great size, as, for example, in the paddle-engines of the "Great Eastern" steamship. The most general application, however, is for moving the slide-valves in steam-engines, for which purpose they are employed either singly, the tail of the rod being in direct communication with the valve lever, or, what is more common, in pairs, the motion being conveyed by some form of link. [LINK-MOTION.] (Weale.)

† For the difference between *eccentric* and *particular*, see PARTICULAR.

eccentric-catch, s. [ECCENTRIC-HOOK.]

eccentric-chuck, s. A chuck attached to the mandrel of a lathe, and having a sliding piece which carries the center. This piece is adjustable in a plane at right angles to the axis of motion by means of a set screw, and carries the center to one side of the axis of motion. By its means circular lines of varying size and eccentricity may be produced. No oval or ellipse is produced thereby, but circles on the face of the work with their centers at such distance from the axis of the mandrel as may be desired.

eccentric-cutter, s. A cutting-tool placed upon the slide-rest, and having a rotation by means of a wheel and shaft, the cutter being attached to the end of the latter. The rotation is obtained by an overhead motion, and the eccentricity by fixing the cutter at different distances from the center by means of the groove and screw. The action of the eccentric-cutter differs from that of the eccentric-chuck in this: in the latter the work is rotated and the tool is stationary; in the former the work is stationary and the tool revolves. When the motions are used in conjunction, the patterns are capable of almost unlimited variation.

eccentric-engraving, s. An arrangement of diamond tracers, operated by elaborate machinery, acting upon a varnished roller designed for calico-printing. The effect is analogous to that produced by the rose-engine lathe.

eccentric-fan, s. A fan-wheel with radial arms and vanes, and having an axis which is eccentric with the case in which it revolves. The case has a scroll form, and the effect is to make the discharge of air more perfect, and avoid carrying a body of air around between the vanes.

eccentric-gab, s. [ECCENTRIC-HOOK.]

eccentric-gear, eccentric-gearing, s. Cog-wheels set on eccentric axes give a variable circular motion, as in the case of the eccentric contrate-wheel and pinion, and the eccentric spur-wheel and

intermediate shifting pinion. Links connect the axis of the pinion with those of the driver and driven wheels, and preserve the pinion at proper mashing distance, so as to engage with the motor, and communicate the motion to the next wheel in series.

eccentric-hook, s.

Steam-eng.: A hook used to connect the eccentric-rod with the wrist on the lever of the rock-shaft which actuates the valve; otherwise called a Gab.

eccentric-hoop, s. The strap on the eccentric of an engine.

eccentric-pump, s. A hollow cylinder in which is a revolving hub and axis eccentrically arranged. On the hub are flaps which act as pistons in the space between the hub and the case to expel the water, which enters at one opening and flows out by another. The same construction is seen in rotary steam-engines, with this difference, that in one case the shaft revolves to force water, and in the other the steam passes through to drive the shaft.

eccentric-rod, s. The rod connecting the eccentric-strap to the lever which moves the slide-valve.

eccentric-strap, s.

Mach.: The ring inclosing an eccentric sheave and connecting by a rod to the object to be reciprocated, as the slide-valve of a steam-engine. [ECCENTRIC-HOOP.]

eccentric-wheel, s.

Mach.: A cam consisting of a circular disc attached eccentrically to a shaft. It is used for communicating a reciprocal motion to the valve of a steam-engine. Its axis of revolution is out of the center of its figure, and the rectilinear motion imparted is called the throw. The ring round the eccentric is the eccentric-strap. The rod connecting the strap to the part to be actuated is the eccentric rod. The hook at the end of the rod, by which it is connected to the rock-shaft of the valve motion, is the eccentric-hook or gab. The whole apparatus is the eccentric-gear. [ECCENTRIC.]

ëc-çën-tri-cal-ly, adv. [Eng. *eccentrically*; -ly.] In an eccentric manner; with eccentricity.

"Swift, Rab'lais, and that favorite child,
Who, less *eccentrically* wild
Inverts the misanthropic plan,
And, hating vices, hates not man."

Lloyd: *A Familiar Epistle*.

ëc-çën-triç-i-tÿ, s. [Low Lat. *eccentricitas*, from *eccentricus*=eccentric; Fr. *excentricité*.]

1. Literally:

1. Deviation from a center. [ECCENTRIC, s., II. 2.]

"Some say the *eccentricity* of the sunne is come nearer the earth."—Burton: *Anat. of Melancholy*, p. 248.

2. The state of having a different center from that of another circle.

"By reason of the sun's *eccentricity* to the earth, and obliquity to the equator, he appears to us to move unequally."—Holder: *On Time*.

II. Figuratively:

* 1. An excursion or departure from the proper orb or sphere.

"The duke, at his return from his *eccentricity*, for so I account favorites abroad, met no good news."—Volton.

2. A departure from what is usual, regular, or established; eccentric or whimsical conduct or character; oddity, peculiarity.

"Who'd make a riot or a poem,
From *eccentricity* of thought
Not always do the thing he ought."

Lloyd: *Genius, Envy, and Time*.

† *Eccentricity of the earth*: The distance between the focus and the center of the earth's elliptic orbit. (Harris.)

ëc-çë sig-nûm, phr. [Lat.] Behold the sign, proof, or badge.

ëc-çÿ-mô-sis, s. [Gr. *ekchymosis*, from *ekchy* *moomai*=to shed the blood and leave it extravasated just under the skin: *ek*=out, and *cheo*=to pour.]

Med.: A livid spot or blotch in the skin, produced by extravasated blood.

"*Ekchymosis* may be defined an extravasation of the blood in or under the skin, the skin remaining whole."—Wiseman.

ëc-clë-grass, s. [Etym. doubtful.]

Bot.: Butterwort or sheepwort, *Pinguicula vulgaris*.

"*P. vulgaris*, or common butterwort in Orkney is known by the name of *Ecclegrass*."—Neill: *Tour*, p. 191.

ëc-clë-gi-a, s. [Lat., from Gr. *ekklesiā*=an assembly of the citizens summoned by the crier, the legislative assembly, from *ekkletos*=summoned.]

1. Greek Archæol.: (See the etym.)**2. English Law:**

- (1) A church.
- (2) A religious assembly.
- (3) A personage. (Wharton.)

†ëc-clë-gi-àn, s. [Gr. *ekklesiā*; and Eng. suff. -an.] One who asserts the supremacy of the Church over the State.

***ëc-clë-gi-arch, s.** [Gr. *ekklesiā*, and *archos*=a leader, a chief.] A ruler of the church.

***ëc-clë-gi-äst, s.** [Gr. *ekklesiastēs*.] [EKKLESIASTES.]

1. One who sat or spoke in the Athenian Assembly. (Liddell & Scott.)

2. An ecclesiastic. (Chaucer.)

3. The Book of Ecclesiastes. (Chaucer.)

ëc-clëg-i-äs-tëg, s. [Gr. *ekklesiastēs*=one who sits or speaks in an assembly of the citizens, from *ekklesiā*.] [ECCLESIA.]

Scripture Canon: The name given by the Septuagint translators to the Old Testament book called in Hebrew *Qoheleth*, pronounced *Koheleth*. This seems to come from *qahal*=a congregation, an assembly, a word occurring in Gen. xxv. 11, Numb. xvi. 3, &c., from the root *qahal*=to call together. The designation "preacher," given in the authorized English version, has essentially the same meaning. In the Hebrew Bible it figures as one of the *Kethubim* or *Agio-grapha*, its place being between Lamentations and Esther. It was almost universally received by the members of the Jewish Church and by the Christian fathers; nor has its title to a place in the Canon been seriously disputed in modern times. Its authorship and date have been matters of controversy. At first sight the matter seems decided to all who accept the inspiration of Scripture by the preacher's own statement (i. 1, 12), which can apply only to Solomon. Some, however, are of the opinion that a later writer might without any intention of fraud have thrown his narrative into the form of an imagined autobiography of Solomon. The Hebrew is mixed with Aramaean, and there seem other indications of a late date. What that date is has been variously stated, the extremes differing by about 300 years. Intellectually considered, the "Kohelah" was a man of powerfully philosophical mind, keen in observing nature and society, and reasoning upon what he saw (i. 9, 10). Morally and spiritually viewed, he was suffering the penalty of having early and too deeply drained the cup of pleasure, and was now satiated with the world and weary of it. The book records his experience and the phases of his faith, the conclusion of the whole matter being that to fear God and keep His commandments is the whole duty of man.

ëc-clë-gi-äs-tic, a. & s. [Gr. *ekklesiastikos*=belonging to the *ekklesiā*=(1) in civil life, an assembly of the citizens for legislative purposes; (2) in ecclesiastical life, the church; *ekklesiōs*=called out; *ekkaleō*=to call out.]

A. As adj.: Pertaining to the Church or to sacred things, as distinguished from the world and things secular.

B. As subst.: A person in holy orders, a clergyman; one who discharges sacred functions in connection with a church or chapel of ease.

† Crabb thus discriminates between *ecclesiastic*, *divine*, and *theologian*. "An *ecclesiastic* derives his title from the office which he bears in the *ecclesia*, or church; a *divine* and *theologian* from their pursuit after, or engagement in, *divine* or *theological* matters. An *ecclesiastic* is connected with an episcopacy; a *divine* or *theologian* is unconnected with any form of church government. An *ecclesiastic* need not in his own person perform any office, although he fills a station; a *divine* not only fills a station, but actually performs the office of teaching; a *theologian* neither fills any particular station, nor discharges any specific duty, but merely follows the pursuit of studying *theology*." (Crabb: *Eng. Synon.*)

ëc-clë-gi-äs-tic-al, a. [Eng., &c., *ecclesiastic*; -al.] The same as ECCLESIASTIC, a. (q. v.)

ëc-clë-gi-äs-tic-al-ly, adv. [Eng. *ecclesiastical*; -ly.] As is done in ecclesiastical affairs; according to ecclesiastical rules; after the manner of an ecclesiastic or of an ecclesiastical corporation or assembly.

ëc-clë-gi-äs-ti-ci-sm, s. [English *ecclesiastic*; -ism.] Strong attachment to ecclesiastical privileges and views.

ëc-clë-gi-äs-ti-cüs, s. [Lat. *Ecclesiasticus*, s., *ecclesiasticus*, s. & a.; Gr. *ekklesiastikos*=(1) pertaining to the assembly of citizens; (2) pertaining to the Church.]

Apoerypha: The name given in the Latin version to a work called in Greek *Sophia Iesou byiou Sirach*=the Wisdom of Jesus the Son of Sirach. The Latin name implies that it was a book used in the worship of the Church. It was penned in Palestine, and "in Hebrew," by which probably is meant Aramaean; but this first composition is lost. The grandson of the original writer translated it into Greek in the reign of Euergetes. There were two

fäte, fät, färe, amidst, whät, fäll, father; wë, wët, hère, camël, hër, thère; pine, pît, sîre, sîr, marine; gô, pô, or, wöre, wölf, wörk, whô, sôn; mäte, cûb, cûre, unite, cûr, râle, füll; trÿ, sÿrian, æ, æ=ë; ey=ä. qu-kw.

kings of this name in Egypt, Ptolemy III, B. C. 247-222, and Ptolemy VII. (Phycon), B. C. 170-117. Probably it was to the first of these that he referred, and the Son of Sirach may have composed Ecclesiasticus some time between 290 and 280 B. C. The work resembles the book of Proverbs. Its theme is the praise of wisdom, and its execution deserves high commendation. To distinguish it from Ecclesiastes, quoted under the abbreviation Eccles., it is cited as Ecclus.

ĕc-clĕ-gl-ĕ-lŏg'-ĭc-ġl, a. Pertaining or relating to ecclesiology.

ĕc-clĕ-ġl-ĕ-l-ĕ-ġĭst, s. [Eng. *ekklesiology* (y); -ist.] One who studies ecclesiology.

ĕc-clĕ-ġl-ĕ-l-ĕ-ġŷ, s. [Gr. *ecclesia* [ECCLESIA], and *logos*=discourse.]

1. *Gen.*: The science which treats of all matters connected with churches.

2. *Spec.*: The department of human knowledge which treats of church architecture and decoration.

ĕc-cŭ-pĕ, s. [Gr. *ekkopĕ*=a cutting out; *ek*=out, and *kopĕ*=to cut.]

Surg.: The act of cutting out; specif., a perpendicular division of the cranium by a cutting instrument.

ĕc-cŭ-prŏt'-ĭc, ĕc-cŭ-prŏt'-ĭck, a. & s. [Low Lat. *ecoproticus*, as if from a Gr. *ekkoprotikos*, from *ekkopros*=a cleaning from dung; *ek*=out, and *kopros*=dung; Fr. *ecoprotique*.]

A. As adj.: Having the property or power of promoting alvine discharges; laxative, loosening.

B. As subst.: A medicine which has the property or quality of promoting alvine discharges; a purgative, a cathartic.

ĕc-crĕm-ĕ-car-pŭs, s. [Gr. *ekkrema*=hanging from or upon, and *karpōs*=fruit.]

Bot.: A genus of Bignoniaceae. *Eccremocarpos scaber*, a native of Chili, is often cultivated here as an ornamental creeper. It has fine orange-colored flowers.

ĕc-crĭn-ĕ-l-ĕ-ġŷ, s. [Gr. *ekkrinō*=to pick out, to secrete, and *logos*=a discourse.]

Physiol.: A treatise on the secretions of the body.

ĕc-crĭ-sis, s. [Gr. *ekkrisis*, from *ekkrinō*=to pick out, to select, to secrete; *ek*=out, and *krinō*=to select.]

Med.: The excretion of excrementitious or morbid matter.

ĕc-ġŷ-ĕ-sis, s. [Gr. *ekkyeō*=to be pregnant.]

Obstet.: Extra-uterine foetation; imperfect foetation in some organ exterior to the uterus, as in the abdomen or in one of the ovaria.

ĕc-dĕr-ŏn, s. [Gr. *ek*=out, and *deros*=the skin.]

Anat.: The epidermal or outer layer of the integument of the skin; the epithelial layer of mucous membrane.

ĕc-dŷp'-sis, s. [Gr. *ekdŷsis*=a getting out; *ekdŷō*=to dry off.]

Physiol.: The casting of the skin, molting.

Ecdysis is not the same as metamorphosis. The former is simple molting, the latter is transformation. Messrs. Swainson and Shuckard drew this distinction between the two: the first is a simple casting off of the old skin, unaccompanied by the development of any new members, or by any variation of form, these latter being always the consequence of metamorphosis or transformation.

ĕc-ġŏ-nĭc, s. [Gr. *ekgonos*=an offshoot, and Eng., &c., suff. -ine (Chem.).]

Chem.: $C_6H_5NO_2$. A base obtained by heating cocaine with hydrochloric acid in a sealed tube to 100°. Ecgonine is soluble in water; it melts at 198°.

ĕ-chañ'-crŭre, s. [Fr.]

Anat.: A term used to designate depressions and notches on the surface or edges of bones.

***ĕche, *ĕch, *ĕech, *ĕeck, v. t.** [Eke.] To add to, to increase, to protract.

"To eche it and to draw it out in length."

Shakespeare: Merchant of Venice, iii. 2.

***ĕche, a. & pron.** [Eche.]

***ĕch'-ĕ-s, s.** [Gr. *ēcheō*=to sound.]

Arch.: The name given to the sonorous bell-shaped vases of bronze or earth, used by the constructors of ancient theaters to give greater power to the voices of the actors.

ĕch'-ĕ-lŏn, s. [Fr., from *échelle*=a ladder.]

1. *Mil.*: The position or arrangement of troops as in the form of steps, i. e., with one division more advanced than another.

2. *Naval*: A fleet is said to be in echelon when it presents a wedge-like form to the enemy, so that the bow-guns and broadsides of the several ships can mutually protect each other.

echelon-lens, s.

Optical Instruments: A large lens, constructed in several pieces, to be put together afterward. It consists of a plano-convex lens, surrounded by a series of angular and concentric segments, each of which has a plane face on the same side as the plane face of the central lens, while the faces on the other side have such a curvature that the foci of the different segments coincide in the same point. Echelon lenses are used in lighthouses, for which it is difficult to construct lenses each of a single piece. (*Ganot*, § 520.)

ĕch-ĕ-nĕ'-is, s. [Lat. *echeneis*=the remora; Gr. *echeneis*=1 (as adj.) holding ships back, 2 (as subst.) the remora: *ēchō*=to have, to hold, and *naus*=a ship.]

Ichthy.: A genus of Fishes belonging to the family Gobiidae. They have on the upper part of the head a disc or sucker by which they can attach themselves to rocks, ships, or to other fishes. *Echeneis remora* is the Remora or Sucking-fish. [REMOREA.]

ĕch-ĕ-vĕr'-ĭ-a, s. [Named after M. Echeverri, who made the drawings in the *Flora mexicana*.]

Bot.: A genus of Crassulaceae, tribe Crassuleae. It has a five-parted calyx, petals united, stamens ten, and five carpels. The species are succulent plants with showy flowers, natives of Mexico.

ĕch'-ĭ-ġl, a. & s. [Lat. *echi(um)*; Eng., &c., suff. -al.]

A. As adjective:

Bot.: Pertaining, relating, or akin to the alliance Echiales, or to the genus Echiium. (*Lindley: Veget. Kingdom* (3d ed.), p. 649.)

B. As subst. (pl.): The Echiial Alliance.

ĕch'-ĭ-ġlĕs, s. pl. [Mod. Lat. *echi(um)*, and Lat. fem. pl. adj. suff. -ales.]

Botany: An alliance of Perigynous Exogens. It has dichlamydeous, monopetalous, symmetrical or unsymmetrical flowers, nucamentaceous fruit, consisting of one-seeded nuts, or of clusters of them separate or separable, and a large embryo with little or no albumen. It contains the following orders: (1) Jasmīnaceae, (2) Salvadoraceae, (3) Ebrutiaceae, (4) Nolanaceae, (5) Boraginaceae, (6) Brunoniaceae, (7) Lamiaceae, (8) Verbenaceae, (9) Myoporaceae, and (10) Selaginaceae. (*Lindley*, [ECHIUM].)

ĕ-chĭd'-nā, s. [Gr. *echidna*=an adder, a viper.]

1. *Zool.*: A genus of mammals, the typical one of the family Echidnidae. Four species are known. The most common are, *Echidna hystrix*, from New South Wales, and *E. setosa*, from that region also, but more frequently from Tasmania. The remaining two are from New Guinea. They are burrowing animals, from fifteen to eighteen inches long, and feed on ants and termites. [ECHIDNIDÆ.]

2. *Palæont.*: A gigantic Echidna occurs in the Post-tertiary deposits of Australia.

ĕ-chĭd'-nĭ-dæ, s. pl. [Gr. *echidna*, and Lat. fem. pl. adj. suff. -idæ.]

Zool.: Porcupine Ant-eaters. A family of mammals belonging to the very aberrant order Monotremata (q. v.). The snout is long and cylindrical, the jaws toothless, the tongue long and extensible, and the skin of the body clothed with bristly hairs.

ĕch'-ĭ-mŷs, tĕ-chĭ'-nŏ-mŷs, s. [Gr. *echinos*=a hedgehog, and *mŷs*=a mouse.]

1. *Zool.*: Spiny Rat: a genus of Mammals, family Octodontidæ. Incisors 2, canines 3-3, cheek teeth 2-2=20. Back covered with shortish spines or bristles. The species inhabit South America.

2. *Palæont.*: Remains of an Echymys have been found in the bone caves of Brazil.

ĕch'-ĭ-nāte, ĕch'-ĭ-nāt-ĕd, a. [Lat. *echinatus*, from *echinus* q. v.]

1. *Zool.*: Furnished with prickles or spines.

2. *Bot.*: Furnished with numerous rigid hairs or straight prickles, as the fruit of *Castanea vesca*. (*Lindley*.) The same as BRISTLY (q. v.).

ĕ-chĭ-nĭd, s. [Gr. *echinos*=a hedgehog . . . a sea-urchin, and *ēidos*=form.]

Zool.: A member of the family Echinidae.

ĕ-chĭ-nĭ-dā, ĕ-chĭ-nĭd'-ĕ-s, s. pl. [ECHINOIDEA.]

ĕ-chĭn'-ĭ-dæ, s. pl. [Lat. *echin(us)*, and fem. pl. adj. suff. -idæ.]

Zoology:

1. The same as ECHINIDA. (*Owen: Invert. Anim.* (1843), Lect. x., p. 117.)

2. A family of Regular Echinoids. The test is usually globular or hemispherical; the ambulacral areas wide, the spines short and awl-shaped.

ĕ-chĭ-nĭ-dan, s. [Eng., &c., *echinid(a)*; suff. -an.] A member of the order Echinida (q. v.).

tĕ-chĭ-nĭ-tal, a. [Eng., &c., *echinit(e)* (q. v.); suff. -al.]

Palæont.: Pertaining to an echinite.

tĕ-chĭ-nĭte, ĕ-chĭ-nĭ-tĕg, s. [Gr. *echinos*=a hedgehog . . . a sea-urchin, and -ite, -ites (Palæont.) (q. v.).]

Palæont.: A fossil Echinoderm, especially if closely akin to or identical with the typical genus Echinus.

ĕ-chĭ-nŏ-brĭs'-sĭ-dæ, s. pl. [Mod. Lat. *echinobris(sus)* (q. v.), and Lat. fem. pl. adj. suff. -idæ.]

Zool.: A family of Irregular Echinoids, ranging from the Oolitic period till now.

ĕ-chĭ-nŏ-brĭs'-sŭs, s. [Lat. *echinus*=Gr. *echinos*; and Mod. Lat. *brissus* (q. v.).]

Zool.: A genus of Echinoids, the typical one of the family Echinobrisidae (q. v.).

ĕ-chĭ-nŏ-cāc'-tĭ-dæ, s. pl. [Mod. Lat. *echinocact(us)*, and Lat. fem. pl. adj. suff. -idæ.]

Bot.: A family of Cactaceae (q. v.).

ĕ-chĭ-nŏ-cāc'-tŭs, s. [Lat. *echinus*=Gr. *echinos*=a hedgehog, and Lat. *cactus*, Gr. *kaktos*=a prickly plant, apparently the Spanish Artichoke or Cardoon, *Cynara cardunculus*. This is not the modern Cactus genus.]

Bot.: A genus of Cactaceae, the typical one of the family Echinocactidae (q. v.). The stem is an ovate or spheroidal form with many ribs, each having at intervals spiny stars. These are the rudiments of leaves, and from the midst of them come the flowers. Above thirty species are known, chiefly from the West Indies and Mexico. They are called Hedgehog Thistles. They have often beautiful flowers.

ĕ-chĭ-nŏ-cĕr'-ĕ-ŭs, s. [Gr. *echinos*=a hedgehog, and Mod. Lat. *cereus* (q. v.).]

Bot.: A genus of Cactaceae, akin to *Cereus*, but with short instead of very long flowers. About thirty species are known; they are from Mexico and Texas.

ĕ-chĭ-nŏ-chĭŏ'-ĕ, s. [Gr. *echinos*=a hedgehog, and *chloa*, or *chloē*=the first light-green shoot of a plant, especially of a grass in spring.]

Bot.: A sub-genus of Panicum, or of Digitaria, having the spikelets in racemes or panicles, and the flowing glumes, awned, or pointed. *Panicum* (*Echinochloa*) *Crux-galli* is naturalized in fields and waste places. It is distributed over all temperate and tropical regions. (*Sir Joseph Hooker*.)

ĕ-chĭ-nŏ-cŏc'-cŭs (pl. ĕ-chĭ-nŏ-cŏc'-ġl), s. [Gr. *echinos*=the urchin, the hedgehog, and *kokkos*=a kernel, a berry. So named from the coronet or cylinder of spines which surrounds their mouth.]

Zool.: A pseudo genus of Entozoa (Intestinal worms), now ascertained to have been founded not on mature animals, but on scolices of those only partially developed. As limited by Professor Owen, the name echinococcus was given to a cyst resembling the accephalocyst, when, in addition to the sero-albuminous fluid, it contained a number of microscopic organized beings floating or freely swimming in it, or adhering by special prehensile organs to its internal surface. The echinococcus is the head of a tœnia appended to a small cyst. The *Echinococcus hominis* (now called *E. veterinorum*) was found in the urinary bladder, and another in the liver of human beings; they are the scolex state of *Tœnia echinococcus*, one of the tapeworms in the mature state infesting the dog. They are commonly called hydatids. Hence Professor Huxley defines the echinococcus as technically being "the wandered scolex of *Tœnia echinococcus* in its hydatid form, with deuto-scolices, or daughter-cysts, formed by gemmation." The cysts of echinococci, from which the latter have disappeared, or in which they have never been properly developed, are termed accephalocysts. [ACEPHALOCYST.]

ĕ-chĭ-nŏ-cŏ-nĭ-dæ, s. pl. [Gr. *echinos*= . . . a sea-urchin; *kōnos*=a cone, and *ēidos*=form.]

Palæont.: A family of Regular Echinoids, found in the Oolitic and Cretaceous rocks.

ĕ-chĭ-nŏ-cŏr'-ĭ-dæ, s. pl. [Gr. *echinos*= . . . a sea-urchin, *koros*=a boy, a scion, and *ēidos*=form; (?) or from Lat. *echinus*, and *cor*=heart, with Gr. *ēidos*=form, from the cordate form of the test.]

Palæont.: Wright's name for the Anarchytidæ, a family of Irregular Echinoids, occurring chiefly in the Cretaceous rocks.

ĕ-chĭ-nŏ-dĕrm, a. & s. [Gr. *echinos*=a hedgehog, and *derma*=skin.]

A. As adj.: Having a prickly skin; pertaining to the Echinodermata (q. v.).

"These echinoderm larvæ."—Huxley: *Classif. of Animals* (1869), p. 44.

B. As substantive:

1. *Sing.*: A member of the zoological class Echinodermata (q. v.).

"The adult Echinoderm presents a calcareous framework."—Huxley: *Classif. of Animals* (1869), p. 46.

2. *Pl.*: The English name for the Echinodermata (q. v.).

bŏll, bŏy; pŏut, jŏwĭ; cat, ġell, chorus, ġhin, bench; go, ġem; thin, tĭis; sin, aŷ; expect, Xenophon, exĭst. ph = f. -cian, -tian = ŷan. -tion, -sion = ŷŭn; -tĭon, -ŷion = ŷhŭn. -tious, -clous, -sious = ŷhŭs. -ble, -dle, &c. = bĕl, dĕl.

ĕ-chi-nô-dêr-ma, s. [ECHINODERM.]

Zoöl.: The name given by Prof. Owen to what are now generally called the Echinodermata (q. v.).

ĕ-chi-nô-dêr-mal, a. [Eng. echinoderm (q. v.); -al.]

Zoöl.: Pertaining to the Echinodermata.

"The harder, spine-clad, or echinoderm species."—Owen: *Invert. Anim.* (1843), Lect. x., p. 113.

ĕ-chi-nô-dêr-ma-ta, s. pl. [Gr. *echinos*=a hedgehog, and *derma, pl. dermata*=the skin.]

1. Zoöl.: Echinoderms, a class of animals established by Cuvier, and placed as the highest of his sub-kingdom Radiata. Prof. Huxley places them along with Scolelecia, temporarily as a primary sub-kingdom intermediate between the Annulosa and the Infusoria. They are more or less radiated, though not so much as the Medusae. While in the larva state there is a tendency to bilateral symmetry, as in insects. Some mature animals, as the Spatangus, have it also. They have a strange metamorphosis, commencing life as free swimming animals, from which after a time the mature form buds forth. They have a leathery integument, often covered with calcareous plates, often taking the form of spines, hence the name Echinoderms. Their skin is perforated with many minute holes, whence hollow tubes or tentacles are protruded for purposes of locomotion. The class Echinodermata is divided into seven orders: Echinoidea, Asteroidea, Ophiuroidea, Crinoidea, Cystoidea, Blastoidea, and Holothuroidea (q. v.).

2. Palæont.: The Echinodermata commenced, as far as is at present known, when the Upper Cambrian rocks were being deposited, and have never since become extinct.

ĕ-chi-nô-dê-a, ĩ-chi-ni-dê-a, ĕ-chi-ni-dê-a, s. pl. [Gr. *echinos*=... a sea-urchin, and *eidos*=form, appearance.]

1. Zoöl.: An order of Echinodermata. The body, which is of subglobose or discoidal shape, is inclosed in a test or shell, composed of calcareous plates. There is a distinct anus. The sexes are distinct, and the larvæ are pluteiform. The order contains the Sea-urchins. They are divided into the following families:

(1) Endocyclia (Regular Echinoids). Families: Cidaridae, Hemidaridae, Diademidae, Echinidae, and Saleniidae.

(2) Exocyclia (Irregular Echinoids). Families: Echinoidea, Collyritidae, Echinonidae, Echinobrisidae, Echinolampadæ, Clypeastridae, Ananchytidae, and Spatangidae.

(3) Aberrant or Transition Echinoids. Families: Echinothuridae and Perischochinidae.

2. Palæont.: For the geological distribution of the Echinoids, see the several families. (Nicholson.)

ĕ-chi-nô-lâm-pa-dæ, s. pl. [Mod. Lat. *echinolampa*(s), and Lat. fem. pl. adj. suff. -dæ.]

1. Zoöl.: A family of Irregular Echinoids.

2. Palæont.: The family ranges from Oolitic times till now.

ĕ-chi-nô-lâm-pas, s. [Gr. *echinos*=... a sea-urchin, and *lampas*=a torch.]

1. Zoöl.: A genus of Echinoids, the typical one of the family Echinolampadæ (q. v.).

2. Palæont.: Range, from Tertiary times till now.

ĕ-chi-nô-nô-ūs, s. [Gr. *echinos*=... a sea-urchin, and *neos*=new (?).]

Zoöl.: A genus of Echinoids.

ĕ-chi-nôn-i-dæ, s. pl. [Mod. Lat. *echinon(eus)*, and Lat. fem. pl. adj. suff. -idæ.]

Zoöl. & Palæont.: A family of Irregular Echinoids, the only fossil genus of which (*Pyrina*) is of Cretaceous age.

ĕ-chi-nô-pæ-di-ūm, s. [Gr. *echinos*=... a sea-urchin, and *paideia*=the rearing of a child.]

Zoöl. & Physiol.: The embryo and larvæ of the Echinodermata.

ĕ-chi-nôph-ōr-a, s. [Lat. *echinophora*; Gr. *echinophora*=a kind of shell, from *echinos* [ECHINUS], and *phoros*=bearing, carrying.]

Bot.: Prickly Samphire, a genus of Umbelliferæ, family Smynridæ. The fruit is ovate, lodged in a prickly receptacle, with a prickly involucre.

ĕ-chi-nôps, s. [Gr. *echinos*=a hedgehog, ... a sea-urchin, and *ops, or ops*=the eye, the face, the countenance.]

Bot.: A genus of composite plants, the typical one of the sub-order Cynareæ (q. v.). They have single-flowered heads, arranged in dense round clusters at the ends of the branches, so as to look like one great composite flower. They occur in Asia Minor, the South of Europe, India, &c.

ĕ-chi-nôps-id-ē-a, s. pl. [Mod. Lat. *echinops* (q. v.), and Lat. fem. pl. adj. suff. -idæe.]

Bot.: A sub-tribe of composite plants, tribe Cynareæ.

ĕ-chi-nô-rhŭn'-chūs, s. [Gr. *echinos*=a hedgehog, and *rhynghos*=a snout, a muzzle.]

Zoöl.: A genus of Entozoa which contains the most noxious of the intestinal parasites, but happily none of them infest man. The largest species (*Echinorhynchus gigas*) is found in the intestines of the hog. Many others, not a few of them microscopic, are found in the intestinal canal of fishes.

ĕ-chi-nô-spēr'-mūm, s. [Gr. *echino*(s)=a hedgehog, and *sperma*=seed.]

Bot.: A genus of Boraginaceæ, tribe Cynoglossæ. The tube of the corolla is straight; the calyx is equally divided, terete; the nuts triquetrous; their margins mucronated. *Echinosperrum Lappula* and *E. deflexum* have been found in England, but they were brought from the Continent in ballast.

ĕ-chi-nô-thūr'-ī-a, s. [Gr. *echinos*=... a sea-urchin, and *thura*=a door.]

Zoöl.: A genus of Echinoids, the typical one of the family Echinothuridae.

ĕ-chi-nô-thūr'-ī-dæ, s. pl. [Mod. Lat. *echinothur*(ia), and fem. pl. adj. suff. -idæe.]

1. Zoöl.: A family of Echinoids, with regular tests, but with the plates so overlapping each other as to render the whole structure flexible.

2. Palæont.: Its range is from Cretaceous times till now.

ĕ-chi-nô-zō'-a, s. pl. [Gr. *echinos*=a hedgehog, a sea-urchin, and *zōon*=a living creature.]

Zoöl.: The name given by Prof. Allman to the sub-kingdom of animals, called by Prof. Huxley Annuloida.

ĕ-chi-n'-u-lāte, a. [Mod. Lat. dimin. of Class. Lat. *echinatus*=set with prickles, prickly.]

Zoöl.: Possessing small spines.

ĕ-chi-nūs, s. [In Fr. (arch.) *échine*; Lat. *echinus*, from Gr. *echinos*=(1) a hedgehog, or urchin, (2) a sea-urchin. In arch. see below.]

I. Ordinary Language:

1. A hedgehog.

2. In the same sense as II. 1.

II. Technically:

1. Zoöl.: A genus of Regular Echinoids, the typical one of the family Echinidae (q. v.). They are shaped something like an orange, with two opposite orifices, connected by rows of little holes or bands approximated by pairs, and resembling the meridians of longitude on a terrestrial globe. They are covered with spines and tubercles. The mouth, which is not the superior, but the inferior orifice, has five teeth. The genus comprises the sea-urchins. [SEA-URCHIN.]

2. Bot.: The prickly head-cover of the seed or top of any plant. (Johnson.)

3. Arch.: A member of the Doric capital; so called from its resemblance to the echinus or large vase, in which drinking-cups were washed.

ĕch-i-ūm, s. [Gr. *echion*=a plant, the *Echium rubrum*, from *echis*=the viper, the adder, because it was supposed to cure the bite of that venomous reptile. This explanation has, however, been disputed.]

Bot.: *Vipers' bugloss*, a genus of Boraginaceæ, the typical one of the tribe Echiæ. The corolla is irregular, with a dilated throat which is open and naked, the filaments are long and unequal; the style is bifid, the achenes wrinkled. *Echium vulgare* is the Vipers' bugloss or common Echium. [BUG-LOSS.] *E. violaceum* or *plantagineum*, the Purple-flowered Bugloss or Purple Echium.

ĕch'-ō, ĕc'-co, s. [Lat. from Gr. *ēchō*, from *ēchē*, *ēchos*=a ringing in the ears; *ēchēō*=to sound; allied to Lat. *vox*=a voice.]

I. Ordinary Language:

1. Literally:

(1) In the same sense as II. 1.

"This miraculous rebounding of the voice the Greeks have a pretty name for, and call it *echo*."—P. Holland: *Plinie*, bk. xxxvi., ch. xv.

(2) The sound returned.

"Babbling echo mocks the hounds."
Shakespeare: *Titus Andronicus*, II. 3.

2. Figuratively:

(1) A faint reproduction, copy, or imitation; close imitation in words or sentiment.

(2) A mental answer or reply.
"Hark! to the hurried question of Despair:
'Where is my child?'—and Echo answers—
'Where?'"
Byron: *Bride of Abydos*, II. 27.

II. Technically:

1. Acoustics: The repetition of a sound in the air, caused by its being reflected from some obstacle. A very sharp, quick sound can produce an echo when the reflecting surface is 55 feet distant. At 112½ feet off monosyllables can be reflected; at twice that distance dissyllables; at three times as far off trisyllables, and so on for greater distances. (Ganot.)

2. Arch.: A vault or arch for redoubling sounds.

3. Music:

(1) In old organ music the use of this term signified that a passage so marked was to be played upon the echo-organ, a set of pipes inclosed in a box, by which a soft and distant effect was produced, incapable, however, of so great expression as that obtained by the use of the swell, which is an improvement upon the echo-organ.

(2) The echo-stop upon a harpsichord was a contrivance for obtaining a soft and distant effect. (Stainer & Barrett.)

4. Class. Myth.: A nymph, daughter of Aër and Tellus. She was one of Juno's attendants, but her loquacity having displeased Jupiter, of whose amours she had become cognizant, she was deprived of the power of speech by Juno, and only permitted to answer questions. She fell in love with Narcissus, and her love being slighted, she pined away, and was changed into a stone, which still retained the power of voice.

5. Astron.: An asteroid, the 62d found. It was discovered by Ferguson, on Sept. 15, 1860.

¶ Multiple echo:

Acoustics: An echo which repeats the sound many times. This can be done when there are two parallel walls in succession. In favorable circumstances the sound is repeated twenty or thirty times. (Ganot.)

ĕch'-ō, v. i. & t. [ECHO, s.]

A. Intransitive:

1. To resound; to give a repercussion of a sound. **To be resounded back.**

"Her mired prices hear the echoing noise,
And, Albion, dread thy wrath and awful voice."
Blackmore.

3. To produce or give out a sound which reverberates, to resound.

B. Transitive:

1. Lit.: To return or send back a voice or sound.

"One great death deforms the dreary ground;
The echoed woes from distant rocks resound."
Prior: *Solomon*, II.

2. Fig.: To repeat with assent; to imitate closely in words or sentiments.

"Our separatists do but echo the same note."—More: *Decay of Piety*.

ĕch'-ōed, pa. par. or a. [ECHO, v.]

***ĕch'-ō-īc-al, *ĕch'-ō-īc-all, a.** [Eng. *echo*; -ical.] Having the nature of an echo.

"An echoical verse, wherein the sound of the last syllable doth agree with the last save one: as in an echo."—Nomenclator. (Nares.)

ĕch'-ō-ēr, s. [Eng. *echo*; -er.] One who or that which gives back an echo.

"Those servile echoes of aught but truth."—Mathias: *Pursuits of Literature*.

ĕch'-ō-lūg, pr. par., a. & s. [ECHO, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The repercussion or sending back of a sound; an echo.

"And hark! again—again it rings;
Near and more near its echoings."
Moore: *Fire Worshipers*.

ĕ'-chō-lēss, a. [Eng. *echo*; -less.] Without any echo or response.

"And then is jealous lest the sky
Should have a listener, nor will sigh
Until its voice is echoes'less."
Byron: *Prometheus*.

ĕ-chōm'-ē-tēr, s. [Gr. *ēchō*=a sound, an echo, and *metron*=a measure.]

Music: A scale or rule marked with lines which serve to indicate the duration of sounds, and to ascertain their intervals and ratios.

ĕ-chōm'-ē-trŭ, s. [Eng. *echometer*; -y.]

1. Arch.: The art or science of constructing vaults so as to produce echoes.

2. Music: The art, science, or act of measuring the duration of sounds.

***ĕ-clāir'-çise, v. t.** [Fr. *éclaircir*, from *clair*=clear.] To make clear or plain; to explain, to demonstrate, to clear up.

***ĕ-clāir'-çised, pa. par. or a.** [ECLAIRCISE.]

ĕ-clāir'-çisse-mēt (ment as mah), s. [Fr.] An explanation or clearing up of anything not before understood.

"The eclaireissement ended in the discovery of the infomer."—Clarendon.

ĕ-clāmp'-sŭ, ĕ-clāmp'-sī-a, s. [Fr. *éclampsie*, from Gr. *eklampis*=a shining out or forth; *eklampō*=to shine out or forth; *ek*=out, and *lampō*=to shine.]

Med.: A fancied perception of flashes of light, a symptom of epilepsy; hence, epilepsy itself.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wōlf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fūll; trŭ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

é-clat (*t* silent), *s.* [Fr. *éclat* = a splinter, a noise . . . splendor, magnificence, from *éclater* = to burst forth; O. Fr. *esclater* = to shine: *es* = Lat. *ex* = out, and a form (*skleitan*?) of O. H. Ger. *schlitzan*, *slitzan* = to slit, to split, whence Ger. *schleissen*. (*Skeat*.)]

1. A bursting forth, as of applause or acclamation; hence, acclamation, applause.

2. Brilliance of success; luster, splendor of effect.

"Cæsar . . . by the éclat of his victories seemed to rival the fame of Pompey himself."—*Middleton: Life of Cicero*.

3. Renown, glory, luster.

"The éclat it gave was enough to turn the head of a man less presumptuous than Egmont."—*Prescott*.

éc-léc'-tic, ***é-cléc'-tick**, *a. & s.* [Gr. *eklektikos* = selecting; *eklegō* = to select, to pick out: *ek* = out, and *legō* = to select; Fr. *éclétique*.]

A. As adjective:

I. Ordinary Language:

1. Selecting, choosing, picking out at will from the doctrines, teachings, &c., of others; not following or adopting the leading of others.

2. Containing or consisting of selections from the works of others; as, an *eclectic* magazine.

II. Phil.: A term applied to a sect of philosophers who professed that truth was the one object of their inquiries, and who, therefore, did not attach themselves to any particular sect or leader, but extracted and adopted for themselves from the teachings and principles of various sects that which they considered best. They sprung up about the close of the second century.

"Cicero was of the *eclectic* sect, and chose out of each such positions as came nearest truth."—*Watts: On the Mind*.

B. As substantive:

1. An eclectic philosopher; a supporter of eclectic philosophy.

"Sometimes a Stoic, sometimes an *Eclectic*, as his present humor leads him."—*Dryden: Origin and Progress of Satire*.

2. A Christian who believed the doctrine of Plato concerning God, the human soul, &c., conformable to the spirit and genius of the Gospel. One of the principal patrons of this system was Ammonius Saccas, who laid the foundation of that sect afterward distinguished by the name of the New Platonists, in the Alexandrine School.

éc-léc'-ti-cal-ly, *adv.* [Eng. *eclectic*; -ly.] After the manner of eclectic philosophers; by way of selection and choosing.

éc-léc'-ti-cism, *s.* [Eng. *eclectic*; -ism.] The system, doctrine, or practice of the eclectic philosophers.

***éc-lègm'** (*g* silent), *s.* [Lat. *eclegma*, from Gr. *ekleigma* = an electuary: *ek* = out, and *leichō* = to lick.]

Med.: A medicine made up by the incorporation of oils with syrups.

é-clip-sár'-è-ôn, *s.* [ECLIPSE, *s.*] An apparatus for explaining the phenomena of eclipses.

é-clip-se, *s.* [Fr., from Lat. *eclipsis*, from Gr. *ekleipsis* = a failure, from *ekleipō* = to fail, to be eclipsed; *ek* = out, and *leipō* = to leave.] [CLIPS.]

I. Ordinary Language:

1. *Lit.*: In the same sense as II.

2. *Figuratively*:

(1) Darkness, obscuration.

(2) A temporary failure or obscuration.

"All the posterity of our first parents suffered a perpetual eclipse of spiritual life."—*Raleigh: Hist. of the World*.

II. Astron.:

1. *Astron.*: The obscuration, total or partial, and not simply by clouds, of the light coming to us from a heavenly body. If that body shines by its own light, the only astronomical cause which can interfere with its luster is the passage of another body between it and the observer's eye. If only by reflected light, it can be obscured also by the intervention of a body between it and the source of the light which it reflects.

(1) *Of the Sun*: The passage of the moon, or even the transit of an inferior planet, Venus or Mars, over the sun's disc between the luminary and the observer's eye. [TRANSIT.] An eclipse of the sun can occur only at new moon. The reason is obvious. To produce it the sun, the moon, and the earth must be in a straight line, the moon being in the center. They are so nearly in line every time the moon is new, that on each of those occasions we come almost to the brink of a solar eclipse. An eclipse of the sun may be partial or total. In the latter case the whole disc of the sun may be for a brief period obscured by the passage over it of the moon. Or, it may be annular, i. e., the moon, the center of which at the time is exactly over that of the sun, while her circumference is smaller, leaves

nothing visible of the greater luminary except a narrow ring of light around the dark shadow of the intervening body. [ANNULAR.]

(2) *Of the Moon*: An obscuration of the moon's light produced by the passage of the earth's shadow over the surface of its satellite. This can occur only at full moon, for to constitute it the sun, the earth, and the moon must be in a straight line, which they so nearly are every time the moon is full as to bring us on all such occasions to the brink of a lunar eclipse.

(3) The very partial eclipse of a planet by some one of its moons passing over the disk of the greater body.

¶ (1) The eclipse of a star by the moon or by a planet is called an *Occultation* (q. v.).

(2) Eclipses of the sun or moon can be calculated backward for any number of centuries, and they therefore constitute a method of verifying ancient dates.

eclipse-speeder, *s.*

Cotton, &c.: A form of spinning-machine.

é-clip'se, *v. t. & i.* [ECLIPSE, *s.*]

A. Transitive:

I. Lit.: To cause an eclipse or temporary obscuration of a heavenly body; to darken or hide.

"The moon sometimes was eclipsed twice in five monethes."—*P. Holland: Pliny*, bk. ii., ep. ix.

II. Figuratively:

*1. To hide, to darken, to cover, to veil.

"He descended from his Father, and eclipsed the glory of his divine majesty with a veil of flesh."—*Camel: Sermons*.

2. To obscure; to throw into obscurity or into the shade.

"The straw, the manger, and the moldering wall,
Eclipse its luster."—*Cooper: Nativity*.

*3. To disgrace, to degrade, to throw into the background.

"She told the king that her husband was eclipsed in Ireland, by the no-countenance his majesty had showed toward him."—*Clarendon*.

*4. To extinguish.

"Then here I take my leave of thee, fair son,
Born to eclipse thy life this afternoon."
—*Shakespeare: Henry VI., Pt. I., iv. 5.*

5. To surpass or excel so as to throw into the background.

*B. *Intrans.*: To suffer an eclipse; to be eclipsed.

"The laboring moon
Eclipses at their charms."—*Milton: P. L., ii. 665, 666.*

¶ Crabb thus discriminates between *to eclipse* and *to obscure*: "In the natural as well as the moral application *eclipse* is taken in a particular and relative signification; *obscure* is used in a general sense. Heavenly bodies are *eclipsed* by the intervention of other bodies between them and the beholder; things are in general *obscured* which are in any way rendered less striking or visible. *To eclipse* is therefore a species of *obscuring*: that is always *obscured* which is *eclipsed*; but everything is not *eclipsed* which is *obscured*. So figuratively real merit is *eclipsed* by the intervention of superior merit; it is often *obscured* by an ungracious exterior in the possessor, or by the unfortunate circumstances of his life." (*Crabb: Eng. Synon.*)

é-clip'sed, *pa. par. or a.* [ECLIPSE, *v.*]

é-clip's-ing, *pr. par., a. & s.* [ECLIPSE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As substantive:

1. *Lit.*: The act or process of darkening by an eclipse; the state of becoming or being eclipsed.

2. *Fig.*: The act of overshadowing, obscuring, or throwing into the shade or background.

é-clip'-ta, *s.* [Gr. *ekleiptō* = to leave out, because the seed crown and ovary are wanting.]

Bot.: A genus of Asteraceæ, sub-tribe *Eclipteæ*, of which latter it is the type. They are found in various parts of the tropics. The Brazilian women stain their hair black by means of *Eclipta erecta*.

é-clip'-tè-œ, *s. pl.* [Mod. Lat. *eclipt(a)*, and Lat. fem. pl. adj. suff. -œ.]

Bot.: A sub-tribe of composite plants, tribe *Asteroidæ*.

é-clip'-tic, *a. & é-clip'-tick*, *a. & s.* [Sw. *ekliptikan*; Dan. *ekliptiken*; Ger. *ekliptik*; Fr. *écliptique*; Prov. *écliptic*; Sp. *écliptica*; Port. *écliptica*, *s.*, *écliptico*, *a.*; Ital. *eclettica*; Lat. *écliptica* (linea), all from Gr. *ekleiptikos* = of or caused by an eclipse. [ECLIPSE.] So named because the moon must be in or near the ecliptic when an eclipse takes place.]

A. As adj.: Constituting the sun's path.

"Annual along the bright ecliptic road,
In world-rejoicing state it moves sublime."
—*Thomson: Summer*, 115, 116.

B. As substantive:

Astron.: The apparent path of the sun through the sky. As his bright rays prevent the stars from being visible in the daytime, an observer cannot, with the naked eye, see the sun actually passing over certain constellations. But astronomers have noted the exact time before or after the sun that each star comes to the meridian, and at what altitude. Thus the exact path of the sun can be traced relatively to the fixed stars. It constitutes a great circle of the heavens, inclined to the equator, supposed to be produced to the sky at an angle of about 23° 28', but continually varying within narrow limits. As the ecliptic does not coincide with the celestial equator, one half of it must be north and the other south of it. The spots at which the two great circles intersect are the first point of Aries and the first point of Libra, the former at the vernal and the latter at the autumnal equinox. [EQUINOX.] Were there an observer in the sun he would see the earth traverse the same constellations which the sun seems to us to do. The Ecliptic is divided into twelve parts, each constituting a "sign of the Zodiac." [ZODIAC.]

"Down from the ecliptic sped with hoped success."
—*Milton: P. L., iii. 740.*

éc-lôgue, ***ag-lôgue**, *s.* [Lat. *ecloga*, from Gr. *eklogē* = a selection: *ek* = out, and *legō* = to select. Fr. *éclogue*.] A pastoral poem, in which shepherds are introduced conversing with each other, as those of Theocritus or Virgil; an idyl; a bucolic.

"An *eclogue* or a lampoon written by a Highland chief was a literary portent."—*Macaulay: Hist. Eng.*, ch. xiii.

éc-lý-sis, *s.* [Gr. *eklysis* = (1) a release, (2) a lowering of the voice through three quarter-tones.]

Music: The flattening of sounds to adapt them to a change of keynote.

éc-ô-nôm'-y-cal, **é-cô-nôm'-y-cal**, **éc-ô-nôm'-ic**, ***ec-o-nom-ique**, ***ec-o-nom-ic**, ***ec-o-nom-i-cal**, *a. & s.* [Lat. *economicus*, from Gr. *oikonomikos*, from *oikonomia* = economy (q. v.); Fr. *économique*.]

A. As adj. (of all forms):

1. Relating or pertaining to the management of a house or household.

"In *economical* affairs, having proposed the government of a family, we consider the proper means to effect it."—*Watts*.

*2. *Regulative*.

"Part of the power given unto Christ as man being purely *economical*."—*Greece: Cosmologia Sacra*, 152.

*3. *Family, domestic*:

"In this *economical* misfortune."—*Milton: Doctrine of Divorce*.

4. Managing household or domestic matters with care and frugality; frugal, careful; not wasteful or extravagant.

"Too *economical* in taste
Their sorrow or their joy to waste."
—*Lloyd: The Poet*.

5. Managed or handled with care and frugality; as, an *economical* use of money or time.

6. Relating to the science of economics, or to the resources of a country.

B. As subst. (pl.): [ECONOMICS.]

¶ Crabb thus discriminates between *economical*, *saving*, *sparing*, *thrifty*, *penurious*, and *niggardly*: "*Saving* is keeping and laying by with care; *sparing* is keeping out of that which ought to be spent; *thrifty* or *thriving* is accumulating by means of *saving*; *penurious* is suffering as from *penury* by means of *saving*; *niggardly*, after the manner of a niggard, nigh, or close person, is not spending or letting go, but in the smallest possible quantities. To be *economical* is a virtue in those who have but narrow means; all the other epithets however are employed in a sense more or less covetous; he who is *saving* when young, will be covetous when old; he who is *sparing* will generally be *sparing* out of the efforts of others; he who is *thrifty* commonly adds the desire of getting with that of *saving*; he who is *penurious* wants nothing to make him a complete miser; he who is *niggardly* in his dealings will be mostly avaricious in his character." (*Crabb: Eng. Synon.*)

Economical method of disputation:
Ancient Logic: A method of disputation which trusted to artifice and careful management rather than to the truth of the arguments adduced.

economic-quantities, *s. pl.*

Polit. Econ.: A technical term for the different orders or kinds of wealth, as money, labor, credit, and the various objects which fall under either of those heads or types. Thus, Money is taken as a type of all the material things which constitute wealth; as, money, properly so called, land, houses, animals, corn, fruit, timber, metals, &c. Labor is the type of services of every kind, as those of the artisan, plowman, lawyer, physician, &c. Credit,

bôll, bôy; pout, jowl; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bəl, dəl.

which is of itself merely a right of action, is the type of rights of all sorts, as the right to annuities, dividends, rents, copyrights, patent-rights, reversions, advowsons, &c. All these things are wealth, because they are exchangeable quantities; in other words, because they can be bought and sold. (*Bithell.*)

éc-ô-nôm'-i-cal-ly, *adv.* [Eng. *economical*; *ly.*] In an economical manner; with economy or frugality.

éc-ô-nôm'-ics, ***ec-o-nom-icks**, ***ec-o-nom-icks**, *s.* [ECONOMIC, *a.*]

1. The science of the management of a household or domestic concerns.

"The best authors have chosen rather to handle education in their politics than in their *economics*."—*Wotton: Of Education.*

2. That branch of political economy which treats of exchangeable things, and of the laws which regulate their exchange.

é-con-ô-mist, ***ec-con-o-mist**, *s.* [Fr. *économiste*.]

1. One who manages household or other affairs with economy; one who exercises economy.

"One that will prove a great husband and a good *économist*."—*Bowen: Letters*, bk. i., ser. ii., lett. 17.

2. One who is skilled in the science of economics or political economy.

"David Hume, undoubtedly one of the most profound political economists of his time, declared that our madness had exceeded the madness of the Crusaders."—*Macaulay: Hist. Eng.*, ch. xix.

***é-con-ô-miz-â-tion**, *s.* [Eng. *economiz(e); -ation*.] The act, practice, or habit of economizing; economy, frugality, saving.

é-con-ô-mize, **ec-con-ô-mize**, *v. i. & t.* [Fr. *économiser*.]

A. Intransitive:

*1. To manage affairs; to arrange.

"[Men] under tyranny and servitude are wanting that power which is the root and source of all liberty, to dispose and *economize* in the land which God has given them."—*Milton: Tenure of Kings and Magistrates*, p. 41.

2. To act or manage domestic or pecuniary affairs with economy; to be economical, frugal, or prudent.

"He does not know how to *economize*."—*Smart.*

B. Trans.: To use, administer, or expend with economy or frugality.

"To manage and *economize* the use of circulating medium."—*Walsh.*

é-con-ô-mized, *pa. par. or a.* [ECONOMIZE.]

é-con-ô-miz-ing, *pr. par., a. & s.* [ECONOMIZE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act, practice, or habit of managing affairs with economy.

é-con-ô-mý, ***ec-con-o-my**, *s.* [O. Fr. *oeconomie*, from Lat. *oeconomia*, from Gr. *oikonomia*=the management of a household; *oikos*=a house, and *nomos*=a law or rule; *nomō*=to deal out.]

1. The management, regulation, and government of a household or household affairs.

"By St. Paul's *economy* the heir differs nothing from a servant, while he is in his minority."—*Taylor: Holy Living*.

2. A frugal and judicious use or expenditure of money; frugality, discretion, and care in expenditure.

"The Scriptures, in a thousand places, praise *economy*."—*Goldsmith: Bee*, No. 5.

3. A careful and judicious use of anything; as, of time.

4. The disposition, arrangement, or plan of any work.

"If this *economy* must be observed in the minutest parts of an epic poem, what soul . . . can be sufficient to inform the body of so great a work?"—*Dryden: Æneid* (Dedic.).

5. The operations of nature in the generation, nutrition, and preservation of animals and plants; the regular, harmonious system under which the functions of living animals and plants are performed.

6. The regulation, administration, or system of government of the internal affairs of a state, nation, or department.

7. A system of matter; a distribution of everything, active or passive, to its proper place.

"These the strainers aid,
That by a constant separation made
They may a due *economy* maintain."
Blackmore: *Creation*.

¶ (1) Crabb thus discriminates between *economy*, *frugality*, and *parsimony*: "*Economy* implies management; *frugality* implies temperance; *parsimony* implies simply forbearance to spend, which is, in fact, the common idea included in these

terms: but the *economical* man spares expense according to circumstances; he adapts his expenditure to his means, and renders it by contrivance as effectual to his purpose as possible: the *frugal* man spares expense on himself or on his indulgences; he may however be liberal to others while he is *frugal* toward himself; the *parsimonious* man saves from himself as well as others; he has no other object than saving. By *economy*, a man may make a limited income turn to the best account for himself and his family; by *frugality* he may with a limited income be enabled to do much good to others; by *parsimony* he may be enabled to accumulate great sums out of a narrow income: hence it is that we recommend a plan for being *economical*; we recommend a diet for being *frugal*; we condemn a habit or a character for being *parsimonious*."

(2) He thus discriminates between *economy*, and *management*: "*Economy* has a more comprehensive meaning than *management*; for it includes the system of science and of legislation as well as that of domestic arrangements; as the *economy* of agriculture; the internal *economy* of a government; political, civil, or religious *economy*; or the *economy* of one's household. *Management*, on the contrary, is an action that is seldom abstracted from its agent, and is always taken in a partial sense, namely, as a part of *economy*. The internal *economy* of a family depends principally on the prudent management of the female: the *economy* of every well-regulated community requires that all the members should keep their station, and preserve a strict subordination; the management of particular branches of this *economy* should belong to particular individuals." (*Crabb: Eng. Synon.*)

¶ (1) *Domestic Economy*: [DOMESTIC.]

(2) *Political Economy*: [POLITICAL.]

é-côn-vér-sô, *phr.* [Lat.] On the contrary; on the other hand.

êcs-tâ-sled, *a.* [Eng. *ecstasy*; *-ed*.] Filled with ecstasy or enthusiasm; ravished, entranced.

"These are as common to the inanimate things as to the most *ecstasied* soul upon earth."—*Norris.*

êcs-tâ-sý, ***ecs-tâ-sie**, *s.* [Low Lat. *ecstasis*=a trance; Gr. *ekstasis*=(1) a displacement, (2) a trance: *ek=*out, *stâ-*, root of *histēmi*=place; O. Fr. *ecstase*; Fr. *extase*.]

I. Ordinary Language:

1. A state in which the mind is, as it were, carried away from the body, or in which the ordinary functions of the senses are temporarily suspended by the contemplation of some extraordinary or supernatural object or occurrence; a trance.

"Whether what we call *ecstasy* be not dreaming with our eyes open, I leave to be examined."—*Locke.*

2. A state in which the passions are excited to a high degree and the thoughts absorbed; as,

(1) A state of excessive joy, rapture, or delight.

"An *ecstasy* that mothers only feel
Plays round my heart."
A. Phillips: *Distrest Mother*, v. 1.

(2) A state of excessive grief, distress, or anxiety.

"Better be with the dead
Than on the torture of the mind to lie
In restless *ecstasy*." *Shakesp.: Macbeth*, iii. 2.

(3) A state of enthusiasm.

"He on the tender grass
Would sit, and hearken even to *ecstasy*."
Milton: *Comus*, 624, 625.

*3. Madness, distraction.

"Blasted with *ecstasy*."—*Shakesp.: Hamlet*, iii. 1.

II. Med.: A species of catalepsy, in which the patient remembers, after the paroxysm is over, the ideas he has had during the fit; a trance.

¶ Crabb thus discriminates between *ecstasy*, *rapture*, and *transport*: "There is a strong resemblance in the meaning and application of these words. They all express an extraordinary elevation of the spirits, or an excessive tension of the mind. The *ecstasy* marks a passive state, from the Greek *ekstasis* and *existēmi*=to stand, or be out of one's self, out of one's mind. The *rapture*, from the Latin *rapio*, to seize or carry away, and *transport*, from *trans* and *porto*, to carry beyond one's self, rather designate an active state, a violent impulse with which it hurries itself forward. An *ecstasy* and *rapture* are always pleasurable, or arise from pleasurable causes; *transport* respects either pleasurable or painful feelings; joy occasions *ecstasies* or *raptures*; joy and anger have their *transports*. An *ecstasy* benumbs the faculties; it will take away the power of speech and often of thought; it is commonly occasioned by sudden and unexpected events; *rapture*, on the other hand, often invigorates the powers, and calls them into action; it frequently arises from deep thought; the former is common to all persons of ardent feelings, but more particularly to children, ignorant people, or to such as have not their feelings under control; *rapture*, on the contrary, is applicable to persons with superior minds, to circumstances of peculiar importance. *Transports* are but sudden bursts of passion, which generally lead to intemperate actions and are seldom indulged, even on joyous occasions, except by the volatile and passionate. A reprieve from the sentence of death will produce an *ecstasy* of delight in the pardoned criminal; religious contemplation is calculated to produce holy *raptures* in a mind strongly imbued with pious zeal; in *transports* of rage men have committed enormities which have cost them bitter tears of repentance ever after." (*Crabb: Eng. Synon.*)

***êcs-tâ-sý**, *v. t.* [ECSTASY, *s.*] To fill as with an ecstasy of rapture, delight, or enthusiasm.

"They were so *ecstasied* with joy that they made the heavens ring with triumphant shouts and acclamations."—*Scott: Christian Life*, l. iv. § 5.

êcs-tât'-ic, ***êcs-tât'-ick**, ***êcs-tât'-i-cal**, *a.* [Gr. *ekstatiskos*, from *ekstasis*=ecstasy (q. v.).]

1. Pertaining to or accompanied by ecstasy; ravishing, entrancing, rapturous.

"One grasps a Cæcrop in *ecstasied* dreams."
Pope: *Moral Essays*, v. 40.

2. Of the nature of ecstasy; ravished, entranced.

"In pensive trance, and anguish, and *ecstasie* fits,"
Milton: *Ode on the Passion*.

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sire, sîr, marine; gô, pôl, or, wôre, wôlf, wôrk, whô, sôn; mûte, cûb, cûre, unite, cûr, râle, fâll; try, Sýrian. æ, œ = ê; ey = â. qu = kw.

3. In a state of ecstasy.

"Then *ecstatic* she diffused
The canvas, seized the palette, with quick hand
The colors brewed." *Thomson: Liberty*, iv. 216-18.

*4. Tending to external objects.

"I find in me a great deal of *ecstatic* love, which continually carries me out to good without myself."—*Norris*.

ēc-sāt'-ī-cal-lŷ, adv. [Eng. *ecstatically*; -ly.] In an ecstatic manner; with ecstasy or rapture.

ēc-tā-sis, s. [Gr. = an extension; *ekteinō* = to stretch out; *ek*=out, and *teinō*=to stretch.] *Rhet.*: The lengthening of a syllable from short to long.

edge-tool, s.

I. Literally:

Hardware.: A general name which includes the heavier descriptions of cutting-tools: axes, adzes, chisels, gouges, plane-bits. Other cutting-tools come within the province of the armorer or cutler, and are included under cutlery: knives, scissors, shears, surgical instruments, and, by the analogy of associated use, forks. The making of swords was anciently the work of the armorer, but has probably merged into cutlery. Wood-cutting tools are divided by Holtzapffel as follows:

1. Paring or splitting-tools, with thin edges, the angle of the basil not exceeding 60° with the straight face. This includes broad-axes, chisels, gouges, &c.; double-basil tools, such as axes.

2. Scraping-tools with thick edges, the angles measuring from 60° to 120°. These remove the fibers in the form of dust. The veneer-scraper is an instance. One angle of the edge of the steel plate is turned over to form a bur, known as a wire-edge.

3. Shearing-tools, which are usually in pairs, acting from opposite sides of the object, the basil and face having an angle of from 60° to 90°

† Iron and steel for edge-tools have been combined in a fagot and rolled so as to have a thickness of steel between layers of iron, for chopping-axes and some other tools, and with a layer of steel on one side for broad-axes, chisels, &c., which have but one basil.

4. A burnisher for rubbing the edges of boot and shoe soles. [EDGE-PLANE.]

5. Saddlery.: A tool used for removing the angular edge from a leather strap. For chamfering down the edges of a strap more broadly, another tool is used, having a blade and guides which travel along the edge and face respectively of the leather. [CHAMFERING-TOOL.]

II. Fig.: Anything dangerous to deal or play with.

"You jest: ill jesting with edge-tools."
Tennyson: *Princess*, ii. 184.

edge-wheel, s. A wheel traveling on its edge in a circular or annular bed, as in the ancient Phœnician oil-mills, the Chilian ore-mills, and many other crushing-mills. [CHILIAN-MILL.]

ēdge, v. t. & i. [EDGE, s.]

B. As subst.: Anything that is fit or proper to be eaten as food; an eatable.

ēd-ī-ble-ness, s. [English *edible*; *-ness*.] The quality of being edible or fit for food.

***ēd-ict, s.** [Lat. *edictum*, neut. sing. of *edictus*=proclaimed, pa. par. of *edico*=to proclaim: *e=ex*=out, and *dico*=to say, to speak; Sp. & Port. *edicto*; Ital. *editto*; Fr. *édit*.]

I. Ordinary Language:

1. **Lit.**: A proclamation or decree issued generally by royal or ecclesiastical authority; an order promulgated by a sovereign or the ruling authorities to the subjects, as a rule or law to be obeyed; an ordinance having the force of law.

"A royal *edict* declared these pieces to be legal tender in all cases whatever."—Macaulay: *Hist. Eng.*, ch. xii.

2. **Fig.**: A decree, a decision, a determination.

II. Technically:

1. **Roman Jurisprudence**: An injunction, having the force of law, issued at first by prætors, provincial governors, &c., till the time of Hadrian, when a digest was made of the edicts then existing, and the power of issuing others supplementary to, or altering those previously in force, was reserved to the emperors.

2. **Eccles.**: A proclamation or notice given of certain things intended or about to be done by a church court.

¶ Edict of Nantes:

Hist.: An edict by which, on April 13, 1598, Henry IV., of France, granted toleration to his Protestant subjects. It was revoked on October 22, 1685, by Louis XIV., the unwise act causing the expatriation of about 50,000 Protestant families, who carried their industry to England and other lands. The loss to France was great, as was the gain to those countries which were wise and hospitable enough to afford an asylum to the refugees.

¶ For the difference between *edict* and *decree*, see DECREE.

***ēd-ict-ā, a.** [Lat. *edictalis*, from *edictum*=an edict.] Pertaining or relating to an edict.

***ēd-ī-fī-cānt, a.** [Lat. *edificans*, pr. par. of *edifico*=to build.] [EDIFY.]

1. **Lit.**: Building.

2. **Fig.**: Edifying.

"And as his pen was often militant,
Nor less triumphant; so *edificant*
It also was."—

Dugard: *Verses on Gataker* (1655), p. 78.

ēd-ī-fī-cā-tion, *ed-ī-fī-ca-tion, *ed-ī-fī-ca-cion, *ed-ī-fī-ca-cioun, s. [Lat. *edificatio*, from *edifico*=to build; Fr. *édification*; Sp. *edificación*; Ital. *edificazione*.]

***I. Literally**:

1. The act, art, or process of building; construction.

"We were licensed to enter the castle or fortress of Corfu, which is not only of situation the strongest I have seen, but also of *edification*."—Hackluyt: *Voyages*, vol. ii.

2. That which is built; a building, an edifice. (*Bullockar*.)

II. Fig.: A building up in a moral or religious sense; a rearing up in knowledge; mental improvement or progress; instruction.

"The end he has in view, the *edification* of others."—Hurd: *Works*, vol. vi., ser. i.

***ēd-ī-fī-cā-tōr-ŷ, a.** [Lat. *edificator* (us), pa. par. of *edifico*, and Eng. adj. suff. *-ory*.] Tending to edification; edifying.

"There can be no reason of restraining them from an exercise so beneficially *edificatory* to the church of God."—Bp. Hall: *Cases of Conscience*, case 10.

ēd-ī-fī-ŷ, s. [Fr., from Lat. *edificium*=a building; *edifico*=to build; Sp. & Port. *edificio*; Ital. *edificio*.] A building, a structure, a fabric; especially applied to large, elegant or elaborate structures.

"Right toward the sacred *edifice* his steps
Had been directed."—

Wordsworth: *Excursion*, bk. vii.

¶ Crabb thus discriminates between *edifice, fabric, and structure*: "*Edifice* in its proper sense is always applied to a building; *structure* and *fabric* are either employed as abstract actions, or the results and fruits of actions: in the former case they are applied to many objects besides buildings; *structure* referring to the act of raising or setting up together; *fabric* to that of framing or contriving. As the *edifice* bespeaks the thing itself, it requires no modification, since it conveys of itself the idea of something superior: the word *structure* must always be qualified; it is employed only to designate the mode of action: the *fabric* is itself a species of epithet, it designates the object as something contrived by the power of art or by design. The *edifices* dedicated to the service of religion have in all ages been held sacred: it is the business of the architect to estimate the merits or demerits of the *structure*: when we take a survey of the vast *fabric* of the universe, the mind becomes bewildered with contemplating the infinite power of its Divine author. When employed in the abstract sense of actions, *structure* is limited to objects of magnitude, or such as consist of complicated parts; *fabric* is extended to everything in which art or contrivance is requisite; hence we may speak of the *structure* of vessels, and the *fabric* of cloth, iron ware, and the like." (Crabb: *Eng. Synon.*)

***ēd-ī-fī-cial (cial as shal), a.** [Low Lat. *edificialis*, from Lat. *edificium*.] Pertaining to an edifice or construction; structural.

"There are mansions, which, without any striking *edificial* attraction, have a certain air of appropriate hospitality and provincial dignity."—*Hist. of Rivers of Great Britain* (1794), l. 232.

ēd-ī-fīed, *ed-ī-fīde, *ed-ī-fīde, pa. par. or a. [EDIFY.]

ēd-ī-fī-ēr, s. [Eng. *edify*; *-er*.]

*1. **Lit.**: One who builds.

2. **Fig.**: One who edifies, improves, or instructs another.

"They scorn their *edifiers* to own."

Bulwer: *Hudibras*, III. ii.

ēd-ī-fī-ŷ, *ed-e-fī-en, *ed-e-fī, *ed-ī-fīe, *ed-ī-fīe, *ed-y-fī, v. t. & i. [Fr. *édifier*, from Lat. *edifico*=to build; *edes*=a building, and *facio*=to make, to construct; Sp. & Port. *edificar*; Ital. *edificare*.]

A. Transitive.

***I. Literally**:

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sire, sīr, marine; gō, pōt,

ēd-u-cā-tion, s. [*Lat. educatio*; from *educatus*, pa. par. of *educ* (1st conj.), freq. of *educ* (3d conj.)=to bring out, to educate; *Fr. education*; *Sp. educacion*; *Ital. educazione*.] Properly the educating, leading out, or drawing out the latent powers of an individual. From the philosophic point of view everyone is educated, his powers being developed for good or evil by all he sees, hears, feels, or does. Education in this sense begins when one enters the world, and continues all the time he is in it. In a more specific sense, it is used of a premeditated effort on the part of parents, teachers, and professors to draw out one's intellectual and moral endowments, encouraging what is good to one's self and to society, and discouraging what is hurtful. With this is combined an effort to give more or less of technical training to fit the scholar or student for the occupation by which he desires or is likely to support himself in life. This necessitates a system of elementary day schools for the multitude, of secondary schools for a smaller number, and of universities for the highly favored few [*SCHOOL, COLLEGE, UNIVERSITY*]. For spiritual and moral purposes, these appliances are supplemented by Sunday Schools, Biblical Institutes, Young Men's Christian Associations, Biblical Churches for persons of every age. Technical education was imparted first by the system of apprenticeship; now schools and colleges for the purpose have been established [*TECHNICAL*]. Mechanics and other Institutes, Lectures, Libraries, Debating and other Societies, Political Clubs, &c., are all appliances for some department or other of education.

Crabb thus discriminates between *education*, *breeding*, and *instruction*: "Instruction and breeding are to education as parts to a whole; the instruction respects the communication of knowledge, and breeding respects the manners or outward conduct; but education comprehends not only both these, but the formation of the mind, the regulation of the heart, and the establishment of the principles: good instruction makes one wiser; good breeding makes one more polished and agreeable; good education makes one really good. A want of education will always be to the injury if not to the ruin of the sufferer: a want of instruction is of more or less inconvenience, according to circumstances; a want of breeding only unfits a man for the society of the cultivated. Education belongs to the period of childhood and youth; instruction may be given at different ages; good breeding is best learnt in the early part of life." (*Crabb: Eng. Synon.*)

*ēd-u-cā-tion-a-ble, a. [*Eng. education*; -able.] Proper or fit to be educated.

ēd-u-cā-tion-āl, a. [*Eng. education*; -al.] Of or pertaining to education; connected with education.

1. *Lit. & Chem.*: That which is educed, brought, or drawn out or extracted; extracted matter; matter brought to light by separation, analysis, or decomposition.

"The volatile oils which pre-exist in cells, in the fruit and other parts of plants, and oil of sweet almonds, obtained by pressure, are educts; while oil of bitter almonds,

which does not pre-exist in the almond, but is formed by the action of emulsin and water on amygdalin, is a product."—*Chambers: Encyclopædia*.

2. *Fig.*: Anything deduced or inferred from another; an inference, a deduction.

"The latter are conditions of the former are educts from experience."—*Sir W. Hamilton*.

Chem.: A term applied to a body separated by the decomposition of another body in which it previously existed as such, in contradistinction to "product," which denotes a compound not previously existing, but formed during the decomposition. The volatile oil of lemon-peel is an educt because it preexists in the peel; but bitter-almond oil is a product, because it does not exist ready formed in bitter almonds, but is produced by the action of emulsin and water on amygdalin. (*Watts: Dict. Chem.*)

*ē-dūc-tion, s. [*Lat. eductio*, from *eductus*, pa. par. of *educ*.] The act of drawing or bringing out into view.

2. A fry or brood of young eels.

eel-fishing, s. The fishing of eels to be used as food. The eels are widely distributed over the world. The Greeks and Romans highly valued them for the table; the Egyptians rejected them as an article of food.

eel-fork, s. A pronged instrument or fork for spearing eels.

eel-grass, s. A plant, *Zostera marina*. (*American*.)

eel-oil, s. An oil obtained from eels when they are roasted. It is used to lubricate stiff joints, and to preserve steel from rusting.

eel-pie, s. A pie made of eels.

eel-pout, s.

Ichthy.: Two fishes—(1) the Burbot or Burbot (*Lota vulgaris*), (2) the Viviparous Blenny (*Zoarces viviparus*).

eel-shaped, a. Like an eel in shape; long and thin.

*eel-pōt, s. [Eng. *eel*, and *pot*.] An eel-buck (q. v.).

"Aft yont the dyke she's heard you bummin',
Wi' eerie drone."

Burns: Address to the Deil.

*ēer'-l-ness, s. [Eng. *eerie*; -ness.] A superstitious dread of spirits; timidity.

*ēe'-sōme, a. [Eng. *ee*=eye; suff. *-some*.] Attractive to or fixing the eye, pleasing or gratifying to look at.

"Will onybody deny that that's an *eesome* couple?"—*Reg. Dalton*, iii. 159.

*ēest'-rice, s. [Ety. doubtful.]

Bot.: Salsola kali. (*Turner*.)

*ēet'-noch, eet-nock, s. [Ety. doubtful.] A moss-grown precipitous rock.

"Among the auld gray etnocks."—*Edinburgh Magazine*.

*ēf-, pref. The form assumed by the Latin prefix *ex* before words beginning with *f*.

*ēf-fa-ble, a. [Lat. *effabilis*, from *effor*=to speak out: *ex*=out, and *for*=to speak.] That may be uttered or spoken; utterable, speakable.

"He did, upon his suggestion, accommodate thereunto his universal language, to make his character *effable*."—*Wallis: Defense of Royal Society* (1678), p. 16.

*ēf-fā'-ge, v. t. & i. [Fr. *effacer*, from *ef*=Lat. *ef* for *ex*=out, and *fr*=face=a face.]

A. Transitive:

1. To destroy, as a figure or marks on the surface of anything, so as to render them invisible or indistinguishable.

"So coin grows smooth, in traffic current passed,
Till Caesar's image is effaced at last."

Cooper: Progress of Error, 279, 280.

2. To erase, to strike or blot out.

"It was ordered that his name should be effaced out of all public registers."—*Addison: On Italy*.

3. To blot out, to remove, to do away with, to wipe out.

"Moral causes noiselessly effaced first the distinction between Norman and Saxon."—*Macaulay: Hist. Eng.*, ch. i.

B. Intrans.: To obliterate, to remove all signs of distinction.

"Before Decay's effacing fingers
Have swept the lines where beauty lingers."

Byron: Giaour.

† For the difference between *to efface* and *to blot out*, see *BLot*, v.

*ēf-fā'-e-a-ble, a. [Eng. *efface*; -able.] That may or can be effaced, blotted out, or destroyed.

*ēf-fā'-e-mēnt, s. [Eng. *efface*; -ment.] The act of effacing; obliteration, erasure.

*ēf-fā'-ē-ing, pr. par., a. & s. [EFFACE.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The same as EFFACEMENT (q. v.).

*ēf-fa'-rē, effraye, s. [Fr.=scared, frightened.]

Her.: An epithet applied to an animal represented as rearing on its hind legs, as though frightened or enraged.

*ēf-fās'-qin-āte, v. t. [Lat. *effascinatus*, pa. par. of *effascino*=to bewitch.] [FASCINATE.] To charm, to bewitch, to fascinate.

"The vulgar already are so effascinated, as to begin to account their planetary presages for divine prophecies."—*Gaule: Mag-Astro-Mantia*, p. 129.

*ēf-fās-qin-ā-tion, s. [Lat. *effascinatio*, from *effascinatus*, pa. par. of *effascino*.] The act of bewitching or fascinating; the state of being bewitched.

"St. Paul sets down the just judgment of God against the receivers of Antichrist, which is effascination, or strong delusion."—*Shelford: Learned Disc.* (1635), p. 317.

*ēf-fauld, *ēf-fold, a. [AFOLD.] Upright, honest.

*ēf-fauld-lie, *ēf-fold-ly, *ēf-old-ly, adv. [Eng. *effauld*; -ly.] Uprightly, honestly.

"We bind and oblige us *effauldie* and *faithfullie*."—*Acts Charles I.* (ed. 1814), v. 318.

*ēf-fēct, s. [O. Fr. *effect*; Fr. *effet*, from Latin *effectus*=(s) an effect, (a) done-effected; *efficio*=to do, to effect; *ef*=ex=out, and *facio*=to do; Sp. *efecto*; Ital. *effetto*.]

1. Ordinary Language:

1. The execution, performance, or carrying out of anything.

"Thoughts are but dreams, till their effects be tried."
Shakesp.: Rape of Lucrece, 353.

2. That which is produced by, or is the result of, an operating cause or agent; the result or consequence of the action of an agent upon some object; result, consequent issue.

"That good effects may spring from words of love."
Shakesp.: Lear, i. 1.

3. Power or capability of producing results.

"The institution has hitherto proved without effect, and has neither extinguished crimes, nor lessened the numbers of criminals."—*Temple*.

4. Completion, perfection, purpose or end intended.

"Whose word leaps forth at once to its effect."
Cooper: Task, v. 687.

5. Reality, substance, fact; not mere appearance.

"[It] is to him, who rightly things esteems,
No other in effect than what it seems."
Denham: Cooper's Hill, 29, 30.

6. Purpose, purport, general intent, tenor.

"Wilt know,
The effect of what I wrote?"
Shakesp.: Hamlet, v. 2

7. Aim, intention, purpose.

"To this effect, Achilles, have I moved you."
Shakesp.: Troilus and Cressida, iii. 3.

8. The result or impression caused on, or produced in the mind at first glance by external objects, as by a picture, a landscape, before the details are examined. Thus, some bold outlines indicating the principal forms, with the masses of light and shade properly thrown in, and the local color put on, are sufficient to produce a picture which, at the first view, may appear strikingly brilliant and true, although many of the details proper to the subject are omitted, or the drawing not strictly correct, or the coloring deficient in harmony. Effect is also the result of all the peculiar excellences of the true master; the ensemble which is brilliant and striking, as in the works of Rubens and Turner.
9. (Pl.): Goods, movables, personal estate.

"All the estates and effects, debts, contracts, and choses in action of the bankrupt are vested in the assignees."—*Blackstone: Comment.*, bk. iii., ch. 27.

II. Mach.: The amount of work performed by a steam-engine or other machine; duty.

† (1) *In effect*: In reality, in fact, in substance.

"To say of a celebrated piece that there are faults in it, is, *in effect*, to say that the author of it is a man."—*Addison*.

(2) *For effect*: In order to produce an impression; ostentatiously, for show.

(3) *To give effect to*: To give validity to; to make valid; to carry out in practice.

(4) *Of no effect, of none effect*: Without validity or force; invalid.

"Making the word of God of none effect through your tradition."—*Mark* vii. 13.

(5) *Without effect*: Invalid, without result.

(6) *To no effect*: In vain, resultless, useless.

"All my study be to no effect."

Shakesp.: Titus Andronicus, v. 2.

(7) *To take effect*: To operate, to be effective.

"Which so took effect as I intended."

Shakesp.: Romeo and Juliet, v. 3.

† (1) Crabb thus discriminates between *effect* and *consequence*: "The effect and the consequence agree in expressing that which follows anything, but the former marks what follows from a connection between the two objects; the consequence is not thus limited; the effect is that which necessarily flows out of the cause, between which the connection is so intimate that we cannot think of the one without the other. In the nature of things, causes will have effects; and for every effect there will be a cause: the consequence, on the other hand, may be either casual or natural; it is that on which we can calculate. Effect applies either to physical or moral objects, consequence only to moral subjects. There are many diseases which are the effects of mere intemperance; an imprudent step in one's first setting out in life is often attended with fatal consequences. A mild answer has the effect of turning away wrath; the loss of character is the general consequence of an irregular life." (*Crabb: Eng. Synon.*)

(2) For the difference between *effects* and *goods*, see *GOODS*.

bōil, bōy; pōut, jōwī; cat, gell, chorus, qin, bench; go, gem; thin, this, sin, ag; expect, Xenophon, exist. ph = f
-cian, -tian = shān. -tion. -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bēl, dēl.

ef-fect', v. t. [EFFECT, s.]

1. To produce as a cause, consequence, or result; to be the cause of, to bring about, to cause to be.

"The change made of that syrup into a purple color was effected by the vinegar."—*Boyle: On Colors.*

2. To bring to pass, to accomplish, to achieve, to attempt successfully, to perform.

"[He] sat down at last in despair of effecting it."—*Atterbury: Sermons*, vol. i. ser. 7.

¶ Crabb thus discriminates between *to effect*, *to produce*, and *to perform*: "The two latter are in reality included in the former; what is *effected* is both *produced* and *performed*; but what is *produced* or *performed* is not always *effected*. To *produce*, signifies to bring something forth or into existence; *to perform*, to do something to the end: *to effect* is to *produce* by *performing*; whatever is *effected* is the consequence of a specific design; it always requires therefore a rational agent to *effect*: what is *produced* may follow incidentally, or arise from the action of an irrational agent or an inanimate object; what is *performed* is done by specific efforts; it is therefore, like *effect*, the consequence of design, and requires a rational agent. *Effect* respects both the end and the means by which it is brought about: *produce* respects the end only; *perform*, the means only. No person ought to calculate on *effecting* a reformation in the morals of men, without the aid of religion: changes both in individuals and communities are often *produced* by trifles. To *effect* is said of that which emanates from the mind of the agent himself; *to perform*, of that which is marked out by rule, or prescribed by another. We *effect* a purpose; we *perform* a part, a duty or office. A true Christian is always happy when he can *effect* a reconciliation between parties who are at variance; it is a laudable ambition to strive to *perform* one's part creditably in society." (*Crabb: Eng. Synon.*)

ef-fect'-ôr, s. [EFFECTOR.]

***ef-fect'-y-ble, a.** [Eng. *effect*; -able.] That may or can be effected; practicable, possible, feasible.

"That a pot full of ashes will still contain as much water as it would without them, is not *effectible* upon the strictest experiment."—*Browne: Vulgar Errors.*

ef-fect'-ing, pr. par., a. & s. [EFFECT, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of causing, producing, or achieving.

***ef-fec'-tion, s.** [Lat. *effectio*, from *effectus*, pa. par. of *efficio*=to effect.]

1. *Ord. Lang.:* The act of effecting, producing, or bringing to pass; production, execution, completion.

"Attributing the *effectio* of the soul unto the great God."—*Hale: Origin of Mankind*, p. 290.

2. *Geom.:* The construction of a proposition; a problem deducible from some general proposition.

ef-fec'-tive, a. & s. [Lat. *effectivus*, from *effectus*, pa. par. of *efficio*; Fr. *effectif*; Port. *effectivo*; Sp. *efectivo*; Ital. *effettivo*.]

A. As adjective:

1. Having the power of effecting or producing as a result; efficacious, effectual, efficient. (Followed by *of*.)

"They are not *effective* of anything, nor leave no work behind them."—*Bacon*.

2. Operative; having the quality of producing effects.

"The use of these rules is not at all *effective* upon erring consciences."—*Taylor: Rule of Conscience*, bk. i., ch. ii.

3. Efficient; causing to be or come to pass.

"Whosoever is an *effective* real cause of doing his neighbor wrong is criminal, by what instrument soever he does it."—*Taylor*.

4. Having the power of acting or operating; efficient; capable of or fit for duty or service.

5. Producing or followed by results; powerful; as, His speech was very *effective*.

B. As substantive:

1. *Comm.:* The same as **EFFECTIVE-MONEY** (q. v.).

2. *Mil.:* A soldier fit for duty; an efficient.

¶ Crabb thus discriminates between *effective*, *efficient*, *effectual*, and *efficacious*: "*Effective* signifies *effecting*; *efficient* signifies literally *effecting*; *effectual* and *efficacious* signify having the *effect*, or possessing the power to *effect*. The former two are used only in reference to physical objects, the latter two in regard to moral objects. An army or a military force is *effective*; a cause is *efficient*; the remedy or cure is *effectual*; the medicine is *efficacious*. The end or result is *effectual*, the means are *efficacious*. No *effectual* stop can be put to vices of the lower orders while they have a vicious example from their superiors: a seasonable exercise of severity on an offender is often very *efficacious* in quelling a spirit of insubordination. When a thing is

not found *effectual*, it is requisite to have recourse to further measures; that which has been proved to be *inefficacious* should never be adopted."

(*Crabb: Eng. Synon.*)

effective money, s.

Comm.: A term used on the Continent of Europe to express coin as distinguished from paper-money.

ef-fect'-ive-ly, adv. [Eng. *effective*; -ly.] In an effective manner; with effect; effectually, powerfully, completely.

"This *effectively* resists the devil, and suffers us to receive no hurt from him."—*Taylor: Holy Living*.

***ef-fect'-less, ef-fect-lesse, a.** [English *effect*; -less.] Without effect or result; useless, vain, impotent.

"I'll chop off my hands;
In bootless prayer have they been held up,
And they have served me to *effectless* use."—*Shakesp.: Titus Andronicus*, iii. 1.

ef-fect'-ôr, s. [Latin, from *effectus*, pa. par. of *efficio*.] One who produces any effect; a maker, a creator, a cause.

"We commemorate the creation, and pay worship to that infinite Being who was the *effector* of it."—*Derham*.

ef-fec'-tu-al, a. [Lat. *effectus*=an effect, and Eng. adj. suff. -al.]

1. Productive of effects; having the power to produce an effect or result; effective, efficacious.

"And all the hills were glad to bear
Their part in this *effectual* prayer."—*Wordsworth: White Doe of Rylstone*, vii.

2. Carrying out, performing, or achieving results.

"Son of my bosom, Son who art alone
My word, my wisdom, and *effectual* might."—*Milton: P. L.*, iii. 169, 170.

*3. Expressive of facts; full of import; grave, decisive.

"Reprove my allegation, if you can;
Or else conclude my words *effectual*."—*Shakesp.: Henry VI., Pt. II.*, ii. 1.

¶ For the difference between *effectual* and *effective*, see **EFFECTIVE**.

effectual calling, s.

Theol.: One of the chief tenets of Calvinism. For definition see extract.

"*Effectual calling* is the work of God's Spirit whereby, convincing us of our sin and misery, enlightening our minds in the knowledge of Christ, and renewing our wills, he doth persuade and enable us to embrace Jesus Christ, freely offered to us in the Gospel."—*Shorter Catechism*, q. 31.

ef-fec'-tu-al-ly, adv. [Eng. *effectual*; -ly.] In an effectual manner; with effect; effectually; so as to produce the desired effect or result; completely, thoroughly.

"The executive power and the legislative power had so *effectually* impeded each other that the state had been of no account in Europe."—*Macaulay: Hist. Eng.*, ch. 2.

ef-fec'-tu-al-ness, ef-fec-tu-al-nesse, subst. [Eng. *effectual*; -ness.] The quality of being effectual; efficacy, effectiveness.

"Give such an omnipotent prevalence and *effectualness* to his requests."—*Goodwin: Trial of Faith*, § 5.

***ef-fec'-tu-âte, v. t. [Fr. *effectuer*.]** To effect, to bring to pass, to accomplish, to fulfill.

"He found him a fit instrument to *effectuate* his desire."—*Sidney*.

***ef-fec'-tu-ât-ing, pr. par., a. & s. [EFFECTU-ATE.]**

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of effecting, accomplishing, or fulfilling; effectuation.

***ef-fec'-tu-â-tion, s.** [Eng. *effectuat(e)*; -ion.] The act of effectuating, effecting, or accomplishing.

"The difficulty . . . from the identity of Causation and Effectuation is solved on this theory."—*Sir W. Hamilton*.

***ef-fec'-tu-ous (1), ef-fec-tu-ose, ef-fec-tu-ouse, a.** [Lat. *effectus*, and Eng. adj. suff. -ous.] Effective, effectual.

"Strong delusions and *effectuose* errors."—*Joye: Expos. of Daniel*, ch. xii.

***ef-fec'-tu-ous (2), adj. [AFFECTUOUS.]** Affectionate.

"Gift you thocht remordis your myndis alsua
Of the *effectuose* piete matnale."—*Douglas: Virgil*, 221, 2.

***ef-fec'-tu-ous-ly (1), adv.** [Eng. *effectuose* (1); -ly.] Effectually, completely, thoroughly.

"It shall, I trust, *effectuously* prove our purpose."—*Stapleton: Fortress of Faith* (1565), p. 59.

***ef-fec'-tu-ous-ly (2), ef-fec-tu-ous-lye, adv.** [Eng. *effectuose* (2), -ly, -lye.] Affectionately.

"The chancellor requested his grace *effectuously* that he would be so good."—*Pittscottie: Chronicle*, p. 26.

ef-feir, s. [AFFERE.]

1. What is becoming one's rank or station.

"To thair estait doand *effeir*."—*Maitland: Poems*, p. 328.

2. A property, a quality.

"Discreyving all thair fassions and *effeirs*."—*Dunbar: Bannatyne Poems*, p. 6.

3. Warlike guise.

"Arrayed in *effeir* of war, as was the ancient custom of Scotland on these occasions."—*Scott: Waverley*, ch. lxx.

B. Intrans.: To fear, to be afraid.

"Quhair for *effeir* that he be not offendit."—*Lyndsay: Works*, p. 194.

ef-fem'-i-na-çy, s. [EFFEMINATE, a.]

1. The softness, delicacy, and weakness characteristic of a woman; unmanly or womanish weakness or delicacy.

"But foul *effeminacy* held me yoked
Her bond slave."—*Milton: Samson Agonistes*, 410, 411.

2. Lasciviousness, voluptuousness; indulgence in womanish pleasures.

"So long as idleness is quite shut out from our lives, all the sins of wantonness, softness, and *effeminacy* are prevented."—*Taylor*.

ef-fem'-i-nate, a. & s. [Lat. *effeminatus*, pa. par. of *effemino*=to make womanish; *femina*=a woman.]

A. As adjective:

*1. Womanlike; becoming or suitable to a woman; delicate, tender.

"As well we know your tenderness of heart,
And gentle, kind, *effeminate* remorse."—*Shakesp.: Richard III.*, iii. 7.

2. Having the qualities of a woman; womanish; soft and delicate in an unmanly degree; destitute of manly qualities; voluptuous, unmanly, weak.

"Such exhortations made his heart swell with emotions unknown to his careless and *effeminate* brother."—*Macaulay: Hist. Eng.*, ch. iv.

***3. Fickle, capricious.**

"He was to imagine me his love, his mistress, and I set him every day to woo me; at which time would I grieve, be *effeminate*, changeable."—*Shakesp.: As You Like It*, iii. 2.

†4. Weak, spiritless; as, an effeminate peace.

B. As subst.: An effeminate, weak, unmanly person; a milkop.

"With a just disdain
Frown at *effeminates*, whose very looks
Reflect dishonor on the land I love."—*Cowper: Task*, ii. 221-23.

ef-fem'-i-nate, v. t. & i. [EFFEMINATE, a.]

A. Trans.: To make effeminate, weak, or unmanly; to unman, to make soft.

"When one is sure it will not corrupt or *effeminate* children's minds, I think all things should be contrived to their satisfaction."—*Locke*.

B. Intrans.: To become effeminate, womanish, or weak; to be unmanly; to lose spirit or manliness.

"In slothful peace both courage will *effeminate* and manners corrupt."—*Pope*.

ef-fem'-i-nate-ly, adv. [Eng. *effeminate*; -ly.]

1. In an effeminate, womanish, or unmanly manner; weakly, softly; like a woman.

"Champions in philosophy, law, and history, are not wanting to answer or confute opposers; and some of them, to say truth, have not undertook the cause *effeminately*."—*Whitlock: Manners of the English* (1654), p. 323.

***2. By womanish arts.**

"What boots it at one gate to make defense,
And at another to let in the foe,
Effeminately vanquished?"—*Milton: Samson Agonistes*, 560-62.

1. *Lit.*: Barren; disabled from generation, not capable of bearing young.

"It is probable that females have in them the seeds of all the young they will afterward bring forth, which, all spent and exhausted, the animal becomes barren and efete."—Ray: *On the Creation*, pt. i.

2. *Fig.*: Worn out or exhausted; having lost all vigor and efficiency.

"All that can be allowed him now, is to refresh his decrepit, efete sensuality with the history of his former life."—South.

ĕf-fi-cā-ċious, *a.* [Lat. *efficax* (genit. *efficacis*), from *efficio*=to effect (*q. v.*).] Productive of effects or results; effectual; having power adequate to the purpose or object intended; effective.

"He would not, he said, venture to affirm that, in so disastrous an extremity, even that remedy would be efficacious, but he had no other remedy to propose."—Macaulay: *Hist. Eng.*, ch. ix.

¶ For the difference between *efficacious* and *effective*, see EFFECTIVE.

ĕf-fi-cā-ċious-lŷ, *adv.* [Eng. *efficacious*; -ly.]

In an efficacious or effective manner; effectually, effectively.

"If we find that any other body strikes efficaciously enough upon it, we cannot doubt but it will move that way which the striking body impels it."—Digby: *On Bodies*.

ĕf-fi-cā-ċious-nēss, *s.* [Eng. *efficacious*; -ness.]

The quality of being efficacious; effectiveness, efficacy.

***ĕf-fi-cā-ċ-i-tŷ**, ***ef-fy-cac-i-te**, *s.* [Lat. *efficacitas*, from *efficax*=efficacious, from *efficio*=to effect.] Efficacy.

"The power of whiche sacraments is of suche efficacye that cannot be expressed."—J. Fryth: *A Boke*, p. 10.

ĕŋ-fi-ca-ċy, ***ef-fy-ca-cy**, *s.* [Lat. *efficacia*=power, from *efficax*=efficacious, from *efficio*=to effect.] Power to produce effects or results; capability or power of producing the effect or object intended.

"The arguments drawn from the goodness of God have a prevailing efficacy."—Rogers.

ĕf-fi-ċience (*ċience* as *shens*), **ĕf-fi-ċien-ċy** (*ċien* as *shen*), *s.* [Lat. *efficientia*, from *efficiens*, *pr. par. of efficio*=to effect.]

I. Ordinary Language:

1. The quality or state of being efficient or causing effects or results; a causing to be or to exist; effectual agency.

"Gravity does not proceed from the *efficiency* of any contingent and unstable agents."—Woodward.

2. Power or capability of producing the effect or result intended.

3. A state of competent knowledge or acquaintance with any art, practice, or operation. [II. 2.]

II. Technically:

1. *Mech.*: The amount of useful effect or actual work yielded by a prime mover, as compared with the power expended.

2. *Mil.*: The state of being efficient.

ĕf-fi-ċient (*ċient* as *shent*), *a. & s.* [Lat. *efficiens*, *pr. par. of efficio*=to effect.]

A. As adjective:

1. Causing or producing effects or results; acting as the cause of effects; effective.

"An instrumental, not an *efficient* cause."—Clarke: *On the Trinity*, pt. ii., § 13. (Note.)

2. Having acquired a competent knowledge of or acquaintance with any art, practice, or duty; competent, capable.

B. As *subst.*: The agent or cause which produces or causes to exist; a prime mover.

"Your answering in the final cause makes me believe you are at a loss for the *efficient*."—Collier: *On Thought*.

¶ For the difference between *efficient* and *effective*, see EFFECTIVE.

ĕf-fi-ċient-lŷ (*ċient* as *shent*), *adv.* [English *efficient*; -ly.]

1. In an efficient manner; with effect, effectively; as the effective cause.

"Logical or consequential necessity is, when a thing does not *efficiently* cause an event, but yet by certain infallible consequences does infer it."—South: *Sermons*, iii. 397.

2. In a competent, able manner; with efficiency; ably.

***ĕf-fŷrce**, *v. t.* [Lat. *ef*=*ex*=out (intens.), and Eng. *fierce* (*q. v.*).] To make fierce, furious, or savage.

"With fell woodness he *efferved* was."

Spenser: *F. Q.*, III. xi. 27.

***ĕf-fiġ-i-ā-l**, *a.* [Eng. *effigy*; -al.] Pertaining to, or of the nature of an effigy.

"The three volumes contain chiefly *effigial* cuts and monumental figures and inscriptions."—Critical Hist. of Pamphlets (1716), p. 6.

***ĕf-fiġ-i-āte**, *v. t.* [Lat. *effigiatus*, *pa. par. of effigio*=to form, to fashion, from *effigies*=a likeness, an effigy (*q. v.*).] To form, fashion, adapt, conform.

"He must *effigiate* and conform himself to those circumstances of living and discourse."—Ep. J. Taylor: *Sermons*, vol. i., ser. 25.

ĕf-fiġ-i-āt-ing, *pr. par., a. & s.* [EFFIGIATE.]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As *subst.*: The act of forming, fashioning, or adapting; effigiation.

***ĕf-fiġ-i-ā-tion**, *s.* [Eng. *effigiate*(*e*); -ion.] The act of forming or fashioning a resemblance of persons or things.

ĕf-fiġ-ŷ, ***ĕf-fiġ-i-ēs**, *s.* [Lat. *effigies*, from *effingo*=to fashion out; *ef*=*ex*=out, and *finġo*=to fashion; Fr. & Ital. *effigie*; Sp. *efigie*.]

1. The literal representation or image of a person. Although the word is sometimes applied to a portrait it is not synonymous with it, but conveys an

idea of a more exact imitation, a more striking and authentic resemblance, such as we meet with in wax figures. The ordinary application of this word is to the sculptured figures or sepulchral monuments.

2. The print or impression on coins and medals representing the head of the prince by whom they are issued.

3. An exact representation, image, or copy.

¶ To burn or hang in effigy: To burn or hang an effigy or representation of any person, in order to show popular hatred, dislike, or contempt. This custom comes from France originally, where the public executioner was in the habit of hanging the effigy of the criminal if the criminal could not be found.

¶ For the difference between *effigy* and *likeness*, see LIKENESS.

***ĕf-flāġ-i-tāte**, *v. t.* [Lat. *efflagitatus*, *pa. par. of efflagito*=to ask or demand earnestly; *ef*=*ex*=out (intens.), and *flagito*=to demand earnestly.] To demand with earnestness or warmth.

***ĕf-flā-te**, *v. t.* [Lat. *efflat*, *pa. par. of efflo*=to blow or breathe out; *ef*=*ex*=out, and *flō*=to breathe.] To blow out, to puff up.

***ĕf-flā-tion**, *s.* [Eng. *efflat*(*e*); -ion.] The act of breathing or blowing out; a breath, a puff.

ĕf-flō-rēs-ċe, *v. t.* [Lat. *effloresco*=to begin to blossom, incept. from *effloreo*=to blossom, to bloom; *ef*=*ex*=out, and *flōreo*=to bloom.]

I. Ordinary Language:

*1. To burst into bloom, to blossom.

"The Italian [Gothic architecture] *effloresced* . . . into the meaningless ornamentation of the Certosa of Pavia, and the cathedral of Como."—Ruskin.

2. In the same sense as II. 2.

II. Chemical:

1. To change over the surface or throughout to a whitish, mealy, or crystalline powder, from a gradual decomposition on simple exposure to the air.

"Those salts whose crystals *effloresce* belong to the class which is most soluble."—Fourcroy.

2. To become covered with a whitish crust or light crystallization, from a slow chemical change between some of the ingredients of the matter covered, and an acid proceeding commonly from an external source.

"The walls of limestone caverns sometimes *effloresce* with nitrate of lime in consequence of the action of nitric acid formed in the atmosphere."—Dana.

ĕf-flō-rēs-ċence, **ĕf-flō-rēs-ċen-ċy**, *s.* [Fr. *efflorescence*, from Lat. *efflorescentia*, from *efflorescens*, *pr. par. of effloresco*.]

I. Ordinary Language:

1. The production of flowers.

"Where there is less heat, there the spirit of the plant is digested, and severed from the grosser juice in *efflorescence*."—Bacon.

2. An excrecence in the form of flowers.

"Two white sparry incrustations, with *efflorescences* in form of shrubs, formed by the trickling of water."—Woodward: *On Fossils*.

3. A springing, budding, or bursting forth.

"There may be some pure *efflorescences* of balmy matter."—Glanville: *Pre-existence of Souls*, ch. xiv.

II. Technically:

1. *Bot.*: The time of flowering; the season when a plant shows its blossoms.

2. *Chemistry*:

(1) The loss of the water of crystallization. Thus, crystals of neutral carbonate of sodium, $\text{Na}_2\text{CO}_3 \cdot 10\text{H}_2\text{O}$, exposed to dry air lose their water of crystallization and crumble to a white powder. Crystals of alum also effloresce in dry air.

(2) The formation of loose fine crystals on the surface of a porous substance. The solution of the salt is carried by capillary attraction to the surface of the substance, where it evaporates, and leaves the crystals; as the formation of deposits of potassium nitrate on niter-beds, of sodium salts on old walls, and ferrous sulphate on iron pyrites: the last is formed by the action of damp air on the sulphides.

3. *Med.*: An eruption, a redness of the skin, as in measles, &c.

"So men and other animals receive different tinctures from constitutional and complexional *efflorescences*."—Browne: *Vulgar Errors*, bk. vi., ch. xii.

ĕf-flō-rēs-ċent, *a.* [Lat. *efflorescens*, *pr. par. of effloresco*.]

1. *Bot.*: Commencing to flower.

2. *Chemistry, Mineralogy*, &c.:

(1) Forming into white threads or powder; becoming covered with efflorescence.

(2) Liable to efflorescence: as, an *efflorescent* salt.

bōl, bōy; pōut, jōwl; cat, ċell, chorus, ċhin, bench; go, ġem; thin, this; sin, ag; expect, Xenophon, exist. pl = f.

-ċlan, -ċian = shān. -tion, -sion = shūn.

-ċion, -ġion = zhūn. -ċious, -ċious = shūs. -ble, -dle, &c. = bēl, dēl.

ĕf-flu-ĕnce, ***ĕf-flu-ĕn-ĕy**, *s.* [Fr. *effluence*, from Lat. *effluens*, pr. par. of *effluo*=to flow out; *ef=ex=*out, and *fluo*=to flow.]

1. The act or state of flowing out.
2. That which flows or issues from a body.
3. An emanation.

"Bright effluence of bright essence increate."

Milton: *P. L.*, iii. 6.

ĕf-flu-ĕnt, *a. & s.* [Lat. *effluens*, pr. par. of *effluo*=to flow out.]

A. As adj.: Flowing or issuing out; emanating.
B. As subst.: A river or stream which flows out of another river or stream, or out of a lake.

ĕf-flu-vi-a-ble, *a.* [Eng. *effluvi(um)*; -able.] Capable of being given out in the form of effluvia.

ĕf-flu-vi-al, *a.* [Eng. *effluvi(um)*; -al.] Pertaining to effluvia; containing effluvia.

***ĕf-flu-vi-ate**, *v. i.* [Eng. *effluvi(um)*; -ate.] To give out or throw off effluvia.

ĕf-flu-vi-um (pl. **ĕf-flu-vi-a**), *s.* [Lat.=a flowing out, an outlet; *effluo*=to flow out; Ital. *effluvio*; Fr. *effluve*.] An invisible emanation; an exhalation perceptible by the sense of smell; specifically applied to noxious or disagreeable exhalations.

ĕf-flux, *s.* [Lat. *effluxus*, pa. par. of *effluo*=to flow out.]

*1. The act of flowing out or issuing in a stream; the state of being discharged or emitted in a stream; effluence, effusion.

*2. An outpouring, an effusion.

*3. A passing away, expiration; as, the *efflux* of time.

*4. That which is emitted; an emanation.

***ĕf-flux**, *v. i.* [EFFLUX, *s.*] To run or flow away, to pass away, to expire.

***ĕf-fluxion** (fluxion as **flū-shūn**), *s.* [As if from a Lat. *effluxio*, from *effluo*=to flow out; cf. *fluxion*.]

1. The act of flowing out or issuing, as in a stream; efflux, effluence, effusion.

2. That which flows out or is emitted; an emanation.

"The doctrine of effluxions, their penetrating natures, &c."—Browne: *Vulgar Errors*, bk. ii., ch. ii.

***ĕf-fō-di-ĕnt**, *a.* [Lat. *effodiens*, pr. par. of *effodio*=to dig out; *ef=ex=*out, and *fodio*=to dig.] Digging; accustomed to dig.

ĕf-fō-ly-a-tion, *s.* [Lat. *ef=ex=*out, and Eng. *foliation* (q. v.).]

Bot.: The depriving a plant of its leaves.

***ĕf-fōr-ĕ**, *v. t.* [French *efforcer*=to endeavor.] [EFFORT.]

1. To force or break through.

2. To force, to ravish, to violate by force.

3. To force, to constrain, to compel.

4. To strain, to utter with effort or vehemence.

***ĕf-form**, *v. t.* [Low Lat. *efformo*, from Lat. *ef=ex=*out, and *forma*=form, shape.] To form, shape, adapt, or fashion.

***ĕf-for-mā-tion**, *s.* [Low Lat. *efformatio*, from *efformo*.] The act of forming, shaping, fashioning, or adapting.

ĕf-fōrt, *s.* [Fr., from *efforcer*, *s'efforcer*=to exert one's self, to endeavor.] An exertion of strength or power, physical or mental; a strain, a straining, a strenuous exertion or endeavor.

"If after having gained victories, we had made the same efforts as if we had lost them, France could not have withstood us."—Addison: *On the State of the War*.

¶ For the difference between *effort* and *endeavor*, see ENDEAVOR.

ĕf-fōrt-less, *a.* [Eng. *effort*; -less.] Without an effort; making no effort.

"That does not alter the fact that Sibil died out in an effortless manner."—London Daily Telegraph.

***ĕf-fossion** (fossion as **fōsh-ōn**), *s.* [Lat. *effossio*, from *effossus*, pa. par. of *effodio*=to dig out.] The act of digging up from the ground; exhumation.

***ĕf-frān-chīse**, *v. t.* [Lat. *ef=ex=*out (intens.), and Eng. *franchise* (q. v.).] To enfranchise, to invest with franchises or privileges.

***ĕf-frā-y**, *s.* [EFFRAY, *v.*] Fear, terror.

***ĕf-frā-y**, *v. t.* [Fr. *effrayer*.] To frighten, to alarm.

***ĕf-frā-y-a-ble**, ***ĕf-frā-i-a-ble**, *a.* [Fr. *effrayable*.] Capable of producing fright or alarm; frightful, dreadful.

***ĕf-frā-yed**, ***ĕf-fray-it**, *pa. par. or a.* [EFFRAY, *v.*]

***ĕf-frā-y-ĕd-ly**, ***ĕf-fray-it-ly**, *adv.* [English *effrayed*; -ly.] In a terrified manner; under the influence of fear.

***ĕf-frā-y-ing**, ***ĕf-fra-yng**, *pr. par., a. & s.* [EFFRAY, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: Fear, terror.

***ĕf-frē-nā-tion**, *s.* [Lat. *effrenatio*, from *ef=ex=*out, and *frenum*=a bridle.] Unbridled impetuosity, rashness, or license.

***ĕf-frōnt-ĕd**, *a.* [Fr. *effronté*.] Shameless, bold-faced, impudent.

ĕf-frōnt-ĕr-y, *s.* [Fr. *effronterie*, from *effronté*=bold-faced, shameless; Lat. *effrons*=shameless; *ef=ex=*out, and *frons*=the countenance.] Impudence, shamelessness; assurance or boldness beyond the bounds of modesty or shame.

"The wretched man behaved with great effrontery during the trial."—Macaulay: *Hist. Eng.*, ch. iv.

***ĕf-frōnt-u-ōus-ly**, *adv.* [EFFRONTERY.] In a shameless, impudent manner, with effrontery or boldness.

ĕf-fūl-crāte, *a.* [Lat. *ef=ex=*out, and *fulcrum*=a prop, a support.]

Bot.: Applied to buds from under which the usual leaf has fallen.

***ĕf-fūl-ĕ**, *v. i. & t.* [Lat. *effulgeo*=to shine out; *ef=ex=*out, and *fulgeo*=to shine.]

A. Intransitive:

1. *Lit.*: To shine brightly; to send out a bright light.

2. *Fig.*: To become famous or illustrious.

B. Transitive:

1. To shoot out, to emit.

2. To exhibit or display brightly.

***ĕf-fūl-ĕnce**, *s.* [Latin *effulgens*, pr. par. of *effulgeo*.] A flood of brightness, splendor, or luster.

"Effulgence of my glory."—Milton: *P. L.*, vi. 680.

***ĕf-fūl-gĕnt**, *a.* [Lat. *effulgens*, pr. par. of *effulgeo*.] Shining brightly; diffusing a bright light.

"In the western sky the downward sun

Looks out effulgent."

Thomson: *Spring*, 189, 190.

ĕf-fūl-gĕnt-ly, *adv.* [Eng. *effulgent*; -ly.] In a bright manner; brightly, splendidly, with effulgence.

***ĕf-fūm-a-blī-i-t-y**, *s.* [Eng. *effum(e)*; -ability.] The quality of flying off or being dispersed in fumes; the quality or state of being volatile.

***ĕf-fūm-a-ble**, *a.* [Eng. *effum(e)*; -able.] Volatile; capable of dispersing in vapors.

***ĕf-fū-me**, *v. t.* [Lat. *effumo*=to emit smoke or vapor; *ef=ex=*out, and *fumus*=smoke.] To breathe or puff out; to emit as a breath or vapor.

***ĕf-fūnd**, *v. t.* [Lat. *effundo*; *ef=ex=*out, and *fundo*=to pour.] To pour out, to shed.

***ĕf-fūse**, *v. t. & i.* [Lat. *effusus*, pa. par. of *effundo*=to pour out.]

A. Trans.: To pour out, to emit, to diffuse.

"Ye that keep watch in heaven, as earth asleep

Unconscious lies, effuse your mildest beams."

Thomson: *Hymn*.

B. Intrans.: To be emitted or poured forth; to emanate.

ĕf-fūs-e, *a. & s.* [Lat. *effusus*, pa. par. of *effundo*.] **As an adjective**:

A. Ordinary Language:

1. Profuse; poured out or emitted freely.

"His pride, or emptiness applies the straw
That tickles little minds to mirth effuse."

Young: *Night Thoughts*, vii. 764, 765.

2. Dissipated, extravagant.

II. Technically:

1. *Bot.*: Applied to an inflorescence, or to a kind of panicle with a very loose one-sided arrangement.

2. *Conchol.*: Applied to shells where the aperture is not whole behind, but the lips are separated by a gap or groove.

***B. As subst.**: Effusion, outpouring, shedding, waste.

"The air hath got into my deadly wounds,
And much effuse of blood doth make me faint."

Shakespeare: *Henry VI.*, Pt. III., ii. 6.

ĕf-fūg-ing, *pr. par., a. & s.* [EFFUSE, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The same as EFFUSION (q. v.).

ĕf-fū-gion, ***ĕf-fu-syon**, *s.* [Latin *effusio*=a pouring out, from *effusus*, pa. par. of *effundo*.]

I. Ordinary Language:

1. *Literally*:

The act of pouring out.

"Our blessed Lord commanded the representation of his death and sacrifice on the cross, should be made by breaking bread and effusion of wine."—Taylor: *Worthy Communicant*.

(2) That which is poured out.

"Purge me with the blood of my Redeemer, and I shall be clean; wash me with that precious effusion, and I shall be whiter than snow."—King Charles: *Eikon Basilike*.

2. *Figuratively*:

(1) A shedding, as of blood.

"Stop effusion of our Christian blood,
And 'stablish quietness."

Shakespeare: *Henry VI.*, Pt. I., v. 1.

(2) A pouring out or bestowing freely.

"Such great force the gospel of Christ had then upon men's souls, melting them into that liberal effusion of all that they had."—Hammond: *On Fundamentals*.

(3) The act of pouring out or uttering words; utterance.

"Endless and senseless effusions of indigested prayers, oftentimes disgrace, in the most unsufferable manner, the whitest part of Christian duty toward God."—Hooker.

(4) Words or sentiments uttered; utterances. (Generally in contempt.)

"The light effusions of a heedless boy."

Byron: *Reply to Some Elegant Verses*.

II. Pathology:

1. The escape of any fluid out of the vessel containing it into another part.

2. The secretion of fluid from the vessels, as of lymph or serum, on different surfaces.

¶ Crabb thus discriminates between *effusion* and *ejaculation*: "*Effusion* signifies the thing poured out, and *ejaculation* the thing ejaculated or thrown out, both signifying a species of verbal expression; the former either by utterance or in writing; the latter only by utterance. The *effusion* is not so vehement or sudden as the *ejaculation*; the *ejaculation* is not so ample or diffuse as the *effusion*; the *effusion* is seldom taken in a good sense; the *ejaculation* rarely otherwise. The *effusion* commonly flows from a heated imagination uncorrected by the judgment: it is therefore in general not only incoherent, but extravagant and senseless; the *ejaculation* is produced by the warmth of the moment, but never without reference to some particular circumstance. Enthusiasts are full of extravagant *effusions*; contrite sinners will often express their penitence in pious *ejaculations*." (Crabb: *Eng. Synon.*)

¶ *Effusion of gases*: The passage of gases into a vacuum, through a minute aperture not much more or less than 0.013 millimeter in diameter, in a thin plate of metal or of glass. (*Ganol.*)

ĕf-fū-sive, *a.* [As if from a Lat. *effusivus*, from *effusus*, pa. par. of *effundo*.]

1. Pouring out freely or widely.

"The North-east spends its rage: th' effusive South
Warms the wide air."—Thomson: *Spring*, 144, 146.

2. Spread widely.

"The walls, the floor,
Wash'd with th' effusive wave are purged of gore."
Pope: *Homer's Odyssey*, xlii. 479, 480.

3. Profuse, free.

ĕf-fū-sive-ly, *adv.* [Eng. *effusive*; -ly.] In an effusive manner, widely, profusely.

ĕf-fū-sive-ness, *s.* [Eng. *effusive*; -ness.] The quality or state of being effusive.

ĕft, *s.* [A. S. *efete*.]

Zool.: The name popularly given to two series of lizard-looking animals, the first the genuine Lacertidae, which are reptiles, the other the Salamandridae, which are Amphibians. The former are land animals, the latter frequent the water. Sometimes the term *eft* is given to the land animals, and newt to the water ones, but in *Bell's British Reptiles* the term *eft* is used only once and is applied to a water species—the Common Smooth Newt, Small Newt, Eft or Evet (*Lissotriton punctatus*).

ĕft, ***ĕfte**, *adv. & a.* [A. S.]

A. As adverb:

1. Again, a second time, back, in return.

"And gif hym eft and eft evere at has neede."
P. Plowman, p. 260.

2. Soon, quickly, soon after.

"And eft aryued on this load with fulle grete naue."
Robert de Brunne, p. 24.

***B. As adj.**: Ready, quick, convenient.

"Yes, marry, that's the *eftest* way."—Shakespeare: *Much Ado*, iv. 2.

***ĕft-sōon**, ***ĕft-sōong**, ***ĕft-sone**, ***ĕft-sones**, *adv.* [Eng. *eft*, and *soon*.] Soon, soon after, shortly, quickly.

"Eftsoons the father of the silver flood,
The noble Thames, his azure head upraised."

Thompson: *Epithalamium*.

e. g., *phr.* [Lat.=*exempli gratia*.] For the sake of an example; for instance, for example.

ĕ-gād, *exclam.* [Probably a corruption of "by God."] An exclamation of surprise, admiration, or pleasure.

ē-gal, *a.* [Fr.] Equal, impartial, fair.

"Whose souls do bear an *egal* yoke of love,"
Shakesp.: *Merchant of Venice*, iii. 4.

*ē-gāl-i-tēe, *e-gal-i-ty, *s.* [Fr. *égalité*.] Equality.

ē-gal-ly, *e-gal-y, *adv.* [English *egal*; -ly.] Equally, in the same degree.

ē-gal-ness, *s.* [Eng. *egal*; -ness.] Equality.

"Such an *egalness* hath Nature made

Between the brethren,"

Sackville & Norton: *Ferrex and Porrex*, i. 2.

ē-gēr, or ē a-gre (gre as gēr), *s.* [EAGER, *s.*]

ē-gēr, e-gre, *a.* [EAGER.]

ēg-ēr-an, ēg-ēr-ane, *s.* [From *Eger* in Bohemia, where it occurs.]

Min.: The name given by Werner in 1817 to what is now called Vesuvianite (*q. v.*). The *British Museum Catalogue* makes it a variety of Idocrase.

Ē-gēr-i-a, Ē-gēr-i-a, *s.* [Lat.]

I. Of the forms *Egeria* or *Egeria*:

1. *Classic Mythol.*: A nymph or goddess who had a fountain at Aricia. Thither Numa Pompilius, the second king of Rome, was said to have repaired to hold converse with her, obtaining from her the laws which he promulgated, and directions for the worship of the gods.

2. *Astron.*: An asteroid, the thirteenth found. It was discovered by De Gasparis, on Sept. 13, 1850.

II. Of the form *egeria*:

1. *Zool.*: A genus of decapod short-tailed Crustaceans. *Egeria indica* inhabits the Indian seas.

2. *Bot.*: A genus of Hydrocharidaceæ.

*ē-gēr-mī-nāte, *v. i.* [Latin *egerminatus*, *pa. par.* of *egermino*; *e=ex=*out, and *germino=*to sprout; *germen=*a bud, a sprout.] To bud or sprout out; to germinate.

*ē-gēst, *v. t. & i.* [Latin *egestus*, *pa. par.* of *egero=*to carry out; *e=ex=*out, and *gero=*to carry.]

A. Trans.: To void, as excrement.

B. Intrans.: To void excrement.

*ē-gēst-ing, *pr. par., a. & s.* [EGEST.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The same as EGESTION (*q. v.*).

*ē-gēst-ion (ion as yūn), *s.* [Lat. *egestio*, from *egestus*, *pa. par.* of *egero*.] The act of voiding digested matter or excrement.

ēgg, *eg, *egee, *ele, *ey (pl. *egges, eggs, *eiren), *s.* [A. *S. egg*, pl. *æggra*; cogn. with Dut. *ei*; Icel. *egg*; Dan. *æg*; Sw. *ägg*; Ger. *ei*; Gael. *ubh*; Ir. *ugh*; Wel. *wy*; Lat. *ovum*; Gr. *ōon*.]

I. Ordinary Language:

1. In the same sense as II.

"If he ask an *egg*, will he offer him a scorpion?"—
Luke xi. 12.

2. The spawn or sperm of any creature.

"Therefore think him as the serpent's egg,
Which hatch'd, would, as its kind, grow mischievous,"
Shakesp.: *Julius Caesar*, ii. 1.

3. Anything fashioned in the shape of an egg; anything resembling an egg in form.

"There was taken a great glass-bubble with a long neck, such as chemists are used to call a philosophical *egg*,"—
Boyle.

II. Technically:

1. *Physiol. & Comp. Anat.*: Every animal tends to commence existence by developing from a fecundated egg or ovum, which exists even when the animal is viviparous, i. e., bears its young alive. In the human subject, in which it is called "ovum," not egg, it is a minute spherical body of about $\frac{1}{16}$ of an inch in diameter. [EGG-CELL, OVUM.] In general, the English term "egg" is used only of those animals which do not produce their young alive. All birds lay eggs, as do most reptiles, amphibians, and fishes. The egg of a bird is covered externally with a calcareous shell, immediately within which is a considerable thickness of white or albumen, and within this again a yellow vitellus, yolk or yelk, or protoplasm. [For its early state, see EGG-CELL.] When the chick is developed, it is nourished first by the albumen and then by the yelk, both of which it consumes prior to its exit from the shell. A bird's egg is thicker at one end than the other, hence leaves of such a form are called ovate. The eggs of reptiles are comparatively large, and have, as a rule, a shell possessing the aspect and consistence of parchment. In the amphibians the eggs are generally in floating glutinous chain-like masses. The roe of fishes is familiar to all. Of the invertebrate animals, the insects have the eggs which have excited most interest.

2. *Palæont.*: Fossil eggs have been found, it is reported, in Auvergne, in Madagascar, in New Zealand, &c. (Mantell: *Fossils British Museum*.)

• *The Mundane Egg*: The Phenicians, and from them the Egyptians, Hindoos, Japanese, and other ancient nations believed that the world was hatched from an egg made by the Creator. Orpheus sings of this theory.

egg-and-anchor, egg-and-dart, egg-and-tongue, *s.*

Arch.: The same as EGG-MOLDING (*q. v.*).

egg-apple, *s.* The Brinjal or Brinfall. The same as EGG-PLANT (*q. v.*).

egg-assorter, *s.* A device by which eggs are assorted according to quality; an egg-detector (*q. v.*).

egg-bag, *s.*

Zool.: The ovary.

egg-basket, *s.* One for standing eggs in to boil, and also to hold them when placed on the table.

egg-bald, *a.* Completely bald.

"I may give that *egg-bald* head

The tap that silences,"

Tennyson: *Harold*, v. 1.

egg-bearer, *s.*

Bot.: *Solanum ovigerum*.

egg-beater, *s.* A whip of wires or a set of wire loops rotated by gear while plunged in the egg contained in a bowl. Another form is a vessel contained in another, and a wire-gauze diaphragm through which the eggs pass when the vessels are reciprocated.

egg-bird, *s.*

Ornith.: A West Indian tern (*Hydrochelidon fuliginosum*), the eggs of which are collected for food.

egg-boiler, *s.* [EGG-GLASS, 1.]

egg-born, *a.* Produced or springing from an egg; oviparous.

egg-carrier, *s.* A means for holding eggs in the proper carrying position without jolting against each other during transportation. The frames have pasteboard, cloth, wire, or net pockets for the eggs.

egg-cell, *s.* The cell whence an egg ultimately develops. Haeckel and others regard every egg as originally a simple cell, and as such, an elementary organism, or an individual of the first order. In its earliest stage it consists only of the nucleus and protoplasm. The latter is known as the germinal vesicle, the former as the vitellus or yelk. Within the nucleus is a third body, called in ordinary cells the nucleolus, but in the egg-cell the germinal spot. In some cases there is also a nucleolus, or germinal point, but these last two parts are of inferior importance. [EGG.]

egg-cup, *s.* A cup-shaped vessel used to hold an egg at table.

egg-detector, *s.* An apparatus for showing the quality of eggs. They are placed upright in the holes in the lid of the dark chamber, and their transmitted light observed upon a mirror; their quality is determined by their translucency as evinced by the relative transmission of light, as an egg becomes more cloudy and opaque as it becomes spoiled.

egg-flip, *s.* A drink compounded of warmed ale, flavored with sugar, spice, spirit, and beaten eggs.

egg-glass, *s.*

1. A glass for holding an egg while eating it.

2. A sand-glass running about three minutes, as a guide for egg-boiling.

egg-hatching apparatus, *s.* An apparatus for the artificial hatching of eggs, which has been practiced from time immemorial in Egypt. [INCUBATOR; CALORIFERE.]

egg-hot, *s.* The same as EGG-FLIP (*q. v.*).

egg-molding, *a.*

Arch.: A peculiar molding in which a tongue dependent from the corona alternates with an oval boss whose major diameter is vertical like an egg set on end.

egg-nog, *s.*

A drink compounded very similarly to egg-flip, of eggs beaten up, sugar, and wine or spirit.

egg-plant, *s.*

1. The Brinjal or Bringall, *Solanum melongena* or *esculentum*.

2. *Solanum ovigerum*.

egg-sauce, *s.*

Cook.: Sauce prepared with hard-boiled eggs, chopped up fine.

egg-shaped, *a.*

Bot., &c.: Ovate, thicker at the lower end.

egg-shell, *s.* The calcareous envelope in which the softer parts of an egg are inclosed.

egg-slice, *s.* A kitchen utensil or slice for removing fried eggs from the pan.

egg-spoon, *s.* A small spoon used for eating eggs.

egg-tongs, *s.* A grasping implement for seizing and holding an egg.

egg-trot, *s.*

Man.: A slow jog-trot, such as one would adopt if carrying a basket of eggs.

eggs-and-bacon, *s.*

Bot.: *Linaria vulgaris*, (2) *Lotus corniculatus*, (3) *Narcissus incomparabilis bicoloratus*. All are so called from having two shades of yellow in their flowers. (Britten & Holland.)

eggs-and-butter, *s.*

Bot.: (1) *Linaria vulgaris*, (2) *Ranunculus acris*, (3) *R. bulbosus*. (Britten & Holland.)

eggs-and-collops, *s.*

Bot.: *Linaria vulgaris*.

ēgg, *eg-gen, *v. t.* [Icel. *eggja=*to goad, egg on; *egg=*an edge.] [EDGE, *s.*]

1. To make or give an edge to.

"I egg a garment with velvet or sylke."—Palsgrave.

2. To incite, to urge on, to stimulate, to instigate, to provoke or encourage to action.

"Study becomes pleasant to him who is pursuing his genius, and whose ardor of inclination eggs him forward."—Derham: *Physico-Theology*.

ēg-gē-bā, *s.* [A West African word.]

Weights and Measures: Half an "affa," or ounce.

*egge-ment, *s.* [Eng. *egg*, *v.*; -ment.] The act of egging on; incitement, instigation.

"Soth is that thurgh womannes eggement
Mankind was lorne, and damned ay to die,"
Chaucer: *C. T.*, 5, 262-3.

ēg-gēr (1), ēg-gar, *s.* [Eng. *egg*; -er.]

1. (Of the form *egger*): One who gathers eggs.

2. (Pl.) The name given to various moths, of the genera *Lasiocampa* and *Ereogaster*. All are of a reddish-brown color.

(1) *Grass egger*: *Lasiocampa trifolii*.

(2) *Oak egger*: *Lasiocampa quercus*.

(3) *Small egger*: *Eriogaster lanestris*.

egger-moths, *s.* The same as EGGER (1), 2 (*q. v.*).

ēg-gēr (2), *s.* [Eng. *egg*, *v.*; -er.] One who eggs on or incites another; an instigator.

ēg-gēr-ŷ, *s.* [Eng. *egg*; -ery.] A nest of eggs; a place where eggs are deposited; an ery or ary.

ēgg-ing, *eg-ginge, *eg-gunge, *eg-gyng, *pr. par., a. & s.* [EGG, *v.*]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of instigating or inciting; an instigation, an incitement.

"Tell me, how curst an *egging*, with a sting
Of lust, do these unwily dances bring,"
Cleaveland: *Poems*, &c., p. 105.

ēgg-lēr, *s.* [Eng. *egg*, *s.*; -ler.] A collector of or dealer in eggs; an egg-merchant.

"The *egglers* were busy getting ready their huge packing-cases for the road, sorting ducks' eggs from hens' eggs, and ranging each kind in its layer of straw."—
Macmillan's Magazine.

ē-gī-lōp-i-cal, *a.* [Eng. *egilop*(s); -ical.]

1. Pertaining to or of the nature of egilops.

2. Affected with or suffering from egilops.

ē-gī-lōps, *s.* [ÆGILOPS.]

ē-gīs, *s.* [ÆGIS.]

ē-gist-mēt, *s.* [AGISTMENT.]

ē-glān-du-lōse, ē-glān-du-lōus, *a.* [Lat. *e=*without, and Eng. *glandulose*, glandulous.]

Bot.: Without glands.

ēg-lan-tine, *eg-len-tere, *s.* [Fr. *églantine*; Prov. *aglantina*; O. Fr. *agient*; remotely from Lat. *aculeus=*a prickle. (Littré.)]

Bot.: (1) *Rosa eglanteria*, (2) *R. rubiginosa*, (3) *Rubus eglanteria*, (4) the woodbine, *Lonicera periclymenum*.

*ē-glōm-ēr-āte, *v. t.* [Latin *e=ex=*out, and *glomeratus*, *pa. par.* of *glomero=*to wind into a ball; *glomus=*a ball.] To unwind, as thread from a ball.

Egyptian architecture, s. Cave temples are found in Egypt, as in India, but the earliest form of Egyptian architecture is the pyramids, which form a distinct class by themselves, and present no points of resemblance with other structures. Their form is substantially invariable—a simple mass resting on a square, or sometimes approximately square base, with the sides facing, with slight deviations, toward the cardinal points, and tapering off gradually toward the top to a point, or to a flat surface, as a substitute for this apex. [PYRAMID.]

statues, owes many characteristic forms and effects to earlier cavern temples in Ethiopia. One of the most striking peculiarities of the style is the pyramidal character of the ascending lines; it is observed in the outline of the portal and the gigantic pylon, in walls, doorways, pedestals, and screens: it pervades the whole system, and must have been occasioned by circumstances connected with its origin. Egyptian architecture had its origin 2,222 years before Christ, and advanced and flourished under different dynasties. The first includes the two great dynasties of Theban princes who governed Egypt during her "most high and palmy state," when Thebes sent forth her armies to distant conquest. In the second period is comprised the erection of the Pyramids. The third includes the reigns of the Ptolemies and earlier Cæsars, under whom Egyptian architecture flourished in a second youth, and almost attained its original splendor. The essentially brilliant period of Egyptian art was in the middle of the twelfth century B. C., in the reign of Sesostris or Rameses, at Thebes. The monuments of this period comprise the remains of Homer's hundred-gated Thebes, the capital of ancient Egypt, the diameter of which city was two geographical miles each way; in Upper Egypt the well-preserved temples in the islands of Philæ and Elephantina of Syene, Bubos, &c. The Egyptian temples do not usually present, externally, the appearance of being columned, a boundary wall or peribolus girding the whole and preventing the view of the interior, except the tops of a lofty avenue of columns, with their superimposed terrace, of the tapering obelisks in some of the courts, or the dense mass of a structure which is the body of the temple itself, inclosing the thickly-columned halls. Boldness and breadth were studied in every part, and a gloomy grandeur was studiously secured to impress, without doubt, the worshippers with awe. The representations given in ancient painting show a remarkable love of uniformity of arrangement of their domestic houses and gardens. In an ordinary house a number of chambers were ranged round a rectangular court. The larger mansions sometimes consisted of an assemblage of such courts, the whole occupying a square or oblong plot. Sometimes a central group of buildings was surrounded by a narrow court. A spacious area often extended from front to rear, with a chief and side entrances at either end: the exterior had nothing of the ponderous character of temple structures, which would have been ill-suited to the wants and festivities of social life. Houses two and three stories high were common; but large mansions appear to have been low and extensive rather than lofty. The terraced top was covered by an awning or roof, supported on light graceful columns. The structures were of stone: the coverings of the apertures, as well as of the courts, were effected by immense blocks of stones laid horizontally. The walls were covered with rows of sculpture painted in bright colors. The capitals of the columns exhibit an immense variety; the most beautiful have a crater-like form, and appear like the projecting bell of a flower, with leaves standing out from the surface. The lotus, the sacred plant, is frequently typified.

Egyptian-bean, s. Probably the fruit of *Nelumbium speciosum*.

Egyptian-blue, s. A pigment of a brilliant color, made of hydrated protoxide of copper mixed with a very small quantity of iron.

Egyptian-era, s.

Chron.: An era, commencing like that of Nabonassar, in B. C. 747. The old Egyptian year consisted of 365 days, without any such intercalary period as our leap year. By 30 B. C. the commencement of the year, which in 747 had been on February 26, had moved backward to August 29. The astronomers of Alexandria, therefore, proposed that five days should be added to every fourth year. This proposal was adopted, the change commencing from B. C. 25.

Egyptian-jasper, s.

Min.: A variety of jasper with zones of brown and yellow. It is found in the desert between Cairo and Suez.

Egyptian-lotus, s.

Bot.: *Nymphaea lotus*.

Egyptian-pebble, s.

Min.: The same as EGYPTIAN-JASPER (q. v.).

Egyptian-rose, s.

Bot.: (1) *Scabiosa arvensis*, (2) *S. atropurpurea*. They have no affinity to the genuine genus *Rosa*.

Egyptian-thorn, s.

Bot.: *Acacia vera*.

Egyptian-vulture, s.

Ornith.: A small vulture, *Neophron percnopterus*, found in, though by no means confined to, Egypt. The Abyssinian traveler, Bruce, called it Pharaoh's Hen. [NEOPHRON.]

E-gyp-tól-ô-gêr, s. [Eng. *Egyptology*(y); -er.] One who is skilled in Egyptology.

E-gyp-tô-lôg-ic-al, s. [English *Egyptology*(y); -ical.] Pertaining to Egyptology; devoted to the study of Egyptology.

E-gyp-tól-ô-gist, s. [Eng. *Egyptology*(y); -ist.] The same as EGYPTOLOGER (q. v.).

"Or, as some Egyptologists persistently read it."—S. Birch, *LL. D.*, in *Trans. Bib. Arch. Soc.*, ii. 1-3.

E-gyp-tól-ô-gy, s. [Gr. *Aigyptos*=Egypt, and *logos*=a discourse.] The study of the antiquities of Egypt; that branch of knowledge which deals with the antiquities, ancient language, history, &c., of Egypt.

"His long life of work in the field of Egyptology."—*Trans. Bib. Arch. Soc.*, vi. 511.

êh, interj. [A. S. *ê*, *ed*; cf. Dut. *he*; Ger. *ei*.] [A.] An interjection expressive of doubt, inquiry, or surprise.

êh-lite, s. [From *Ehl*, where it occurs.]

Min.: A variety or sub-species of Pseudo-malachite.

êhr-ên-bêrg-ite, s. [Ger. *ehrenbergit*, named after Christian Godfrey Ehrenberg, the celebrated German naturalist and microscopist.]

Min.: A rose-red mineral, nearly gelatinous when fresh, but on drying becoming fragile, pulverulent, and opaque. It is akin to Sphragidite. It is found in clefts in trachyte, in Siebengebirge. (*Dana*.)

êhr-êt-î-a, s. [Named after D. G. Ehret, a celebrated German botanical draughtsman.]

Bot.: The typical genus of Ehretiaceæ; they are shrubs or small trees, eight to twenty-five feet high, with the flowers, which are generally white, in corymbs or panicles. Some species bear eatable drupes. The root of *Ehretia buxifolia* is prescribed in India in chronic venereal affections. *E. serrata*, also from India, has a tough, light, durable wood.

êhr-êt-î-â-çê-a, s. pl. [Mod. Lat. *ehreti(a)*, and Lat. fem. pl. adj. suff. -aceæ.]

Bot.: Ehretiads, an order of Perigynous Exogæus, alliance Echiales. It consists of trees or shrubs, with a harsh pubescence. Leaves simple, alternate, without stipules; flowers grate; calyx inferior, five-parted; corolla monopetalous, tubular, with five segments; stamens five; ovary, two or more celled; fruit drupaceous; seed suspended, solitary in each cell. They are closely akin to Boraginaceæ. They are divided into two tribes: (1) *Tournefortiæ*, in which the leaves have albumen, and (2) *Heliotropæ*, in which they are destitute of albumen. The Ehretiads are trees or shrubs, from the tropics of both hemispheres. Lindley enumerated fourteen genera, and estimated the known species at 297.

êhr-êt-î-âds, s. pl. [Mod. Lat. *ehretia*, and Eng. pl. suff. -ads.]

Bot.: The name given to the order Ehretiaceæ (q. v.).

ei-dênt, a. [Corruption of *ay-doing*, i. e., always doing.] Diligent, careful, attentive. (*Scott*.) "The curate is playing at dice wi' Cornet Graham. Be eident and civil to them baith."—*Scott: Old Mortality*, ch. iv.

ei-dêr, s. [Sw. *ejder*; Icel. *ádur*, *ádur*(fugl); Dan. *eder*(fugl), *edder*(fugl); Ger. *eider*(gans).] 1. The same as eider-duck or any other species of the genus.

"The flinty couch we now must share
Shall seem with down of eider piled."

Scott: Lady of the Lake.

2. The same as eider-down (q. v.).

eider-down, s. The soft and elastic down of the eider-duck.

eider-duck, s. *Somateria mollissima*. The forehead and crown are blue, the back of the head, nape and temples green, the rest of the body variegated with white, greenish-yellow, buff, and black.

It is found in the Arctic regions, both of the Eastern and Western hemispheres. It is called also the St. Cuthbert's Duck, the Cuthbert or Cutbert Duck, the Great Black and White Duck, and the Colk Winter Duck.

ei-dô-grâph, s. [Gr. *eidos*=form, appearance; and *graphô*=to write, to draw.] An instrument for copying drawing, invented by Professor Wallace. It consists of a central beam of mahogany, sliding backward and forward in a socket whose axis passes through a longitudinal slit in the beam. Two equal wheels, one below each end of the beam, turn on axes that pass through pipes fixed near its extremities, and a steel chain passes over the wheels as a band by which motion may be communicated from one to the other. Two arms slide in sockets along the lower face of the wheels, just under their centers, one of which bears at its extremity a metallic tracer, having a handle by which its point may be carried over the lines of any design; while at the extremity of the other arm is a pencil, fixed in a metallic tube which slides in a pipe and is raised by a string, when required, the pressure on the paper being maintained by a weight. The wheels being equal in diameter, the arms attached to them, when once set parallel to each other, will remain so when the wheels are revolved.

***ei-dô-lôn, s.** [Gr.=a likeness, an image, and *eidos*=form, appearance.] An image, likeness, or representation; an apparition, an appearance.

ei-dô-scôpe, s. [Gr. *eidos*=form, appearance, and *skopeô*=to see.] An instrument on the principle of the kaleidoscope, which produces an infinite variety of geometrical figures by the independent revolution of two perforated metallic discs on their axes. It may be employed in conjunction with the magic-lantern, when rapidly rotated, causing flashing rays of light, forming singular combinations to appear upon the screen. Various colored glass discs may be used, producing striking variations and combinations of color.

ei-dôu-râ-nl-ôn, s. [Greek *eidos*=form, appearance, and *ouranos*=heavenly; *ouranos*=the heaven.] A representation of the heavens.

"The driving him [the Devil] out . . . by exorcisms and spiritual ejections."—Warburton: *Doctrine of Grace*, bk. ii., ch. iv.

2. *Law:* The act or process of ejecting or dispossessing a tenant of his tenancy.

¶ Action of ejection:

Law: An action wherein the title to certain lands and tenements may be tried and possession recovered in cases, when the claimant has a right of entry. It is begun by the serving of a writ of ejectment on the tenant in possession, setting forth that the plaintiff in the action lays claim to the estate in question, and calling upon all interested to appear within a certain time and defend their right, failing which the tenant in possession will be ejected.

"The action of ejectment has, I may add, been rendered an easy and expeditious remedy to landlords whose tenants are in arrears, or who hold over after their term has expired or been determined. For every landlord who has a right of re-entry in case of non-payment of rent, when half a year's rent is due and no sufficient distress is to be had, may serve a writ of ejectment on his tenant, to fix the same upon some notorious part of the premises, which shall be valid, without any formal re-entry or previous demand of rent. And a recovery in such ejectment shall be final and conclusive, both in law and equity, unless the rent and all costs be paid or tendered within six calendar months afterward."—Blackstone: *Comment.*, bk. iii., ch. 7.

ê-jêct'-tôr, *s.* [Latin, from *ejectus*, *pa. par. of ejicio*.]

1. *Ord. Lang.*: One who or that which ejects, throws, or drives out.

2. *Mach.*: A device wherein a body of elastic fluid, such as steam or air, under pressure and in motion is made the means of driving a liquid such as water or oil. The effect of a body of escaping steam in setting liquids in motion was observed long ago, but the most notable instance is the Giffard Injector [INJECTOR], which is used as a feed-water pump for steam-boilers. The ejector acts on a similar principle, but is applied to eject or lift liquids.

3. *Firearms:* That device in a breech-loading firearm which withdraws the empty cartridge-case from the bore of the gun.

4. *Shipbuild.*: A device on shipboard for carrying up the ashes from the stokeholds of steamships and discharging them overboard. The ashes are shoveled into a box, and a steam-jet being driven into the mouthpiece of the pipe, causes an induced current of air, which carries the ashes along with it up the pipe, and overboard above the water-line.

ejector-condenser, s.

Steam-eng.: A form of condenser worked by the exhaust steam from the cylinder. The apparatus consists essentially of three concentric tubes terminating in conoidal nozzles, and opening into the hot well or waste-water receptacle by a common and gradually widening or trumpet-shaped mouthpiece; the inlet-tube is in communication with the water-tank from which the current of injection water is obtained, while each of the other tubes conveys the exhaust steam from one of the cylinders. In starting, steam is admitted, and passing along the axial-pipe, issues at the nozzle, drawing with it water from the cold-water pipe, which condenses the steam from the exhaust passages of the respective cylinders, and has momentum enough to carry the condensed steam and itself to the hot-well.

*êj-u-lâ-tion, *s.* [Latin *ejulatio*, from *ejulo*=to cry out, to wail.] A wailing aloud, an outcry, mourning, or lamentation.

Fruit inclosed within the persistent calyx, ultimately succulent. Found in the Northern Hemisphere both in the Eastern and Western Worlds. Lindley, in 1845, enumerated four genera, and estimated the known species at thirty.

ē-lā-āg-nūs, *s.* [Greek *alaia*gnos, *eleagnos*=a Baetian marsh plant (*Myrica Gale*).]

Bot.: Oleaster or Wild Olive-tree. A genus of plants, the typical one of the order Eleagnaceæ (*q. v.*). The fruit of *E. orientalis*, called in Persia Zinzeyd, is eaten in that country, as are the drupes of *E. arborea*, *E. conferta*, and others, in Nepal. The honey derived from the very fragrant flowers of *E. orientalis* and *E. angustifolia* is regarded in some parts of Europe as a remedy for malignant fevers. (*Lindley*.)

ē-lā-lā, *s.* [Gr. *elaia*=the olive-tree, with which *elaia* agrees in furnishing oil.]

Bot.: A genus of Palms, tribe Cocceæ, and the spiny section of that tribe. It is dioecious, or monoecious; the flowers, especially the males, in dense masses, packed very closely together; the fruit is partly three-sided, but somewhat irregular. *Elais guineensis*, the Maba or Oil Palm of the West African coast, has heads of large fruits. The outer or fleshy part of the fruit is boiled in water, when the oil rises to the surface and may be skimmed off. In its native country it is used for butter. It constitutes one of the chief commercial products of Western Africa. *E. melanococca* also furnishes oil. Both species also yield by manufacture palm wine.

ē-lā-ō-car-pā-qē-ā, *s. pl.* [Mod. Lat. *elæocarp(us)*, and Lat. fem. pl. adj. suff. *-aceæ*.]

Bot.: An old order of plants now reduced to Elæocarpeæ, a tribe of Tiliaceæ (*q. v.*).

ē-lā-ō-car-pē-ā, *s. pl.* [Mod. Lat. *elæocarp(us)*, and Lat. fem. pl. adj. suff. *-eæ*.]

Bot.: Elæocarps. A tribe of Tiliaceæ, having lacerated petals, and the anthers opening by a transverse valve at the apex.

ē-lā-ō-car-pūs, *s.* [Gr. *elaio*s=the wild olive, the oleaster, or *elaia*=the olive tree, and *kurpos*=fruit.]

Bot.: A genus of Tiliaceæ, the typical one of the tribe Elæocarpeæ (*q. v.*). It consists of large trees or shrubs found in the southeast of Asia, in Australia, and New Zealand. The stones of the fruit of *E. Canitrus* are strung into necklaces. *E. Hinatu* furnishes in New Zealand a good black dye. The natives of India eat the fruit of some species in their curries.

ē-lā-ō-cōc-ca, *s.* [Gr. *elaio*s=the wild olive, or *elaia*=the olive tree, and *kokkos*=a berry.]

Bot.: A genus of Euphorbiaceæ, tribe Crotonææ. The pressed seeds of *Elæococca verrucosa*, a Japanese plant, furnish oil for burning, as do those of the Chinese *E. vernicia* oil for mixing with paint.

ē-lā-ō-dēn-drē-ā, *s. pl.* [Modern Lat. *elæodendr(on)*, and Lat. fem. adj. suff. *-eæ*.]

Bot.: A tribe of Celastraceæ having drupaceous fruit.

ē-lā-ō-dēn-drōn, *s.* [Gr. *elaio*s=the wild olive, or *elaia*=the olive, and *dendron*=a tree.]

Bot.: A genus of Celastraceæ, the typical one of the tribe Elæodendreeæ (*q. v.*). Calyx five-parted, petals five, linear, oblong anthers, five on the margin of a five-angled fleshy disc; nutone to two-celled. The drupes of *Elæodendron kuba* are eaten in the Cape of Good Hope, while the fresh bark of *E. roxburghii*, rubbed with water, is used by the Hindus as an external application to swellings of all kinds.

ē-lā-ō-lite, *s.* [Gr. *eleolith*; Gr. *elaio*s=the wild olive, the oleaster, or *elaia*=the olive tree, and *lithos*=stone.]

Min.: A variety of nephelite or nepheline from Arkansas.

ē-lā-ōm-ēt-ēr, **ōl-āi-ōm-ē-tēr**, *s.* [Gr. *elaion*=olive oil, and *metron*=a measure.] An instrument for detecting the adulteration of olive oil.

ēl-ā-ōp-tēne, **ē-lā-ōp-tēn**, *s.* [Gr. *elaion*=oil, and Eng., &c., *optene* (*q. v.*).]

Chem.: A term applied to the more volatile portion of a natural essential oil.

ēl-ā-ō-sē-lī-nī-dm, *s. pl.* [Mod. Lat. *elaiose-lin(um)*, and Lat. fem. pl. suff. *-ida*.]

Bot.: A family of Apiceæ, umbelliferous plants.

ēl-ā-ō-sē-lī-nūm, *s.* [Gr. *elaio*s=the wild olive, or *elaia*=the olive, and *selinon*=a kind of parsley.]

Bot.: A genus of Apiceæ, the typical one of the family Elæoselinidæ (*q. v.*).

ēl-ā-īc, *a.* [Fr. *elaïque*, from Gr. *elaion*=oil.]

[OLEIC.]

elaic-acid, *s.* [OLEIC ACID.]

ēl-ā-ī-dāte, *s.* [Gr. *elaion*=oil; *d* euphonic, and *-ate* (*Chem.*) (*q. v.*).]

Chem.: A salt resulting from the combination of elaidic acid with a base.

ē-lā-īd-īc, *a.* [Gr. *elaion*=oil; *d* euphonic; *-ic*.]

elaidic-acid, *s.*

Chem.: A fatty acid, isomeric with oleic acid, formed by the action of nitrous acid on oleic acid. Elaidic acid, $C_{17}H_{33}CO_2H$, crystallizes out of alcohol in shining plates, which melt at 45°.

ē-lā-īd-in, *s.* [Gr. *elaion*=oil; *d* euphonic, and *-in* (*Chem.*) (*q. v.*).]

Chem.: A solid isomeric modification of olein, produced by the action of nitrous acid (or of nitric acid in contact with mercury) on olein. It has never been obtained sufficiently pure for analysis, but may be partially purified by dissolving it in ether, cooling the solution to 0°, and washing the deposit with ether. Elaidin melts at 32° is nearly insoluble in alcohol, but dissolves readily in ether.

ē-lā-in, *s.* [Gr. *elaion*=oil.] [OLEIN.]

ē-lāi-ōd-īc, *a.* [Gr. *elaio*dēs=like an olive, oily.] [RICINOLEIC.]

elaiodic-acid, *s.* [RICINOLEIC-ACID.]

ē-lāi-ōm-ē-tēr, *s.* [ELÆOMETER.]

ēl-āi-dē-hŷde, *s.* [Gr. *elaion*=oil, and Eng., &c., *aldehyde* (*q. v.*).]

Chem.: A solid isomeric modification of aldehyde (*q. v.*).

ē-lām-ite, *s.* One of the citizens of ancient Elam or Persia.

***ē-lāmp-lŷng**, *a.* [Pref. *e*=out, and Eng. *lamp* (*q. v.*).] Shining.

"As when the cheerful sun, elamping wide,
Glads all the world."

G. Fletcher: *Christ's Victory*, l.

ē-lan, *s.* [Fr., from *élancer*=to dart.] Ardor; zeal; enthusiasm.

***ē-lan-qe**, *v. t.* [Fr. *élancer*: *é*=out, and *lancer*=to throw.] To throw or cast out; to discharge; to cast or shoot as a dart.

***ē-lan-q**, *pr. par., a. & s.* [ELANCE.]

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As subst.*: The act of shooting, casting, or darting out.

ē-lānd, *s.* [Dut.=elk.]

Zool.: *Oreos hoselaphus*, *Oreos canna*. The Cape Elk, a large antelope about the size of a horse and of heavy make, like that of an ox, but with long, nearly straight, erect horns. It is slower in movement than most of its congeners. It is susceptible of domestication. It is found in South Africa, where its flesh is highly esteemed.

"And the gemsbok and eland unbent recline."

Thos. Pringle: *Afar in the Desert*.

ē-lā-nēt, *s.* [ELANUS.]

ē-lā-nūs, *s.* [Etym. doubtful.]

Ornith.: A genus of raptorial birds, placed by Swainson under his sub-family Cymindinæ, or Kites. Example, *Elanus melanopterus* of South Africa. This is sometimes called the Elanet.

ē-lā-ō-lite, *s.* [ELEOLITE.]

ē-lā-ōp-tēn, *s.* [ELEOPTENE.]

ēl-ā-phine, *a.* [Gr. *elaphos*=a stag; Eng. adj. suff. *-ine*.]

Zool.: Of or pertaining to a stag; resembling a stag.

ēl-ā-phō-mŷ-qēg, *s. pl.* [Gr. *elaphos*=a deer.]

Bot.: A genus of Ascomycetous Fungi. The best known species are *Elaphomyces granulatus*, *E. variegatus*, and *E. muricatus*. Some herbalists sell them as lycoperdon nuts.

ē-lā-phrī-ūm, *s.* [Gr. *elaphria*=lightness.]

Bot.: A genus of Amyridaceæ. *Elaphrium tomentosum* has been said to furnish the balsamic bitter resin called Tacamahac. Family Burseridæ.

ēl-ā-phrūs, *s.* [Gr. *elaphros*=light.]

Entom.: A genus of Carabidæ. They have prominent eyes.

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, aq; expect, Xenophon, exist. ph = f. -cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bel, del.

ē-lāp-i-dæ, *s. pl.* [Mod. Lat. *elap(s)*, and Lat. fem. pl. adj. suff. *-idæ*.]

Zoöl.: A family of Colubrine Snakes, having a short rounded head covered with plates. There are poisonous fangs, which are smaller than in the Viperine Snakes, but very deadly. The skin of the neck is loose, and can be distended into a hood. The tail is long and tapering, with a double row of plates beneath. The Cobra di Capello (*Naja tripudians*) belongs to this family.

***ē-lāp-i-dā-tion**, *s.* [Latin *elapidatio*, from *elapido*=to clear of stones; *e=ex*=out, and *lapis* (genit. *lapidis*)=a stone.] The act of clearing of stones.

ē-lāps, *s.* [An obsolete spelling for Gr. *elaps*.] [*ELAPS*.]

Zoöl.: A genus of snakes, the typical one of the family Elapidæ. It contains the Harlequin Snakes.

ē-lāpse, *v. i.* [Lat. *elapsus*, pa. par. of *elabor*=to glide out or away; *e=ex*=out, and *labor*=to glide.] To glide or pass away silently, as time; to slip away.

"In these romantic wars several centuries elapsed."—Mickle: *Hist. of Discovery of India*.

ē-lāpsed, *pa. par. or a.* [*ELAPSE*.]

ē-lāps-ing, *pr. par., a. & s.* [*ELAPSE*.]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As *subst.*: The act of slipping, gliding, or passing away.

***ē-la-quē-āte**, *v. t.* [Lat. *elaequeus*, pa. par. of *elaequeo*=to set free from a snare; *e=ex*=out, and *laqueus*=a noose, a snare.] To disentangle, to set loose or free.

***ē-la-quē-āt-ēd**, *pa. par. or a.* [*ELAEQUEATE*.]

***ē-la-quē-āt-ing**, *pr. par., a. & s.* [*ELAEQUEATE*.]

A. & B. As *pr. par. & particip. adj.*: (See the verb.)

C. As *subst.*: The act of disentangling, setting free, or loosing.

ē-lās-mō-brān-chi-āte, *a.* [*ELASMOBRANCHII*.]

Zoöl.: Pertaining to the Elasmobranchii.

ē-lās-mō-brān-chi-l, *s. pl.* [Gr. *elasma*=metal beaten out, a metal plate, and *branchia*=gills.]

1. Zoöl.: An order of fishes containing the Sharks, Rays, and Chimæras. There are no cranial bones, the skull is without sutures, the gills fixed and shaped like pouches. The exoskeleton consists of a placoid expanse of granular tubercles or spines; the endoskeleton is cartilaginous. The ventral fins are far back. The heart has but one auricle and one ventricle. The order is nearly coextensive with Cuvier's Cartilaginous Fishes and the Placoidæ of Agassiz. It is divided into two orders, Holocephali and Plagiostomi.

2. Palæont.: The order has existed from remote Silurian times till now.

ē-lās-mō-dūs, **ē-lās-mō-dōn**, *s.* [Gr. *elasma*=metal beaten out, and *odus*=a tooth.]

Palæont.: A genus of Chimæroid fishes from the Eocene beds.

ē-lās-mōse, *s.* [Gr. *elasma*=metal beaten out, a metal plate, and Eng. suff. *-ose*.]

Mineralogy:

(1) The same as *ALTAITE* (q. v.).

(2) The same as *NATAGITE* or *ELASMOSINE* (q. v.).

ē-lās-mō-sine, *s.* [Ger., Eng., &c., *elasmose*, and Eng., &c., suff. *-ine*.]

Min.: The same as *NATAGITE* (q. v.).

ē-lās-mō-thēr-i-ūm, *s.* [Gr. *elasma*=metal beaten out, and *thērion*=a wild animal.]

Palæont.: A Pachyderm, family Rhinocerotidæ, found in the Post-pliocene beds in various parts of Europe.

ē-lās-tic, ***ē-lās-tick**, ***ē-lās-tic-al**, *a.* [From Gr. *elao*, fut. *elaso*=to drive; Low Lat. *elasticus*; Fr. *élastique*.]

1. Literally:

1. Having the power or property of returning with a spring to the form from which it has been bent, pressed, or distorted; having the inherent property or quality of recovering its original form or volume after the removal of any external force which has altered that form or volume; springy, rebounding.

"The membrane is an elastic substance capable of being drawn out."—Paley: *Natural Theology*, ch. iii.

2. Soft, springy.

"A step that seemed Caught from the pressure of elastic turf."—Wordsworth: *Excursion*, bk. vi.

II. Figuratively:

1. Admitting of extension, not confined with certain narrow limits; as, an elastic conscience.

fāte, **fāt**, **fāre**, **amidst**, **whāt**, **fāll**, **father**; **wē**, **wēt**, **hēre**, **camel**, **hēr**, **there**; **pine**, **pl̄t**, **sīre**, **sīr**, **marine**; **gō**, **pōt**, **or**, **wōre**, **wōlf**, **wōrk**, **whō**, **sōn**; **māte**, **cūb**, **cūre**, **unite**, **cūr**, **rūle**, **fūll**; **tr̄y**, **S̄yrian**. **æ**, **œ**=**ē**; **ey**=**ā**. **qu**=**kw**.

2. Readily recovering from depression or exhaustion; not permanently giving way to depression: as, elastic spirits.

"A trifle now sufficed to depress those elastic spirits which had borne up against defeat, exile, and penury."—Macaulay: *Hist. Eng.*, ch. iv.

¶ Elastic force of gases:

Nat. Phil. (of gases): That property of gases by which their particles are constantly repelling each other, so that the gases tend every moment to diffuse themselves through a wider and wider area. Vapors also, which are really gases, possess an elastic force.

elastic-bands, *s.* Bands made of caoutchouc, naked or covered. The former are cut from flattened cylinders of rubber of proper diameter and thickness between a duplicate series of circular knives acting after the manner of shears; the latter are made by cutting continuous slips from a sheet of vulcanized rubber of the required thickness, wound upon a reel, by means of a knife with slide-rest motion. These strips are then covered with cotton or silk, and woven in an endless web. [*CAOUTCHOUC*.]

elastic-bitumen, *s.*

Min.: The same as *ELATERITE*.

elastic-bulb syringe, *a.* A syringe having a bulb of caoutchouc, the expansion and contraction of which acts as a pump.

elastic-curve, *s.* A curve formed by an elastic blade fixed horizontally by one of its extremities in a vertical plane, and loaded at the other extremity. The loaded end by its gravity bends the blade into a curve.

elastic-fabric loom, *s.* A loom having mechanical devices for stretching the rubber threads or shirrs, and holding them at a positive tension while the fabric is woven.

elastic-fluid, *s.* A fluid which has the property of expanding in all directions after the removal of external pressure, as the air.

elastic-goods, *s. pl.* Goods having elastic cords, called shirrs, inserted in a fabric or between two thicknesses.

elastic-ligaments, *s. pl.*

Anat.: Strong yellowish bands of elastic or fibrous tissue, with a small quantity of areolar tissue, found in the ligaments of the jaw, &c.

elastic mineral-pitch, *s.* A brown, massive, elastic variety of bitumen.

elastic-mold, *s.* Elastic molds of glue for taking casts of undercut objects were invented by Douglas Fox. The body to be molded is oiled and secured about an inch above the surface of a board, and is then surrounded by a wall of clay rather higher than itself, and about an inch distant from its periphery. Into this, warm melted glue, just fluid enough to run, is poured, completely enveloping the object. When cold, the clay wall is removed, and the mold delivered by cutting it into as many pieces as are required, either with a sharp knife or by threads previously placed in proper situations about the object. The pieces are then placed in their proper positions and bound together. The mold is designed particularly for taking casts in plaster-of-paris, but molten wax, if not too hot, may also be employed.

elastic-piston pump, *s.* A pump described in Dr. Gregory's *Mechanics*, consisting of an elastic bag provided with a valved board on top, and operating over a valved diaphragm. The trunk in which it operates is a square box, and the piston moves without friction against the trunk in which it works. The bag is of waterproof canvas or leather, with occasional rings. A somewhat similar pump, recommended for a bilge-water pump, and for pumping out leak-water, is known as 'racknell's', and was somewhat famous forty years ago. It had a pliable diaphragm of leather attached to the plunger-rod, and a valve on top like the pump just described. As the leather diaphragm was driven down and drawn up alternately, it filled with water and then lifted it, the lower valve rising as the plunger lifted. [*BAG-PUMP*.]

elastic-propeller, *s.* A form of ship's propeller invented by Macintosh, in which the blades are of flexible steel, which assume a more and more nearly disc form as the speed and consequent resistance of the water is increased.

elastic-tissue, *s.*

Anat.: Yellow fibrous tissue in most cases mixed with the fibers of areolar tissue. It occurs in the ligaments of the vertebrae, that of the jaw, &c., also in connection with arteries, veins, and lymphatics. It is distinguished from white fibrous tissue by its elasticity and yellow color. It is used in the animal structure whenever an extensible and highly elastic material is required.

elastic-type, *s.* Type made of compounds of caoutchouc, which will accommodate themselves to a somewhat uneven surface in printing. A form of elastic type may be lapped around a curved printing-surface.

***ē-lās-tic-al-l̄y**, *adv.* [Eng. *elastical*; *-ly*.] In an elastic manner; with a spring or rebound.

***ē-lās-tic-i-t̄y**, *s.* [Eng. *elastic*; *-ity*.]

I. Ordinary Language:

1. Lit.: The quality or condition of being elastic; that inherent property in bodies by which they recover their original form or volume after an external pressure or force has been removed; springiness.

2. Fig.: The power of recovering quickly from any depression or exhaustion; the quality of being capable of resisting depression; liveliness; as, *elasticity of spirits*.

¶ Limit of elasticity: The utmost limit or extent to which elastic bodies can be extended or compressed without destroying their elasticity.

II. Nat. Phil.: The property in virtue of which bodies resume their original form or volume, when the force which altered that form ceases to act. It may be developed by pressure, by traction, by flexion, or by torsion (q. v.). Solids vary much in elasticity. India-rubbers, ivory, glass, &c., possess much of it; lead, clay, &c., little. Gases and liquids are completely elastic.

***ē-lās-tic-nēss**, *s.* [Eng. *elastic*; *-ness*.] The quality or state of being elastic; elasticity.

***ē-lat**, *a.* [*ELATED*.] Elated.

"This king of kings proud was and elated."—Chaucer: *C. T.*, 14, 175.

ē-lā'te, *a.* [Latin *elatus*=lifted up; *e=ex*=out, and *latus*=borne, carried, pa. par. of *fero*=to bear or carry.]

1. Lit.: Lifted up, raised.

"With upper lip elate he grins."—Fenton: *Knight of the Sable Shield*.

2. Fig.: Raised or elevated in spirit; puffed up with success or pride.

"Oh how elate was I, when, stretched beside The murmuring course of Arno's breezy tide, Beneath the poplar grove I passed my hours."—Cooper: *Milton's Death of Damon*. (Trans.)

ē-lā'te, *v. t.* [*ELATE*, *a.*]

1. Lit.: To raise, to lift up.

"By the potent sun elated high."—Thomson: *Autumn*, 694.

II. Figuratively:

1. To elevate, to heighten, to raise.

"Truth divinely breaking on his mind, Elates his being, and unfolds his power."—Thomson: *Autumn*, 1,335, 1,336.

2. To raise, puff up, or elevate the spirits; to make elate.

"The church of Corinth was foolishly elated by spiritual pride."—Warburton: *Doctrine of Grace*, bk. i., ch. iv.

ē-lāt-ēd, *pa. par. or a.* [*ELATE*, *v.*]

***ē-lāt-ēd-l̄y**, *adv.* [Eng. *elated*; *-ly*.] In an elated, proud, or exultant manner; with elation.

"Nero, we find, defiled most in the foulest mires of luxury; and where do we find any so *elatedly* proud, or so unjustly rapacious as he?"—Beltham: *Disc.* on Luke xiv. 20.

***ē-lāt-ēd-nēss**, *s.* [Eng. *elated*; *-ness*.] The quality or state of being elated.

***ē-lāt-ēr** (1), **ē-lā-tōr**, *s.* [Eng. *elat(e)*; *-er*.] One who or that which elates.

"Not the effects of any internal elater of the water."—Boyle: *Works*, I. 49.

ē-lā-tēr (2), *s.* [Gr. *elatr*=a driver, a chariot-eer, from *elauo*=to drive.]

1. Ord. Lang.: A spring.

"Why should there not be such an elater or spring in the soul?"—Cutworth: *Serm.* (1676), p. 82.

II. Technically:

1. Entom.: The typical genus of the family Elateridæ (q. v.). Linnaeus comprised in his extensive genus all the family.

2. Botany: (Generally in pl.)

(1) The loose spiral fibers inclosed in membranous cases among which lie spores in the fructification of *Jungmannia*. When fully ripe, the membranous case generally disappears, the spiral fibers, which are powerfully hygrometric, uncurl, and the spores are dispersed. (*Lindley*.)

(2) Four elastic filaments attached about the middle of one side of the spores in *Equisetaceæ*. They are curled once or twice round the spore, uncoiling elastically when the spore is discharged.

ē-lā-tēr-i-dæ, *s.* [Gr. *elatr*, and Lat. fem. pl. adj. suff. *-idæ*.] [*ELATER*.]

Entom.: A family of *Coloptera* (beetles), tribe *Pentamera*, sub-tribe *Sternoxia*. It contains the insects placed by Linnaeus in his great genus *Elater*, now broken up into many genera.

ē-lāt-ēr-in, ē-lāt-ēr-ine, s. [Mod. Lat. *elaterium*], and Eng., &c., suff. -in (Chem.) (q. v.)
Chem.: $C_{10}H_{14}O_2$; the active principle contained in elaterium. It is extracted by boiling alcohol, purified by precipitation with water, washing with ether, and recrystallization from hot alcohol. It forms colorless hexagonal tables, insoluble in water.

ē-lāt-ēr-ite, s. [Ger. *elaterit*, from Gr. *elater*=a driver.]

Mineral.: A soft elastic subtranslucent mineral which has been called Elastic Bitumen, and from its resemblance to India-rubber has been termed also Mineral Caoutchouc. The specific gravity, 0.90-1.2, color brown. Composition: hydrogen, 83.7-88.2; hydrogen, 12.34-13.28. (Dana.)

ē-lā-tēr-ī-ūm, s. [Latin *elaterium*; Greek *elaterion*.]

1. **Phar.**: Obtained by cutting the fruit of *ecballium* lengthwise, and lightly pressing out the juice, which is strained through a hair-sieve and then is set aside to deposit; the sediment is poured on a linen filter, and dried on porous bricks at a gentle heat. Elaterium occurs in the form of thin flattened, or slightly incurved pieces, about one line thick, light, friable, of a green color, becoming gray on exposure to the light. It contains an active principle, elaterin, $C_{10}H_{14}O_2$. Elaterium is a very powerful drastic hydragogue purgative, used in dropsical affections, especially those connected with cardiac diseases; it sometimes causes nausea and great depression. Elaterium is apt to produce gastro-enteritis if incautiously given. The official preparation is *Pulvis Elaterii Compositus* (elaterium, ten grains; sugar of milk, ninety grains). (Garrod: *Materia Medica*.)

2. The name given by Richard to the kind of fruit called by Mirbel, Lindley, and others, *Regma* (q. v.).

ēl'-a-tērs, s. [ELATER (2).]

ēl'-a-tēr-ŷ, s. [Gr. *elater*=a driver, and Eng., &c., suff. -y.] Elasticity.

ē-lāt-i-nā-ċē-s, s. [Lat. *elatin(e)*, and Lat. fem. pl. adj. suff. -aceae.]

Bot.: Water-peppers. An order of plants, alliance Rutales. It consists of small annual plants, with fistular rooting stems, growing in marshy places. Leaves opposite, with interpetiolar stipules; sepals three to five; petals three to five; stamens generally six to ten; fruit a capsule with three to five cells. A small order, with about twenty-two known species scattered over the world.

ēl'-a-tī-ne, s. [Lat., from Gr. *elatinē*=a kind of toad-flax (*Linaria*). This is not the modern elatine.]

Bot.: The typical genus of the order *Elatinaceae* (q. v.).

ē-lāt-ing, pr. par., ā. & s. [ELATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The same as ELATION (q. v.).

ēl-lā-tion, s. [Lat. *elatio*, from *elatus*, pa. par. of *effero*.] The state of being elate; an elevation or inflation of mind arising from extreme pleasure, satisfaction, or success; pride, haughtiness, vanity.

"God began to punish this vain elation of mind, by withdrawing his favors."—Atterbury.

***ēl'-a-trōm-ēt-ēr, s.** [Gr. *elater*=a driver, from *elavō*=to drive, and *metron*=a measure.] A pressure-gauge for air or steam.

ēl'-ā-yle, s. [Gr. *elaion*=oil, and *hylē*=matter.]

Chem.: A name given to ethene (olefiant gas), C_2H_4 , by Berzelius, owing to its forming a heavy, yellow, oily liquid when it is mixed with chlorine gas. [Dutch Liquid (q. v.)]

ēl'-bōw, *el-bowe, s. [A. S. *elboga*, from *el*, cogn. with Lat. *ulna*=the elbow, and *boga*=a bending, a bow; cogn. with Icel. *albogi*, *ölbogi*, *ölbogi*; Dut. *elbeog*; Dan. *albue*; O. H. Ger. *clunpogo*; M. H. Ger. *elenboge*; Ger. *ellenbogen*.]

I. Ordinary Language:

1. **Lit.**: The joint uniting the forearm with the upper arm.

"The wings, that waft our riches out of sight,

Grow on the gamester's elbows."

Cowper: *Task*, iii. 760, 761.

2. **Figuratively**:

(1) Any flexure or bend, especially if obtuse; as of a road, a river, a pipe, a wall, a parapet, &c.

"Fruit trees, or vines, set upon a wall between elbows or buttresses of stone, ripen more than upon a plain wall."—Bacon.

(2) A support for the arm, elbow-high; as the arm of a chair.

"Elbows still were wanting; these, some say,

An alderman of Cripplegate contrived."

Cowper: *Task*, i. 60, 61.

II. Technically:

1. **Arch.**: A voussoir of an arch, which also forms part of a horizontal course; an obtuse angle of a wall.

2. **Carp.**: The junction of two parts having a bent joint; a knee or toggle joint; an abrupt angle.

3. **Joinery**: The sides or flanks of a paneled recess; especially the two small pieces of framing which occur on each side of a window immediately below the shutters when the window-jams are carried down to the floor, forming a slight recess.

† **Arabian Elenja**: A plant, *Trichilia emetica*. It is a large tree with villous shoots, pinnate leaves, five greenish-yellow petals, ten monadelphous stamens, and a three-valved, three-angled fruit. It grows in Yemen. The fruit, mixed with fragrant materials, is used by the Arab women to wash their hair. The fruit is emetic. The ripe seeds, mixed with sesamium oil, are made into an ointment for the cure of itch.

ēl'-cē-sā ites, ēl'-cē-sē-anŷ, s. pl. [Named after Elxai, a Jew, their founder.]

Ch. Hist.: A sect founded by Elxai, in the second century, during the reign of Trajan. He commingled Oriental philosophy with Judaism. He speaks respectfully of the Messiah, but whether or not he referred to Jesus of Nazareth is not quite plain, and Epiphanius doubts whether the Elcesaites should be regarded as a Christian or as a Jewish sect.

ēld, *ēld, *elde, s. & a. [A. S. *ylde*, *ylau*, *eld*, *eldu*, *eld*=old age, antiquity, from *eald*=old. (cf. Icel. *öld*=an age, *ald*=old age; Goth. *alds*=an age.)]

A. As substantive:

1. Old age; decrepitude or weakness arising from age.

2. Age.

"He was of grete elde and myght not trauaille."

Robert de Brunne, p. 3.

3. Old people.

4. People of olden times; former ages.

"The superstitious idle-headed *eld*

Receiv'd and did deliver to our age

The tale of Herne the Hunter, for a truth."

B. As substantive:

I. Ordinary Language:

1. One who is older or of greater age than one or more others; an older person; a senior in years.

2. One whose age gives him a claim to honor and respect.

(3) (Pl.): Ancestors, forefathers.

II. Technically:

1. **Among the Jews**: The rulers or magistrates of the people. The instinct of mankind considers the old fitter than the young to rule, and at first probably every "elder" was really pretty well advanced in life. But the designation ultimately came to be used more of office than of age. "The elders of the congregation," or simply "the elders," are mentioned as early as Lev. iv. 15. Seventy of them were appointed (Num. xi. 25). They are combined with the officers (Deut. xxiv. 10), with the princes (Ezra x. 8), with the priests (Lam. i. 19). In the New Testament they are described as having given currency to traditions (Matt. xv. 2), and taken a chief part in compassing the death of Jesus (Matt. xxvi. 59; xxvii. 20), &c. There were elders, also, of single towns, as of Succoth (Judges viii. 14), and of Jezreel (2 Kings x. 1).

2. **In the New Testament Church**: The same as presbyters. [PRESBYTER.]

bōll, bōy; pōūt, jōwl; cat, cēll, chorus, chīn, bench; go, gem; thīn, thīs; sin, ag; expect, Xenophon, exist. ph = f.
 -cian, -tian = shān. -tion, -sion = shūn; -tīon, -sīon = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

3. Among Calvinistic Churches: A body of men elected by the communicants from among their number to aid the minister in portions of his spiritual work. With the minister, they constitute the executive of the congregation.

"A general meeting of ministers and elders was called for the purpose of preventing such discreditable excesses."—*Macaulay: Hist. Eng.*, ch. xiii.

† For the difference between elder and senior, see SENIOR.

elder-son, *s.*

Among the *Albigenses* and other *Cathari*: The higher of two vicars attached to the bishop. (*Mosheim*.)

ēl-dēr (2), ***eller**, *s. & a.* [*A. S. ellen, ellem.*]

A. As subst.: A tree, *Sambucus* (q.v.). *Sambucus nigra* is the Common Elder. It has corky bark, two to four pairs of serrate leaflets, flowers in cymes, four to six inches in diameter, berry small globose, black, or rarely green. It is found in Europe, also in South Africa. The berries are used for the manufacture of wine; the flowers for making perfumes. *S. ebulus* is the Dwarf Elder, or Danewort.

† *Cut-leaved elder*: A cultivated variety of *Sambucus nigra*.

B. As adj.: Made of the hollowed branch of the elder-tree.

"If he give not back his crown again upon the report of an elder gun, I have no augury."—*Beaumont & Fletcher: Philaster*, i. 1.

elder-wine, *s.* Wine made from the fruit of the elder-tree. It is sometimes used to adulterate port wine.

elder-flowers, *s. pl.*

Mat. Medica: *Sambuci flores*; the recent flowers of *Sambucus nigra*. They yield *Aqua sambuci*, elder-flower water, when ten pounds of flowers are distilled with two gallons of water, one gallon being distilled over. The water is used in the mixing of medicines. It is a gentle stimulant. The berries of elder are used to give a special color and flavor to port wine. The coloring matter is obtained by digesting elder-berries with alum and water. A piece of flannel mordanted with aluminium acetate, heated for some time in the suspected wine, then washed, and immersed in water rendered faintly alkaline with ammonia, becomes green if the wine is pure; but dark brown if black elder is present. (*Blyth: Practical Chemistry*.)

ēl-dēr-lý, *a.* [*Eng. elder; -ly*.] Rather old; having passed middle age; bordering upon old age. "A young man, an elderly man, an old man, to preach early and late."—*Wilson: Art of Logic*, fol. 58.

Now if God's power should her election bind,
Her motions then would cease, and stand all still."
Davies: Immort. of the Soul.

*6. Discernment, discrimination, distinction.

"In favor, to use men with much difference and election is good; for it maketh those preferred more thankful, and the rest more officious."—*Bacon*.

7. Voluntary preference or choice.

"By his own election led to ill."

Daniel: Civil Wars, bk. vi.

*8. Those who are elected.

"Some of the House of Lords having procured themselves to be chosen by the people sat in parliament at the foot of the election."—*Ludlow: Memoirs*, i. 253.

II. Technically:

1. *Astrol. (pl.)*: Astrologers mean by this Term certain opportunities of Times, elected (or chosen) by Astrological Observations, as most fit for such a particular Business or Enterprise. (*Moxon*.)

2. *Theol.*: The act of God in selecting some persons from the race of man to be regenerated by His spirit, to be justified, to be sanctified, and to receive other spiritual gifts in this world, with eternal life in the next. The Calvinistic doctrine makes this election take place by God's mere good pleasure, without any foreseen merit in the individuals chosen. The Arminian one considers that God chooses those who He foresees will accept the offer of the Gospel and act as true Christians till death. The 17th of the Thirty-nine Articles of the English Church, headed "Of Predestination and Election," teaches Calvinism, though not of an extreme type. The 3d chapter of the Westminster Confession,

entitled "Of God's Eternal Decree," uses more decided language. The strongest adherents of this view are in the Presbyterian churches, though there is a tendency to soften the harsher features of the system. Many Baptists hold the same doctrine, as do the Calvinistic Methodists. The Arminian opinion is that of the Wesleyans, of many clergymen in the Church of England, and many Dissenters belonging to various denominations.

"The conceit about absolute election to eternal life, some enthusiasts entertaining, have been made remiss in the practice of virtue."—*Atterbury*.

General election:

1. In Great Britain, an election of Members of Parliament in all the constituencies throughout the United Kingdom.

2. In the United States, a presidential election.

"The *electorals* and countries belonging to electors."—*Wotton: Remains* (1620), p. 531.

electoral-college

1. *United States*: On Presidential election day in this country, which occurs on the Tuesday next after the first Mouday in November, instead of voting directly for the President and Vice-president of the United States, the qualified voters of each state vote for as many electors as their state has Senators and Representatives in Congress. The electors thus chosen constitute the Electoral-college. These electors meet in their respective states on the second Monday of January following, and vote by ballot for President and Vice-president. Three lists of the persons voted for, and the number of votes received by each, are certified to and signed by all the electors, and sealed. One list is deposited with the United States District Court Judge of the district in which the electors meet; the other two are sent by the Secretary of State to the President of the United States Senate, one by mail and one by messenger. On the second Wednesday of February the lists from the several states are opened by the President of the Senate in the presence of the two houses of Congress, and the votes are counted. The candidates receiving the highest number of votes are declared duly elected.

2. *Germany*: The body of princes entitled to elect the Emperor of Germany.

A. As adjective:

1. *Lit.*: Portaining or relating to electricity. *Spec.*—

(1) Containing electricity, exciting attraction in consequence of its electricity.

(2) Generating electricity; as, an *electric machine*.

(3) Operated upon by electricity, or by a body containing that subtle agent.

2. *Fig.*: Anything subtle, mysterious, and powerful, as, for instance, thought.

"And the wild sparkle of his eye seemed caught From high, and lightened with electric thought."—*Byron: Lara*, i. 26.

B. As subst.: A non-conductor of electricity, and in which, therefore, it can be accumulated. Examples, amber, shellac, the resins, wax, sulphur, glass, silk, dry paper, &c.

electric-alarm, *s.* An instrument, otherwise known as a thermostat, used for giving an alarm when the temperature rises to a point at which the instrument completes the circuit. This is used in stoves and hot-houses, to indicate excess or lack of temperature, and as a maximum thermometer-alarm or fire-alarm, which is made by carrying one platinum wire in connection with a battery and bell into the bulb of a mercurial thermometer, and another wire down the tube to the degree it is not desired to exceed. When the mercury rises to this point, the circuit is completed, and notice is given by the ringing of the bell. [THERMOSTAT; FIRE-ALARM.]

electric-annealing, *s.* Annealing by the heat produced by the passage of the electric current through the body to be annealed.

¶ In 1893 an American electrician discovered that a bar of iron immersed in a solution of sulphuric acid and cold water could be easily fused by the application of a strong electric current. The mode of procedure is as follows: The vessel employed is made of glass or porcelain, provided with a sheet lead electrode connected to the positive pole of a continuous-current generator, and contains a mixture of sulphuric acid and water. A flexible cable from the negative pole is connected to a strong pair of pliers with insulated handles. Taking in the pliers a piece of metal of any kind—iron, for instance—and immersing it in the acidulated water, the liquid is seen immediately to boil near the iron rod or plate, which latter is rapidly heated, and brought to a dazzling whiteness in a few seconds, and soon begins to melt. The heating is produced so quickly that neither the liquid nor the body of the metal rod has time to become hot. So rapid an evolution of heat necessarily means a tremendously high temperature. In a very short time a temperature of 7,000° Fahrenheit has been developed, which is proved by using a carbon rod instead of a metal one, when in a few moments amorphous carbon fragments are seen dropping off. With strong currents the enormously high temperature of 14,000° Fahrenheit, or nearly five times hotter than molten iron, has been produced.

electric-annunciator, *s.* A form of annunciator, used in large private houses and hotels, in which a current wire is the means of shifting the shield covering the number aperture on a dial, or in some other way indicating the number of the room. The guest in his room touches a button upon the wall; the circuit being made or broken, the effect is evidenced by the exposure of the room number on the dial. Other forms of annunciator are used for automatically recording future engagements, the electrical mechanism being dependent upon clock-work.

electric-apparatus, **electrical-apparatus**, *s.* Apparatus used for making discoveries in electricity, or for applying it to purposes useful to mankind. [ELECTRIC-BATTERY, ELECTRIC-MACHINE, &c.]

electric-aura

Pharm.: A current or breeze of electrified air employed as a mild stimulant in electrifying delicate parts, as the eye.

electric-balance, *s.* An instrument for measuring the attractive or repulsive forces of electrified bodies. A form of electrometer, consisting of a graduated arc supported by a projecting plate of brass which is attached to the perpendicular column. A wheel, the axis of which is supported on anti-friction rollers, and is concentric with that of the graduated arc, carries an index. Over this wheel, in a groove on its circumference, passes a line, to one end of which is attached a light ball of gilt wood, and to the other a float, which consists of a glass tube about one-fifth of an inch in diameter, terminating in a small bulb, so weighted that the index may point to the center of the graduated arc. The difference between the weights of the float when in and out of water is known, and the diameter of the wheel carrying the index is such, that a certain amount of rise or fall of the float causes the index to move over a certain number of graduations on the arc. The attractive or repulsive power on the ball is estimated by the rise or falling of the float in the fluid, and consequent motion of the index as shown by the graduated arc.

electric-bath, s.

1. In electro-plating, the solution used for depositing metal as contained in a vat or tank.

2. In electro-therapeutics, a bath with suitable arrangements, electrodes, and connections, for treating patients with electricity.

electric-battery, s.

1. *Primary or voltaic*: Two dissimilar substances, or metallic surfaces, both conductors of electricity, immersed in a jar of acidulated water or other exciting fluid, that will act more energetically on one than on the other, the two conductors being connected on the outside by a wire; the substance or surface less acted upon is the negative, and that more acted upon the positive pole, the current flowing from the positive to the negative. The electrodes, or poles, are most commonly made of carbon or zinc; platinum, gold, silver, copper, iron, tin and lead may be, but are not used, because of cost or high resistance of the metals. The common excitants are sulphuric or nitric acid, bicarbonate of potash, sulphate of copper solution, or sal-ammoniac solution.

2. *Secondary or storage*; also called *accumulator*: A series of metallic or other conducting plates, usually lead, divided from each other by a non-conducting substance, the whole being immersed in a water solution; through this solution a primary current is sent from the negative to the positive, decomposing the water, its oxygen forming with the lead on the positive pole a peroxide of lead, and leaving a deposit of metallic lead on the negative plate, the oxide then being destroyed by the hydrogen. When the primary discharge from the negative to the positive pole is stopped, the chemical affinity of the oxygen in the peroxide of lead for the metallic lead causes it to leave the positive for the negative pole, thereby causing a current from the positive to the negative pole, which is utilized as a primary current.

electric-bell, s.

1. *Magnetic or dynamic*: Two electro-magnets, parallel and in series, having at their extremity a vibrating armature in close proximity pivoted between them; fixed to this armature is a clapper vibrating between two gongs. The current passes through the fields, magnetizing the cores, and in generating an alternating current vibrates the armature and rings the bell.

2. *Battery-bell*: A single coil or bobbin of wire, wound around a steel core; a vibratory armature, pivoted at one end, and passing at a right angle by the core of the bobbin; at the other end of the armature is a clapper, a gong situated close to the clapper. A delicate spring is attached to the vibratory armature near the clapper, which, while the current is passing, operates against a set-screw placed for the purpose. The current passing through the bobbin to the set-screw magnetizing the core, attracts the armature, which in turn is repelled, the spring working against the screw. These alternate attractions and repulsions of the armature vibrate the clapper and ring the bell.

electric-boat, s. A boat propelled by electricity. The electricity drives a motor, which actuates a screw propeller. The current is generally supplied by a storage battery. From their noiselessness electric-boats are peculiarly available for nocturnal torpedo operations, and the universal equipment of modern warships with electric lighting and power plants makes their use possible at all points. This type is often termed an electric-launch, and most or all electric-boats fall under this category. (Sloan.)

electric-bridge, s. A term applied to an arrangement of electrical circuits used for measuring the resistance of an element of the circuit. The most generally known and used are the Wheatstone "bridge" or "balance," and that of the British Association. The former in substantial respects is adopted in the Siemens' universal galvanometer. The principle involved is, that an electrical circuit being divided into two branch-circuits, and again united, and the branches bridged or connected by a short cut, if the resistances in the branches on one side of the bridge are in the same ratio to each other as the resistances on the other side, no current will traverse the bridge; if the ratios are not equal, a current will traverse the bridge. (Knight.)

electric-cable, s. The same as TELEGRAPH CABLE (q. v.).

electric-calamine, s.

Min.: The same as HEMIMORPHITE (q. v.).

electric-candle, s. A modification of the arc form of electric light, in which the carbon pencils are parallel and separated by a layer of plaster of Paris. Invented in 1877 by Jablockhoff, a Russian engineer. This invention is noteworthy as having revived an interest in electric illumination.

electric-car, s. [ELECTRIC-MOTOR.]**electric-charge, s.**

Elect.: The accumulation or condensation of electricity in a Leyden jar, or anything similar.

electric-chimes, s. pl. A number of bells, graduated in tone from treble to bass, operated from a key-board or controlled by means of an electric-current.

electric-circuit, s. The passage of electricity from a body in one state to a body in another by means of conductors.

electric-clock, s.

Hor.: A dial with hands and going-train impelled by recurrent impulses from an electro-magnet. The first known clock of this kind was invented by Wheatstone, and exhibited by him in 1840. Appold, Bain, Shepherd and others have contrived clocks on the same principle. [ELECTRO-MAGNETIC CLOCK.]

electric-column, s. A galvanic pile invented by De Luc, consisting of different metals alternating with each other, the several couples being separated by paper.

electric-current, s. The discharge of electricity from one body to another.

electric-death, s. Death resulting from electricity discharged through the animal system. The exact conditions requisite for fatal results have not been determined. High electro-motive force is absolutely essential; a changing current, pulsatory or alternating, is most fatal. As applied to the execution of criminals, the victim is seated in a chair and strapped thereto. One electrode with wet padded surface is placed against his head or some adjacent part. Another electrode is placed against some of the lower parts, and a current from an alternating dynamo passed for 15 seconds or more. The potential difference of the electrodes is given at 1,500 to 2,000 volts, but of course the maximum may be two or three times the measured amount, owing to the character of the current. (Sloan.)

electric-density, electric-thickness, s.

Elect.: The quantity of electricity found on a given surface.

electric-discharge, s.

Elect.: The escape of electricity, whether slowly and silently, or more quickly and violently, from any receptacle or generator.

electric-drill, s. A drill for metals or rock worked by an electro-magnetic motor. For metals a rotary motion, for rocks a reciprocating or percussory action is imparted.

electric-eel, s.

Zoöl.: *Gymnotus electricus*, a great eel, inhabiting the marshy waters of the Llanos (plains) in South America. It attains the length of five or six feet, and can discharge electricity sufficient to kill an animal of considerable size. [GYMNOTUS.]

electric-egg, s.

Elect.: An ellipsoidal glass vessel, with metallic caps at each end, which may be filled with a feeble violet light by means of an electric machine acting on it after a vacuum has been made inside the glass.

electric-escapement, s. A device actuated by electric impulse which intermittently arrests the motion of the scape-wheel and restrains the train to a pulsative motion—acting, in fact, in the place of a pendulum. An electric pendulum at a central station may be the regulator of numerous distant clocks with electric escapements, with each of which it is connected by circuit or circuits. In some cases the device has alternately a detent and impulse action, and is the motor as well as regulator. Devices in which a train is set in motion, or a machine started or stopped, are not strictly escapements, but may be considered as electrical-governors or electrical-regulators. (Knight.)

electric-fishes, s. pl. Such fishes as are capable of giving electric shocks, such as the Torpedo, the Gymnotus, and the Silurus (q. v.).

electric-fluid, s. According to a once-accepted theory, a fluid, if it can be called so, composed of an indefinite quantity of a subtle imponderable matter. It was supposed to be formed by the union of two fluids, the one positive, the other negative in character. [ELECTRICITY.]

electric-force, s. The force with which electricity tends to move matter.

electric-furnace, s. A heater or oven in which an electric current is substituted for heat by fuel. A sufficient amount of resistance is introduced in the course of the current to create the degree of heat desired.

electric-fuse, s.

1. A device used in blasting to explode the charge. The fulminate or the charge itself is lighted by

means of an electric spark or a resistance section of fine platinum wire, which is heated to redness by the passage of an electric current induced by a voltaic or magneto-electric battery.

2. A safety device used to protect electric circuits against too great a volume of current. The regular or metal circuit is broken by the introduction of a wire of lead or soft alloy, formed to melt at a point beyond which a current would be harmful. The melting of the fuse will stop the current by breaking the circuit.

electric gas-lighting.

How it is that an electric spark lights the gas, and why the coil gives a spark: Illuminating gas is principally composed of two elements, carbon and hydrogen, both of which also have a strong affinity for oxygen, but, like phosphorus and sulphur, they will only unite with it when their kindling temperature is reached. In lighting gas with a match, all we do is to heat the gas up to this point. But we may light it just as well by any other means that will give the required heat. A piece of red-hot wire will do it. An electric spark does it. There is very little heat in the spark itself, but very little is needed. It is degree of heat required, not quantity. If one tiny particle of hydrogen can be made hot enough to unite with oxygen, it will heat up its neighboring particles and spread the flame in an instant. To understand why the spark coil makes a spark we must remember its construction. We have several pounds of wire, that is, several hundred feet, wound around a soft iron core. When a current passes through the wire, the core becomes a strong magnet. When the current is broken, the core ceases to be a magnet. At the same instant a strong current is momentarily induced in the coil. It is known as the "extra current," and is strong enough to jump through the air between the two little wires over the gas-burner, thus making a spark and lighting the gas. A current of electricity is always induced in a wire when it is near a changing magnet, or near another wire in which a current is made or broken. The extra current in the spark coil is due to both of these causes; the magnetism of the core changes, and the retreat of the original current along the turns of the coil induces secondary currents in the neighboring turns. Without the spark coil there would be no extra current, and consequently no spark.

electric-governor, s. A governor in which a part of a fly-wheel, say a segment of the rim, is made to move radially outward when the wheel revolves at a rate above a preappointed speed, and thereby comes in contact with a metallic tongue, completing an electric connection, which is utilized to move a butterfly-valve or other device which concerns the transmission of power. Governor-balls flying out to a certain distance may make or break an electric connection to produce the same result, or sound an alarm. Electro-magnetic action is also used to start and stop machines, and operate stop-motions.

electric-harpoon, s. An application of the electric-current to the explosion of a bursting-charge in a harpoon or bomb-lance. A copper wire is carried through the line, and when a circuit is established by the harpoon, a resistance-section in the fuse of the bomb-lance ignites the charge.

electric-heater, s. The new forms of electric-heater are based upon the principle of electrical resistance. Some resistant body, such as carbon or platinum, is placed in the circuit, and retains heat upon the passage of the current in proportion to its qualities of resistance.

electric-helix, s. A coil of copper wire in the form of a screw. The wire is generally coiled round a bar of soft iron, and when an electric current is sent through it, this confers polarity upon the iron, the wire and iron together constituting an electro-magnet. But the helix will also manifest magnetic properties without any iron wire at all.

electric-indicator, s. An apparatus by which electro-magnetic currents are indicated.

electric-kite, s. A kind of kite devised by Franklin to attract electricity from the air. In June, 1752, on a stormy day, in a field near Philadelphia, he flew a kite with a key attached to it. In order to insulate the kite, in place of the ordinary string he made a silken cord, which he tied to a tree. He hoped to obtain a spark readily from the key, but without success till the rain began to fall, when the cord became a good conductor and brought down the spark.

electric-lamp, s.

1. *Arc*: A contrivance for holding in position and regulating the movements of the carbon electrodes, between which the arc light is produced. The patent office teems with specifications of different patterns of regulators. Among the first devised were those of Duboscq, Foucault, and Serrin, the last being of very perfect form. Of later years the

lamps of Siemens, Brush, Pilsen, Crompton, and others have supplanted the older forms. The electric-candle (q. v.) of Jablochkoff is also a form of arc lamp.

Arc Lamp.

The accompanying illustration shows an enlarged view of the carbons of an arc light. When the current is flowing through the lamp the carbons are automatically separated a very small distance. The

electric current jumps from the positive or upper carbon to the negative or lower carbon, thus forming the electric arc, from which the lamp derives its name. The current tears away from the positive carbon minute particles, which are consumed in the intense heat of the arc and adding somewhat to the light given off. The heat developed by the arc is so intense that an ordinary case-knife is consumed as fast as it can be fed into the arc.

Another form of arc light is shown in the following cut, which is called a Focusing lamp. It consists of the arc-lamp mechanism arranged to feed both up and down to maintain the position of the arc in the axis of a parabolic reflector. This lamp is used as a search-light at sea on war vessels, and when it is desired to concentrate a powerful light in small space.

2. *Incandescent*: In this form of lamp a slender thread of carbon (carbonized paper, fiber, &c.) is inclosed in a glass bulb exhausted of air. The passage of the electric-current renders this thread white-hot. Edison, Swan, Maxim, and others have produced lamps on this principle, which differ little

from one another. E. A. King, in 1845, patented an incandescent lamp. The following year Greener and Staite improved upon it. In 1871 Lodyghin at

St. Petersburg exhibited 200 such lamps on one circuit. In the patent office of the United States the Edison patents on an incandescent lamp seem to

Incandescent Lamp and Holder.

stand as the fundamental ones, the principle calling forth this decision being the vacuum in which the carbon is suspended. Mr. Edison, however, made

his vacuum lamp just in time to secure the co-operation of the dynamo-electric machine invented two years before, without which the lamp would have been of no practical value, since the electric-current cannot be made commercially in any other way. Prof. Moses G. Farner, of Boston, lighted his house with a number of platinum filament incandescent lamps in 1847, but as a curiosity only, as the generation of the required current by means of primary batteries was too costly for commercial purposes. The great litigation of the past year or two over the patents on the carbon-vacuum lamp have led inventors to seek avoidance of that principle. The nearest they have come to their desires is the substitution of nitrogen, or some other gas in which combustion will not take place, for the vacuum.

electric-launch, s. [ELECTRIC-BOAT.]

electric-light, s.

1. *Definition*:

(1) A brilliant light emitted by the white-hot points of two pieces of carbon when used as the electrodes of a powerful voltaic battery, or other generator of electric-currents. [ELECTRIC-LAMP.]

(2) The light emitted by the incandescence of a metallic wire, or carbon filament, when subjected to the passage of an electric-current. [ELECTRIC-LAMP, 2.]

2. *Hist.*: In 1809 Sir Humphry Davy, while experimenting with a powerful battery, discovered the phenomenon of the voltaic arc. He used as electrodes points of charcoal. Foucault and later experimenters replaced these by pencils of gas-retort carbon, and this material is yet used in some forms of regulators. A better result, however, is obtained from manufactured carbon pencils, and this manufacture already represents a distinct trade both here and in Europe. Coke, lamp-black, cane-sugar, &c., are the ingredients used for these pencils, which are subsequently placed in molds and submitted to a red heat. Davy's suggestive experiments were of mere scientific interest until the improved battery-cells invented by Grove and Bunsen came into use forty years later, when many attempts were made to turn the electric-light to practical account; but owing to the trouble, expense, and other difficulties attendant upon the use of a battery, the light was still only available for exceptional uses. The discovery by Faraday (1830) that an electric-current could be induced in a coil of wire by the approach to it or recession from it of a magnet, may be said to have given electricians the first hope of giving the electric-light a commercial importance. The magneto-electric machines which followed upon Faraday's discovery were soon many in number, each one exhibiting some improvement upon its predecessor. Of these pioneer machines may be mentioned that of Aixii (1832), who caused a horseshoe magnet to turn beneath bobbins of wire suspended above its poles; Clarke's machine, where the reverse method was adopted, the bobbins moving near the poles of a fixed magnet; Siemens', who in 1854 introduced a new form of armature or coil, which superseded the bobbins formerly used; Wilde, of Manchester, who produced a powerful machine in which the electro-magnet (q. v.) was first employed in this connection, it being excited by a permanent or ordinary horseshoe magnet. In 1865, Siemens, and also Wheatstone, pointed out that this initial excitation was unnecessary, because the iron cores of the electro-magnets always retained a certain amount of residual magnetism which, by proper appliances, could be roused into giving powerful effects. Holmes, Ladd, and others also produced machines worthy of mention. A machine called the "Alliance" was fixed at the South Foreland Light-house in 1872 and is still in use there. It was invented by Professor Nollet, of Brussels, in 1849, and was used for the service of some French light-houses before it was employed in England. It is of a most cumbersome nature, and in common with the machines already noticed must be considered obsolete. In 1872, Gramme (France) gave the subject of electric illumination fresh impetus by the introduction of a small and compact machine which altogether distanced its prototypes in power and efficiency, and we may date from this time the excitement which has been growing of late years concerning the electric-light. In England the Gramme machine was first used in 1874, to provide a light for the summit of the Westminster clock tower. Since that date it has been greatly improved. The Gramme machine gives a continuous current like that afforded by a voltaic battery; but previous machines, like the "Alliance," for instance, gave an alternate current, which had for most uses to be turned into one direction by a device called a commutator, which formed an attachment to such machines. In France the Gramme machine is used almost exclusively, not only for lighting, but for electroplating and electrotyping. In America the Brush and Edison machines are naturally more used. In England the Gramme, the Brush, the Crompton, the Gordon, and other machines are

competing for public favor. In spite of these improved machines, the entire question of electric illumination is still in an experimental stage. The different systems may be conveniently grouped under the two heads—Arc-lights and Incandescent lights.

induced by the constant influence of an already electrified body. It is an old invention revived and improved, and the principle has been carried still further by the admirable machines of Voss and Winshurst. (*Ganot, &c.*)

2. All dynamo-electric machines or generators,

electric-pen, s. A stylus for producing a series of perforations in paper, so that the paper may act as a stencil for the reproduction of a great number of copies of the original matter. Various kinds of electric-pens have been invented. One kind, invented by Edison, consists of a handle carrying an electric-motor actuating a needle, which is driven in and out of the other end of the handle with high rapidity. It is used by being held vertically on the paper with the needle end downward, and is moved so as to describe perforated letters or designs. The paper is then used as a stencil, with an ink-roller to produce the writing or design *ad libitum*. (*Sloan.*)

electric-pendulum, s. A pendulum constituting an essential element in an electric-clock. A point below the bob of the pendulum passes through a globe of mercury, the time of contact being indicated on a traveling fillet of paper. In another form the bob comes in contact, at the limit of each stroke, with a delicate spring, which makes the electric connection. Besides its use as a chronograph for recording atmospheric, astronomical, and other observations, it is also employed to secure isochronous beats of distant pendulums.

electric-photometer, s. An apparatus for measuring the intensity of light by its action upon the resistance of selenium. The term has also been applied to a combination of a thermo-electric pile and a galvanometer, the light falling on the pile affecting the motions of the galvanometer.

electric-piano, s. A piano provided with a series of electro-magnets, each corresponding to a key of the instrument, the armatures of which are made to strike the keys when the circuit is closed.

electric-railway, s. A railway in which the motive power is electricity, operating an electric-motor carried on the car, the armature of which, in turning in response to the current, turns the axle, and thus moves the car. The generating plant for railway propulsion is of course stationary, the current being carried to the locomotives over a third rail, or over a copper wire above or below the ground. [**ELECTRIC-LOCOMOTION, MOTORS.**]

electric railway-signal, s. A device for communicating messages or warnings as to the place or condition of a train on the track, in regard to stations left or approached, or to other trains on the same line.

electric-ray, s.

Ichthy.: A name for the Torpedo (q. v.), so called because when irritated it is capable of giving an electric-shock.

electric-regulator, s. Any device by which an electro-magnetic circuit is made the means of reaching a machine to stop it or start it. The applications are numerous and various. The term is also applied occasionally to apparatus for controlling the arc forms of electric-lamps. [**ELECTRIC-LAMP, 1.**]

electric-locomotion, s. The power of moving from place to place by the use of electricity.

"The engineers studying the practical details of electric-locomotion are still uncertain as to whether we shall have a separate locomotive drawing the future train or whether each car will be equipped with its own motor."—*The Review of Reviews*, Dec., 1893.

electric-locomotive, s. A locomotive operated by means of electricity. [**ELECTRIC-MOTOR.**]

electric-log, s. An electric-circuit through the log-line to the detent of an escapement in the register-log, so that by touching a key on deck a circuit may be completed, an armature attracted, and thus the starting and stopping of the mechanical register in the log be exactly timed.

electric-loom, s. Electricity used as the motive power for a loom. In 1852, an electric-loom was exhibited by Bonelli at Turin. The invention was at that time in a crude state, but has since been much improved. The object is to dispense with the perforated cards required in the Jacquard apparatus. (*Knight.*)

electric-machine, electrical-machine, s.

1. A machine for exciting electricity by means of friction. Its inventor was Otto von Guericke, of Magdeburg, who made one, consisting of a sulphur globe, about 1647, following it by the air-pump about 1650. Sulphur was next exchanged for resin, which in turn was superseded by a glass cylinder. Von Guericke's "rubber" to excite electricity had been simply his hand. Instead of the hand Winckler, in 1740, introduced cushions of horsehair stuffed with silk. Bose, about the same date, collected the electricity on an insulated cylinder of tin-plate. Ramsden, in 1760, replaced the glass cylinder by a circular glass-plate. The glass is rotated between the surfaces of the rubbers, and the electricity which is generated passes to the conductors on each edge of the disc, thence to the prime conductor, and finally to a Leyden jar or other object, as may be desired. By friction with the glass, the glass becomes positively and the rubbers negatively electrified. The latter communicate with the ground by means of a chain, which carries off the negative electricity as soon as it is produced. In Nairne's machine there is a cylinder which is rubbed by only one cushion. Armstrong's is a hydro-electrical machine. [**HYDRO-ELECTRICAL.**] In Holtz's the electricity is not developed by friction, but is

whatever their peculiar forms, as distinct one from the other, are based upon the discoveries of Faraday, and Henry contemporaneously in 1832, that if a closed wire or conducting ring is moved across a magnetic space, a current of electricity is generated in the wire. A dynamo-electric generator is the best apparatus devised for the application of this principle to the production of an electric-current. A magnetic space is provided between the poles of two or more powerful magnets, and coils of wire are caused to traverse this magnetic space in such a way as to excite a current in them. The stronger the magnetism of the space, the longer the wire and the quicker it is moved, the stronger will be the current excited. The aim of inventors, therefore, is to construct their machines with powerful magnets and coils of wire having many turns, and to rapidly rotate these coils through the magnetic "field" by mounting them on an axle driven by a steam-engine or other mechanical motor. As each coil or bobbin of wire passes between the poles of the magnet, a transient current is generated in it; but as there are a number of bobbins rapidly following each other, each with its transient current, the joint effect of the whole is a practically continuous current.

electric-meter, s. [**ELECTROMETER, ELECTROSCOPE.**]

electric-motor, s. A machine for driving other machines or vehicles, using the electric-current as the motive power. Practically, it is an electric dynamo having current supplied to it by another dynamo or a battery. [**ELECTRO-MOTOR.**]

"It is now but a question of time when the mantle of the steam locomotive will fall on the electric-car. The latter has made the first advances toward supplanting steam in such work as is required in the B. & O. tunnel under the city of Baltimore, where whole trains, with their locomotives attached, are hauled six or seven miles by powerful electric-motors."—*The Review of Reviews*, Dec., 1893.

law stands as follows:—The strength of the current varies directly as the electro-motive force, and inversely as the resistance of the circuit.

electric-signal, s. A signal, or signals, by simple or repetitive sounds or by code, conveyed by electric influence. The motion of bell-hammers, of flags, index-fingers, or semaphoric arms may be held as included in this definition, which thus covers telegraphing and signaling by electric circuit.

electric-spark, s. A spark produced when two bodies of opposite electricities are brought within a short distance of each other, and electricity, pass-

electric-switch, s. A device for interrupting or dividing one circuit and transferring the current, or a part of it, to another circuit. [SWITCH.] The same as a commutator (q. v.).

electric-telegraph, s. In a general sense an apparatus by which signals may be transmitted to considerable distances by means of voltaic currents propagated on metallic wires. (Ganot.) In a more limited one that form of electric signaling apparatus in which an insulated wire excited by frictional electricity is, or rather was, used to convey messages by sparks or shocks. (Knight.) distinct signals. In 1834 Gauss and Weber made an electro-magnetic telegraph [ELECTRO-MAGNETIC], sending signals by it in or near Göttingen for a mile and a quarter. In 1837 Steinheil, in Munich, and Wheatstone, in London, constructed telegraphs, the current in the former being produced by an electromagnet machine, and the latter by a constant battery. Morse is the father of the present commercial system of telegraphy. He constructed the first line over which an intelligible message was sent for any distance, the line being built from Baltimore to Washington. The first message "What Hath God Wrought," was sent in 1843, by Prof. Morse, to his assistant Alfred Vail. The U. S. government appropriated \$30,000 to further the invention. An electric telegraph consists essentially of three parts: A circuit comprising a metallic connection between two places, a communicator for signaling between them, and an indicator for receiving them at the station to which they are sent. In Europe the electromotor is generally a modified Wollaston's battery, consisting of a trough divided into compartments, each having in it an amalgamated zinc and copper plate. The compartments are filled up with sand moistened with dilute sulphuric acid. The connection between two places, if aerial or terrestrial, is made by galvanized iron wires fixed to insulating porcelain on poles or other supports. If marine, they are of copper coated with gutta-percha, covered with tarred hemp, and strengthened exteriorly by being sheathed in an iron cable. (For the other arrangements, see COMMUTATOR, INDICATOR, ELECTRO-CHEMICAL, ELECTRO-MAGNETIC, &c.) (Knight, Ganot, &c.)

electric time-ball, s. A balloon of canvas suspended on a mast, and dropped at an exact time every day by means of an electric circuit, operated by an observer whose eye is upon the astronomical clock and hand upon the telegraph-key.

electric-torch, s. A gas-lighter operating by electric action.

electric-torpedo, s. A torpedo operated by electricity. There are various kinds of electric torpedoes. The Sims-Edison torpedo is driven by an electric motor, and its motions are controlled from the shore by electricity. The torpedo proper is carried some distance below the surface of the water by a vessel immediately above it, from which it is suspended by two rigid bars. In the torpedo is a cable reel on which the conducting cable is disposed. An electric motor and controlling gear are also contained within the torpedo. In its front the explosive is placed. It is driven by a screw propeller actuated by the electric motor. As it moves it pays out cable so that it has no cable to draw after it through the water, the cable lying stationary in the water behind it. This avoids frictional resistance to its motion. The maintenance of the torpedo at a proper depth is one of the advantages of the system. (Sloan.)

electric-wand, s. An electrophorus in the shape of a baton. [ELECTROPHORUS.] (Knight.)

electric watch-clock, s. A watchman's time-detector, in which a patrol touches a button at such times during the night as may indicate his presence at that spot at the appointed hour. (Knight.)

electric weighing-apparatus, s. An attachment to a scale which comes in as an auxiliary to the eye in detecting the turn of the balance. The poise is shifted out on the beam, and, as soon as it feels the tendency to rise, the circuit is completed, and the point at which the poise stopped is indicated. (Knight.)

ing from the one to the other, has to encounter the resistance of the air. It may be also drawn from the conductor of an electric machine if the latter be touched or nearly approached by the finger. If the spark have only a short distance to travel, it does so in a straight line. When it has to traverse two or three inches, it resembles a curve with branches. When it is very powerful, its course becomes zigzag. Lightning is a powerful electric spark, and its track tends to be of the last-named form.

electric steam-gauge, s. A steam-boiler attachment, in which the rise of the mercury under pressure of steam is indicated by means of electric connection to the dial. (Knight.)

electric-storm, s. A widespread disturbance of the earth's magnetic and electric forces, by some ascribed to vast electrical disturbances in the sun. [SUN SPOTS.]

"At the Mutual Union office the manager said, 'Our wires are all running, but very slowly. There is often an intermission of from one to five minutes between the words of a sentence. The electric-storm is general as far as our wires are concerned.' The telephone service was practically useless during the day."—*New York Tribune*, Nov. 8, 1882.

"The aurora is a part of a great electric-storm in the upper atmosphere, which also produces disturbances of the electric needle. The connection between the deflections of the needle and the spots on the sun has been suspected since 1859. At that time the two phenomena were first observed to coincide. The coincidence was observed by two astronomers simultaneously, one being at Kew, England, and one in this country, but it was at first thought to be a coincidence only. Subsequent observations, however, have confirmed the theory then propounded of the connection; and at this day it is one of the best settled facts in science."—*Chicago Tribune*, Feb. 25, 1894.

1729, experimented with conductors; Nollet soon afterward sent a shock along a line of men and wires 900 toises in length; Watson, Bishop of Llandaff, in 1745, sent a shock through 12,000 feet of wire, and proved that it was practically instantaneous throughout its length. A writer in the *Scots' Magazine*, in 1753, proposed a series of wires from the ends of which were to be suspended light balls marked with the letters of the alphabet, or bells which were to be moved by an electric current directed to the appropriate wire. LeSage, at Geneva, in 1774, actually constructed a telegraph arranged in this manner, the end of each wire having a pith-ball electroscope attached. Lamond, in 1787, employed a single wire, connecting an electrical machine and electroscope in each of two rooms; and Reusser, in 1794, proposed the employment of letters formed by spaces cut out of parallel strips of tin-foil pasted on sheets of glass, which would appear luminous on the passage of the electric spark. In 1795 Cavallo proposed to transmit letters and numbers by a combination of sparks and pauses. Don Silva, in Spain, appears to have previously suggested a similar process. Betancourt, in 1796, constructed a single line telegraph between Madrid and Aranjuez, a distance of twenty-seven miles, in which the electricity was furnished by a battery of Leyden jars, and the reading effected by the divergence of pith balls. In 1811 Sömmerring, decomposing water, managed thereby to give

to have known no more than this regarding electricity; nor for the first sixteen centuries of the Christian era was much addition made to the solitary known fact in electricity.

In A. D. 1600, Gilbert, who was surgeon to Queen Elizabeth and to James I., published a book, *De Magnete*, in which for the first time the word "electric" was used in connection with science. He died in 1603. He regarded magnetism and electricity as two emanations of one fundamental force. He showed that not merely amber, but sulphur, glass, &c., are electrics. Otto Guericke, of Magdeburg, discovered that there was a repulsive

Wall, in 1708, observed the sparks produced from amber, and Hawkesbee noticed the sparks and "snapping" under various modifications.

Dufay and Abbé Nollet were the first to draw sparks from the human body, an experiment which attracted great attention, and became a species of fashionable diversion at the time.

The discovery of the Leyden jar is attributed to Cunæus of Leyden, in 1746, who, while handling a vessel containing water in communication with an electrical machine, was surprised at receiving a severe shock. A similar event had happened the year previous to Von Kleinst, a German prelate.

In the eighteenth century the names of the principal contributors to the advancement of electrical science are Newton, Hawkesbee, Dufay, Guericke, Cunæus of Leyden, (to whom we owe the Leyden jar), and Franklin, who, in 1747, pointed out the circumstances on which the action of the Leyden jar depends. Monnier the younger discovered that the electricity which bodies can receive depends on their surface rather than their mass, and Franklin soon found that "the whole force of the bottle and power of giving a shock is in the glass itself," he further, in 1750, suggested that electricity and lightning were identical in their nature, and in 1752 demonstrated this fact by means of his kite and key. About the same time D'Alibard and others in France erected a pointed rod forty feet high at Marli, for the purpose of verifying Franklin's theory, which was found to give sparks on the passage of a thunder-cloud. Similar experiments were repeated throughout Europe, and in 1753 Richman was instantly killed at St. Petersburg by a discharge from a rod of this kind.

The more important discoveries since those days relate rather to electricity produced by voltaic or magnetic action.

In the later history of electricity no name is greater than that of Michael Faraday, who was born in London in 1794, was appointed by Sir Humphry Davy assistant in the laboratory of the Royal Institution in March, 1813, and in 1831 commenced the publication of a series of splendid discoveries in electricity.

3. *Present state of knowledge regarding electricity*: The past history of electricity centers round the frictional machine and the voltaic battery. The first-named is now only of experimental interest, and the second, if we except its use in signaling (telegraphy and telephony), is quickly being supplanted by the more economical and vastly more powerful dynamo-machine. To this contrivance, in its various forms, as designed by different makers, and in less degree to the secondary battery (now quite in its infancy), electricians look for the advancement of their science. The fact that the Gramme and similar machines are reversible is considered to be one of the most important discoveries of the century. By reversible is meant its power to act as a motor when coupled up with a distant machine, under which circumstances its armature rapidly revolves in the reverse direction to what it would do if used directly—as in the production of

Electric Motor.

as well as an attractive force in electricity, and about 1647 constructed the first electrical machine.

Newton, in 1675, observed signs of electrical excitement in a rubbed plate of glass. Hawkesbee, who wrote in 1709, also observed similar phenomena; and Dufay, in the *Memoirs of the French Academy*, between 1733 and 1737, generalized so far as to lay down the principle that electrified bodies attract all those which are not so, and repel them as soon as they have become electric by the vicinity or contact of the electric body.

Dufay also discovered that a body electrified by contact with a resinous substance repelled another electrified in a similar way, and attracted one which had been electrified by contact with glass.

He thence concluded that the electricity derived from those two sources was of different kinds, and applied the names vitreous and resinous to them. Franklin attributed this difference to an excess or deficiency of the electric fluid, the former condition existing in electrified glass and the latter in resins.

Otto Guericke had discovered that his sulphur globe, when rubbed in a dark place, emitted faint flashes of light, and shortly afterward it was noticed that a similar phenomenon occurred at the surface of the mercury when the barometer was shaken—a fact which one of the celebrated mathematicians, Bernoulli, attempted to explain on the Cartesian system, but which was afterward correctly attributed by Hawkesbee to electricity.

which simply marked on strips of paper the dots and dashes composing his alphabet. The paper itself is now generally dispensed with, and the signals read by sound—a practice which conduces to accuracy in transmission, as the ear is found less liable to mistake the duration and succession of sounds than the eye to read a series of marks on paper. In 1840 Wheatstone, whose attention seems to have been drawn to telegraphy about 1834, patented a dial instrument, on which, however, he afterward adopted several modifications. His first telegraph comprised five pointing needles and as many line wires, requiring the deflection of two of the needles to indicate each letter. The single-needle telegraph of Cook and Wheatstone is caused to indicate letters and figures by means of the deflections to the right or left of a vertical pointer; for instance, the letter A is indicated by two deflections to the left, N by two deflections to the right, I by three consecutive deflections to the right and then one to the left, and so on. This is extensively employed in Great Britain and in India. The same inventors have also contrived a double needle-telegraph on the same plan; but this, as it requires two lines of wire, each needle being independent of the other, though greatly increasing the speed with which messages may be transmitted, has not come into general use. Dr. Siemens and others have also made improvements in the electro-magnetic telegraph.

electro-magnetic units, s. pl. [UNIT.]

electro-magnetic watch-clock, s. An apparatus consisting of a magnet, with a recording-dial, clock-works, and a signal-bell; from this run wires, one to each of the banks or other offices under guard where watchmen are employed, whose duty it is to visit each bank at stated times during the night and give signals, which are recorded on the dial of the clock in the fire-alarm office, showing the time that the signal was given from any particular bank or office. If the signal is not given within five minutes after the appointed time, the man on duty at the fire-alarm office communicates with the office of the superintendent of police, and an officer is immediately dispatched to the point from which no signal has been sent.

electro-magnetics, s. [ELECTRO-MAGNETIC.] The same as ELECTRO-MAGNETISM (q. v.).

electro-magnetism, s. [English *electro*, and *magnetism*.] The science which treats of the development of magnetism by voltaic electricity, and the properties or actions of the currents thus evolved. Professor Oersted, of Copenhagen, led the way in the discoveries which established the science; Ampère, Faraday, Barlow, Arago, Nobili and others followed in his track.

The temporary magnetic moment is proportional to the intensity of the currents. In the case of an iron bar it is proportional to the number of windings. In a magnet it is proportional also to the square root of the diameter of the magnet. In solid and in hollow cylinders of the same diameter it is equal in amount. The attraction of an armature by an electro-magnet is proportionate to the square of the intensity of the current, as long as the magnetic moment does not attain its maximum. Two unequally strong electro-magnets attract each other with a force proportional to the square of the sums of both currents. For powerful magnets the length of the branches of an electromagnet is without influence on the weight which it can support. (Ganot.)

electro-medical, a. [English *electro*, and *medical*.] Pertaining to electricity used medically; designed to cure diseases by means of electricity.

electro-medical apparatus, s. An instrument for the treatment of diseases by electro-magnetism.

electro-metallurgy, s. [English *electro*, and *metallurgy*.] The act of precipitating metals from their solutions by the slow action of a galvanic current. The method of doing this was discovered independently by Spencer in England, and by Jacobi in St. Petersburg. (Ganot.)

electro-metrical, a. [English *electro*, and *metrical*.] Measuring electric force; pertaining to electrometry.

electro-motion, s. [Eng. *electro*, and *motion*.] The motion of electricity in its passage from one metal to another in a voltaic circuit; mechanical action produced by means of electricity.

electro-motive, a. [Eng. *electro*, and *motive*.] Producing electromotion; producing mechanical effects by means of electric currents.

"Physicists have traced the source of the electromotive force of polarization to the oxygen and hydrogen deposited in (or on) the platinum plates."—*Electrician*, October 7, 1882.

electro-motive force, s. This term is used to denote that which moves, or tends to move electricity from one place to another. Generally expressed by the letters E.M.F.

electro-motive series, s.

Of the metals in a voltaic couple: Metals so arranged as to have the most electro-positive at one end, and the most electro-negative at the other. Ohm's Law on the subject—i. e., the law discovered by Ohm—is that the intensity of the current is equal to the electro-motive force divided by the resistance.

electro-motor, s. [English *electro*, and *motor*.] An apparatus actuated by electricity and imparting motion to a machine. [ELECTRO-MAGNETIC ENGINE.]

electro-negative, a. & s. [English *electro*, and *negative*.]

A. As adj.: Having the property of being attracted by an electro-positive body, or a tendency to pass to the positive pole in electrolysis.

B. As subst.: A body which, in electrolysis, passes to the positive pole; an anion.

electro-photographer, s. One whose occupation consists of taking photographs by the aid of electric light.

electro-photometer, s. [English *electro*, and *photometer*.] An instrument for measuring the intensity of light by means of electricity.

electro-photomicrography, s. [English *electro*, and *photomicrography*.] The art of photographing objects as magnified by the microscope by the help of electric light.

electro-physiological, a. [English *electro*, and *physiological*.] Pertaining to electro-physiology.

electro-physiology, s. [English *electro*, and *physiology*.] Physiological results produced by electricity, or vice versa.

electro-polar, a. [English *electro*, and *polar*.] *Of a conductor:* Positively electrified at or on one end or surface, and negatively at or on the other.

electro-positive, a. & s. [English *electro*, and *positive*.]

A. As adj.: Having a tendency to the negative pole of a magnet or battery.

B. As subst.: A body where an electrolysis passes to the negative pole; a cation.

electro-puncture, s. [English *electro*, and *puncture*.]

Surg.: A method of treatment by the insertion of needles in the body, and passing a voltaic current between the points.

electro-puncture, v. t. [English *electro*, and *puncture*.]

Surg.: To treat by electro-puncture.

electro-pyrometer, s. [English *electro*, and *pyrometer* (q. v.).] An instrument for measuring high degrees of temperature by means of electricity.

Such instruments as have been devised are not very satisfactory in practice. Pouillet's, described by Ganot, is one of the best known. At a meeting of the Royal Society of Edinburgh (1883), Professor Tait indicated a means by which he hoped to construct a serviceable instrument. His experiments led to the assumption that by means of the metals iridium and ruthenium a standard thermo-electric couple might be constituted. "I shall have at last found that which I have long searched for, a definite standard for comparing very high temperatures, such as furnaces, &c., for which at present we have no suitable instruments." (Prof. Tait, as above.)

electro-silver, v. t. To coat with silver by means of electricity; to electroplate.

electro-statics, s. [ELECTROSTATIC.] The science which treats of electricity in a state of rest as distinguished from Electro-dynamics, in which the electricity is in a state of motion. The distinction is analogous to that between hydrostatics and hydraulics.

electro-telegraphic, a. [English *electro*, and *telegraphic*.] Pertaining or relating to the electric telegraph. [TELEGRAPH.]

electro-thermancy, s. [English *electro*, and *thermancy*=heating.] The department of electricity which treats of the effect of an electric current on the temperature of a conductor or part of a circuit composed of two different metals.

electro-vital, a. [English *electro*, and *vital*.] Derived from or dependent upon vital processes. Used of currents believed by some physiologists to circulate in the nerves of animals.

electro-voltaic, a. [English *electro*, and *voltaic*.] Pertaining to voltaic electricity. Duclenne's electro-voltaic apparatus was designed to send currents for medical purposes through portions of the human body.

ê-lêc-trô-cû-te, v. t. [This word is formed after the word "execute," and has no proper etymology.] To inflict capital punishment by means of electricity; to kill by electrification. [ELECTRIC-DEATH.]

ê-lêc-trô-cû-tion, s. Capital punishment by means of electricity; the killing of a man or of an animal by electrification. [ELECTRIC-DEATH.]

"A few seconds later he was dead. Johnson showed no signs of breaking down as the time for the electrocution approached. He surprised his guards and Warden Durston with his marvelous coolness."—*Charleston (S. C.) News and Courier*, Feb. 27, 1884.

ê-lêc-trô-cû-tion-êr, s. One who electrocutes, or puts to death by electrification, in pursuance of a legal warrant.

ê-lêc-trô-de, s. [Gr. *êlektron*=amber, and *hodos*=a way, a path.] A term introduced by Faraday to designate either pole of a voltaic circle. The positive pole, marked +, is called the anode, the negative one, marked −, the cathode.

ê-lêc-trô-gên-ic, a. [Eng. *electro*, and Gr. *gennao*=to produce.] Producing electricity.

ê-lêc-trô-graphy, s. [Eng. *electro*, and Gr. *grapho*=to write.] The department of knowledge which describes electrical phenomena. As inquiry into the cause of these phenomena generally accompanies such a dissertation, the more common term is *Electrology* (q. v.).

ê-lêc-trô-liêr, s. A pendant fixture for holding electric-lamps, generally incandescent. Frequently made to combine both gas and electric-lights; in appearance it generally resembles a gas chandelier.

ê-lêc-trô-lô-gy, s. [Gr. *êlektron*=amber, and *logos*=a discourse.] The science which treats of the phenomena of electricity, and attempts to trace them to their causes.

ê-lêc-trô-lyz-a-ble, a. [ELECTROLYZABLE.]

ê-lêc-trô-lyze, v. t. [ELECTROLYZE.]

ê-lêc-trô-ly-sis, s. [Gr. *êlektron*=amber, and *lysis*=setting free.] The decomposition of chemical compounds by electricity.

[This word is one of the many that have come into common use since electricity has played so important a part in every-day affairs. This word, or rather what it stands for, causes decomposition of gas and water pipes buried near the wires of electric railroads. The electricity manufactured at the dynamo passes through the feed wires to the trolley wires, thence down the trolley through the car into the machinery, and so on out to the rails and wires fastened to them for the return current. The current from the dynamo to the car is carefully guarded by insulation in order that as little as possible may be lost. Having done its work, the balance of the wires establishes the complete circuit. The insulation of the ground wire not being so good, more or less of the current passes off into the earth, especially when it is moist. Gas or water pipes are attractive as conductors, and if in the neighborhood are bound to secure some share of the subtle fluid.]

As long ago as 1833 it was discovered that the earth could be used as a part of a circuit to carry electric currents, and until the introduction of electric cars the earth was almost wholly depended upon for the return current required by telephone and telegraph apparatus. Now the best telephone circuits have carefully insulated wires for the return current. The interference with the telegraph is much less than with the telephone from this cause. When electricity passes through moist earth it causes the decomposition of the water and the formation of oxygen and hydrogen gases. The oxygen, reaching metallic pipes, causes oxidation and ultimate destruction. The time required is, of course, wholly dependent upon the conditions, such as the volume of the current, the size of the conductor, and the amount of oxygen liberated.

ê-lêc-trô-lyte, s. [Eng. *electro*, and Gr. *lytos*=that may be dissolved; *lyo*=to loose, to dissolve.] The compound in the electroplating bath which is decomposed by the electric action.

ê-lêc-trô-lyt-ic, ê-lêc-trô-lyt-i-cal, a. [Eng. *electro*, and Gr. *lytikos*=able to loosen or dissolve; *lyo*=to loosen, to dissolve.] Pertaining to electrolysis; caused by the decomposition of chemical compounds by electricity.

"The following are examples of electrolytic decompositions."—Everett: *C. G. S. System of Units* (1873), ch. xi., p. 76.

ê-lêc-trô-lyt-i-cal-ly, adv. [Eng. *electrolytically*.] As is done in or by electrolysis (q. v.).

"The Croto lamp possesses theoretic and practical interest. The filament is hollow. The carbon is deposited electrolytically, and is shaped externally somewhat like the Müller carbon."—*Electrician*, October 7, 1882.

ê-lêc-trô-lyz-a-ble, a. [Eng. *electrolyz*(e); -able.] That may or can be decomposed by an electric current; capable of or liable to electrolyzation.

ê-lêc-trô-lyz-a-tion, s. [Eng. *electrolyz*(e); -ation.] The act or process of electrolyzing; the state of being electrolyzed.

ē-lēc-trō-lý-ze, *v. t.* [Fr. *électrolyser*; Gr. *ēlektron* = amber, and *lyō*, future *lyōō* = to loose, to dissolve.] To decompose by the direct action of electricity, whether frictional or dynamic.

ē-lēc-trōm-ē-tēr, *s.* [Gr. *ēlektron* = amber, and *metron* = a measure.] An instrument to measure the amount of an electrical force. In Coulomb's torsion electrometer the force opposed to that of electricity is the resistance to twisting offered by an elastic thread. In Henley's quadrant electrometer the electric force is measured by the amount of repulsion which it produces upon a pith-ball attached to a silk fiber suspended from the center of a graduated arc. [ELECTROSCOPE.] Sir William Thomson's and Varley's electrometers are the most delicate of all, and are used in reading the insulating power of telegraph-cables. [GALVANOMETER.] The strength of the electric force excited by the rubbing of glass, sulphur, amber, wax, resin, &c., was measured by Gilbert by means of an iron needle (not very small) moving freely on a point, *versorium electricum*, very similar to the apparatus employed by Hady and Brewster, in trying the electricity excited in different minerals by warmth and friction. Another form of the instrument is Lane's electrometer. (Knight, &c.)

tē-lēc-trō-mēt-rý, *s.* [Eng. *electro*, and Gr. *metron* = a measure.] The department of science which seeks to measure the intensity of electricity at any time in a particular body. [ELECTROMETER.]

***ē-lēc-trōn**, *s.* [Gr. = amber.] The same as ELECTRON (q. v.).

ē-lēc-trō-nōme, *s.* [Eng. *electro*, and Gr. *nomos* = a law, a regulation.] A measurer of electricity. [ELECTROMETER.]

ē-lēc-trōp-a-thý, *s.* [Eng. *electro*, and Gr. *pathos* = suffering.] The practice of treating disease by electricity. It is the third of the series of "pathies," as the first was allopathy, then homeopathy, and now *electrotherapy*. It is the outgrowth of electricity applied as a curative agent.

ē-lēc-trō-phone, *s.* [Eng. *electro*, and Gr. *phōnē* = a sound, a tone, or *phōnēō* = to sound.] An instrument invented by Dr. Strehlitz Wright in 1864 for producing sound by electric currents of high tension. [TELEPHONE.]

tē-lēc-trō-phōr, **ē-lēc-trōph-ōr-ūs**, *s.* [Eng. *electro*, and Gr. *phoros* = bearing.] An instrument invented by Volta, about 1776, for generating electricity by induction. It consisted of a thick disc of resin twelve or fifteen inches in diameter, called the plate, resting on a tin foil called the sole. The plate has a metallic cover, insulated by a glass handle. The resinous plate being excited by rubbing it with a warm and dry flannel, the metallic cover is placed upon it, and a spark of — electricity may be drawn from it; if it then be raised, it affords a spark of + electricity.

On replacing the cover and again touching it, it affords another spark of — electricity, and so on. It forms a portable electrifying-machine, and is used as a gas-lighter by developing a spark over the burner, inflaming the issuing gas. There are other forms of the instrument.

ē-lēc-trō-plāte, *v. t. & s.* [Eng. *electro*, and *plate*.]

A. As verb: To cover with a coating of silver or other metal by means of an electric current.

B. As subst.: Articles covered with silver or other metals by means of electric currents.

ē-lēc-trō-plāt-ēr, *s.* [Eng. *electroplat(e)*; -er.] One who practices or professes electroplating.

ē-lēc-trō-plāt-ing, *s.* [Eng. *electro*, and *plating*.] A means of covering a metal or a metallic surface by exposure in a bath of a solution of a metallic salt, which is decomposed by electrolytic action. In 1800 Mr. Cruickshank, and in 1801 Wollaston, both English, made discoveries which led the way to electroplating. It was not, however, till 1838 that Mr. Spencer gave it a practical bearing by making casts of coin and casts in intaglio from the matrices thus formed. Professor Jacobi, of Dorpat, in Russia, an independent inventor, in the same year also produced much-admired electroplated articles.

The process, briefly described, is as follows: The voltaic current employed is supplied by a constant battery, such as Daniell's or Bunsen's. In the simple form, the galvanic current is produced in the same vessel in which the metallic deposit is effected. The outer vessel of glass, stoneware, or wood, contains a solution of the metallic salt—say sulphate of copper. A smaller vessel of unglazed porcelain contains diluted sulphuric acid. A plate of zinc, forming the positive pole, is suspended in the acid solution, and connected with two copper medals by means of a copper wire. Electrolysis ensues, the copper in the solution is deposited on the medal which forms the negative pole, and the strength of the solution is maintained by suspending a bag of crystals of sulphate of copper in the bath. In the

compound form, the galvanic current is produced outside the bath containing the solution to be decomposed. In this arrangement a current of any degree of strength may be employed, according to the size and number of cells forming the battery. The molds are suspended from a metallic rod, opposite to which a plate is hung. Copper, if the solution is a salt of that metal, will serve as a soluble electrode, and will be dissolved in the same ratio as the metal is deposited upon the mold. The battery being charged, the plate is put into communication with the copper pole by a copper wire, and the metallic rod is put into communication with the zinc pole. The voltaic current being passed through the solution of metal, decomposition takes place; the metal being electro-positive attaches itself in a metallic state to the negative pole or to the object attached thereto—a medal, for instance—while the oxygen or other electro-negative element seeks the positive pole. For operations on a large scale the dynamo machine is now employed instead of a voltaic battery.

ē-lēc-trō-pōi-ōn, *s.* [Eng. *electro*, and Gr. *poiein* = making, pr. par. of *poieō* = to make.] A name applied specially to Bunsen's carbon battery, though applicable to other forms.

ē-lēc-trō-scope, *s.* [Eng. *electro*, and Gr. *skopeō* = to view, to see.] An instrument for detecting electrical excitation. It consists of a glass jar with a wooden bottom, a brass wire passing through the cork, and surmounted by a ball of the same metal; to the lower end of the wire are gummed two depending strips of gold-leaf. The test of the electric condition of a body is to bring a small ball suspended from a filament of silk against the body, and then apply the same ball to the knob of the electroscope. The presence of electricity will be shown by the divergence of the leaves, which, being similarly electrified, will repel each other. A rod of glass or of sealing-wax rubbed and applied to the knob will determine if the previous excitation was positive or negative. The dry-plate electroscope consisted of a gold-leaf suspended between two balls, and Grove improved on this by insulating the gold-leaf between two surfaces and charging it at the same time by an electrified rod. [ELECTROMETER.]

ē-lēc-trō-scop-ic, *a.* [Eng. *electroscop(e)*; -ic.] Of or pertaining to an electroscope; performed by means of an electroscope.

ē-lēc-trō-stāt-ic, *a.* [Eng. *electro*, and *static*.] Pertaining to electricity in a state of rest.

¶ **Electrostatic unit of electricity:** [For definition see extract.]

In the C. G. S. system, the *electrostatic unit* of electricity is accordingly that quantity which would repel an equal quantity at the distance of one centimeter with a force of one dyne.—Everett: *The C. G. S. System of Units* (London, 1875), ch. xi., p. 64.

ē-lēc-trō-tint, *s.* [Eng. *electro*, and *tint*.] A mode of engraving in which the design is drawn on a copper plate with an acid resisting varnish. By the electro-bath a reverse is obtained, and from this copies are printed. The process may be adapted to relief or to plate printing.

ē-lēc-trō-tōn-ic, *a.* [Eng. *electro*, and *tonic*.] Pertaining to electric tension.

electrotonic-state, *s.*

Elect.: The latent state of a conductor while it is being subjected to the action of an electric current.

ē-lēc-trō-type, *s.* [Eng. *electro*, and Gr. *typos* = a figure, an image, *tygōō* = to strike.]

1. The act or process of producing copies of medals, woodcuts, &c., by means of the electric deposition of copper upon a mold taken from the original.

2. A copy, usually in copper, of a form of type. A page of the type is covered with wax, which is driven into the interstices by powerful pressure. The face of the wax-mold is covered with plumbago to give it a conducting surface to which the metal will adhere. The positive pole of a battery is attached to the mold, and the negative to a copper plate, and both are plunged into a bath of sulphate of copper in solution. The copper is deposited on the face of the mold in a thin film, which increases in thickness as the process continues. The shell having attained the thickness of a stout sheet of paper, the mold is removed from the bath, the shell detached and strengthened by a backing of type-metal. This process is called *backing-up*. As type-metal will not readily adhere to copper, the back of the shell is coated with tin, and the shell is then placed face downwards on a plate, by which it is suspended over a bath of molten type-metal. When it has attained the requisite heat, a quantity of the metal is dipped up and floated over the back of the shell. When cold, the plate is reduced to an even thickness by a planing-machine. For printing, it is mounted on a wooden backing. Another mode of obtaining electrotypes from a letterpress form is by a mold of gutta-percha, brushed

with graphite and immersed in the electro-plating bath. Gutta-percha is also used for obtaining intaglio molds and then cameo impressions from woodcuts, for printing. [ELECTROPLATING.]

ē-lēc-trō-týper, *s.* One who follows the occupation described under electrotypist.

ē-lēc-trō-týpe, *v. t. & i.* [ELECTROTYPE, *s.*]

A. Trans.: To take copies of by electrotyping.

B. Intrans.: To practice the art of electrotyping.

ē-lēc-trō-týp-ic, *a.* [Eng. *electrotyp(e)*; -ic.] Pertaining to electrotyping; produced by means of electrotyping.

ē-lēc-trō-týp-ist, *s.* [Eng. *electrotyp(e)*; -ist.] One who practices or is skilled in the art of electrotyping.

ē-lēc-trō-týp-ý, *s.* [Eng. *electrotyp(e)*; -y.] The art or process of producing copies by electrotyping.

ē-lēc-trō-tý-pō-grāph-ic, *a.* [Eng. *electro*; -typographic.] Pertaining to printing by electricity.

electrotypographic-machine, *s.* An apparatus invented by Fontaine, a French barrister, for printing short legal documents, &c. The letters of the alphabet are arranged around two horizontal discs, one above the other, and surmounted by a third disc which has notches corresponding to the types below. A bar in the center is caused to press upon the notch representing any particular letter, which is, by electromagnetic action, caused to drop and leave its impression on a sheet of paper wound upon a roller beneath, then returning to its place. When the whole has been printed, an impression is transferred to a lithographic stone, from which any number of copies may be taken.

ē-lēc-trūm, *s.* [Lat., from Gr. *ēlektron*.]

1. **Mineralogy:**

(1) Amber.

(2) The same as 2 (q. v.). Dana calls it *Argentiferous gold*.

2. **Metal:** An alloy of gold and silver, containing from twenty to fifty per cent. of silver. Its color is lighter and its specific gravity less than gold. It is found native, and was used by the ancient Greeks for coinage.

ē-lēc-tu-ar-ý, ***let-u-a-rie**, *s.* [Low Latin *electuarium*, *electarium*, perhaps for *elimctarium*, from *elingo* = to lick away; and so a medicine which dissolves in the mouth.]

Phar.: A form of medicine compounded of powders and conserves of the consistence of honey.

"We meet with divers *electuaries*, which have no ingredient, except sugar, common to any two of them."—Boyle.

ēl-ē-dō-nē, *s.* [Gr. *eledōnē* (*heledōnē*) = a kind of polypus. (Aristotle.)

Zool.: A genus of Cephalopods, family Octopodidae. Two species are known.

***ē-lē-mōs-ýn-ar-l-ý**, *adv.* [Eng. *eleemosynary*; -ly.] By way of charity; in a charitable manner; charitably.

ē-lē-mōs-ýn-ā-r-ý, ***e-lee-mos-in-a-ry**, *a. & s.* [Low Lat. *eleemosynarius* = an almoner; Gr. *eleēmosynē* = alms (q. v.).]

A. As adjective:

1. Given or done by way of alms or charity.

"He had done many several *eleemosynary* cures amongst them."—Boyle: *Works*, v. 704.

2. Relating to charity or alms; established for the distribution of alms or charity; devoted to charitable purposes.

3. Supported by or living upon alms or charity.

***B. As substantive:**

1. One who dispenses alms.

"*Eleemosynary*, an almoner, or, one that gives alms."—Blount: *Glossographia*.

2. One who subsists on charity or alms; a dependent.

"Living as an *eleemosynary* upon a perpetual contribution from all and every part of the creation."—South: *Sermons*, iii., ser. 1.

ēl-ē-gān-ce, ***ēl-ē-gan-cý**, *s.* [Fr. *élégance*; Lat. *elegantia*, from *elegans* = neat, elegant; Sp. *elegancia*; Ital. *eleganza*.] [ELEGANT.]

1. The state or quality of being elegant; a state of beauty arising from perfect proportion and propriety of the parts, and an absence of anything likely to cause a sensation of discord or want of harmony; symmetry.

"Tell me no more of legs and feet
Where grace and elegance meet."

Cotton: *On Mrs. Anne King*.

2. Refinement, polish. (Used of language, style, manners, &c.)

"My plain, homely words
Have not that grace that elegance affords."
Dryden: *Owl*.

bōl, bōy; pōut, jōw1; cat, cell, chorus, chin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -die, &c. = bēl, dēl

3. Anything which is elegant; that which pleases by the perfect propriety and proportion of its parts.

"My compositions in gardening are altogether Pindaric, and run into the beautiful wildness of nature, without the nicer elegancies of art."—Spectator.

él-é-gant, *el-e-gaunt, a. [Fr. *élégant*, from Lat. *elegans*, from *e=ex=*out, and *lego=*to choose; Sp. & Ital. *elegante*.] [ELECT.]

I. Of persons:

1. Capable of choosing, selecting, or discriminating with nicety, judgment, and taste.

"For now I see thou art exact of taste,

And elegant, of sapience no small part."

Milton: P. L., ix. 1,017, 1,018.

2. Nice, sensible to beauty or propriety.

3. Giving rise to a feeling or sensation of pleasure by the perfect propriety, elegance, or gracefulness of manners, language, or style; polished; as, an elegant speaker.

II. Of things:

1. Pleasing to the eye by the perfect propriety and proportion of its parts; free from anything calculated to give rise to a sensation of discord or want of harmony; characterized by elegance, grace, or fine taste.

2. Polished, refined, graceful; free from awkwardness or coarseness; as, elegant manners.

3. Polished or refined in language, style, and thought.

"As for the oration itself, as it is most learned, so it is most elegant."—Gardiner: *Of True Obedience*; Pref. of D. Bonar.

4. Pleasing to the mind as exhibiting fine perception of what is required; characterized by neatness, delicacy, and ingenuity.

5. Excellent.

¶ For the difference between *elegant* and *graceful*, see GRACEFUL.

él-é-gant-ly, adv. [Eng. *elegant*; -ly.] In an elegant manner; with taste, elegance, propriety, or grace.

"He delivered his ambassage most elegantly in the Italian language."—Watson: *Life of Wotton*.

é-lé-gi-ác, *é-lé-gi-äck, a. & s. [Low Latin *elegiacus*, from *elegia=*an elegy (q. v.).]

A. As adjective:

1. Of or pertaining to elegies; used in the composition of elegies; as, *elegiac* verse.

2. Of the nature of an elegy; sad, mournful, plaintive.

"Let *elegiac* lay the woe relate,
Soft as the breath of distant flutes."

Gay: *Trivia*.

B. As subst.: A style of verse commonly used by the Greeks and Romans in writing elegies; it consists of couplets of alternate hexameters and pentameters. It was sometimes applied to any distich, even of two hexameters.

"His Latin elegiacs are pure."—Watson: *History of English Poetry*.

***él-é-gi-ác-al, a.** [English *elegiac*; -al.] The same as ELEGIAC (q. v.).

él-é-gi-ám-bic, a. [Eng. *elegy*, and *iambic*.] A term applied to a kind of verse used by Horace.

***él-é-gi-ást, s.** [Eng. *elegy*; -ast.] A writer of elegies; an elegist.

"The great fault of these *elegists* is, that they are in despair for griefs that give the sensible part of mankind very little pain."—Goldsmith: *Piccolino*, ch. xvii.

***é-lé-gi-óus, a.** [Eng. *elegy*; -ous.] Lamenting, melancholy.

"If your *elegious* breath should hap to rouse
A happy tear, close harb'ring in his eye."

Quarles: *Emblems*.

***él-é-gize, *él-é-gize, v. t. & i.** [Eng. *eleg(y)*; -ize=-ize.]

1. Trans.: To write an elegy upon; to lament in elegies.

"Yet none in lofty numbers can surpass
The bard who soote to *elegize* an ass."

Byron: *English Bards and Scotch Reviewers*.

2. Intrans.: To lament as in an elegy.

"I perhaps should have *elegized* on for a page or two farther."—Walpole: *Letters*, i. 329.

él-é-gist, s. [Eng. *eleg(y)*; -ist.] A writer or composer of elegies.

"Our *elegist* and the chroniclers impute the crime of withholding so pious a legacy to the advice of the king of France."—Watson: *History of English Poetry*, i. 108.

é-lé-git, s. [Lat.=he has chosen, 3d pers. sing. perf. indic. of *eligo=*to choose.]

English Law:

1. A writ of execution after judgment issuing from the court where the record or other proceedings upon it are grounded, and addressed to the

sheriff, who by virtue of it gives to the judgment creditor possession of the debtor's lands, to be by him enjoyed until his debt and damages are fully paid.

2. The title to estate by elegit.

él-é-gy, *el-e-gie, s. [O. Fr. *elegie*, from Lat. *elegia*, from Gr. *elegia=*an elegy; originally neut. pl. of *elegeion=*a distich consisting of an hexameter and a pentameter, from *elegos=*a lament.]

1. A lament, a funeral song or ode; originally applied to one written in elegiac verse. The most remarkable example of the elegy is Gray's "Elegy in a Country Church-yard."

2. Any funeral lament; a dirge.

"Thy strings mine *elegy* shall thrill,
My harp alone!"

Scott: *Rokeby*, v. 18.

3. A poem written in a mournful or serious style.

"He hangs odes upon hawthorns, and *elegies* upon brambles, all, forsooth, defying the name of Rosalind."—Shakespeare: *As You Like It*, iii. 2.

4. Any poem written in elegiac verse.

él-é-mént, s. [Fr. *élément*, from Lat. *elementum=*a first principle: a word of uncertain origin, but perhaps from the same root as *aliment*; Sp., Port. & Ital. *elemento*.]

I. Ordinary Language:

1. Literally:

(1) One of the first or constituent principles of which anything consists or is compounded; one of the fundamental parts or principles by the combination or aggregation of which anything is composed, or upon which its constitution is based.

(2) (Pl.): Earth, air, fire, and water, the so-called elements of which our world is composed.

(3) The air, the sky, the winds.

(4) Any ingredient or constituent part.

(5) The world, the universe.

(6) The proper or natural habitat of any creature, as water of fish.

2. Figuratively:

(1) The proper or natural sphere of any person; the state of life or action most suited to any person.

(2) (Pl.): The first rudiments or elementary principles of any science or art.

(3) A datum, quantity, value, or other matter necessary to be taken into consideration in making any calculation, or coming to any conclusion.

(4) One of the fundamental sources of activity or moving causes in nature or life.

II. Technically:

1. Astron.: [Elements of an orbit.]

2. Chem.: An element is a substance which has not yet been resolved into a more simple form of matter, nor obtained by the union of other elementary substances. It has been stated that at high temperatures certain of the elements have been decomposed, as shown by certain spectroscopic phenomena, but the constituents have not been separated from each other. The number of elementary substances is not known, as certain of the earth-metals have not been obtained in a pure state. The substances which require further investigation before their claims as elements are admitted are marked with an asterisk (*). The Elements have been divided into Metallic and Non-metallic elements (q. v.), but this division is not clearly defined, as arsenic, antimony, and others, are on the border line. Hydrogen should be regarded as a metal. They are classed also according to their atomicity. [MENDELEJEFF'S LAW.] They form remarkable series of three elements in which the atomic weight of the middle element is almost half the weight of the sum of the other two elements, and its properties chemical and physical are intermediate: as, Cl 35.5, Br 80, I 127; S 16, Se 79, Te 128; P 31, As 75, Sb 122; Li 7, Na 23, K 39; Rb 85.5, Cs 133; Ca 40, Sr 87.5, Ba 137; Mg 24, Zn 65, Cd 112; Al 27, Ga 68, In 113.4. Other elements having similar properties have their atomic weights nearly the same: as, N 15, C 59, Fe 56, Mn 55, Cr 52.5; Ce 138, La 140; Pt 197, Ir 198, Os 199; Rh 104.4, Ru 104.4, Pd 106.6. Certain elements form the chief part of nature. Oxygen, hydrogen, nitrogen, and carbon are the chief constituents of all organic matter; water is composed of oxygen and hydrogen; air is a mechanical mixture of oxygen and nitrogen. Rocks are composed chiefly of oxides of silicon, calcium, magnesium, aluminum, iron, sodium, and potassium combined with each other, or with carbonic acid. Sodium chloride occurs in large quantities in sea-water; phosphate and carbonate of calcium form the framework or skeleton of animals. Metals occur native or as carbonates, oxides, and sulphides. But some of the rarer elements occur very widely diffused; thus iron generally contains a trace of vanadium; clay, especially that of Gault, traces of lithium. Many mineral springs contain Cesium and Rubidium in minute quantities. Traces of rare metals in the soil are often detected in the ashes of plants grown on it.

The following is a list of the elements and their symbols and atomic weights:

The following elements are gases at ordinary temperature: Hydrogen, Oxygen, Nitrogen, Chlorine, and Fluorine; and two are liquids, Bromine and Mercury. For other properties of the elements, see ATOMICITY, ATOMIC WEIGHT, ATOMIC THEORY, ATOMIC HEAT, &c.

3. Eccles. (pl.): The bread and wine used in the Holy Eucharist.

4. Elect.: Elements in binary compounds are divided into electropositive and electronegative. The former separated at the positive pole are electronegative, and those at the negative are electropositive.

5. Math.: If we suppose a surface to be generated by a right line moving according to some fixed law, every position of the moving line is called an element. The term is also applied to an infinitely small particle of the same nature as the entire magnitude considered.

¶ Elements of an orbit:

Astron.: Those quantities the determination of which define the path or orbit of a planet, a comet, or other celestial body, thus enabling the observer to determine the exact position of such body at any past or future time.

*él-é-mént, v. t. [ELEMENT, s.]

1. To compound of elements.

2. To constitute; to form an element or first principle of.

él-é-mén-tal, a. [Eng. *element*; -al.]

fâte, fât, färe, amidst, whât, fáll, father; wê, wêt, hère, camél, hâr, thère; pine, plt, sire, sîr, marine; gô, pô, or, wôre, wolf, wôr, whô, sôn; mâte, cûb, cûre, unite, cûr, râle, fûll; trÿ, Sÿrian. æ, œ = é; ey = â. qu = kw.

1. Produced by or among elements or first principles; pertaining to the four elements of which the world was supposed to be composed.
2. Arising from first principles; natural, innate.
3. Pertaining to the elements or first principles of any art or science; elementary, rudimentary.

**él-ě-mén-tál'-i-tý, s.* [Eng. *elemental*; -*ity*.]

1. The quality or state of being elemental or elementary.
2. Combination of principles or ingredients.

él-ě-mén-tal'-i-ly, adv. [Eng. *elemental*; -*ly*.] In an elemental manner; according to elements; literally.

**él-ě-mén-tar, a.* [ELEMENTARY.] Elementary, primary.

él-ě-mén-tar-i-něss, s. [English *elementary*; -*ness*.] The quality or state of being elementary; primary, rudimentary.

**él-ě-mén-tár'-i-tý, s.* [English *elementar*(y); -*ity*.] The quality or state of being elementary; elementariness.

él-ě-mén-tár-y, a. [Latin *elementarius*, from *elementum*; Fr. *élémentaire*; Ital. *elementario*.]

1. Consisting of only one element, principle, or constituent part; uncompounded, uncombined, primary, simple.
2. Rudimentary, rudimental.
3. Treating of, discussing, explaining, or teaching the elements or first principles of any science or art.

elementary-analysis, s.

Chem.: Analysis designed to ascertain of what elements or simple substances a compound is composed. It is more generally called Ultimate Analysis.

elementary-organisms, s.

Anat.: A name proposed by Brücke for animal cells destitute of envelope. It has not come into general use.

elementary-organs, s.

Bot.: The cells from which all plants are developed. [CELL, Bot.]

elementary-schools, s. pl. Schools for teaching the first elements of knowledge; primary schools. [SCHOOL.]

elementary-substances, s. pl. The same as ELEMENTS, *Chem.* (q. v.)

**él-ě-mén-tá-tion, s.* [Eng. *element*; -*ation*.] Instruction in the elements or first principles.

él-ě-mént-éd, a. [English *element*; -*ed*.] Composed or consisting of elements; compounded of elements or first principles.

él-ě-mén-ts, s. pl. [ELEMENT, s.]

él-ě-mí, s. [Fr. *élemi*; Sp. Port. & Ital. *elemi*, from either a native American or an Oriental word.]

1. *Bot.*: Gum resins derived from various trees. The American or Brazilian elemi is from *Icica Icicaria*, the Mexican from *Elaphrium elemiferum*, and the Eastern or Manila from *Canarium commune*.
2. *Comm.*: A brownish yellow resin, from a species of elemi, used to mix with spirit and turpentine varnishes to prevent their cracking as they dry. Distilled with water it yields a transparent colorless oil, which boils at 166°.
3. *Phar.*: Elemi has an odor like fennel, and a bitter, aromatic taste. It is used to form *Unguentum elemi*, ointment of elemi, which is applied as a topical stimulant.

él-ě-míne, él-ě-mín, s. [English, &c., *elemi* (q. v.); -*ine* (Chem.).]

Chem.: $C_{10}H_{16}$. The transparent, colorless oil distilled from elemi resin.

*ě-lěch, *ě-lenche, s.* [Latin *elenchus*; Greek *elenchos*, from *elenchō*=to refute, to prove, to argue.]

I. Logic:

1. A syllogism by which an opponent is made to contradict himself.
2. A fallacious argument; a sophism.
3. The refutation of an opponent by arguing.

II. Antig.: A kind of ear-ring set with pearls.

**ě-lěh'-chic, *ě-lěh'-chí-cal, a.* [Eng. *elench*; -*ic*; -*ical*.] Of or pertaining to an elench; of the nature of an elench.

ě-lěh'-chí-cal-ly, adv. [Eng. *elenchical*; -*ly*.] By means of an elench.

**ě-lěh'-chize, v. t.* [Eng. *elench*; -*ize*.] To argue, to dispute.

"Hear him problematize . . . or syllogize, *elenchize*."—Ben Jonson: *New Inn*, II. 2.

**ě-lěch'-tic, *ě-lěch'-tic-al, a.* [Eng. *elench*; *t* connective; suff. -*ic*, and -*ical*.] Serving to convict, refute, or contradict.

"This is of two kinds, didactic and *elenchitic*."—Wilkins: *Ecclesiastes*, p. 90.

ěl-ě-ěch'-ar-ls, s. [Gr. *helos, heleos*=a marsh, and *charis*=favor . . . favor felt; *chairō*=to rejoice.]

Bot.: Spike-rush. A genus of Cyperaceæ, tribe Scirpæ. About 118 species are known. The most common is *Eleocharis palustris*, the Creeping Spike-rush, which has a stout creeping rootstock, with many tufts of leaves and stems, four to six bristles; compressed fruit. It is found in this country, in Britain and on the continent of Europe, in Northern Africa, Northern Asia, and Western India.

ěl-ě-ět, s. [Etym. doubtful.] A kind of apple.

ěl-ě-ě-trā'-gūs, s. [Gr. *helos, heleos*=a marsh, and *tragos*=a he-goat.]

Zool.: A genus of Antelopes. *Eleotragus arundinaceus* is the Riet-boc (Reed-buck) of Southern Africa.

ěl-ě-phānt, s. & a. [Dan., Ger., & Prov. *elephant*; Fr. *éléphant*; Sw. *elefant*, Dut. *oliphant*; Port. *elephante*; Sp. & Ital. *elefante*; Lat. *elephas* (genit. *elephantis*), also *elephantus*; Gr. *elephas* (genit. *elephantos*); in Homer, Hesiod, and Pindar =the elephant's tusk, ivory only; in Herodotus and Aristotle=the animal. Cf. Heb. *eleph*=an ox.]

A. As substantive:

1. Ordinary Language:

*1. A horn of ivory. (*King Alysander*, 1,182.)

[See etym.]

2. The animal described under II. 1 (q. v.).

*3. Ivory; the teeth of elephants.

"High o'er the gate, in elephant and gold,
The crowd shall Caesar's Indian war behold."
Dryden: Virgil; Georgic iii. 41, 42.

II. Technically:

1. *Zool.*: The name given to the only two species of elephants still living—viz., *Elephas indicus*, the Indian or Asiatic; and *E. africanus*, the African elephant. The molars of the former are 2, with undulating bands of enamel; those of the latter 3, their crowns with lozenge-shaped ridges of enamel. The Asiatic elephant is, moreover, the larger of the two. The head is oblong, the forehead concave, the ears somewhat large, the hind feet with four hoofs. Its ordinary height is about ten feet. It inhabits India and other parts of Southern Asia, and the Eastern Islands. While many representatives of the species are yet remaining wild in the jungles of India, it has been largely domesticated in that land, every petty Indian potentate possessing a few or many of them. The Anglo-Indians mount on their backs when hunting for tigers, besides occasionally using them to ride upon in journeys, or more largely to carry burdens. The Indian God Ganesh, or Ganesa, the patron of wisdom, has evidently been suggested at first by the sagacity of the *E. indicus*. The African elephant has a round head, convex forehead, very large ears, and the hind feet with only three hoofs. It is smaller than the Asiatic species. It is found through a great part of Africa. This seems to have been the species known to the Greeks and Romans. When first brought into the battlefield against the latter people, by Pyrrhus, it inspired some terror. This was, however, ultimately dissipated when it was seen how easily they could be driven by men through the amphitheater at the imperial games.

2. *Her.*: [Order of the Elephant.]

3. *Bot.*: A kind of Scabious. (*Wright*.)

4. *Paper*: A size of drawing-paper measuring twenty-eight by twenty-three inches, and weighing seventy-two pounds to the ream. A flat writing-paper of about the same dimensions.

B. As adj.: Pertaining to, derived from, or in any way connected with or resembling the elephant.

1. (1) *Order of the Elephant*: A Danish Order of knighthood, originally religious, but secularized by Christian V., in 1693.

(2) *Sea elephant*: The Bottle-nosed Seal. [CYSTOPHORA.]

elephant-apple, s.

Bot.: A tree, *Feronia elephantum*, which grows in India. It is of the Orange tribe, and is large and handsome, with pinnate leaves and a large gray fruit with a very hard rind.

elephant-bed, s.

Geol.: A bed or stratum at Brighton, England, noted for the abundant remains of fossil elephants. The name was given by Mantell.

elephant-beetle, s.

Entom.: Either of two large lamellicorn beetles from West Africa. They are—(1) *Goliathus giganteus*, (2) *G. caecicus*.

elephant-fish, s.

Ichthy.: *Callorhynchus antarctica*. [CALLORYNCHUS.]

elephant hawk-moth, s.

Entom.: *Metopisus elenor*. Upper wings olive-brown, inclining to olive green, with purple tinged rose-red markings, a white margin and spot, and a

red fringe. Under wings dusky at the base, and reddish-purple posteriorly, with a pure white fringe. The caterpillar feeds on the Willow-herbs (*Epilobium*), the vine, &c.

¶ *Small Elephant Hawk-moth:*

Entom.: *Metopisus porcellus*. It is one of the smallest species of the genus, being usually but twenty lines long. Fore wings ochre-yellow and purple; hinder ones black anteriorly, purple posteriorly, with yellow between; body rose-colored or purple. The caterpillar feeds chiefly on *Epilobium angustifolium*.

elephant-paper, s. The same as ELEPHANT, II. 4.

elephant-shrew, s.

1. *Sing.*: *Macroscelis typicus*. [2.]

2. *Pl.*: The Macroscelidae, a family of Insectivorous Mammals, having a proboscis suggesting that of the elephant, except in its minute size. They are from Africa.

elephant's-ear, s.

ot.: The English name of the genus *Begonia*.

elephant's-foot, s.

Botany:

1. *Testudinaria Elephantipes*.

2. The genus *Elephantopus* (q. v.).

elephant's-tusk, s.

1. *Lit.*: The tusk of an elephant. It is a genuine incisor tooth.

2. The shell of *Dentalium arcuatum*, or that mollusk itself.

ěl-ě-phān'-ta, s. [From the island of that name.] For def. see extract.

"The termination of the rainy season on this side India is usually proclaimed by a tremendous burst of thunder and lightning, termed the *Elephanta*, and caused by the commencement of the Madras monsoon. For some days previous to this final crash the atmosphere is charged with electricity, and the heavy thunder-clouds, which apparently form directly over the island of Elephanta, roll onward to expend themselves in one terrific storm, which bears its name."—*Life in Bombay* (London, 1852), p. 194.

ěl-ě-phān-ti-āc, a. [Eng. *elephant*(asis); -*ac*.]

Med.: Pertaining to or of the nature of elephantiasis; suffering from elephantiasis.

ěl-ě-phān-ti'-a-sis, s. [Greek *elephantiasis*=a cutaneous disease, especially prevalent in Egypt, so called from its likeness to an elephant's hide. (*Liddell & Scott*.)]

Med.: Two distinct diseases were long confounded under this term, the Grecian and the Arabian Elephantiasis.

(1) Grecian or Greek Elephantiasis (*Elephantiasis Græcorum*), Tubercular Elephantiasis. It is characterized by the breaking-out over the face, ears, or limbs of reddish or dark tubercles from the size of a split-pea to that of a large nut; the skin becomes thickened, wrinkled, and of diminished sensibility. It is ultimately fatal. It is common in India, where two forms of it occur, in Arabia, Africa, Madeira, and the West Indies, as also in Norway and Iceland. [LEPROSY.]

(2) Arabian Elephantiasis (*Elephantiasis Arabum*), called also Elephant Leg, and locally in Ceylon Galle Leg, on the Indian peninsula Cochin Leg, and in the West Indies Barbadoes Leg, or sometimes Yam Leg. It consists, according to Dr. Musgrave, of a migratory inflammation of the lymphatic system, and may affect various organs, especially the legs. Rhazes, an Arabian physician, described it about A. D. 850. In the East it is common on the south-west coast of Ceylon, in Cochin, Malabar, also in Japan, Egypt, and parts of Abyssinia. Its chief locality in the western world is Barbadoes, where at first it was limited to the negroes, but in 1706 began to attack also the Creoles. Its causes are unknown.

ěl-ě-phān-ti-dæ, s. pl. [Latin *elephas* (genit. *elephantis*) and Lat. fem. pl. adj. suff. -*idæ*.]

Zool. & Paleont.: A family of Mammals, the typical one of the order Proboscidea (q. v.). In addition to *Elephas*, it contains the extinct genus *Mastodon*, distinguished from the former by the shape of the crown of its teeth. [ELEPHANT, MASTODON.]

ěl-ě-phān-tine, a. [Lat. *elephantinus*; Greek *elephantinos*; Fr. *élephantin*.] [ELEPHANT.]

A. Ordinary Language:

I. Literally:

1. Of or pertaining to an elephant; resembling an elephant.

*2. Made of ivory.

"Chaste elephantine bone."

Jones: *Enchanted Fruit*.

II. Fig.: Huge, immense: as, A person of elephantine proportions.

"Beneath his overshadowing orb of hat,

And ample fence of elephantine nose."

J. Phillips: *Cerealia*.

ból, bōy; pòut, jòw1; cat, gell, chorus, çhin, bengh; go, gem; thin, this; sin, aq; expect, Xenophon, exist. ph = f. -cian, -tian = shān. -tion, -sion = shūn; -tīon, -sīon = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bel, del.

E. Rom. Antiq.: An epithet applied to certain tablets or books in which the transactions of the senate, magistrates, emperors, &c., were registered, so called from being made of ivory.

Ēl-ē-phān'-tōid, Ēl-ē-phān'-tōid'-al, a. [Greek *elephantoides*=like an elephant, from *elephas* (genit. *elephantos*)=an elephant, and *eidos*=form; Eng. &c. suff. -al.] Resembling an elephant, elephant-like.

Ēl-ē-phān-tō'-pē-æ, s. pl. [Mod. Lat. *elephantopos* (q. v.), and Lat. fem. pl. adj. suff. -æc.]
Bot.: A sub-tribe of Composite plants, tribe Veroniacæ.

Ēl-ē-phān-tō-pūs, s. [Gr. *elephantopous*=ivory-footed, but now used for "shaped like an elephant's foot;" *elephas* (genit. *elephantos*)=an elephant, and *pous*=foot.]

Bot.: A genus of Composite, the typical one of the sub-tribe Elephantopæ. About twelve species are known. *Elephantopus scaber* is a plant about a foot high, with heads of pale red flowers. It is common in India. The natives of Malabar use a decoction of it as a remedy in dysuria.

Ēl-ē-phās, s. [Lat. & Gr.] [ELEPHANT.]

1. **Zool.:** A genus of mammals, the typical one of the family *Elephantidæ*. The incisor teeth are two; they are enormously developed, and are what are popularly called tusks. The molars vary in the different species; they have vertical and transverse laminae springing from the bottom of the jaw transversely forward; the nose is elongated into a trunk, the multifarious motions and operations of which, from lifting a cannon to picking up a pin, are produced, according to Cuvier, by the action of nearly 40,000 muscles; mammae two, tail rather short, pencillated at the end; five toes to all the feet. There are but two living species known. [ELEPHANT.]

2. **Paleontol.:** The oldest stratum in which the genus has as yet been found is the Siwalik formation of India, which is Upper Miocene. By the time of the Pliocene they were scattered over the world. In Malta there were two of pigmy size—*Elephas melitensis*, the Donkey elephant, and *E. falconeri*, the former four and a half, the latter two and a half to three feet high. *E. antiquus* abounded in the Post-pliocene of Southern Europe; while *E. primigenius*, the Mammoth, was a northern and even arctic form, being adapted to bear cold by its long shaggy hair. [MAMMOTH.]

Ēl-ēt-tār'-ī-a, s. [From one of its native names, which in the Mahratta country are *ela*, *ailum*, *cheddy*, *elachee*, *elah*, and *eldorah* (†).]

Bot.: A genus of Zingiberacæ, akin to *Anomum*, except that the tube of the corolla is filiform and the anther naked. *Elettaria cardamomum* furnishes the small Cardamoms, called also the Malabar Cardamoms, of commerce. *E. major* is said to produce the Ceylon Cardamoms. [CARDAMOM.]

Ēl-ēu-sī'-nē, s. [From *Eleusis* in Attica.] [ELEUSINIAN.]

Bot.: A genus of Grasses, tribe Chlorææ. *Eleusine coracana*, called in the West of India Natchnee, Nagla, Ragee, and Mand, forms a principal article of diet among the hill people of the Western Ghauts, in India. It is cultivated also in Japan. *E. stricta* is also used for food. In Demara a decoction of *E. indica* is prescribed in infantile convulsions.

Ēl-ēu-sin'-ī-an, a. [Gr. *Eleusis*, *Eleusin*, a city in Attica, where were celebrated the mysteries of Ceres or Demeter.] Of or pertaining to Eleusis; as, the Eleusinian mysteries.

Eleusinian-mysteries, s. pl.

Greek Myth.: Mysteries annually celebrated in the month of September, at Eleusis, in honor of Ceres. They were of great antiquity, and continued till the invasion of Alaric I., in A. D. 396.

Ēl-ēu-thēr'-ī-a, s. & a. [See def.]

A. As substantive:

Geog.: One of the Bahama Islands.

B. As adjective: (See the compound.)

Eleutheria bark, s.

Bot.: The bark of *Croton Eleutheria*, so named from growing on the island of the same name. It yields Cascarella (q. v.).

Ēl-ēu-thēr'-ī-an, a. [Gr. *eleutheros*, from *eleutheros*=free.] Delivering, saving.

"Eleutherian Jove will bless their flight."

Glover: *Leonidas*, bk. i.

***Ēl-ēu-thēr-ō-mā-nī-a, s.** [Gr. *eleutheros*=free, and *mania*=madness.] A madness for freedom.

"Nothing but insubordination, *eleutheromania*."—*Carlyle: French Revolution*, pt. i., bk. iii., ch. iv.

***Ēl-ēu-thēr-ō-mā-nī-āc, a.** [Gr. *eleutheros*=free, and Eng. *maniac*.] Mad for freedom.

"*Eleutheromania* philosophodem grows ever more clamorous."—*Carlyle: French Revolution*, pt. i., bk. ii., ch. v.

Ēl-ēu-thēr-ō-pēt'-a-loūs, a. [Gr. *eleutheros*=free, and *petalon*=a leaf.]

Bot. (of a corolla): Having the petals distinct—i. e., in no way cohering together; apopetalous, polypetalous.

Ēl-ēu-thēr-ō-phŷl'-loūs, a. [Greek *eleutheros*=free, and *phyllon*=a leaf.]

Bot. (of a perianth): Consisting of distinct portions, in no way cohering together; apophyllous, polyphyllous.

Ēl-ēu-thēr-ō-pō'-mī, s. pl. [Gr. *eleutheros*=free, and *poma*=a lid, a cover.]

Ichthy.: A name given to Chondropterygii, or the first order of Cuvier's cartilaginous fishes, those designated in Griffith's *Cuvier* by the circumlocution Chondropterygii with free gills. It contains the Sturgeons. [ACIPENSER.]

Ēl-ēu-thēr-ō-sēp'-a-loūs, a. [Gr. *eleutheros*=free, and Eng. *sepalous* (q. v.).]

Bot. (of the calyx): Having the sepals distinct instead of cohering; aposepalous, polysepalous.

Ēl-ēu-thēr-ūr'-ūs, s. [Gr. *eleutheros*=free, and *oura*=tail.]

Zool.: A genus of Pteropidæ, Frugivorous Bats. *Eleutherurus ægypticus* is sculptured on the Egyptian monuments.

Ēl-ē-vāte, v. t. [Lat. *elevatus*, pa. par. of *elevo*=to lift up; *e*=out, up, and *levo*=to make light, to lift; *levis*=light; Fr. *élever*; Ital. *elevare*; Sp. *eleva*.]

*1. To make light of.

"Withal he forgot not to *elevate* as much as he could the fame of the aforesaid unhappy field fought, saying that if all had been true there would have been messengers coming thick one after another upon their flight to bring fresh tidings thereof."—*P. Holland: Surgery*, p. 1, 199.

2. To lift, to raise up from a lower to a higher place or position.

"This subterranean heat or fire, which *elevates* the water out of the abyss."—*Woodward*.

3. To raise or exalt in position, rank, or dignity.

4. To raise, to make higher or louder: as, to *elevate* the voice.

5. To raise with high or great conceptions; to refine, to improve, to raise in character or sentiment.

"And I am conscious of affecting thoughts
And dear remembrances, whose presence soothes
Or *elevates* the mind, intent to weigh
The good and evil of our mortal state."

Wordsworth: *Recluse*.

6. To excite, to elate, to animate.

"A little *elevated*

With the assurance of my future fortune."

Mossinger: *Parliament of Love*, il. 1.

7. To make excited with drink; to intoxicate slightly.

¶ For the difference between *elevate* and *lift*, see **LIFT**.

***Ēl-ē-vāte, *Ēl-ē-vat, a.** [Lat. *elevatus*, pa. par. of *elevo*.]

1. Raised.

"As many degrees as thy pool is *elevat*."—*Chaucer: Astrolabe*, p. 32.

2. Elevated, raised, high.

"In a region *elevate* and high."

Drayton: *Barons' Wars*, bk. i.

Ēl-ē-vāt-ēd, pa. par. & a. [ELEVATE, v.]

A. As pa. par.: (See the verb.)

B. As adjective:

I. Ordinary Language:

1. Lifted or raised up; set on high or above others; exalted: as, an *elevated* position or dignity.

2. Raised, made louder.

"Your *elevated* voice goes through the brain."

Cowper: *Conversation*, 328.

3. Slightly intoxicated with drink; excited.

"He is supposed to be a little *elevated*, and nobody hears him."—*Diokens: Martin Chuzzlewit*, ch. ix.

II. Her.: Applied to the wings of a bird, which are expanded and upright.

elevated-battery, s. A battery which has its whole parapet elevated above the natural surface of the ground; to procure the mass of earth required, a ditch is usually dug directly in front of the parapet.

elevated-oven, s. An oven whose baking-chamber is situated above that plate of the stove in which are the holes for the pots and kettles.

elevated-railway, s. A railway with an elevated line of rails. Any railroad supported on a continuous viaduct may be said to be an elevated railway, but the term has lately received a rather more limited application. It is now particularly applied to city railroads of which the line of rails is so elevated as not to materially infringe upon the street area, such as are in New York and Chicago.

Ēl-ē-vāt-lŭg, pr. par., a. & s. [ELEVATE, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The act of lifting up, raising, or exalting; elevation.

elevating-block, s. A tackle-block used in elevating hay or bales, where, after the object has been raised to a given height, the block is required to travel along to a position above where the load is to be deposited. The track-rope passes through the case under the locomotive pulleys. The draft-rope leading from the hay-fork to the team passes between the lower pulley and the stop. The cord running over the pulley in the rear operates the stop that, rigidly connecting the draft to the track-rope above, arrests its progress in either direction. It is managed by a depending check-rope, which is grasped by a man on the barn or warehouse floor. (*Knicht*.)

elevating-clutch, s. Designed to attach a clutch to an elevated beam in a barn, as a means of suspension for the tackle of a horse hay-fork, and to detach the clutch therefrom when required. It has two arms attached to a handle of any suitable length, and arranged to engage the jaws of the clutch to hold them open until the beam is grasped, or to uncloset them when required. (*Knicht*.)

elevating-screw, s. A screw beneath the breech of a piece of ordnance, to give the elevation or vertical direction to the piece. In field-pieces it is bedded in the stock immediately under the base-ring of the gun, which rests on the top of the screw. The latter is turned by four handles. In theodolites and other geodetical and astronomical instruments a similar contrivance is used for leveling the instrument. (*Knicht*.)

Ēl-ē-vā-tion, s. [Lat. *elevatio*, from *elevatus*, pa. par. of *elevo*=to lift up; Fr. *élévation*; Sp. *elevacion*; Ital. *elevazione*.]

I. Ordinary Language:

1. The act of elevating, lifting up, or raising to a higher place or position.

"The disruption of the strata, the *elevation* of some, and depression of others, did not fall out by chance, but were directed by a discerning principle."—*Woodward*.

2. The state of being elevated, lifted up, or raised.

3. The act of raising, promoting, or exalting to a higher state, position, or dignity.

4. The state of being raised or exalted to a higher state, position, or dignity.

"One of the most severe trials to which the head and heart of man can be put is great and rapid *elevation*."—*Macaulay: Hist. Eng.*, ch. xxv.

5. An elevated position or ground; a height, an altitude.

6. A position of high honor, rank, or dignity.

"Angels, in their several degrees of *elevation* above us, may be endowed with more comprehensive faculties."—*Locke*.

7. The act of raising, refining, or improving the mind, manners, character, style, &c.

8. A state of refinement or exaltation of the mind, &c., by noble conceptions.

"There must be some *elevation* of soul in a man who loves the society of which he is a member and the leader whom he follows with a love stronger than the love of life."—*Macaulay: Hist. Eng.*, ch. xiii.

9. Dignity or refinement of language or style.

"His style was . . . so far from tumid, that it rather wanted a little *elevation*."—*Wotton*.

10. The act of raising or lifting up the heart in prayer.

"All which different *elevations* of spirit unto God are contained in the name of prayer."—*Hooker: Ecclesiastical Polity*.

II. Technically:

1. Architecture, Drawing, &c.:

(1) A side or end view of an object or representation on a perpendicular plane.

(2) An end or side view of a building or machine drawn according to the actual width and height of its parts without reference to perspective.

2. **Astron.:** The arc of a vertical circle intercepted between an object and the horizon; the altitude or height of any heavenly body with respect to the horizon.

"Some latitudes have no canicular days, as those which have more than seventy-three degrees of northern *elevation*."—*Brownie: Vulgar Errors*.

3. **Dialing:** The angle of the gnomon with its base.

4. **Geol.:** The upheaval of the land in any region or district by an earthquake commotion or by other agency, as has been alleged to be the case on the coast of Sweden, though Lord Selkirk in 1866 somewhat modified previous views on the subject. [IGNEOUS.]

5. **Gunnery:** The angle of the line of fire with the plane of the horizon.

6. *Trig. Surv.*: The altitude or height of any object or point above the surface of the earth; the angle of elevation (q. v.).

7. *Astrol.*: A certain pre-eminence of one Planet above another; or, a concurrence of Two to a certain Act, wherein one being Stronger is carried above the Weaker, and does alter and depress its Nature and Influence. (*Moxon.*)

8. (1) *Angle of elevation*:

Trig. Surv.: The angle formed by two straight lines drawn in the same vertical plane, the one from the observer's eye to the highest point of an object, the other parallel to the horizon.

(2) *Elevation of the Host*:

Roman Catholic Church: The part of the mass in which the celebrant raises the Host above his head to be adored by the people.

(3) *Valley of elevation*:

Geol.: A valley produced by the elevation of strata so as to constitute an anticlinal, cracked or fissured at the top so as to produce a ravine or narrow valley. It excavated mainly by water or ice, it is not properly a valley of elevation.

elevation-crater, s. & a. A term used chiefly in the subjoined compound.

Elevation-crater theory: [*CRATER.*]

él-è-vât-ôr, s. [*Low Lat. elevator*; *Fr. élévateur*; *Ital. elevatore*, from *Lat. elevatus*, pa. par. of *elevo*=to elevate (q. v.).]

1. *Ord. Lang.*: One who or that which elevates, raises, or lifts up.

II. *Technically*:

1. *Anat.*: A muscle whose function it is to elevate a part of the body, as the lip, the eye, &c.

2. *Machinery*:

(1) A machine for transferring grain by raising it from the car, a bin, or the hold of a ship, to an elevated hopper, whence it is discharged by any one of a series of spouts directed to a bin for storage or to the hold of a boat, a car, or to a run of stones. Elevators are used in flour-mills to carry the wheat to the upper story, where it is cleaned in the smut-mill; also to raise wheat, so cleaned, to a bin whence it proceeds to the stones; also to raise the meal to the bolt, the offal to the bran-duster, &c., as the case may be. Elevators are also used in many other machines for raising small objects or materials, such as the tailings in a thrashing-machine or clover-huller. They are also used in elevating bricks, mortar, &c., in building.

(2) A platform or cage in a warehouse, hotel, mine, or elsewhere, for raising or lowering persons, goods, or material to or from different floors or levels. Elevators for carrying people from floor to floor of hotels, business offices, public buildings and flats, are much in use, and are called "passenger elevators," in distinction from "freight elevators." [*LIFT, s.*]

3. *Grain-trade*: A building specially constructed for elevating, storing, and loading grain into cars or vessels. These structures are very capacious, both as to the capacity for handling and storing, but the construction is very simple. An elevator-leg, so called, reaches into the bin or cellar into which the contents of the wagons or cars are discharged. A strong belt, carrying a series of buckets, travels over a drum at the lower end and also over one at the upper end, where the buckets tip over and discharge into the upper bin. This has valved spouts, which direct the contents into either one of the deep bins. The floors of these bins are over the tracks, and valves in the floor allow the contents of the bins to be discharged into cars or canal-boats, which are brought beneath. In unloading from ships, the leg is a pivoted, adjustable piece, which is first raised to obtain the necessary height, brought over the hatchway, and lowered thereinto. In practice the grain is discharged into the hopper of a weighing-machine gauged exactly for one hundred bushels; by pulling on a valve the contents are sent by a spout to the bin, the valve closed, the elevating resumed, and so on. Seven thousand bushels an hour are thus weighed.

4. *Surgical*: An instrument employed in raising portions of bone which have been depressed, or for raising and detaching the portion of bone separated by the crown of the trepan. The common elevator is a mere lever, the end of which is somewhat bent

and rough, in order that it may less readily slip away from the portion of bone to be raised. The elevator of Louis has a screw peg united to the bridge by a kind of pivot. Pettit's elevator is a straight lever, except at the very point, where it is slightly curved. The triploid elevator consists of three branches united in one common trunk. The elevator is one of the instruments of the trephine case. A curved instrument for operating upon depressed portions of the skull was disinterred at Pompeii, 1819, by Dr. Cavenue of St. Petersburg.

elevator-bucket, s. One of the grain cups on the traveling-belt of the elevator.

él-è-vât-ôr-ÿ, a. & s. [*Eng. elevator*; -ÿ.]

A. *As adj.*: Tending or having the power to lift or raise.

"The elevatory effect of such dislocating movements." —*Lyell: Princ. of Geol.*, ch. xxi.

B. *As substantive*:

Surg.: The same as *ELEVATOR*, II. 4.

è-ll-às-ite, s. [*Named from the Elias mine, Joachimsthal, where it occurs; -ite (Min.)* (q. v.).]

Min.: A subtranslucent or opaque mineral occurring in shapeless masses. Hardness, 3-4-5; specific gravity, 4-5. There are two varieties: (1) *Eliasite proper*: Of reddish-brown color, hyacinth-red on the edges, streak yellow or orange; (2) *Pit-tinite*: Color black, streak olive-green. Both are closely akin to *Grennite* (q. v.). The *Brit. Mus. Cat.* makes it a variety of *Pitchblende* (q. v.).

è-ll-ic-ite, *è-ll-ic-ite, v. t. & i. [*Lat. elicitus*, pa. par. of *elicio*=to draw out: *e*=out, and *lacio*=to entice, to allure.]

A. *Transitive*:

1. To draw out, to extract, to educe.

"Divers particles of matter and spirits derived and elicited from the plant or animal." —*Hale: Origin of Man-kind*, p. 76.

2. To ascertain by reasoning and observation; to deduce.

"By bringing reason to bear upon observation, the astronomer has been able out of the 'mystic dance' to elicit their order and their real paths." —*Paley: Natural Theology*, ch. xxii.

3. To ascertain or bring to light by inquiry and questioning.

B. *Intrans.*: To ascertain, to find out, to discover, to deduce.

***è-ll-ic-ite, *è-ll-ic-ite, a.** [*Lat. elicitus*, pa. par. of *elicio*.] Brought into act or real existence; open, evident.

"The schools dispute whether, in morals, the external action superadds anything of good or evil to the internal elicit act of the will." —*South: Sermons*, vol. I, ser. 8.

***è-ll-ic-ite-tate, v. t.** [*Eng. elicit*; -ate.] To elicit, to discover, to deduce.

***è-ll-ic-ite-tion, s.** [*Eng. elicitat(e)*; -ion.] The act or process of eliciting, drawing out, or educing.

è-ll-ic-ite-d, pa. par. or a. [*ELICIT, v.*]

è-ll-ic-ite-ing, pr. par., a. & s. [*ELICIT, v.*]

A. & B. *As pr. & particip. adj.*: (See the verb.)

C. *As subst.*: The act or process of drawing out, deducing, or ascertaining.

***è-ll-de, v. t.** [*Lat. elido*, from *e*=out, and *lædo*=to dash, to hurt.]

I. *Ord. Lang.*: To crush, to break in pieces, to destroy utterly.

bôil, bôÿ; pout, jowl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, ag; expect, Xenophon, exist. ph = f.
-cian, -tian = shan. -tion, -sion = shün; -tion, -sion = zhün. -tious, -cious, -sious = shüs. -ble, -dle, &c. = bel, del.

II. Technically:

1. *Law*: To quash.
2. *Gram.*: To cut off or suppress the last syllable by elision.

**ē-lie*, **ē-lye*, v. t. [OIL, v.] To anoint.

**ē-lī-gent*, s. [Lat. *eligens*, pa. par. of *eligo*=to choose, to elect.] An elector.

**ē-lī-g-l-bil-lī-tŷ*, s. [As if from a Low Lat. *eligibilis*, from *eligibilis*=eligible (q. v.).]

1. The quality or state of being worthy or fit to be chosen; the state of being preferable.
2. The quality or state of being eligible or capable for being chosen to any office or position; the position of being legally qualified for any office.

**ē-lī-g-l-ble*, a. [Fr. *Eligible*, from Low Latin *eligibilis*, from Lat. *eligo*=to choose; e=out, and *lego*=to choose; Ital. *eligibile*.] [ELECT.]

1. Fit or deserving to be chosen; worthy of choice, preferable.

2. Desirable, suitable.

3. Fit or qualified to be chosen to any office or position; legally qualified or capable for election or appointment. (Generally followed by *for* before the office or position.)

† Crabb thus discriminates between *eligible* and *preferable*: "Eligible or fit to be elected, and preferable to be preferred, serve as epithets in the sense of choose and prefer: what is *eligible* is desirable in itself, what is *preferable* is more desirable than another. There may be many *eligible* situations out of which perhaps there is but one *preferable*. Of persons, however, we say rather that they are *eligible* to an office than *preferable*." (Crabb: *Eng. Synon.*)

**ē-lī-g-l-ble-ness*, s. [Eng. *eligible*; -ness.] The quality or state of being eligible; eligibility.

**ē-lī-g-l-blŷ*, adv. [Eng. *eligibly*; -ly.] In a manner deserving or fit to be chosen or preferred; suitably, desirably.

**ē-lī-ke*, a. [ALIKE.] Like, similar.

**ē-lī-māte*, v. t. [Lat. *elimo*: e=out, fully, and *lima*=a file.] To polish, to render smooth.

**ē-līm-l-nant*, s. [Lat. *eliminans*, pr. par. of *elimino*.] [ELIMINATE.]

1. *Math.*: The result of eliminating *n* variables between *n* homogeneous equations of any degree. Called also *RESULTANT* (q. v.).

2. *Med.*: A remedy that causes absorption, or enables the system to throw off deleterious matter; e. g., the iodides.

**ē-līm-l-nāte*, v. t. [Lat. *eliminatus*, pa. par. of *elimino*=to put out from the threshold, to publish: e=out, and *limen* (genit. *liminis*)=a threshold; Fr. *éliminer*.]

I. Ordinary Language:

*1. Literally:

- (1) To thrust, put, or cast forth out of doors. (Blount.)

- (2) To pass over the threshold; to pass beyond.

2. Figuratively:

- (1) To set free from confinement, to set at large, to discharge.

"Eliminate my spirit, give it range

Through provinces of thought yet unexplored."

Young: *Night Thoughts*, l. 590, 591.

- (2) To discharge, to throw off, to vent.

- (3) To publish abroad. (Blount.)

- (4) To get rid of; to clear away.

"To discharge and eliminate the errors that have been gathering and accumulating."—Lowth: *Isaiah* (Prelim. Disc.).

- (5) To leave out of an argument or consideration; to set aside, to pass over.

- (6) To obtain by eliminating; to elicit, to deduce, to educate, to infer.

"Conclusions which all are glad to accept after they have been painfully eliminated by others."—O. W. Holmes.

II. Algebra:

1. To cause a quantity or quantities to disappear from an equation; to remove a quantity or quantities from each side of an equation.

2. To combine several equations containing several unknown quantities, so as to deduce therefrom a less number of equations containing a less number of unknown quantities.

**ē-līm-l-nā-tion*, s. [Fr. *élimination*, from Lat. *eliminatus*, pa. par. of *elimino*.]

I. Ordinary Language:

1. *Lit.*: The act of expelling or thrusting out of doors; expulsion, ejection.

2. Figuratively:

- (1) The act or process of expelling or throwing off; the act of discharging or excreting, as by the pores.

- (2) The act of leaving out of an argument or consideration; a passing over or by as of no account; a setting aside as unimportant.

- (3) The act of eliciting, deducing, or inferring.

ēlāte, *fāt*, *fāre*, amidst, *whāt*, *fāll*, father; *wē*, *wēt*, *hēre*, camel, *hēr*, there; pine, *pīt*, *sīre*, *sīr*, marine; *gō*, *pōē*, or, *wōre*, *wōlf*, *wōrk*, *whō*, *sōn*; *mūte*, *cūb*, *cūre*, unite, *cūr*, *rāle*, *fūll*; *trŷ*, *Sŷrian*. æ, œ = ē; ey = ā. qu = kw.

II. Algebra:

1. Causing a quantity or quantities to disappear from an equation; removing a quantity or quantities from each side of an equation.

2. The operation of combining several equations containing several unknown quantities, so as to deduce therefrom a less number of equations, containing a less number of unknown quantities.

**ē-līh-gūte* (gu as gw), v. t. [Lat. *elinguatus*, pa. par. of *elinguo*=to deprive of the tongue; e=out, and *lingua*=the tongue.] To deprive of the tongue. It was an old punishment in English law.

**ē-līh-guā-tion* (gu as gw), s. [English *elinguat(e)*; -ion.] The act of punishment by cutting out the tongue.

**ē-līh-guld* (gu as gw), a. [Lat. *elinguis*: e=out, and *lingua*=the tongue.] Not having the power of speech; tongue-tied.

**ē-līh-quā-mēnt* (liqua as lik-wa), s. [Latin *eliquamen*, from *eliquo*=to strain or drain.] A liquid expressed from fat or fat fish by pressure.

**ē-lī-quā-tion*, s. [Lat. *eliquatio*, from *eliquo*=to liquify, strain out: e=out, and *liquo*=to make liquid, to melt.]

Chem.: An operation by which a more fusible substance is separated from another which is less fusible—namely, by the application of a degree of heat sufficient to melt the former but not the latter. Thus, argentiferous copper is melted with lead, and the alloy is cast into discs, which are subjected to a gradually increasing heat; the silver in combination with the lead melts, while an alloy of lead and copper remains in the solid state. (Watts: *Dict. Chem.*)

**ē-lī-sion*, s. [Lat. *elisis*, from *elisis*, pa. par. of *elido*=to strike out: e=out, and *lædo*=to dash; Fr. *élision*; Sp. *elision*; Ital. *elisione*.] [ELIDE.]

I. Ordinary Language:

1. *Lit.*: Division, separation. In the same sense as II.

"Nor praise I less that circumcision,

By modern poets called *elision*."

Swift: *Dean's Answer to Sheridan*.

2. *Fig.*: A cutting apart or asunder; a division or separation of parts.

"To make some adumbration of that we mean, the interior is rather an impulsion or concussion of the air, than an *elision* or section of the same."—Bacon: *Nat. Hist.* (cent. ii.), § 167.

- II. *Gram.*: The cutting off or suppressing of a vowel at the end of a syllable for the sake of the rhythm; as, th' attempt.

**ē-lī-sōr*, s. [Fr. *éliseur*=a chooser, from *éliser*=to choose.]

Law: One of two persons appointed by the court to return a jury, when, from the sheriff's being interested in a suit, he is himself disabled from so doing.

"If the sheriff be not an indifferent person, as if he be a party to the suit, or be related by either blood or affinity to either of the parties, he is not then trusted to return the jury, but the precept is directed to the coroners, who in this, as in many other instances, are the substitutes of the sheriff, to execute process when he is deemed an improper person. If any exception lies to the coroners, the precept shall be directed to two clerks of the court, or two persons of the county named by the court, and sworn. And these two, who are called *elisors*, or electors, shall indifferently name the jury, and the return is final; no challenge being allowed to their array."—Blackstone: *Comment.*, bk. iii., ch. 13.

**ē-lī'te*, **ē-lyte*, s. [O. Fr.]

- *1. A choice.

2. A choice or select body or number; the pick, the best part; as, the *élite* of society.

**ē-līx*, v. t. [Latin *elixo*=to boil thoroughly.] [ELIXATE.] To extract, to elixate.

**ē-līx-āte*, v. t. [Lat. *elixatus*, pa. par. of *elixo*=to boil thoroughly, from *elixus*=sadden: e=out, fully, and *lix*=lye or ashes.] To boil, to seethe, to extract by boiling.

**ē-līx-ā-tion*, s. [Lat. *elixatus*, pa. par. of *elixo*.] [ELIXATE.]

1. The act or process of boiling or stewing anything.

2. The act or process of digestion.

**ē-līx-īr*, **ē-lex-īr*, s. [Arab. *el iksēr*=the philosopher's stone.]

I. Ordinary Language:

1. The philosopher's stone.

"A, nay, let be, the philosopher's ston,

Elisir clepet, we seken fast eche on;

For had we him, than were we siker ynow."

Chaucer. *C. T.*, 16,390,2.

2. The quintessence or refined extract of anything.

3. Any cordial or invigorating substance or essence.

4. In the same sense as II. 1.

II. Technically:

*1. *Alchemy*: The liquor with which alchemists hoped to transmute metals.

(1) A potion or draught for prolonging life.

2. *Medical*:

*1) A tincture with more than one base.

(2) A compound tincture or medicine composed of various substances, held in solution by alcohol in some form.

† *Elixir of love*:

(1) *Ord. Lang.*: A decoction of the seeds of the plant described under (2). It is made in Amboyna.

(2) *Bot.*: *Grammatophyllum speciosum*, a fine orchid from Java and the adjacent islands. It seems to be deleterious, if not even absolutely poisonous, as many of the orchids are.

**ē-līx-īr*, **ē-līx-ēr*, v. t. & i. [ELIXIR, s.]

A. *Trans.*: To compound as an elixir.

B. *Intrans.*: To prepare elixirs; to practice with elixirs.

**ē-līx-iv-l-āte*, v. t. [Pref. e=ex=out, fully, and Eng. *lixivate* (q. v.).] To lixiviate or refine thoroughly.

**ē-līx-iv-l-ā-tion*, s. [Pref. e=ex=out, fully, and Eng. *lixivation* (q. v.).] A complete or thorough process of lixiviation.

**ē-līx-a-bēth-an*, a. [Eng. proper name *Elizabeth*, and adj. suff. -an.] Of or pertaining to Queen Elizabeth, or her time.

Elizabethan-architecture, s. That style of architecture which prevailed in England at the time of Queen Elizabeth, and followed immediately on the Tudor style. It is a mixed style, combining debased forms of the Gothic and Italian styles. It is also sometimes known as the English Renaissance.

**ēlīx*, s. [Icel. *elgr*; Sw. *elg*; O. H. Ger. *elaho*; M. H. Ger. *elch*; Lat. *alces*; Gr. *alkē*; Sansc. *rishya*=a kind of antelope.]

1. *Zool.*: The Moose or Moose Deer, the *Cervus alces* of Linnaeus, now called *Alces palmatus*, one of the family Cervidae. It is a clumsily proportioned animal with very large broad antlers, with points along their outer edges, a long narrow head, small eyes, long hairy ears, a large mane, the throat with long hair, a rounded body, long legs, and a short tail. It is found in this country and in the northern parts of Europe, and in Asia. It is hunted for its flesh, which is prized for the table, while the skin may be tanned into good leather.

2. *Paleont.*: It has been found in the peat bogs of Northumberland, Yorkshire, (England) and Scotland. A specimen has been found at Walthamstow, near London, where it was associated with the goat, Celtic sthorhorn, and the reindeer.

† *Irish elk*:

Paleont.: *Megaceros hibernicus* (Owen), a fossil species of Cervidae having enormous antlers; found in the peat bogs of Ireland, in the brick-earths of Ilford, &c., in Essex, and in other places. Prof. Boyd Dawkins ranks it as one of the early Pleistocene Mammalia of Britain, and considers that it continued to exist nearly to the historic period, being contemporary with paleolithic and with neolithic man.

elk-nut, s.

Bot.: A North American cinchonaceous plant. *Hamiltonia oleifera*, the oil nut, of which elk-nut may perhaps be a corruption.

**ēll*, **elle*, **elne*, s. [A. S. *elne*=a cubit, cogn. with Dut. *elle*=an ell; Icel. *alni*; Sw. *aln*; Dan. *alen*=an ell; Goth. *aleina*=a cubit; O. H. Ger. *elina*; M. H. Ger. *elne*, Ger. *elle*=an ell; Lat. *ulna*=(1) an elbow, (2) a cubit; Gr. *ōlenē*=an elbow.]

1. *Lit.*: A measure of length varying in different countries. The English ell is=45 in.; the Scotch=37 1/2 in.; the Flemish=27 in.; and the French=54 in. It is used for measuring cloth.

2. *Fig.*: Used proverbially to express a long measure.

"I saw," he wrote to Portland the next day, "faces an ell long. I saw some of those men change color with vexation twenty times while I was speaking."—Macaulay: *Hist. Eng.*, ch. xv.

**ēl-lāg-lc*, a. [Fr. *ellagique*, pertaining to galls. A word formed by Braconnot, from Fr. *galle*=gall, reversed, and suff. -ique=Gr. *ikos*=Lat.=-icus=Eng. -ic. (Sayce.)]

Chem.: Pertaining to galls or to gallic acid.

ellagic-acid, s.

Chem.: C₁₄H₆O₆. Obtained by the action of oxidizing agents, as arsenic acid, iodine, and water, &c., on gallic acid. It is also contained in bezoar stones, which are dissolved in caustic potash, and precipitated by hydrochloric acid. Ellagic-acid forms a crystalline compound with one molecule of water; it is insoluble in water, but soluble in alcohol.

ēl-lā-gīte, s. [Eng., &c., *ellag*(ic) (q. v.); -ite (Min.) (q. v.).]

Min.: A variety of *Scolecite* (q. v.). It is found in yellowish or brownish crystalline masses, pearly on the planes of cleavage.

ēl-lēb-ōr-lā, s. [Fr. *ellébore*, from Lat. *helleborus*=*hellebore* (q. v.); suff. -in (Chem.) (q. v.).]

Chem.: A resin of an extremely acrid taste, found in Winter Hellebore (*Helleborus hiemalis*).

ēl-lēr, s. [ELDER.]

Bot.: (1) The alder, *Alnus glutinosa*; (2) The elder, *Sambucus nigra*.

el-ling, a. [A. S. *ellende*, *elelānde*=foreign, strange.] [ELENGE.] Lonely, melancholy, separated from friends.

***el-linge-ness, *el-ling-ness, s.** [Eng. *elling*; -ness.] Loneliness, melancholy, dullness, cheerlessness.

"This shall be to advertise you of the great *ellingness* that I find here since your departing."—Henry VIII. to Anne Boleyn, Lett., p. 29.

ēl-lip-se, s. [Dan., Ger., Fr. & Port. *ellipse*; Sw. *ellips*; Sp. *elipse*; Ital. *ellisse*; Lat. *ellipsis*; Gr. *elleipsis*=a leaving behind, leaving out, ellipse (of a word), deficiency, failure . . . the conic section called an ellipse because the base forms, with the base of the cone, a less angle than that of the parabola.]

1. **Geom. (Conic Sections)**: A plane curve of such a form that if from any point in it two straight lines be drawn to two given fixed points, the sum of these straight lines will always be the same. These two fixed points are called the foci. In the Ellipse A B C D, E and F are the foci. If a straight line (E Q F) be drawn joining the foci, and be then bisected, the point of bisection is called the center. The distance from the center to either focus (E Q or Q F) is called the eccentricity. The straight line (G Q H), drawn through the center and terminated both ways by the curve, is called the diameter. Its vertices are G and H. The diameter A C, which passes through the foci, is called the axis major or major axis; the points in which it meets the curve (A and C), the principal vertices. The diameter (B D) at right angles to the major axis, is called the axis minor, or minor axis. [See also Abscissa, Axis, Latus Rectum, Normal, and Subnormal, Parameter, and Tangent.] Practically, a tolerably accurate ellipse may be drawn on paper by sticking two pins in it to represent the foci, putting over these a bit of thread knotted together at the ends, inserting a pencil in the loop, and pulling the sheet tight as the figure is described. The importance of the ellipse arises from the fact that the planets move in elliptical orbits, the sun being in one of the foci—a fact which Kepler was the first to discover.

ēl-lip-sis, s. [Gr. *elleipsis*.] [ELLIPSE.]

1. **Gram.**: An omission; a figure by which one or more words are omitted, which the hearer or reader can supply.

2. **Print.**: Marks denoting an omission of one or more words or letters: as —, or . . . , or * * * , as *k—g*, for *king*, &c.

*3. **Geom.**: An ellipse.

ēl-lips-ō-grāph, ēl-lip-tō-grāph, s. [Gr. *ellipseis*=an ellipse, and *graphō*=to write, to draw.] An instrument for describing ellipses. The pins of the beam traverse in the slots of the trammel, each occupying its own slot, and the pencil at the end, as the beam revolves, is guided in an elliptical path. [TRAMMEL.]

ēl-lip-sōid, a. & s. [Gr. *elleipsis*=an ellipse, and *eidos*=form.]

A. As substantive:

Geom.: A solid figure produced by the revolution of an ellipse about its axis. The earth, generally said to be an oblate spheroid, has been designated also an oblate ellipsoid.

B. As adj.: Pertaining to the figure described under A.

ēl-lip-sōid-āl, a. [Eng. *ellipsoid*; -al.] The same as ELLIPSOID, a. (q. v.)

ēl-lip-tic, *ēl-lip-tick, ēl-lip-tic-āl, a. [Fr. *elliptique*, from Gr. *elleiptikos*.] Having the form of an ellipse.

elliptic-chuck, s.

Turnery: A chuck invented by Abraham Sharp, for oval or elliptic turning. [CHUCK.]

elliptic-compasses, s. pl. Compasses or other instruments for describing not a circle but an ellipse. The simple device of two pins and a thread, mentioned under ellipse, is the simplest form of elliptic compasses. A slightly more complex one is made by constructing two grooves at right angles to each other, and causing two pins attached to a ruler to travel in the grooves. If, then, a pencil be attached to the ruler it will, when the latter is put in motion, trace out an ellipse.

elliptic-functions, s. pl.

Integral Calculus: A class of integrals representing the expression for the arc of an ellipse.

elliptic-lanceolate, a.

Bot., &c.: Between lanceolate and elliptic, but tending more to the former than to the latter.

elliptic-leaf, s.

Bot.: A leaf two to three times as long as broad, and with the angles rounded off. The same as OVAL-LEAF (q. v.).

elliptic-polarization, s.

Optics: Polarization which causes the particles of a substance to describe ellipses around their positions of rest, the planes of the ellipses being perpendicular to the direction of the ray, and their axes equal and parallel. It arises when plane polarized light suffers reflection, as when it is reflected from some metals.

elliptic-spring, s.

Vehicles: A spring formed of a number of bent plates in two sets, curved apart in the middle and united at the ends. The pressure is brought upon the middle and tends to collapse them.

elliptical-arch, s.

Arch.: An arch having two foci and an elliptical contour. The arches of London Bridge are the finest elliptical arches in the world; the middle one has 132 feet span.

elliptical-gearing, s. [ELLIPTICAL-WHEEL.]

elliptical-wheel, s. A wheel used where a rotary motion of varying speed is determined by the relation between the lengths of the major and minor axes of the ellipses.

ēl-lip-ti-cāl-lŷ, adv. [Eng. *elliptical*; -ly.]

Gram.: In an elliptic manner, so as to constitute an ellipsis.

"Looked upon as dull" [is] *elliptically* expressed to avoid the repetition of *as*. The sentence, if drawn out at length, would be, "looked upon as being as dull as."—Hurd: *On Addition*, vi. 179.

[**Elliptical polarized light**: [ELLIPTIC-POLARIZATION].]

ēl-lip-tic-l-tŷ, s. [Fr. *ellipticité*.] The extent to which any particular ellipse differs from a circle; in other words, the relative lengths of its two axes; the amount of compression of an ellipse, whether at the equator or the poles. (Airy.)

ēl-lip-tō-grāph, s. [ELLIPSOGRAPH.]

ēlm, *elme, s. & a. [A. S. *elm*; cogn. with Dut. *olm*; Icel. *álmr*; Dan. *alm*, *ælm*; Sw. *alm*; *Ger. *elme*, *ulme*; Lat. *ulmus*.]

A. As substantive:

Botany:

1. **Gen.**: The botanical genus, *Ulmus*.

2. **Specialty**:

(1) Either the Common Elm or the Wych Elm. Their wood is soft, tough, and coarse. It is used for water-pipes placed beneath the ground, and frequently for coffins. A substance called Ulmin exudes from the elms, but is not confined to them.

(2) Any species of the genus *Ulmus*. About thirteen are known. The most common are the English elm (*Ulmus campestris*), the American or white elm (*Ulmus Americana*), and the slippery or red elm (*U. fulva*).

B. As adj.: Made of elm, or in any way pertaining to it.

(1) **American elm**: *Ulmus Americana*. It is found from New England to South Carolina.

(2) **Broad-leaved elm**:

(a) *Ulmus latifolia* (Gerard), now called *U. montana*.

(b) *Tilia parvifolia*. This has no real affinity to the Elms, (Colloq. Eng.) (Britten & Holland.)

(3) **Common elm**: *Ulmus campestris*. A large tree with a rugged bark found in woods and ascending in some cases to 1,000 feet on the mountain sides. Its native regions are the middle and south of Europe, North Africa, and Siberia. Its inner bark is slightly bitter and astringent, demulcent, and diuretic. It has been used, though with little effect, in skin diseases.

(4) **English elm**: The same as Common elm (q. v.).

(5) **Mountain elm**: [Wych elm.]

(6) **Scotch elm**: [Wych elm.]

(7) **Spanish elm**: A West Indian tree, *Cordia gerascanthus*, with no real affinity to the elm. It furnishes good timber.

(8) **Wych, Witch, Scotch, or Mountain elm**: *Ulmus montana*, a large tree with larger leaves than those of No. 2, wild in the north of England and in Scotland, besides being naturalized in other parts of Britain. On the Yorkshire mountains it ascends 1,300 feet. It is native in other parts of Europe, and in Siberia. (J. D. Hooker, &c.)

(9) **Yoke elm** (Gerard). *Carpinus betulus*, the hornbeam. According to Gerard, yokes were formerly made of the wood. (Britten & Holland.)

elm-galls, s. pl. Galls on the different species of elm, brought on by the puncture of *Aphis ulmi*. (Curtis.)

ēl-mōn, a. [Eng. *elm*; suff. -en.] Of elm, or pertaining to it.

ēl-mī-dæ, s. pl. [Mod. Lat. *elm*(is), and Lat. fem. pl. adj. suff. -idæ.]

Entom.: A small family of aquatic beetles, now more commonly called Paridae.

ēl-mis, s. [Gr. *helmins*=a worm (?).]

Entom.: The typical genus of Elmidae. It consists of small beetles generally found adhering to the under side of stones lying in running water.

ēl-mō, *Er-mo, s. [Ital., corrupted from St. Erasmus, Bishop of Formiae, a town of ancient Italy, who suffered martyrdom under Diocletian, in A. D. 303. He is invoked by Italian sailors during storms.] (For definition, see etymology.)

"What gales are sold on Lapland's shore,
How whistle rash bids tempests roar,
Of witch, of mermaid, and of sprite,
Of Erick's cap and Elmo's light."

Scott: *Rokeby*, ii. 11.

Elmo's fire, Elmo's light, St. Elmo's fire, s. A fire or light, probably of electric origin, which in certain states of the atmosphere settles on the tops of masts, the extremities of yards, on the rigging, &c., in ships navigating the Mediterranean. When two were visible at the same time, the ancients called them Castor and Pollux. It is also called Corposant (q. v.).

ēlm-ŷ, a. [Eng. *elm*; -y.] Abounding with elms.

"The simple spire and elmy grange."

T. Warton: *Ode*, xi.

***el-norne, s.** [A. S. *ellarn*. (Somner.)] The Elder, *Sambucus nigra* (q. v.). (Prompt. Parv.)

***ē-lō-cā-tion, s.** [Lat. *e=*out, away, and *locatio*=a placing; *loco*=to place; *locus*=a place.]

1. A placing away, a removal from home.

"When the child either by general permission, or former elocation, shall be out of the parent's disposing."—Bp. Hall: *Cases of Conscience*.

2. A departure from usual method; an ecstasy.

"In all poetry (if it be good and worthy) there must be not only an incitation, and commotion, but also an elocation, and emotion of the mind."—Fotherby: *Atheomastix*, p. 30.

ē-lōc-ū-lār, a. [Lat. *e=*out, without, and *loculus*=a cell, a compartment.]

Bot.: Having only one cell; not divided by partitions.

ēl-cū-tion, s. [Lat. *elocutio*, from *elocutus*, pa. pr. of *eloquor*=to speak out; *e=*out, and *loquor*=to speak; Fr. *élocution*; Sp. *elocucion*; Ital. *elocuzione*.]

*1. The power of speaking; speech, articulation.

"Whose taste, too long forborne, at first essay
Gave elocution to the mute."

Milton: *P. L.*, ix. 748, 749.

2. The art of speaking in public, so as to render the discourse most effective and impressive by the use of appropriate gestures, and modes of utterance or delivery; the style or manner of delivering a discourse in public.

"Fitch, formed for tedious elocution, proves
That Swift oils many a spring which Harley moves."
Swift: *Upon Himself*.

3. The power of expression or diction; the choice of appropriate words or language in speaking.

"Elocution is applying of apt words and sentences to the matter."—Wilson: *Arte of Rhetorique*, p. 6.

4. The power or art of clothing thought in appropriate and elegant written language.

"The third happiness of this poet's imagination is elocution, or the art of clothing or adorning that thought so found, and varied, in apt, significant, and sounding words."—Dryden.

5. Eloquentness, eloquent language.

"When graceful in the senate Godfrey rose,
And deep the stream of elocution flows."

Brooke: *Tasso*; *Jerusalem Delivered*, i.

bōl, bōy; pōut, jōwl; cat, çell, chorus, çhīn, bench; go, gem; thin, thīs; sin, aș; expect, Xenophon, exist. ph = f -cian, -tian = șan. -tion, -sion = șhūn; -tīon, -șion = zhūn. -tious, -cious, -sious = șhūs. -ble, -dle, &c. = beł, deł.

¶ Crabb thus discriminates between *elocution*, *eloquence*, *oratory*, and *rhetoric*: "The *elocution* consists in the manner of delivery; the *eloquence* in the matter that is delivered. We employ *elocution* in repeating the words of another; we employ *eloquence* to express our own thoughts and feelings. *Elocution* is requisite for an actor; *eloquence* for a speaker. *Eloquence* lies in the person, it is a natural gift; *oratory* lies in the mode of expression, it is an acquired art. *Rhetoric* is properly the theory of that art of which *oratory* is the practice. But *rhetoric* may be sometimes employed in the improper sense for the display of *oratory* or scientific speaking. *Eloquence* speaks one's own feelings; it comes from the heart and speaks to the heart; *oratory* is an imitative art, it describes what is felt by another. *Rhetoric* is the affectation of *oratory*. An afflicted parent who pleads for the restoration of her child that has been torn from her will exert her *eloquence*; a counselor at the bar, who pleads the cause of his client, will employ *oratory*; vulgar partisans are full of *rhetoric*. *Eloquence* often consists in a look or an action; *oratory* must always be accompanied with verbosity. There is a dumb *eloquence* which is not denied even to the brutes, and which speaks more than all the studied graces of speech and action employed by the orator. Between *eloquence* and *oratory* there is the same distinction as between nature and art: the former can never be perverted to any base purposes; it always speaks truth: the latter will as easily serve the purposes of falsehood as of truth." (Crabb: *Eng. Synon.*)

Ēl-ō-cū-tion-ār-y, a. [Eng. *elocution*; -ary.] Of or pertaining to elocution.

Ēl-ō-cū-tion-ist, s. [Eng. *elocution*; -ist.]

1. One who is skilled in elocution.

2. A teacher of elocution; a writer on elocution.

Ēl-ō-cū-tive, a. [Lat. *elocut(us)*, pa. par. of *elocutor*; Eng. adj. suff. -ive.] Having the power of eloquent expression or language; eloquent, elocutionary.

Ēl-ō-dē-a (pl. **Ēl-ō-dē-æ**), s. [Gr. *helōdēs* = marshy, fenny, the habitat of these plants being in such places.]

Botany:

1. *Sing.*: A genus of Hypericaceæ, the typical one of the tribe Elodeæ. In this country a stomachic tincture is prepared from *Elodea virginica*. The *Hypericum elodes* is by some referred to this genus.

2. *Pl.*: A tribe of Hypericaceæ (Tutsans) in which the glands alternate with the bundles of stamens. (Lindley.)

Ēl-ō-dī-āns, s. pl. [Gr. *helōdēs* (ELODEA); Eng., &c., pl. suff. -ians.]

Zool.: An old family or tribe of Chelonia, comprehending the Marsh Tortoises. They were divided into two sub-families, Cryptodera Elodians and Pleurodera Elodians. The former now constitute the family Chelydidae, and the latter Emydidae (q. v.).

Ēl-ō-gē, s. [Fr., from Lat. *elogium* = a word, a short inscription; Gr. *elogion*, from *logos* = a discourse, a word.] A funeral oration or panegyric pronounced in public in honor of the memory of some illustrious person lately deceased.

Ēl-ō-gist, s. [Fr. *élogiste*.] One who delivers or pronounces an elege or panegyric over the dead.

"She did not want a passionate *elogist*, as well as an excellent preacher."—Wotton: *Rem.*, p. 366.

Ēl-ō-gŷ, Ēl-ō-gŷ-ī-um, Ēl-ō-gŷe, s. [Latin *elogium*.] [ELOGE.] A panegyric, praise, eulogy.

"I referre such scoffers to the *elogie* Alcibiades gave of his master."—Bacon: *On Learning*, bk. i., ch. 3.

Ēl-ō-him, s. [Heb. *Elohim*, pl. of *Eloach* = God; cognate with Syriac *Ilo*, *Eloho*, and with Arabic *Allah*.]

Hebrew Theol.: The ordinary name of God in the Hebrew Scriptures. It is rare in the singular, but occurs in the plural more than 2,000 times. There is, however, the grammatical anomaly that this plural stands as the nominative to a singular verb. This has been held to imply that in the Divine nature there is a certain plurality and a certain unity. The plural has been called also the plural of majesty (q. v.). It is generally used of the true God, but Jehovah is deemed by far the more sacred name. Unlike Jehovah, *Elohim* may be applied to false gods (Exod. xix. 20, xxiii. 31; Jer. ii. 11, &c.), to spirits or supernatural beings (1 Sam. xxviii. 13), and even to kings, judges, and magistrates, who are held to be vicerogers of God (Exod. xxi. 8, xxii. 8; Psalm lxxiii. 1). It is probably an abbreviation of *Elohim*, though Gesenius and others have deemed it the earlier and primary word. [EL.]

Ēl-ō-hist, s. [Heb. *Elohim*, a plural of excellence = God, and Eng., &c., suff. -ist.]

Biblical Criticism: A biblical writer, hypothetically assumed to have penned part of the Pentateuch, who habitually, if not even exclusively, used the Hebrew name *Elohim* for God. A Belgian or

French physician called John Astruc (A. D. 1684-1766), first called special attention to the fact that in portions of the Pentateuch the name given to the Divinity is *Elohim*, while in other portions it is *Jehovah*, and attributed these two parts to different writers. His view has been universally accepted by critics of the rationalistic school, and by an increasing number of theologians holding what are deemed orthodox views. Others, notably Hengstenberg, have strongly controverted the opinion that the Pentateuch was the work of different writers. Those who agree with Astruc and his school call the one hypothetical author the *Elohist*; and the other, the *Jehovist*. [GENESIS, EXODUS, PENTATEUCH.]

"To imitate the phraseology of the *Elohist*."—Colenso: *On the Pentateuch*, vi. 127.

Ēl-ō-hist-ic, a. [Eng., &c., *Elohist*; -ic.]

Biblical Criticism: Pertaining to the hypothetical *Elohist*, or to the part of the sacred compositions of which he is supposed to have been the author, having used *Elohim* as the name of the Divine Being.

"The age of the *Elohist*ic matter in Genesis and Exodus."—Colenso: *On the Pentateuch*, vi. 116.

***Ēl-ōin', *Ēl-ōine, *Ēl-ōigne** (g silent), v. t. [Fr. *éloigner*, from Lat. *elongo* = to remove far off; Fr. *loin*; Lat. *longus* = long, far.]

1. *Ord. Lang.*: To remove, to separate, to put at a distance.

"They shulde *eloin*ge or absent themselves from their domesticall affayres."—Nicolls: *Thucydides*, p. 45.

2. *Law*: To remove out of the jurisdiction.

"After judgment in the action brought by the replevisor, the writ of execution to obtain a return of the goods is the writ de retorno habendo: and, if the distress be *eloin*ged, the defendant shall have a *copias in withernam*; but on the plaintiff's tendering the damages, the process in *withernam* shall be stayed."—Blackstone: *Comment.*, bk. iii., ch. 16.

***Ēl-ōin'-āte, *Ēl-ōign'-ate** (g silent), v. t. [Eng. *eloin*, *eloin*ge; -ate.] To remove, to separate, to sunder.

"Nor is some vulgar Greek so far adulterated, and *eloin*gated from the true Greek, as Italian is from the Latin."—Howell: *Instruct. For Trav.*, p. 149.

***Ēl-ōin'-mēt, *Ēl-ōign'-mēt** (g silent), s. [Eng. *eloin*, *eloin*ge; -mēt.] A removal to a distance; a separation; remoteness.

"He discovers an *eloin*gment from vulgar phrases much becoming a person of quality."—Shenstone.

***Ēl-ōing', v. t.** [Low Lat. *elongo*: Lat. *e* = out, and *longus* = long, far.]

1. To remove, to put or set at a distance.

"By seas and hills *eloin*ged from thy sight."
Wyat: *The Lover prayeth Venus*.

2. To put off, to retard, to delay.

"Upon the roof the bird of sorrow sate
Eloing joyful day with her sad note,
And through the shady air the fluttering bat
Did wave her leather sails and blindly float."
G. Fletcher: *Christ's Victory*, ii. 24.

Ēl-ōin'-gāte, v. t. & i. [Low Lat. *elongatus*, pa. par. of *elongo*, from Lat. *e* = out, away, and *longus* = long, far.]

A. Transitive:

1. To remove, to put or set at a distance or farther off.

"The first star of Aries, in the time of Meton the Athenian, was placed in the very intersection, which is now *eloin*gated and moved eastward twenty-eight degrees."—Browne: *Vulgar Errors*, bk. iv., ch. xiii.

2. To lengthen out, to extend, to make long or longer.

"Frequent and thick, o'er all his limbs were seen
Th' *eloin*gated papillæ of the skin."
Cambridge: *The Scribleriad*, bk. iii.

B. Intrans.: To depart; to go or move away; to recede.

"About Cape Frio in Brasilia, the south point of the compass varieth twelve degrees unto the west; but *eloin*gating from the coast of Brasilia, toward the shore of Africa, it varieth eastward."—Browne: *Vulgar Errors*, bk. iv., ch. xiii.

Ēl-ōin'-gāte, a. [Low Latin *elongatus*, pa. par. of *elongo*.]

1. *Ord. Lang.*: Lengthened, prolonged, extended. "Berosus has also an *eloin*gate scutellum and ciliate tibia and tarsi."—Trans.: *Amer. Philos. Society* (1873), vol. xiii., p. 118.

2. *Bot.*: Lengthened, as if stretched out artificially.

Ēl-ōin'-gā-tion, s. [Low Latin *elongatio*, from *elongatus*, pa. par. of *elongo*; Fr. *élongation*; Ital. *elongazione*.]

1. *Ordinary Language*:

1. The act of making longer, lengthening, or extending.

"To this motion of *eloin*gation of the fibers is owing the union or conglutination of the parts of the body, when they are separated by a wound."—Arbuthnot: *On Aliments*.

2. The state of being elongated, extended, or lengthened.

3. A continuation, an extension.

"May not the mountains of Westmoreland and Cumberland be considered as *eloin*gations of these two chains?"—Pinkerton (Webster).

*4. Departure, removal, recession.

"Nor then had it been placed in a middle point but that of descent, or *eloin*gation."—Browne: *Vulgar Errors*, bk. iv.

*5. Distance; the space between two things; the distance at which one thing is from another.

"The distant points in the celestial expanse appear to the eye in so small a degree of *eloin*gation from another, as bears no proportion to what is real."—Glanvill: *Scepsis Scientifica*, ch. ix.

II. Technically:

1. *Astron.*: The removal of a planet to the farthest distance it can be from the sun; commonly taken notice of in Venus and Mercury; the angular distance of a planet from the sun; apparent departure of a planet from the sun in its orbit.

2. *Surg.*: An imperfect luxation, when the ligament of any joint is so extended or relaxed as to lengthen the limb, but yet not let the bone go quite out of its place. (Quincy.)

"*Eloin*gations are the effect of a humor soaking upon ligament, thereby making it liable to be stretched, and to be thrust quite out upon every little force."—Wiseman: *Surgery*.

Ēl-ō-pe, v. i. [Derived from Dut. *ontloopen* = to escape, to run away; cogn. with A. S. *hlæpan*; Eng. *leap*; Sw. *löpa*; Dan. *løbe*.]

*1. To run away, to break away, to break loose, to escape from any ties.

"It is necessary to treat women as members of the body politic, since great numbers of them have *eloin*ged from their allegiance."—Addison: *Freeholder*.

2. *Specif.*: To run away with a lover or paramour in defiance of social or marriage restraints; most commonly applied to the woman.

"The fool whose wife *eloin*ges some thrice a quarter,
For matrimonial solace dies a martyr."
Pope: *Satires*, iii. 150, 151.

*3. To pass away, to escape.

"Thy strength must with thy years *eloin*ge,
And thou wilt need some comfort to assuage
Health's last farewell, a staff of thine old age."
Couper: *Tirocinium*, 876-78.

*4. To issue readily from the lips, to glide softly and musically.

"Spenserian vowels that *eloin*ge with ease
And float along like birds o'er summer seas."
Keats: *To C. Cowden Clarke*.

Ēl-ō-pe-mēt, s. [Eng. *elope*; -mēt.] The act of *eloin*ging; a running or breaking away from just restraint without license; *specif.*, the running away of a woman, married or unmarried, with a lover.

"In cases of *eloin*gement, and living with an adulterer, the law allows her no alimony."—Blackstone: *Comment.*, bk. ii., ch. 15.

Ēl-ōp-ēr, s. [Eng. *elop(e)*; -er.] One who *eloin*ges. "Making you an *eloin*ger with a duellist."—Mad. *D'Arblay*: *Cecilia*, ch. ii.

1. *Emancipation Proclamation*:

American History: The proclamation issued by President Abraham Lincoln, declaring the negro slaves within the boundaries of the United States free. There were two documents of this nature issued by the President, one (the preliminary) being given to the public on Sept. 22, 1862, the provisions of which were to take effect on Jan. 1, 1863. On this latter date, the success of the Union arms seeming to warrant such a course, he issued the final proclamation, in which he designated ten states or parts of states as being in a state of rebellion against the Union, and decreed that in the territory so designated slavery was forever abolished. Although there had been a tacit acquiescence to this proposition, it was not until two years had passed that Congress gave its assent to a measure to put the matter before the country. To this end, on Jan. 31, 1865, two months before the collapse of the Confederacy, Congress by joint resolution passed the thirteenth amendment, and ordered that it be submitted to the states for ratification. Before the end of the year twenty-seven out of thirty-six states—more than the required two-thirds—had ratified the amendment, and negro slavery was a thing of the past in America.

ēm-balm-ing (l silent), ***em-baulm-ing**, ***em-baum-ing**, *pr. par., a. & s.* [EMBALM.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The art of preserving the dead bodies of men or animals. The earliest examples are found in Egypt, where it was practiced over 3,000 years ago. The invention was ascribed by them to Anubis, the son of Osiris, who was said to have performed the office for his father. The practice prevailed, though not so extensively, among the nations of Asia, and was at a later period in use to some extent among the Greeks and Romans.

Drying the bodies in sand was the method chiefly practiced among the poorer classes. Embalming was also performed by salting in natron, and then drying; boiling in resins and bitumen; and by removing the brain and viscera, washing, and applying fine resins, myrrh, cassia, and other aromatic substances. In some cases oil of cedar was injected into the cavity of the body, which was then steeped in a solution of natron for seventy days, when the viscera came away, leaving little but skin and bone remaining. Among the upper classes, the bodies, after being prepared, were swathed in linen bandages saturated with gum, the total length of which amounted in some instances to more than 1,000 yards. Within and about the bodies of different mummies have been found sulphate of soda, saltpeter, common salt, soda, oil of cedar, turpentine, asphalt, myrrh, cinnamon, and other substances. In very recent times, with the increase of chemical knowledge, considerable attention has been devoted to the subject, and various processes and compounds have been devised.

***ēm-balm-mēt** (l silent), ***em-bal-ment**, *s.* [Eng. *embalm* (m); *-ment*.] The act, art, or process of embalming.

"To carry the corpse to Russell's . . . leave it there till he sent orders for the embalment."—*Malone: Life of Dryden; The Funeral.*

3. To hinder, to impede, to obstruct.

II. *Comm.*: To encumber with debt or difficulties; to involve in pecuniary difficulties.

¶ Crabb thus discriminates between *embarrass*, to entangle, and to perplex: "*Embarrass* respects the manners or circumstances; *perplex* the views and conduct; *entangle* is said of particular circumstances. *Embarrassments* depend altogether on ourselves; the want of prudence and presence of mind are the common causes; *perplexities* depend on extraneous circumstances as well as ourselves; extensive dealings with others are mostly attended with *perplexities*; *entanglements* arise mostly from the evil designs of others. That *embarrasses* which interrupts the even course or progress of one's actions; that *perplexes* which interferes with one's decisions; that *entangles* which binds a person in his actions. Pecuniary difficulties *embarrass*, or contending feelings produce *embarrassment*; contrary counsels or interests *perplex*; law-suits *entangle*. Steadiness of mind prevents *embarrassment* in the outward character. Firmness of character is requisite in the midst of *perplexities*; caution must be employed to guard against *entanglements*." ember-days, s. pl.

Ecclesiast. Calendar: Certain days set apart for prayer and fasting, one special theme of supplication being that the blessing of God may descend on the crops, and consequently that there may be plenty in the land. Stated days of this character began to be observed in the third century, an injunction to that effect having been given by Pope Calixtus, but at first there was no unity over the Christian world as to the precise days. In A. D. 1095 the Council of Placentia diffused them over the year, and enacted that in all churches the spring ember-days should be the Wednesday, Friday, and Saturday after the first Sunday in Lent; those of summer the same days of the week after Whit-Sunday; those of autumn the same days of the week after the feast of the Holy Cross, Sept. 14; and those of winter the corresponding week days after the feast of St. Lucia, Dec. 13.

ember-eves, s. pl.

Ecclesiast. Calendar: The evenings immediately preceding the several ember-days.

"It hath been sung at festivals,

On *ember-eves* and holy alea."

C. *As substantive*:

1. The act or art of ornamenting by raised work or figures in relief, applied to many objects. Crests or initials are embossed on paper, envelopes, &c. Ornaments are embossed on book-covers, especially on those of cloth. Leather is embossed for binding, and many ornamental uses. Textile fabrics

are embossed for various purposes. Glass is said to be embossed when it is molded with raised figures.

2. Embossed work.

"All engravings and embossings (afar off) appear plain."

—Bacon: *Natural History*, § 878.

embossing-iron, *s.*

Sculp.: A tool for giving a peculiar grained or caruncular appearance to a marble surface.

embossing-machine, *s.* A machine in which a compressible material is placed between a rolling or reciprocating surface and a bed, the moving portion having a design in intaglio, which confers a cameo ornamentation upon the object. The embossing-machine for giving an indented ornamentation to velvet and other goods has engraved copper rollers, which are heated by inclosed red-hot irons when operating on dampened goods, as in giving a watered surface.

embossing-press, *s.* A hand-stamp or machine for giving a raised surface to an object placed between the descending die and the bed. The embossing-presses of bookbinders are screw, toggle, or lever presses, according to the area of surface and character of material under treatment, and other considerations.

† **Embossing wood**: A process of indenting designs in wood by heat and pressure. The wood is saturated with water, and the cast-iron mold is heated to redness and pressed forcibly upon the wood. The water preserves the wood from ignition, though the surface is slightly charred. The iron is re-heated, the wood re-wetted, and the branding-iron again applied. This is repeated until the wood fills the mold. The surface is cleansed, between each operation and finally, with a scratch-brush, and any desired color may be retained or obtained by the extent to which the charcoal and discolored surface are removed. Perforated designs are obtained by pressure upon portions of the surface, and the removal of a scale of material by a saw.

***ëm-böss'-ment**, *s.* [Eng. *emboss* (1), *v.*; *-ment*.]

1. Anything standing or jutting out from the rest; an eminence; a protuberance.

"I wish, also, in the very middle, a fair mount, with three ascents and alleys, enough for four to walk abreast; which I would have to be perfect circles, without any bulwarks or embossments."
—Bacon: *Essays: Of Gardens*.

2. The act or art of embossing or ornamenting with raised work.

3. Embossed work; rilievo, or rising work.

"They are at a loss about the word *pendants*; some fancy it expresses only the great embossment of the figure, others believe it hung off the helmet in alto-rilievo."
—Addison: *On Italy*.

ëm-bött'-tle, *v. t.* [Pref. *em*, and Eng. *bottle* (q. v.).] To put into bottles; to bottle.

embroidering-machine, s. A form of sewing-machine in which the cloth is moved beneath the reciprocating needle-bar according to the requirements of the tracing, while the needles and hooks retain their relative positions above and below the fabric.

Em-brō'id-ēr-ry, *em-broid-er-ry, *em-broudr-ry, s. [Eng. embroider; -ry.]

I. Ordinary Language:

1. The act, process, or art of embroidering.

2. Ornamentation by raised figures of needlework executed in colored silks, gold or silver thread, &c. This is a very ancient art. The Egyptians, Babylonians, Medes, and Persians all excelled in it. The adornments of the tabernacle in the wilderness were of tapestry worked in blue, scarlet, and gold. The garment of Sisera, as referred to by Deborah, was embroidery, "needlework on both sides." Homer refers to embroidery as the occupation of Helen and Andromachē. Embroidery is generally done in frames, the woven fabric being stretched flat and the needle passed through and through.

"Flowers purified, blue and white,
Like sapphire, pearl, in rich embroidery,
Buckled below fair knight-hood's bending knee."
Shakesp.: *Merry Wives*, v. 5.

3. Cloth or other stuff ornamented with embroidered work.

"Laces and embroideries are more costly than either warm or comely."—Bacon: *Advice to Villiers*.

4. Variegation or diversity of color.

"Already bound to a bad, mad, and embreuted partner."—*C. Brontë: Jane Eyre*, ch. xxvi.

***ēm-brȳ-ō**, ***ēm-bri-on**, ***ēm-bri-on**, s. & a. [Fr. *embryon*; Lat. *embryon*; Gr. *embryon*, from *em*=in, and *bryon*, neut. of *bryōn*=swelling, full of a thing, *pr. par.* of *bryō*=to be full of a thing, to swell.]

A. *As substantive*:

1. *Ordinary Language*:

1. *Lit.*: In the same sense as II. 1.

"When the crude *embryo* careful nature breeds, See how she works, and how her work proceeds."—*Blackmore: Creation*.

2. *Fig.*: A rudimentary, crude, or undeveloped state; in the first or earliest stages.

"The company little expected what a noble work I had then in *embryo*."—*Swift*.

II. *Physiology*:

1. *Human Phys.*: The first beginning of the animal development, not born and still unfinished. The germs of two new cells are first deposited within the ovulum (q. v.) by spontaneous movement. They occupy only the pellicular center of the germinal spot at first, but speedily increase in size, and develop new cells in their own interior, until they alone fill the whole germinal vesicle. Each gives birth to a new generation of two, making four, then eight cells, sixteen, and so on, doubling progressively, until a mulberry-like mass is produced of innumerable cells. This in the animal embryo moves up to the side of the yolk, flattening against its lining membrane, in contact with the yolk-bag. A second and third layer is then formed from the center within the first mass of cells. The whole is known as the germinal membrane; the external pellicle is called the serous layer, the internal the mucous layer, and the middle the vascular layer, giving rise to the first vessels of the embryonic structure. Thus the beginning of the embryo is a sac, inclosing the nutriment prepared for it prior to the permanent portion to be evolved from the center of this mulberry-mass. The greater portion is then cast off, and nearly all the permanent embryonic formation is derived from one large cell, at first in the center, but ultimately at the surface of the mass, when it undergoes the flattening described. This, with the cluster of cells round it, forms the germ-spot, with a round transparent space in it, the area pellucida. The nucleus of this cell is first annular, then pear-shaped, then violin-like, being two long, parallel lines, with a narrow space between them, but separating to inclose a wider space at one end. This is called the Primitive Trace. The parts first formed from this are the spine and spinal-cord (q. v.). Vessels at the same

time are being formed within the substance of the germinal membrane, forming a network known as the Vascular Area, and terminating in the embryo, at the point afterward becoming the umbilicus (q. v.), in two large trunks. The formation of the heart takes place in the vascular layer, and at the same time the production of a digestive cavity begins by the separation of a small part of the yolk-bag, below the embryo, from the general cavity. The amnion (q. v.) and allantois (q. v.) are then formed, the chief office of the latter being to convey the vessels of the embryo to the chorion (q. v.). Then comes the respiratory process (q. v.). [EGG, CIRCULATION, FŒTUS.]

2. *Animal Phys.*: In the higher vertebrates the development presents an analogy to that described under 1.

3. *Veg. Phys.*: The rudiments of the future plant contained in all true seeds, not in spores. In some seeds the embryo constitutes nearly the whole of the structure, in others it is embedded in albumen. In a perfectly developed embryo there are three parts, a cotyledon or cotyledons (q. v.), the plumule or future bud, and the radicle or future root. For distinctions of plants founded on the number of their cotyledons—a very important character—see Dicotyledons, Monocotyledons, and Acotyledons.

B. *As adj.*: In a rudimentary, crude, or undeveloped state; undeveloped; not in a perfect state. "Four champions fierce, Strive here for mastery, and to battle bring Their *embryon* atoms."—*Milton: P. L.*, ii. 899-900.

4. *Crabb* thus discriminates between *embryo* and *fœtus*: "*Embryo* . . . signifies the thing germinated; *fœtus* signifies the thing cherished, both words referring to what is formed in the womb of the mother; but *embryo* properly implies the first fruit of conception, and the *fœtus* that which has arrived to a maturity of formation. Anatomists tell us that the *embryo* in the human subject assumes the character of the *fœtus* about the forty-second day after conception. *Fœtus* is applicable only in its proper sense to animals; *embryo* has a figurative application to plants and fruits when they remain in a confused and imperfect state, and also a moral application to plans, or whatever is roughly conceived in the mind." (*Crabb: Eng. Synon.*)

5. (1) *Fixed embryo*: Bot.: A leaf bud.

A. As substantive:

I. **Ord. Lang.:** The same as II. 1 & 2 (q. v.).

II. **Technically:**

1. **Min.:** A variety of beryl, and distinguished from the latter by being emerald-green in place of pale green, light blue, yellow or white, the colors of the beryl. The green of the emerald is produced by the presence of chromium, the colors of the beryl proper chiefly by iron. The finest emeralds are found in Peru, but they occur in various other places.

2. **Scripture:**

(1) *That of the Old Testament:* The rendering of the Heb. *nophekh* (Exod. xlviii. 18, xxxix. 11; Ezek. xxvii. 16, xxviii. 13), a gem which has not been properly identified. The Septuagint and Josephus render it *anthrax*=coal, the carbuncle, the ruby, the garnet; cinnabar.

(2) *That of the New Testament:* The rendering of the Gr. *smaragdus* (Rev. iv. 13, xxi. 19) probably not the emerald but aqua marina. (Liddell & Scott.)

3. **Her.:** The green tincture in coat-armour; vert.

4. **Print.:** A size of type larger than nonpareil and less than minion.

B. As adjective:

1. Made of or containing an emerald; as, an *emerald ring*.

2. Of a bright green color, like an emerald.

"Nor trace be there, in early spring,
Save of the Fairies' emerald ring;"

Scott: Norman Horse-Shoe.

3. Printed with the type called emerald; as, an *emerald edition*.

† **Oriental emerald:**

Min.: A green variety of sapphire.

emerald-copper, s.

Min.: The same as DIOPHASE (q. v.).

emerald-green, s.

Chemistry: Schweinfurt green (CuAs_2O_4); $\text{Cu}(\text{C}_2\text{H}_3\text{O}_2)_2$. A cupric arsenite and acetate, containing when pure 58.4 per cent of arsenious acid, and 25 per cent of copper. It is a rich green pigment, but very poisonous. Prepared by dissolving five pounds of cupric sulphate and one pound of lime in two gallons of vinegar, and pouring a boiling aqueous solution of five pounds of arsenious acid into the mixture gradually while it is well stirred. The precipitate is then dried and powdered.

Emerald Isle, s. An epithet applied to Ireland, from the freshness and bright color of the verdure, produced by the abundant heat and moisture continually reaching it from the Atlantic. This epithet was first used by Dr. W. Drennan (1754-1820), in his poem entitled "Erin."

"Arm of Erin, prove strong; but be gentle as a brave,
And, uplifted to strike, still be ready to save:
Nor one feeling of vengeance presume to defile
The cause or the men of the Emerald Isle."

emerald-moths, s. pl.

Entom.: The name given to the genus *Hipparchus* (q. v.), which, as now defined, is more limited in species than it was.

† **Large emerald-moth:**

Entom.: *Hipparchus papilionarius* (the *Phalæna geometra papilionaria* of Linnaeus). The wings are two or two and a-half inches across their surface, grass-green, with two rows of whitish spots, and a greenish-yellow fringe; antennæ reddish-brown. The caterpillar feeds on the elm, the lime, the alder, the beech, &c.

Emerald-moth.

emerald-nickel, s.

Min.: The same as TEXASITE (q. v.). (*Brit. Mus. Catal.*) For Texasite Dana prefers the name Zaraitite.

***ē-mēr-ge, v. i.** [Lat. *emerge*=to rise out of; *e*=out, and *mergo*=to dip; Ital. *emergere*.]

1. To rise up out of anything in which a thing has been immersed, sunk, or covered.

"They emerged, to the upper part of the spirit of wine, as much of them as lay immersed in the spirit."—*Boyle*.

2. To issue, to proceed.

"If the prism was turned about its axis that way which made the rays *emerge* more obliquely out of the second refracting surface of the prism, the image soon became an inch or two longer, or more."—*Newton: Optics*.

3. To reappear in sight after being temporarily lost to view; as in an eclipse the sun is said to *emerge* when the moon ceases to obscure its light.

"Chasing the red-coats down the lane,
Then crossing the fields to *emerge* again."

Longfellow: Landlord's Tale.

4. To rise from a state of depression or obscurity; to come forward or into a prominent position.

"At the very moment when some of them seemed plunged in unfathomable abysses of disgrace and disaster, they have suddenly *emerged*."—*Burke: Regicide Peace*, lett. i.

5. To come up, to occur, to come into notice.

† For the difference between *emerge* and *to rise*, see *RISE*.

***ē-mēr-ge-mēt, s.** [Eng. *emerge*; -ment.] An unexpected occurrence; an emergency.

***ē-mēr-ge-nce, s.** [Lat. *emergens*, pa. par. of *emerge*.]

1. The act of rising or emerging from any fluid by which a thing has been covered.

2. The act of issuing or proceeding.

3. That which emerges or rises up.

*4. An emergency, an exigency; a critical time.

***ē-mēr-ge-n-cŷ, s.** [Latin *emergens*, pr. par. of *emerge*.]

*1. The act of emerging or rising up; a rising, issuing, or starting into view.

"The emergency of colors, upon coalition of the particles of such bodies, as were neither of them of the color of that mixture whereof they are ingredients, is very well worth our attentive observation."—*Boyle: On Colors*.

*2. A sudden or unexpected occasion, event, or chance.

"Most of our rarities have been found out by casual emergency, and have been the works of time and chance rather than of philosophy."—*Glanvill: Scepsis Scientifica*, ch. xix.

3. A pressing necessity; an exigency; a critical moment; a combination of circumstances requiring immediate action or remedy; a crisis.

"He never, in any emergency, lost, even for a moment, the perfect use of his admirable judgment."—*Macaulay: Hist. Eng.*, iv.

*4. A casual profit.

"The rents, profits, and emergencies belonging to a Bishop of Bath and Wells."—*Bayly: Life of Laud*, p. 159.

† For the difference between *emergency* and *exigency*, see *EXIGENCY*.

***ē-mēr-gent, a. & s.** [Lat. *emergens*, pr. par. of *emerge*=to emerge.]

A. As adjective:

1. Rising up out of a fluid or other surrounding or covering substance; rising into view.

"Immediately the mountains huge appear
Emergent." *Milton: P. L.*, vii. 286.

2. Rising or starting into notice from obscurity or depression.

"The man that is once hated, both his good and his evil deeds oppress him; he is not easily *emergent*."—*Ben Jonson*.

*3. Issuing or proceeding, as from a cause; resulting.

"The stoics held a fixed, unalterable course of events; but then they held also, that they fell out by a necessity *emergent* from and inherent in the things themselves."—*South*.

*4. Accidental, casual.

"The Septuagint was much depraved, not only from the errors of Scribes, and the *emergent* corruptions of time."—*Broome: Vulgar Errors*, bk. vi., ch. i.

*5. Sudden, unexpected, critical; of the nature of an emergency, pressing.

"All the lords declared, that, upon any *emergent* occasion, they would mount their servants upon their horses."—*Clarendon*.

*B. **As substant.:** A sudden recurrence; a casualty; an emergency.

"They, for those reasons, and other *emergents*, went to work again, and that so avowedly, that they pitched upon my Lord Hamilton to be their head."—*Guthry: Memoirs*, p. 6.

B. As adjective:

*1. Ord. Lang.: Exploring, spying out.

"You shall neither eat nor sleep,
No, nor forth your window peep,
With your emissary eye,
To fetch in the forms go by."

B. Jonson: *Underwoods*; *Of Charis*, viii. 7.

2. Anat.: Discharging or conveying excretions; excretory.

¶ Crabb thus discriminates between *emissary* and *spy*: "Both these words designate a person sent out by a body on some public concern among their enemies; but they differ in their office according to the etymology of the words. The *emissary* is by distinction sent forth, he is sent so as to mix with the people to whom he goes, to be in all places, and to associate with every one individually as may serve his purpose; the *spy* on the other hand takes his station wherever he can best perceive what is passing; he keeps himself at a distance from all but such as may particularly aid him in the object of his search. The object of an *emissary* is by direct communication with the enemy to sow the seeds of dissension, to spread false alarms and to disseminate false principles; the object of a *spy* is to get information of an enemy's plans and movements. Although the office of *emissary* and *spy* are neither of them honorable, yet that of the former is more disgraceful than that of the latter. The *emissary* is generally employed by those who have some illegitimate object to pursue; *spies* on the other hand are employed by all regular governments in a time of warfare. In the time of the Revolution, the French sent their *emissaries* into every country to fan the flame of rebellion against established governments. At Sparta, the trade of a *spy* was considered as a self-devotion for the public good." (Crabb: *Eng. Synon.*)

Em'-is-sa-ry'-ship, *s.* [Eng. *emissary*; -ship.] The office or position of an emissary.

Em'-is-sion, *s.* [Lat. *emissio*, from *emissus*, pa. par. of *emitto*.]

1. Ordinary Language:

1. The act of emitting, sending, or throwing out; as the emission of light from the sun, the emission of odor from plants, &c.

"Tickling causeth laughter: the cause may be the emission of the spirits, and so of the breath by a flight from titillation."—Bacon.

2. The act of sending out or despatching.

"Populosity naturally requirith transmigration and emission of colonies."—Broune: *Vulgar Errors*.

3. That which is emitted or sent out.

"Cover them with glasses; but upon all warm and benign emissions of the sun, and sweet showers, give them air."—Evelyn.

4. The state of being emitted or sent out.

"Still opportune with prompt emission flow." Brook: *Universal Beauty*, bk. v.

II. Finance: The putting into circulation or issuing of bills, notes, shares, &c.; the issue or number and value of the bills, &c., sent out.

¶ Theory of emission, Emission theory:

Optics: The theory or hypothesis that the propagation of light is effected by the throwing out of infinitely small particles of matter, of which it is assumed that it is composed, from a luminous body in radiating lines. It is called also the Corpuscular Theory. Though accepted by Sir Isaac Newton, it is now generally abandoned in favor of its rival—the Undulatory Theory. [UNDULATORY LIGHT.]

***Em'-is-si'-tious**, *a.* [Lat. *emissivus*=sent out, exploring; *emissus*=sent out, pa. par. of *emitto*=to send out.] Prying, spying, inquisitive.

***Em'-is-sive**, *a.* [Latin *emiss(us)*, pa. par. of *emitto*; Eng. suff. -ive.]

1. Ordinary Language:

1. Sending out, emitting.

2. Sent out, emitted.

II. Optics: Sending forth radiation.

¶ (Of heat) *Emissive power of a body*: The same as its radiating power. (Ganot.) [RADIATION.]

***Em'-is-sor'-y**, *a.* [Latin *emiss(us)*, pa. par. of *emitto*; Eng. suff. -ory.]

1. Ord. Lang.: Emitting, sending or conveying out.

2. Anat.: Excretory; applied to certain ducts which convey fluids out of the body; emissary.

***Em'-it**, *v. t.* [Lat. *emitto*=to send out; *e*=out, and *mitto*=to send.]

1. To send out or forth; to throw or give out; to give vent to; to discharge.

"The soil, being fruitful and rich, emits steams, consisting of volatile and active parts."—Arbutnot: *On Air*.

2. To let fly; to dart, to discharge.

"Pay sacred reverence to Apollo's song,
Lest, wrathful, the far-shooting god emit
His fatal arrows." Prior: *Hymn to Apollo*.

3. To issue by authority.

"That a citation be valid, it ought to be decreed and emitted by the judge's authority, and at the instance of the party."—Ayliffe: *Parergon*.

¶ Crabb thus discriminates between *emit*, to exhale, and *evaporate*: "Emit is used to express a more positive effort to send out; *exhale* and *evaporate* designate the natural and progressive process of things: volcanoes emit fire and flames; the earth exhales the damps, or flowers exhale perfumes, liquids evaporate. Animals may emit by an act of volition: things exhale or evaporate by an external action upon them; they exhale that which is foreign to them; they evaporate that which constitutes a part of their substance. The polecat is reported to emit such a stench from itself when pursued, as to keep its pursuers at a distance from itself: bogs and fens exhale their moisture when acted upon by the heat: water evaporates by means of steam when put into a state of ebullition." (Crabb: *Eng. Synon.*)

***Em'-it-tent**, *a.* [Lat. *emittens*, pr. par. of *emitto*=to send out.] Sending out; emitting.

***Em'-man'-tle**, ***em-man-tel**, *v. t.* [Fr. *emman-teler*.]

1. To cover.

2. To build or place round by way of fortification or defense.

***Em-mar'-ble**, ***en-mar'-ble**, *v. t.* [Pref. *em*, and Eng. *marble* (q. v.).] To render hard and insensible as marble.

***Em-men'-a-gög'-ic**, *a.* [Eng. *emmenagog(ue)*; -ic.] Promoting the menstrual discharge.

***Em'-mō-tion**, *s.* [As if from Lat. *emotio*=a moving out; *e*=out, and *moveo*=to move.]

1. **Ord. Lang.**: A movement or disturbance of the mind; a state of excited feeling of any kind, whether of pain or pleasure; an intense excitement of feeling; agitation, trepidation, perturbation of mind.

"[He] bewailed, with great emotion, his former complacency in spiritual things."—Macaulay: *Hist. Eng.*, ch. v.

2. **Mental Phil.**: One of the three primary divisions of the powers, capacities, or qualities inherent in the human mind, the others being intellect and will. Emotion in this division denotes the subjective effect produced by all things which move us, whether operating on us directly through the senses, or indirectly through the memory or of reflection upon sensations formerly experienced. Sometimes emotion is used in a more limited sense, so as to exclude sensation, and the threefold classification is adopted of sensation, intellect or intellection, and emotion. Very generally the word is used by mental philosophers in the plural, there being various distinct emotions, as one of pity, one of terror, one of joy, &c. These may be resolved into three kinds—emotions of a pleasurable, those of a painful, and those of an indifferent kind. What the stream of a mill-race is to a water-wheel working complex machinery, the emotions are to man's will, and partly to his intellect. They are the moving power of action, and in some respects of thought. The emotions are less potent than intellect in the masculine nature; they are more powerful in the feminine nature. They vary greatly in keenness in different individuals; the refinement of superior education and advanced civilization render them more acute. Pleasurable emotions are physically healthful; painful ones the reverse; but when too intense and sudden either can terminate life, the exciting emotion of joy more easily than the depressing one of sorrow. Each emotion has its appropriate expression in the face and in the bodily frame generally, and those habitually indulged tell ultimately on the physiognomy.

***Em'-mō-tion**, *v. t.* [EMOTION, *s.*] To affect with emotion; to produce emotion in.

"How all his form the emotion'd soul betrays."

*2. To fortify, to strengthen for defense.

"All that dwell near enemies *empale* villages, to save themselves from surprise."—Raleigh: *Essays*.

*3. To surround, to inclose, to shut in.

"Keep yourselves in breath;
 And when I have the bloody Hector found,
Empale him with your weapons round about."
 Shakesp.: *Troilus and Cressida*, v. 7.

*4. To form a border, to border.

"Round about her work she did *empale*
 With a fair border wrought of sundry flowers."
 Spenser: *Mutopotmos*.

*5. To clasp, to incircle.

"Thank my charms,
 I now *empale* her in my arms."—Cleveland.

6. To put to death by spitting on a stake fixed upright.

"Nay, I don't believe they will be contented with hanging; they talk of *empaling* or breaking on the wheel."—Arbuthnot.

7. To transfix, to pierce.

"With solemn pace, and firm in awful state,
 Before thee stalks inexorable Fate,
 And grasps *empaling* nails, and wedges dread,
 The hook tormentous, and the melted lead."
 Francis: *Horace*; *Odes*, bk. 1, 36.

***ēm-pāled**, *pa. par. & a.* [EMPALE.]

A. As *pa. par.*: (See the verb.)

B. As adjective:

"The thought whereof empear'st his heart so deep."—*Spenser: F. Q.*, IV. xii. 19.

***ēm-pl-ēm, s.** [EMPYEMA.] An imposthume in the breast.

"The spawling empiem, ruthless as the rest, With foul impostumes fills his hollow chest."—*Sylvester: The Fairies*, 402.

***ēm-plight (gh silent), v. t. & i.** [Pref. *em*, and Eng. *plight* (q. v.).]

1. *Trans.*: To fix, to set, to fasten.

"Had three bodies in one waste empiight."—*Spenser: F. Q.*, V. i. 8.

2. *Intrans.*: To fasten, to become fixed.

"But he was wary, and ere it empiight In the meat mark advanced his shield atween."—*Spenser: F. Q.*, III. iv. 46.

***ēm-pīre, *em-per-īe, *em-pere, *em-pyre, *em-pyre, s.** [Fr. *empire*; from Lat. *imperium*=power, command; *impero*=to command; Sp., Port., & Ital. *imperio*.]

1. Supreme command or dominion; sovereignty; imperial power.

"To God alone, our saviour Jhesu Crist our Lord, be glorie and magnifying, empire and power before alle worldis."—*Wycliffe: Judas*, c. ii.

2. The territory, region, or countries over which supreme dominion is extended; the countries under the rule or dominion of an emperor or other supreme ruler.

"He caused it to be proclaimed throw out al his empire."—*Bible* (1551), 1 Esdras, i.

3. The population of an empire.

"Bury the great Duke with an empire's lamentation."—*Tennyson: Ode on Wellington*.

4. Supreme control or command over anything; rule, sway.

"If vice had once an ill name in the world . . . it would quickly lose its empire."—*Sharp: Sermons*, vol. ii, ser. 1.

¶ (1) Crabb thus discriminates between *empire* and *kingdom*: "The word *empire* carries with it the idea of a state that is vast, and composed of many different people; that of *kingdom* marks a state more limited in extent and united in its composition."

(2) He thus discriminates between *empire*, *reign*, *dominion*: "*Empire* is used more properly for the people or nations; *reign* for the individuals who hold the power; hence we say the *empire* of the Assyrians, or of the Turks; the *reign* of the Cæsars, or the Paleologi. The glorious epocha of the *empire* of the Babylonians is the *reign* of Nebuchadnezzar. All the epithets applied to the word *empire*, in this sense, belong equally to *reign*, but all which are applied to *reign* are not suitable in application to *empire*. We may speak of a *reign* as long and glorious; but not of an *empire* as long and glorious, unless the idea be expressed paraphrastically. *Empire* and *reign* are both applied in the proper sense to the exercise of public authority; *dominion* applies to the personal act, whether of a sovereign or a private individual; a sovereign may have *dominion* over many nations by the force of arms; but he holds his *reign* over one nation by the force of law. Hence the word *dominion* may, in the proper sense, be applied to the power which man exercises over the brutes, over inanimate objects, or over himself; but if *empire* and *reign* be applied to anything but civil government, or to nations, it is only in the improper sense: thus a female may be said to hold her *empire* among her admirers; or fashions may be said to have their *reign*. In this application of the terms, *empire* is something wide and all-commanding; *reign* is that which is steady and settled; *dominion* is full of control and force." (*Crabb: Eng. Synon.*)

***ēm-pīre, v. i.** [EMPIRE, s.] To assume authority or sovereignty over.

"They should not *empire* over Presbyteries, but be subject to the same."—*Heylin: Hist. of Presbyterians*, p. 217.

ēm-plr-īc, s. & a. [Fr. *empirique*; from Latin *empiricus*, from Gr. *empeirikos*=(a.) experienced; (s.) an empiric, from *empeiria*=experience; *empeiros*=experienced; *peira*=a trial, attempt.]

- A. *As substantive*:

1. Originally a respectful designation. An ancient medical sect who sought to derive their knowledge from observations or experiment, and considered these the only true methods of acquiring knowledge. Acron of Agrigentum had held these views about B. C. 430, but the sect did not arise till B. C. 250. It was called into life by the assertions of the Dogmatics.

2. One who begins to practice medicine without a regular professional education, relying solely upon his experience and observation.

"Such an aversion and contempt for all manner of innovators, as physicians are apt to have for empirics."—*Suett*.

3. A quack, a charlatan; a pretender to medical knowledge.

"But hark—the doctor's voice!—fast wedged between Two empirics he stands."—*Cowper: Task*, ii. 351, 352.

- B. *As adjective*:

1. Pertaining to experiments or experience; depending upon experience or observation.
2. Skilled in experiments.

"The empiric alchemist Can turn, or holds it possible to turn, Metals of drossiest ore to perfect gold."—*Milton: F. L.*, v. 440-2.

3. Known only by experience; derived from experiment or observation, without any regard to science or theory.

"Bold counsels are the best; Like empiric remedies they last are tried, And by th' event condemn'd or justified."—*Dryden: Aurungzebe*, ii. 1.

ēm-plr-ī-cāl, a. [Eng. *empiric*; -al.] The same as EMPIRIC (q. v.).

empirical-formula, s.

Chem.: The empirical formula of a chemical substance states the result of the analysis of the body, showing the relative number of the atoms of each element contained in it. Several substances can have the same empirical formula; thus acetylene, C₂H₂, and benzene, C₆H₆, when analyzed give the same percentage of carbon and hydrogen. The numbers of the atoms of hydrogen and carbon contained in a molecule of the substance are expressed by their rational formula (q. v.). The relations of the atoms of the elements contained in a molecule to each other are shown by the constitutional formula, thus C₂H₄O is the rational formula for acetone, CH₃COCH₃. Propyl aldehyde is written CH₃CH₂COH, and allyl alcohol, H₂C=CHCH₂OH.

empirical-laws, s. pl. Laws founded on conformities ascertained to exist, but which have not yet been traced to any broad general principle.

ēm-plr-īc-al-ly, adv. [Eng. *empirically*; -ly.]

1. Experimentally, by experiment; according to experience.
2. In manner of a quack; without science.

ēm-plr-ī-çism, s. [Eng. *empiric*; -ism.]

1. Reliance upon experience and observation rather than on theory.

"Experience is apt to degenerate to a vulgar and presumptuous empiricism."—*Knox: Essays*, No. 38.

2. The practice of medicine without due professional training; quackery, charlatanism.

***ēm-plr-ī-çist, s.** [English *empiric*; -ist.] An empiric.

***ēm-plr-ī-cū-tic, a.** [EMPIRIC, a.] Empirical. "The most sovereign prescription in Galen is but empiric."—*Shakespeare: Coriolanus*, ii. 1.

ēm-pls', s. [Gr. *empis*=a mosquito, a gnat.]

Entom.: A genus of Diptera, the typical one of the family Empidæ (q. v.). It has a proboscis which is perpendicular or directed backward.

***ēm-plā-çe-mēt, s.** [Fr.]

1. *Ord. Lang.*: The place, ground, or site, as of a building.

2. *Mil.*: An emplacement, used in field fortification to cover a battery of field guns, usually in conjunction with a line of shelter-trench.

"Behind these dark objects on the slopes, so like battery emplacements, may be lurking Krupp cannon."—*Daily News Correspondence*.

ēm-plas-tēr, *em-plais-ter, *em-plas-tre, s. [Gr. *emplastron*, from *emplastō*=daubed on; *emplastō*=to daub on.] A plaster.

"All emplasters, applied to the breasts, ought to have a hole for the nipples."—*Wiseman: Surgery*.

ēm-plas-tēr, *em-plas-tre, *em-plais-ter, v. t. [EMPLASTER, s.]

1. *Lit.*: To cover with a plaster.

"They must be cut out to the quick, and the sores emplaced with tar."—*Mortimer: Husbandry*.

2. *Fig.*: To cover, to smear over.

"Parde as faire as ye his name emplastre."—*Chaucer: C. T.*, 10,171.

ēm-plās-tic, a. & s. [Gr. *emplastikos*, from *emplastō*=to daub or smear over.]

- A. *As adj.*: Viscous, glutinous, adhering; fit to be used for a plaster.

"Resin, by its *emplastio* quality, mixed with oil of roses perfects the concoction."—*Wiseman: Surgery*.

- B. *As substantive*:

Med.: A constipating medicine.

em-plô-re, *v. t.* [IMPOLE.]

em-plô-y, *v. t.* [Fr. *employer*, from Lat. *implico*=to involve, to involve, to engage: *em*=in, and *plico*=to weave, to fold; Sp. *emplear*; Ital. *impiegare*; Port. *empregar*.]
 1. To involve, to inclose.

2. To busy, to exercise, to keep at work; to occupy the time, care, or attention of.

3. To engage in one's service; to commission or intrust with the management or execution of any work.

"He could not legally continue to employ officers who refused to qualify."—*Macaulay: Hist. Eng.*, ch. vi.

4. To use as the means or instrument for any purpose.

"During many years one half of the energy of England had been employed in counteracting the other half."—*Macaulay: Hist. Eng.*, ch. x.

5. To use as materials; to apply to any purpose or use.

"The labor of those who felled and framed the timber employed about the plough, must be charged on labor."—*Locke*.

6. To use as an instrument; to work at.

"The cleanly cheese-press she could never turn; Her awkward fist did ne'er employ the churn."—*Gay: Shepherd's Week, Wednesday*.

7. To spend or pass in any business or occupation; to occupy, to fill up.

"Come, when no graver cares employ, Godfather, come and see your boy."—*Tennyson: To Rev. F. D. Maurice*.

*8. To devote to any use.

"Employing all their ground to tillage."—*Golding: Cæsar*, fo. 2.

¶ Crabb thus discriminates between to employ and to use: "Employ expresses less than use; it is in fact a species of partial using: we always employ when we use; but we do not always use when we employ. We employ whatever we take into our service, or make subservient to our convenience for a time; we use whatever we entirely devote to our purpose. Whatever is employed by one person may, in its turn, be employed by another, or at different times be employed by the same person; but what is used is frequently consumed or rendered unfit for similar use. What we employ may frequently belong to another; but what one uses is supposed to be his own." (*Crabb: Eng. Synon.*)

em-plô-y, *s.* [EMPLOY, *v.*] That which employs or occupies the time, care or attention; employment, occupation, business, object of industry, trade, profession, office.

"Is duty a mere sport, or an employ?"—*Cosper: Retirement*, 649.

em-plô-y-a-ble, *a.* [Eng. *employ*; -able.] Capable of being employed or used; fit for employment; proper or suitable for use.

*14. Destitute, devoid. (Followed by of.)

"Empty of defense."—*Shakesp.*: *Henry V.*, i. 2.

*15. Free, clear.

"I shall find you empty of that fault."
Shakesp.: *Love's Labor's Lost*, v. 2.

B. As subst.: An empty packing-case, or the like.

¶ Crabb thus discriminates between *empty*, *vacant*, *void*, and *devoid*: "*Empty*, in the natural sense, marks an absence of that which is substantial, or adapted for filling; *vacant* designates or marks the absence of that which should occupy or make use of a thing. That which is hollow may be *empty*; that which respects an even space may be *vacant*. A house is *empty* which has no inhabitants; a seat is *vacant* which is without an occupant. . . . A dream is said to be *vacant*, or a title *empty*: a stare is said to be *vacant*, or an hour *vacant*. *Void* and *devoid* are used in the same sense as *vacant*. . . . thus we speak of a creature as *void* of reason, and of an individual as *devoid* of common sense." (*Crabb*: *Eng. Synon.*)

¶ For the difference between *empty* and *hollow*, see *HOLLOW*.

empty-handed, *a.* Having nothing in the hands; carrying or possessing nothing of value.

"Homeward hurried Hiawatha,
Empty-handed, heavy-hearted."
Longfellow: *Song of Hiawatha*, xx.

empty-headed, *a.* Silly, ignorant.

"How comes it that so many worthy and wise men depend upon so many unworthy and empty-headed fools?"—
Raleigh.

empty-hearted, *a.* Destitute of feeling, heartless.

"Nor are those empty-hearted, whose low sound
Reverbs no hollowness." *Shakesp.*: *Lear*, i. 1.

ēmp-tŷ, *ēmp-te, *ēm-te, *v. t. & i.* [A. S. *emþtian*, *emþian*.] [EMPTI, *a.*]

A. Transitive:

1. To make empty of the contents; to remove or discharge the contents from; to exhaust.

ē-mūl-gēnt, *a. & s.* [Lat. *emulgens*, pr. par. of *emulgeo*=to milk out: *e*=out, and *mulgeo*=to milk.]

A. As adjective:

*1. Ord. Lang.: Milking or draining out.

2. Physiol.: The renal arteries and veins are called also *emulgent* arteries and veins, the ancients assuming that they strained and "milked out" the serum by means of the kidneys.

B. As substantive:

1. Anat.: An emulgent vein or vessel.

2. Med.: A medicine which promotes the flow of bile.

ēmp-u-lōus, *a.* [Lat. *emulus*; Sp. & Ital. *emulo*; Fr. *émule*.]

1. Emulating; desirous of equaling or excelling; rivaling.

"What the Gaul or Moor could not effect,
Nor emulous Carthage, with their length of spite,
Shall be the work of one." *Ben Jonson*: *Catiline*, iii. 4.

2. It is followed by *of* before the object of ambition or emulation.

"By strength
They measure all, of other excellence
Not emulous, nor care who them excels;
Nor other strife with them do I vouchsafe."
Milton: *P. L.*, vi. 820-2.

*3. Envious, jealous.

"Wouldst thou, oh, emulous Death, do so
And kill her young to thy loss."
Donne: *Mrs. Boulstred*.

*4. Factious, contentious.

"Whose glorious deeds, but in the fields of late,
Made emulous missions 'mongst the gods themselves,
And drave great Mars to faction."
Shakesp.: *Troilus and Cressida*, iii. 3.

ēmp-u-lōus-lŷ, *adv.* [Eng. *emulous*; -ly.] In an emulous manner; with emulation or desire of equaling or excelling.

"The islanders, in joyous mood,
Rushed emulously through the flood."
Scott: *Marmion*, ii. 11.

ēmp-u-lōus-nēss, *s.* [Eng. *emulous*; -ness.] The quality or state of being emulous; emulation, ambition to excel.

ē-mūl-sic, *a.* [Eng., &c., *emul(sine)*; -ic.]

Chem.: Pertaining to or derived from emulsin.

ē-mūl-si-fy, *v. t.* [Lat. *emulsus*, pa. par. of *emulgeo*, and *facio* (pass. *fio*)=to make.] To make or form an emulsion.

ē-mūl-sin, **ē-mūl-sine**, *s.* [EMULGENT.]

Chem.: A neutral substance contained in almonds, which acts as a ferment on amygdalin in the presence of water, converting it into benzoic aldehyde, hydrocyanic acid and glucose. Emulsin can be obtained as a white friable mass, soluble in water by making an emulsion of almonds from which the fixed oil has been extracted. It cannot be obtained pure.

ē-mūl-sion, *s.* [Fr., from Lat. *emulsus*, pa. par. of *emulgeo*=to milk out, to drain.]

1. Ord. Lang.: Finely divided matter, suspended in a colloid body.

2. Pharm.: A form of medicine of a soft liquid character resembling milk in color and consistency; a milk-like preparation of oil and water united by some saccharine or mucilaginous substance.

"The aliment is dissolved by an operation resembling that of making an emulsion."—*Arbutnot*.

*ē-mūl-sive, *a.* [Lat. *emulsus*, pa. par. of *emulgeo*, and Eng. suff. -ive.]

1. Softening; milk-like.

2. Yielding oil by expression; as, *emulsive* seeds.

3. Producing or yielding a milk-like substance; as, *emulsive* acids.

ē-mūnc-tōr-ŷ, *ē-munc-tōr-ŷ, *a. & s.* [Lat. *emunctorium*=a pair of snuffers; *emungo*=to clean, to cleanse; Fr. *emunctoire*; Ital. *emuntorio*.]

A. As adj.: Designed to carry noxious or useless particles out of the body.

fāte, fāt, fāre, amidst, whāt, fāll, father; wē, wēt, hēre, camēl, hēr, thēre; pine, pīt, sīre, sīr, marine; gō, pōt, or, wōre, wolf, wōrk, whō, sōn; mūte, cūb, cūre, unite, cūr, rāle, fāll; trŷ, Sŷrian. æ, œ = ē; ey = ā. qu = kw.

B. As substantive:

Anat.: Any organ of the body which serves to pass excrementitious or waste matter; an excretory duct.

***ē-mūs-cā-tion**, *s.* [Lat. *emuscatus*, pa. par. of *emusco*=to free or clear from moss: *e*=out, away, and *muscus*=moss.] A freeing or clearing from moss.

ē-myđ'-i-dæ, *s. pl.* [Lat. *emys*, genit. *emyd*(is), and fem. pl. adj. suff. *-idæ*.]

1. *Zool.*: Terrapins, Mud Tortoises. A family of Chelonians. Feet palmated; claws five, four of them sharp; jaws horny; shell solid, covered with horny plates; marginal plates twenty-three or twenty-five, hinder pair free; sternal shields eleven or twelve; neck retractile. They are common in warm climates, but species exist in the temperate regions of both hemispheres. They are generally of small size.

2. *Palæont.*: The family has existed from Oolitic times till now.

ēm'-y-din, *s.* [Gr. *emys* (genit. *emydos*)=a turtle; suff. *-in* (Chem.).]

Chem.: A white nitrogenous substance contained in the yolk of turtles' eggs. It is soluble in dilute potash, swells up in acetic acid without dissolving, and dissolves in boiling hydrochloric acid without violet coloration. (Watts: *Dict. Chem.*)

ē-myđ'-i-ūm, *s.* [Latinized dimin. of Gr. *emys*.]

Zool.: A genus of Arachnida (Spiders). Order Colopoda, tribe or family Tardigrada.

***ē-myđ-ō-sau'-ri-an**, *a. & s.* [Gr. *emys* (genit. *emydos*)=a water tortoise, and Eng., &c., *saurian* (q. v.).]

A. As adj.: Having certain affinities to lizards on the one hand and to water tortoises on the other. Pertaining to the Emydosaurians [B].

B. As subst. (pl.): De Blainville's name for an order of Reptiles in which he places the Crocodiles. The term has given place to Crocodilia (q. v.).

ē-mŷs, *s.* [Lat. *emys*; Gr. *emys*=a water tortoise.]

1. *Zool.*: Terrapin or Mud Tortoise. A genus of Chelonians, the typical one of the family Emydidae.

2. *Palæont.*: A species has been found in the Wealden.

en-, *pref.* [Fr., from Lat. *in-*.] A prefix adopted from the French, in which language it represents the Latin *in*. It is, however, frequently found in English compound verbs with the sense of *in*, *within*, the form *en* being adopted through the influence of other verbs taken directly from the French. In many cases the original form *in* is also used, so that two forms of the same verb are found co-existent; as *enquif*, *inquif*; *enquire*, *inquire*, where there is no difference in meaning between the two forms. In the majority of instances of double forms there is a tendency for one of the forms to become obsolete, while in others, as *ensure* and *insure*, the meanings have become differentiated. Before *t* and *p*, and sometimes before *n*, *en* becomes *em*. In many cases *en-* as a prefix appears to have little if any force; in most instances it has the force of *in* or *within*, and in many it expresses change of state, as *enrich*, *enslave*. It sometimes, and especially in scientific terms, represents the Greek *en*=in.

-en, *n.*, a verbal formative from other verbs. [A. S. *-enian*, *-nian*; Goth. *-nan*, a termination forming intrans. verbs from the pa. par. of primitive verbs, as *wakan*, *wok*, *wakan-s*, to "wake, watch," whence *wakn-an*; A. S. *wacnian*, *wacnan*=to become awake, to awaken; so from *drincan*, *drunc*, *druncen*; *druncnan*, to get drowned.]

I. It was probably due to the fact that there was no apparent difference of meaning between, e. g., *wake* and *waken*, which seemed mere formal variants, that other verbs received, by form-association, secondary forms, as *threat*, *threaten*; *haste*, *hasten*; *list*, *listen*; *hark*, *hearken*; *hap*, *happen*; *glisten*, *glist*; and probably *heighten*, *lengthen*, *strengthen*, though some of these may also be due to form-association with *-en* [II.].

II. A verbal formative from adjectives; as *fatten*, *whiten*, *sweeten*, and perhaps *heighten*, *lengthen*, &c. [I.].

III. An adjectival formative from nouns; as *wooden*.

IV. A plural termination of nouns, now obsolete except in *ozen*, *children*, and *brethren*.

V. A plural termination of verbs, now obsolete.

VI. A feminine suffix in nouns, of which only one instance survives, viz., *wixen*, the feminine of *fox*.

ēn, *s.* [From the letter *n*.]

Print.: Half an em (q. v.).

bōl, **bōy**; **pōut**, **jōwl**; **cat**, **cell**, **chorus**, **chin**, **bench**; **go**, **gem**; **thin**, **this**; **sin**, **as**; **expect**, **Xenophon**, **exist**. **ph** = **f**. **-cian**, **-tian** = **shan**. **-tion**, **-sion** = **shūn**; **-tion**, **-sion** = **shūn**. **-tious**, **-cious**, **-sious** = **shūs**. **-ble**, **-dle**, &c. = **bēl**, **dēl**.

ēn-ā'-ble, *v. t.* [Pref. *en*, and Eng. *able* (q. v.).]

1. To make able; to give power or ability to; to supply with power, force, or strength; to empower.

"Exercise enables her to exert herself in all her force and vigor."—*Spectator*, No. 195.

2. To supply with means to do any act.

"I shall be enabled

To make payment of my debts."

Massinger: *City Madam*, iv. 1.

3. To make legally capable or competent; to empower, to authorize.

"4. To make competent; to furnish or endow with ability or knowledge; to inform.

"To assertain you I will myself enable."

Chaucer: *Remedie of Love*, st. 28.

***ēn-ā'-ble-mēt**, *s.* [Eng. *enable*; *-ment*.]

1. The act of enabling or giving ability to.

2. That which enables or gives ability.

ēn-āct', *v. t. & i.* [Pref. *en*, and Eng. *act* (q. v.).]

A. Transitive:

*1. To act, to perform, to do, to effect.

"Conscience, anticipating time,

Already rues the enacted crime."

Scott: *Rokeby*, i. 2.

*2. To represent by action; to act the part of on or as on the stage.

"What did you enact?"—*Shakesp.*: *Hamlet*, iii. 2.

*3. To set down, to record.

"A little harm done to a great good end

For lawful policy remains enacted."

Shakesp.: *Rape of Lucrece*, 529.

4. To decree, to establish, to appoint.

"Such ceremonies as Moses and Aaron have enacted."—*Wilson*: *Art of Logic*, fo. 15.

5. To establish as a law; to give validity to a bill; to pass or sanction as a law.

"The senate were authors of all counsels in the state; and what was by them consulted and agreed, was proposed to the people, by whom it was enacted or commanded."—*Temple*.

B. Intrans.: To decree, to determine.

"God did digne to talk with men,

He enacting, they observing."

Sidney.

C. As subst.: The act of decreeing or establishing as a law.

enacting-clause, *s.*

Law: That clause of a bill which gives legislative sanction.

***ēn-āct'-ive**, *a.* [Eng. *enact*; *-ive*.] Having power to enact; enacting, decreeing, or establishing as a law.

"An enactive statute regardeth only what shall be."—*Bp. Bramhall*: *Schism Guarded* (1656), p. 271.

ēn-āct'-mēt, *s.* [Eng. *enact*; *-ment*.]

*1. The acting, doing, or performing any act.

*2. The representation or acting of a part or character.

3. The act of decreeing, establishing, or sanctioning as a law.

"What terrible slaughters succeeded in consequence of its enactment."—*Goldsmith*: *Citizen of the World*, let. 79.

4. A law enacted; a decree; an act.

ēn-āct'-ōr, *s.* [Eng. *enact*; *-or*.]

*1. One who performs or does any act.

"The violence of either grief or joy,

Their own enactors with themselves destroy."

Shakesp.: *Hamlet*, iii. 2.

2. One who enacts, decrees, or establishes as a law.

"This is an assertion by which the . . . enactor of this law of good and evil, is highly dishonored."—*Atterbury*: *Sermons*, vol. ii. (Pref.)

***ēn-āct'-ūre**, *s.* [Eng. *enact*; *-ure*.] A purpose, a determination.

***ēn-āge'**, *v. t.* [Pref. *en*, and Eng. *age* (q. v.).] To make aged, to whiten.

"That never frost, nor snowe, nor slippery ice

The fields enaged."

Sylvester: *Du Bartas*; *Eden*, 154.

ēn-āi'-mæ, *s. pl.* [ANAIMA.]

***ēn-āir'**, *v. t.* [Pref. *en*, and Eng. *air* (q. v.).]

To air, to employ, to use.

"Shee it enaïres in prose and poesy."

Davies: *Wittes Pilgrimage*, p. 31.

ēn-āi'-i-ō-saur, *s.* [ENALIOSAURIA.]

Palæont.: A reptile of the order Enaliosauria (q. v.).

ēn-āi'-i-ō-sau'-ri-æ, *s. pl.* [Gr. *enaios*, *enaios* =marine, and *sauros*, *sauria*=a lizard.]

Palæont.: An extinct sub-class of gigantic reptiles akin to crocodiles in the form of the head, and to that of fishes in their vertebral column. The teeth were in sockets, the eyes large and surrounded by bony plates, the vertebrae concave on both sides, the body ending in a long tail, the feet converted into paddles, apparently no scales on the skin. The sub-class Enaliosauria was constituted by De la Beche, and named by Prof. Owen, who, in 1860, divided it into two orders: Ichthyopterygia and Sauropterygia. The first order includes one family: Ichthyosauridae; and the second order two: Nothosauridae and Plesiosauridae.

ēn-āi'-i-ō-sau'-ri-an, *a. & s.* [ENALIOSAURIA.]

A. As adj.: Pertaining to the marine saurians, placed in the order Enaliosauria.

B. As subst.: That order itself.

ēn-āi'-la-gē, *s.* [Greek *e*=change; *enallassō*=to change, barter, exchange; *en*=in, and *allassō*=to change.]

Gram.: A figure by which some change is made in the common modes of speech, as when one mood or tense of a verb, or one number, case, or gender of a noun, &c., is substituted for another: as, Lat. *scelus*=wickedness, put for *sceleratus*=wicked; Eng. "We, the king."

ēn-āi'-lō-stē-gæ, *s.* [Gr. *enallōs*=changed, contrary, and *stegē*=a roof.]

Zool.: A genus of Rhizopoda, the typical one of the family Enallotegidae (q. v.).

ēn-āi'-lō-stēg'-i-dæ, *s.* [Mod. Lat. *enalloteg*(a), and Lat. fem. pl. adj. suff. *-idæ*.]

Zool.: A family of Rhizopoda, having simple cells arranged in two alternate series.

ēn-a-lŷ-rŷn, *s.* [Fr. *en*=in, and *aileron*=a little wing.]

Her.: A term applied to a bordure charged with eight birds.

ēn-ām'-būsh, *v. t.* [Pref. *en*=in, and English *ambush* (q. v.).] To place or hide in an ambush.

ēn-ām'-el, ***en-am-aile**, ***en-am-mell**, *s. & a.* [Fr. *en*=in, upon, and *amaile*, *amellet*; O. Fr. *esmail*=enamel, from O. H. Ger. *smaltzan*; M. H. Ger. *smelzen*=to smelt (q. v.).]

A. As substantive:

I. Ordinary Language:

1. *Literally*:

(1) A vitreous, opaque, colored material, tractable in the fire, and used in ornamenting metals; in painting on metals, to be subsequently fired. The art of painting in enamel or with metalline colors, and fixing them by fire, was practiced by the Egyptians and Etruscans on pottery, and passed from them to the Greeks and Romans. It was also practiced among the Chinese. Specimens of enameled work are yet extant of early British, Saxon, and Norman manufacture. Enamel is applied to various kinds of pots and pans for stewing and preserving fruit, the flavor of which would be injured by contact with iron, and its wholeness by being cooked in vessels of brass or copper. The ordinary enamel for the purpose is common glass fused with oxide of lead. This will not resist vinegar and some other acids, and a dangerous poison may be present unsuspected. Articles exposed to the weather are sometimes enameled to preserve them from rusting. This has been done with plowshares, moldboards, water-wheels.

(2) That which is enameled; a work of art worked in enamel.

(3) A glassy opaque bead obtained by the blow-pipe.

(4) In the same sense as II.

2. *Figuratively*:

(1) A bright smooth surface, like enamel.

"Down from her eyes welled the pearls round,

Upon the bright enamel of her face." *Fairfax*.

(2) Gloss, polish.

(3) A kind of cosmetic or paint for the face.

II. Anat.: The ivory-like crust of the exposed surfaces of the crown of the teeth to the commencement of the roots. It is a delicate cellular wavy network of hexagonal crystalline fibers, with calcareous deposits in the cells, thickest over the top of the crown.

B. As adj.: Pertaining to the art of enameling; enameled.

enamel-germ, *s.*

Anat.: A down-growth of epithelium, whence comes ultimately the enamel of the teeth. There are common and special enamel-germs. (*Quain*.)

enamel-kiln, *s.*

Porcelain: The enamel-kiln for firing porcelain which has been bat-printed, that is, printed on the glaze, is made of fired-clay slabs, and is 6½ by 3½ feet, and 7½ feet high, with flues beneath and around. The fireplaces are at the sides, and smoke and flame are excluded from the interior.

enamel-membrane, s.

Anat.: The columnar epithelium on the surface of the pulp belonging to the enamel-organ. (*Quain.*)

enamel-organ, s.

Anat.: The enamel-germ, after epithelial processes have appeared upon it and upon the membrane. (*Quain.*)

enamel-painting, s.

Art.: Painting upon metal previously covered with a glazed ground. This kind of painting can only be done in small pieces, and it stands in the same relation to porcelain painting as miniature does to water-color painting. The metals used are gold and copper; the latter is usually gilt; silver is never used, because that metal is liable to blister and otherwise injure the enamel, and brass is of too fusible a quality. For bijouterie an opalized semi-transparent ground is laid on, or a transparent one through which the foil may be seen. For painting, an opaque white ground, such as we see on the dial-plates of clocks, is placed on the metal. The laying-on and burning-in of this ground is called Enameling (q. v.). The best works of this nature were executed in the twelfth and thirteenth centuries. No course of experiments has hitherto made known the substances of which ancient enamels were composed, or the proportions in which they were employed. The coloring paste in present use, which forms the base, consists of oxides of lead and tin fused with silice, in certain quantities, the opaque qualities being given by the oxide of tin, while various colors are produced by the addition of the metallic oxides: thus, from copper green is obtained, red from gold or iron, and blue from cobalt. The colors are mixed with spike-oil of lavender, and spirits of turpentine. Camel's-hair or sable brushes are used by the artist, and the plate undergoes the process of firing after each layer of color is spread over the whole surface. Sometimes a highly-finished enamel requires fifteen or twenty firings. Enamel-painting on lava is a newly-invented style of painting very serviceable for monuments. The material used consists of Volvic stone and lava from the mountains of Auvergne. (*Fairholt.*)

enamel-paper, s. Paper with a glazed metallic coating. Various metallic pigments are employed, such as will spread quickly and take a polish. The pigments are white lead, oxide of zinc, sulphate of barytes, china clay, whiting, chalk, in a menstruum or upon a previous coating of glycerine, size, collodion, water varnish, &c.; afterward polished by an agate or between calendering or burnishing cylinders. (*Knicht.*)

ën-äm'-el, *en-äum-ayl, v. t. & i. [ENAMEL, s.]

A. Transitive:**I. Literally:**

1. To lay enamel upon; to coat with enamel.

"High as th' enameled cupola, which towers,
All rich with arabesques of gold and flowers."
Moore: Veiled Prophet of Khorassan.

2. To paint or inlay in enamel.

"I bequeath to the Earl of Orrery the enameled silver plates to distinguish bottles of wine by."—*Swift.*

3. To form a smooth, glossy, enamel-like surface upon; as, to enamel paper.

II. Fig.: To variegate or adorn with colors, as it were inlaid.

"A gaudy spendthrift heir,
All glossy gay, enameled all with gold."
Thomson: Castle of Indolence, l. 51.

***E. Intrans.**: To practice the art of enameling; to paint in enamel.

"Though it were foolish to color or enamel upon the glasses of telescopes, yet to gild the tubes of them may render them more acceptable to the users, without lessening the clearness of the object."—*Boyle.*

ën-äm'-elled, ën-äm-el-lar, a. [Eng. enamel; -ar.] Consisting of or resembling enamel; smooth, smooth, glossy.

ën-äm'-eled, ën-äm'-elled, pa. par. or a. [ENAMEL, v.]

enameled-board, s. Card-board treated with a surface of white lead and size laid on by a large, flat brush and smoothed by a round, badger's hair-brush. A powder of talc (silicate of magnesia) is rubbed upon the dried surface of lead, and the face is then polished by the brush.

enameled-leather, s. A glazed leather for boots, shoes, carriage upholstery, and other purposes. It is prepared from hides, which are split to the required thickness, well tanned, curried, and passed through two operations; the first to render the leather impermeable to the varnish, and the latter to lay on the varnish. The hides used are those of kip, calf, ox, or horse. They are rubbed on the grain or flesh side with three coatings of boiled linseed oil mixed with ochre or ground chalk, and dried after each coating. The surface is then painted, treated with the same

material of a thinner quality in several applications. Over the surface thus prepared are laid successive layers of boiled linseed oil and of the oil mixed with lamp-black and turpentine spread on with a brush. The surface, which has become black and shining, is then varnished with copal and linseed oil with coloring matters. Five coats of varnish are successively applied, and the colors are varied at will. (*Knicht.*) [PATENT LEATHER.]

enameled-paper, s. [ENAMEL-PAPER.]

enameled-photograph, s.

Photog.: A photograph, for the ground of which metal or pottery is used; the image is developed by nitrate of silver until the half-tints are overdone or obscured, and the deep shades are covered with a thick deposit. The heat of the muffle drives off the organic matters, which formed but vehicles, and the fire cleans the image and restores the brilliancy and delicacy. A thin layer of flux fixes the image. (*Knicht.*)

enameled-ware, s. The enameling of hollow-ware is by a mixture of powdered glass, borax, and carbonate of soda, mixed, fused, cooled, and ground. The ware is cleansed with acid, wetted with gum water, the powder dusted on, and then fused by heat carefully applied.

ën-äm'-el-ër, en-äm'-el-lër, s. [Eng. enamel; -er.] One who practices or is skilled in the art of enameling.

"In the reigns of the two first Edwards, there were Greek enamellers in England, who both practiced and taught the art."—*Walpole: Anecdotes, vol. I, ch. II. (Note.)*

ën-äm'-el-låg, ën-äm'-el-låg, pr. par., a. & s. [ENAMEL, v.]

A. & B. As pr. par. & particip. adj.: (See the verb.)

C. As subst.: The art of painting in enamel; enamel-painting; the art of applying vitrifiable colors to metal, pottery, or glass. The colors are prepared from the oxides of different metals, melted with a vitreous flux and laid on with a fine brush, the medium being oil of spike or some other essential oil. The work is heated in a muffle, which fuses the colors so that they adhere to the metal or other object. The principal colors are oxides of lead, platinum, chromium, uranium. Oxides of tin and antimony give opacity. The enameler works, not with actual colors, but with materials which will assume certain colors under the action of fire. [ENAMEL, ENAMEL-Painting.]

"The coloring of furs, enameling and anealing."—*Sprat: Hist. of Royal Society, p. 286.*

enameling-furnace, s. A furnace for vitrifying the enamel coating on a plate, glass, or biscuit. The work is placed in a muffle, which consists of an arched chamber in the midst of a small furnace, and surrounded by fuel, which keeps it at a red heat, although the fuel cannot touch the work. The furnace and muffle are sometimes made of sheet iron mounted on legs so as to bring the work to the level of the artist's eye.

ën-ar-thrö'-sis, s. [Gr. *enarthrosis=a kind of* jointing when the ball is deep set in the socket: *en=*in, and *arthron=a joint*.]

Anat.: A particular kind of jointing. [Etym.] It is a highly-developed arthrodia. The convex surface assumes a globular shape, and the concavity is so much deepened as to be cup-like; hence the appellation, ball and socket. The ball is kept in apposition with the socket by means of a capsular ligament, which is sometimes strengthened by accessory fibers at certain parts that are likely to be much pressed upon. The best example of enarthrosis is the hip-joint, and next to it the shoulder; in the latter the cavity is but imperfectly developed. This species of joint is capable of motion of all kinds, apposition and circumduction being the most perfect, but rotation limited. (*Todd & Bowman: Physiol. Anat., vol. I, ch. vi., p. 137.*)

*ên-câ-u-mâ, s. [Gr. *engkauma*, from *engkaio*=to burn.]

Surg.: The mark, blister, or vesicle caused by a burn; the scar left by a burn.

ên-câus'-tîc, a. & s. [Gr. *engkaustikos*=pertaining to burning in; from *engkaio*=to burn in: *en=in*, and *kaiô*=to burn.]

A. As adj.: Pertaining to the art of enameling, and of painting in burnt wax; prepared by fusion of colors.

B. As subst.: A mode of painting in which the colors are laid on or fixed by heat. The ancient Greek encaustics were executed in wax-colors, which were burned in by a hot iron, and covered with a wax or encaustic varnish. Pictures in this

style were common in Greece and Rome. The credit to Gausias, of Sicily, 33 B. C., as the inventor, is rather to be taken as an indication that he was an improver. The term *encaustic* at the present day is mostly confined to colors burnt in on vitreous or ceramic ware. By the ancient method, according to Pliny, the colors were made up into crayons with wax, and the subject being traced on the ground with a metallic point, the colors were melted on the picture as they were used. A coating of melted wax was then evenly spread over all, and, when it was quite cold, was polished. The art was revived by Count Caylus in 1753.

encaustic-brick, s. A brick ornamented with various colors baked and glazed. Diodorus Siculus relates that the bricks of the walls of Babylon, erected under the orders of Semiramis, "had all sorts of living creatures portrayed in various colors upon the bricks before they were burnt."

encaustic-painting, s. [ENCAUSTIC, a.]

encaustic-tile, s. An ornamental tile having several colors. A mold is prepared which has a raised device on its face so as to leave an impression in the face of the tile cast therein. This intaglio recess is then filled by a trowel with clay compounds, in the liquid or slip state, and which retain or acquire the required colors in baking, and glazed. This tile is common in ancient and modern structures. The glazing came from the Arabs, who derived it from India, and primarily from China.

*ên-câ-ve, v. t. [Pref. en, and Eng. cave (q. v.).] To hide, as in a cave.

"Do but encave yourself,

ên-cô-mi-um, *s.* [ENCOMION.] Praise, commendation, eulogy.

"How eagerly do some men propagate every little *encomium* their parasites make of them."—*Government of the Tongue*.

¶ Crabb thus discriminates between *encomium*, *eulogy*, and *panegyric*: "The idea of praise is common to all these terms; but the first seems more properly applied to the thing, or the unconscious object; the second to the person in general, or to the characters and actions of men in general; the third to the person of some particular individual: thus we bestow *encomiums* upon any work of art, or production of genius, without reference to the performer; we bestow *eulogies* on the exploits of a hero, who is of another age or country; but we write *panegyrics* either in a direct address, or in direct reference to the person who is panegyricized: the *encomium* is produced by merit, real or supposed; the *eulogy* may spring from admiration of the person eulogized; the *panegyric* may be mere flattery, resulting from servile dependence; great *encomiums* have been paid by all persons to the constitution of England; our naval and military heroes have received the *eulogies* of many besides their own countrymen; authors of no mean reputation have condescended to deal out their *panegyrics* (crabb) freely, in dedications to their patrons." (Crabb: *Eng. Synon.*)

*ên-côm-môn, *v. t.* [Pref. *en*, and Eng. *common* (q. v.).] To make common.

"The occupation dearest to his heart

Was to *encourage* goodness."

Couper: *Task*, ii. 709, 710.

*5. To give additional strength to; to strengthen.

"Sometimes *encouraged* his faint ale with the mixture thereof."—Fuller: *Hist. Camb.*, v. 48.

¶ (1) Crabb thus discriminates between *to encourage*, *to animate*, *to incite*, *to impel*, *to urge*, *to stimulate*, and *to instigate*: "*Encouragement* acts as a persuasive; *animate* as an impelling or enlivening cause; those who are weak require to be *encouraged*; those who are strong become stronger by being *animated*; we are *encouraged* not to give up or slacken in our exertions; we are *animated* to increase our efforts. What *encourages* and *animates* acts by the finer feelings of our nature; what *incites* acts through the medium of our desires; what *impels*, *urges*, *stimulates*, and *instigates*, acts forcibly, by the cause internal or external; we are *impelled* and *stimulated* mostly by what is internal; we are *urged* and *instigated* by both the internal and external, but particularly the latter. We may be *impelled* and *urged*, though not properly *stimulated* or *instigated*, by circumstances; in this case the two former differ only in the degree of force in the impelling cause; less constraint is laid on the will when we are *impelled* than when we are *urged*, which leaves no alternative or choice. *Encouragement* and *incitement* are the abstract nouns either for the act of *encouraging* or *inciting*, or the thing that *encourages* or *incites*; the *encouragement* of laudable undertakings is itself laudable, a single word or look may be an *encouragement*; the *incitement* of passion is at all times dangerous, but particularly in youth; money is said to be an *incitement* to evil. *Incentive*, which is another derivative from *incite*, has a higher application for things that *incite* than the word *incitement*, the latter being mostly applied to sensible, and the former to spiritual objects; savory food is an *incitement* to sensualists to indulge in gross acts of intemperance; a religious man wants no *incentives* to virtue, his own breast furnishes him with those of the noblest kind. *Impulse* is the derivative from *impel*, which denotes the act of *impelling*; *stimulus*, which is the root of the word *stimulate*, naturally designates the instrument, namely, the spur or goad with which one is *stimulated*; hence we speak of acting by a blind *impulse*, or wanting a *stimulus* to exertion."

(2) He thus discriminates between *to encourage*, *to advance*, *to promote*, *to prefer*, and *to forward*: "First as to persons, *encourage* is partial as to the end, and indefinite as to the means; we may *encourage* a person in anything however trivial, and by any means; but to *advance*, *promote*, and *prefer*, are more general in their end, and specific in the means: a person may *advance* himself or may be *advanced* by others; he is *promoted* and *preferred* only by others. When taken in regard to things, *encourage* is used in an improper or figurative acceptance; the rest are applied properly; if we *encourage* an undertaking, we give courage to the undertaker; but when we *advance* a cause, or *promote* an interest, or *forward* a purpose, they properly convey the idea of keeping things alive, or in a motion toward some desired end; to *advance* is, however, generally used in relation to whatever admits of extension and aggrandizement; *promote* is applied to whatever admits of being brought to a point of maturity or perfection; *forward* is but a partial term, employed in the sense of *promote* in regard to particular objects: thus we *advance* religion or learning; we *promote* an art or an invention; we *forward* a plan."

(3) He thus discriminates between *to encourage* and *to embolden*: "To *encourage* is to give courage, and to *embolden* to make bold; the former impelling to action in general, the latter to that which is more difficult or dangerous: we are *encouraged* to persevere; the resolution is thereby confirmed: we are *emboldened* to begin; the spirit of enterprise is roused. Success *encourages*; the chance of escaping danger *emboldens*." (Crabb: *Eng. Synon.*)

(4) For the difference between *to encourage* and *to cheer*, see *CHEER*.

B. As subst.: The circle of arts and sciences; the general system of knowledge.

"Let them have that encyclopædian, all the learning in the world, they must keep it to themselves."—*Burton: Anat. of Melancholy*, p. 181.

ĕn-ĉyst, v. t. [Pref. *en*, and Eng. *cyst* (q. v.).] **Med.:** To inclose in a cyst or vesicle.

ĕn-ĉys-tā-tion, s. [Eng. *encyst*; -*ation*.]

Physiol.: Inclosure within a cyst, as some Protozoa effect for themselves at one stage of their development.

ĕn-ĉyst-ĕd, a. [Pref. *en*; Eng. *cyst*; -*ed*.] Inclosed in a cyst or vesicle; applied to those tumors consisting of a fluid or other matter inclosed in a cyst or sac.

ĕn-ĉyst-mēt, s. [Eng. *encyst*; -*ment*.]

Physiol.: The same as **ENCYSTATION** (q. v.).

ĕnd, *ĕende, *ĕende, s. [A. S. *ende*; cogn. with Icel. *endi*; Dut. *ende*; Sw. *ände*; Dan. *ende*; Ger. *ende*; Goth. *andei*; Sansc. *anta*.]

I. Ordinary Language:

1. The extremity, or extreme point of anything materially extended. Of bodies that have equal dimensions we do not use *end*; the extremity of breadth is *side*.

"Jonathan put forth the end of the rod that was in his hand, and dipt it in a honey-comb."—*1 Samuel* xiv. 27.

2. The extremity, termination, or last part in general.

"The extremity and bounds of all bodies we have no difficulty to arrive at; but when the mind is there, it finds nothing to hinder its progress into this endless expansion; of that it can neither find, nor conceive any end."—*Locke*.

3. A fragment, a bit, a portion; as, in odds and ends.

"Thus I clothe my naked villany
With odd ends, stolen forth of Holy Writ,
And seem a saint." *Shakespeare: Richard III.*, i. 3.

4. The last particle, or termination, of any assignable duration.

"Behold the day growth to an end."—*Judges* xix. 9.

5. The conclusion or cessation of any action.

"It came to pass, as Jacob had made an end of commanding his sons."—*Genesis* xxvii. 30.

6. A ceasing to exist or continue to be.

"What is the sign of the end of the world?"—*Matthew* xxiv. 3.

7. The close or termination of life; death.

"I determine to write the life and the end, the nature and the fortunes of George Villiers."—*Wotton*.

8. The concluding portion of anything.

"A sweet beginning, but unsavory end."
Shakespeare: Venus and Adonis, i. 138.

9. Ultimate state or condition; final lot or doom.

"Mark the perfect man, and behold the upright, for the end of that man is peace."—*Psalms* xxxvii. 37.

10. A limit, a termination.

"There is no end of the store."—*Nahum* ii. 9.

11. An abolition, doing away with, or total loss.

"There would be an end of all civil government, if the assignment of civil power were by such institution."—*Locke*.

12. The cause of death, destruction, or extinction.

"Take heed you daily not before your king,
Lest he that is the supreme King of kings
Confound your hidden falsehood, and award
Either of you to the other's end."
Shakespeare: Richard III., ii. 1.

13. A result, consequence, conclusion, or issue.

"O, that a man might know
The end of this day's business ere it come!"
Shakespeare: Julius Caesar, v. 1.

14. A purpose, an intention.

"There was a purpose to reduce the monarchy to a republic, which was far from the end and purpose of that nation."—*Clarendon*.

15. The thing or issue intended; a design or aim; a drift.

"Perhaps, whatever end he might pursue,
The cause of virtue could not be his view."
Cowper: Charity, 541, 542.

16. A final determination; a conclusion of debate or deliberation.

"My guilt be on my head, and there's an end!"
Shakespeare: Richard II., v. 1.

II. Technically:

1. *Min.*: The farthest or last portion of a level driven on the course of the lode.

2. *Spin.*: A sliver or carding.

3. *Weaving*: One of the worsted yards in a loom for weaving Brussels carpet. It proceeds from a bobbin on the frame, and through a small brass eye called a mail, by which it is lifted when its turn comes to be raised to form a loop in a pattern.

† (1) *An end*:

(a) On end: as, his hair stood on end.

(b) *An end* has a signification in low language not easily explained as, *most an end, commonly*; probably it is properly on end, at the conclusion.

"Stay! at thou to vex me here?"

Slave, that still an end, turns me to shame."
Shakespeare: Comedy of Errors, iv. 4.

(2) *At one's wit's end*: In a state of being entirely at a loss what course to pursue.

"They reel to and fro, and stagger like a drunken man, and are at their wit's end."—*Psalms* ciii. 27.

(3) *End on*:

Naut.: Applied to a ship when her head points directly toward an object; in a straight line for some point.

(4) *End for end*:

Naut.: Applied to any article, as a rope, a spar, &c., reversed so that one end is in the place occupied by the other before the reversing.

(5) *On end*:

(a) With one end resting on the ground; upright.

(b) Continuously.

(6) *To make both ends meet*: To manage one's means so that the expenditure shall not exceed the income.

(7) *To put an end to*: To finish, to kill.

(8) *In end-standards* (of length), the standard length is that of the bar as a whole, and the ends are touched by the instrument every time that a comparison is made. This process is liable to wear away the ends and make the standard false. (*Everett: The C. G. S. System of Units* (1875), ch. ii., p. 9.)

† *Crabb* thus discriminates between *end* and *extremity*: "Both these words imply the last of those parts which constitute a thing; but the *end* designates that part generally; the *extremity* marks the particular point. The *extremity* is from the Latin *extremus*, the very last end, that which is outermost. Hence the *end* may be said of that which bounds anything, but *extremity* of that which extends farthest from us: we may speak of the *ends* of that which is circular in its form, or of that which has no specific form; but we speak of the *extremities* of that only which is supposed to project lengthwise. The *end* is opposed to the beginning; the *extremity* to the center or point from which we reckon. When a man is said to go to the end of a journey or the end of the world, the expression is in both cases indefinite and general; but when he is said to go to the *extremities* of the earth or the *extremities* of a kingdom the idea of relative distance is manifestly implied. He who goes to the end of a path may possibly have a little farther to go in order to reach the *extremity*. In the figurative application *end* and *extremity* differ so widely as not to admit of any just comparison." (*Crabb: Eng. Synon.*)

† For the difference between *end* and *sake*, see **SAKE**.

end-all, s. The ending, the conclusion, the finale.

"That but this blow
Might be the be-all and the end-all here."
Shakespeare: Macbeth, i. 7.

end-bulbs, s. pl.

Anat.: Bulbous swellings, constituting the termination of some sensory nerves. (*Quain*.)

end-plates, motorial end-plates, s. pl.

Anat.: Expansions terminating the nerves of voluntary muscles. (*Quain*.)

end-shake, s. A certain freedom of endwise motion of a spindle or arbor, which has bearings at each end, so that the shoulders of the gudgeons or pivots (as in a watch), shall not bear against the journal-boxes or plate.

end-speech, s. An epilogue, a tag.

end-stone, s. One of the plates of a watch-jewel against which the pivot abuts. [*JEWEL*.]

ĕnd, *ĕnde, v. t. & i. [END, s.]

A. Transitive:

1. To bring to an end, to terminate, to conclude, to finish.

"In that grete languour endid he his life."
Robert de Brunne, p. 127.

2. To bring to a close or decision; to consummate, to decide.

"If I were young again, the sword shall end it."—*Shakespeare: Merry Wives*, i. 1.

3. To destroy, to kill, to put to death.

"The lord of Stafford dear to-day hath bought,
Thy likeness, for instead of thee, King Harry,
This sword hath ended him."
Shakespeare: Henry IV., v. 3.

B. Intransitive:

1. To be brought to an end, to be finished, to terminate, to cease.

"Then the story aptly ends."
Shakespeare: Venus and Adonis, 716.

2. To terminate, to conclude, to finish.

"Our laughing, if it be loud and high, commonly ends in a deep sigh, and all the instances of pleasure have a sting in the tail."—*Taylor*.

3. To cease, to fail, to die out.

"His sovereignty, built upon either of those titles could not have descended to his heir, but must have ended with him."—*Locke*.

bōll, bōy; pōūt, jōwī; cat, çell, chorus, çhin, bench; go, gem; thm, this; sin, aq; expect, Xenophon, exist. ph = f.
-cian, -tian = shān. -tion, -sion = shūn; -tīon, -sīon = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

*4. To die.

"Ere they live, to end."—*Shakesp.: Measure for Measure*, II. 2.

5. To conclude or finish a discourse.

"He ended, and his words, replete with guile,
Into her heart too easy entrance won."

Milton: P. L., ix. 732.

¶ Crabb thus discriminates between *to end*, *to close*, and *to terminate*: "To *end* is the simple action of putting an *end* to, without any collateral idea; it is therefore the generic term. To *close* is to *end* gradually; to *terminate* is to *end* in a specific manner. There are persons even in civilized countries so ignorant as, like the brutes, to *end* their lives as they began them, without one rational reflection: the Christian *closes* his career of active duty only with the failure of his bodily powers. A person *ends* a dispute, or puts an *end* to it, by yielding the subject of contest; he *terminates* the dispute by entering into a compromise." (*Crabb: Eng. Synon.*)

**end-a-ble*, *a.* [Eng. *end*; -*able*.] That may or can be ended or terminated; terminable.

**en-dām-age* (age as *ig*), **en-dām-madje*, **en-dom-age*, *v. t.* [Fr. *endommager*.] [DAMAGE.] To damage, to hurt, to injure, to prejudice, to harm.

**en-dām-age-a-ble* (age as *ig*), *a.* [English *endamage*; -*able*.] That may or can be damaged; liable to damage or injury.

**en-dām-age-mēt* (age as *ig*), *s.* [Eng. *endamage*; -*mēt*.] Damage, loss, injury, harm, prejudice.

**en-dām-ni-fy*, *v. t.* [Pref. *en*, and Eng. *dannify* (q. v.).] To damnify, to injure.

**en-dān-gēr*, **en-daun-ger*, *v. t.* [Prefix *en*, and Eng. *danger* (q. v.).]

1. To bring into danger, hazard, or peril; to expose to danger; to put in hazard.

"I hold him but a fool that will *endanger*

His body for a girl that loves him not."

Shakesp.: Two Gentlemen of Verona, v. 4.

*2. To incur the danger or risk of; to hazard, to risk.

"He that turneth the humors back, and maketh the wound bleed inward, *endangereth* malign ulcers."—*Bacon*.

**en-dān-gēr-mēt*, *s.* [Eng. *endanger*; -*mēt*.]

1. The act of endangering or placing in danger, hazard, or peril.

2. Danger, risk, hazard.

**en-dark*, **en-dark-en*, *v. t.* [Pref. *en*, and Eng. *dark*, *darken* (q. v.).] To make dark, to darken, to obscure.

**en-dart*, *v. t.* [Pref. *en*, and Eng. *dart* (q. v.).] To dart, to shoot.

**en-dēar*, *v. t.* [Pref. *en*, and Eng. *dear* (q. v.).]

1. To make dear or beloved; to attach by bonds of affection.

"She whose generous aid her name *endears*,
Tore down those remnants with a harpy's hand."

Byron: Child Harold, II. 13.

*2. To make dear in price; to raise the price of.

"All victuals and other provisions *endeared*."—*King James: Proclamation concerning Buildings* (1618).

*3. To bind, to oblige.

"I am so much *endeared* to that lord."

Shakesp.: Timon of Athens, III. 2.

**en-dēar-ānce*, *s.* [Eng. *endear*; -*ance*.] Affection.

"Show it young Lady Betty, by way of *endearance*."

Anstey: New Bath Guide, let. x.

**en-dēared*, *pa. par.* or *a.* [ENDEAR.]

**en-dēar-ēd-lý*, *adv.* [English *endeared*; -*ly*.] Affectionately, with love or affection; dearly.

**en-dēar-ēd-nēss*, *s.* [Eng. *endeared*; -*nēss*.] The quality or state of being endeared or beloved.

**en-dēar-ing*, *pr. par.*, *a.* & *s.* [ENDEAR.]

A. As *pr. par.*: (See the verb.)

B. As *adj.*: Tending to make dear or beloved.

"He strove,
To soothe a child who walked beside him."

Wordsworth: Excursion, bk. II.

C. As *subst.*: The act of making dear or beloved; endearment.

**en-dēar-mēt*, *s.* [Eng. *endear*; -*mēt*.]

1. The act of endearing or making dear or beloved.

"Love is a medley of *endearmments*,
Suspicious, quarrels, reconclements, wars."

Walsh: To his Book.

2. A state of being endeared or beloved; a source or cause of affection.

"The statesman who exchanges the bustle of office and the fame of oratory for philosophic studies and domestic *endearmments*."—*Macaulay: Hist. Eng.*, ch. xvi.

**en-dēav-or*, *s.* [ENDEAVOR, *v.*] An effort, an essay, an attempt; the exertion of the physical or intellectual powers for the attainment of some object.

"How strangely high endeavors may be blest,
Where piety and valor jointly go."

Dryden: On the Death of Cromwell.

**en-dēav-or*, **en-dev-or*, **en-dev-our*, *v. i.* & *t.* [From the Mid. Eng. phrase "to do his *dever*"=to do his duty, with *pref. en*.]

A. Intransitive:

1. To labor or exert one's self to a certain purpose; to strive or work for a certain end; to struggle, to try, to make efforts.

"He . . . endeavors, uprightly and sincerely, to observe them all."—*Sharp: Sermons*, vol. I., ser. 5.

*2. To seek to gain; to strive after or for. (Followed by *after*.)

"I could wish that more of our country clergy would endeavor after a handsome elocution."—*Addison*.

B. Transitive:

1. To attempt, strive, or exert one's self to gain; to seek to effect or bring about.

"It is our duty to *endeavor* the recovery of these beneficial subjects."—*Chatham*.

2. To attempt, to essay.

"To prayer, repentance, and obedience due,
Though but *endeavored* with sincere intent,
Mine ear shall not be slow, mine ear not shut."

Milton: P. L., III. 191-93.

3. To exert.

"Let us *endeavor* ourselves diligently to keepe the presence of His Holy Spirit."—*Homilies: Rogation Week*, pt. III.

¶ Crabb thus discriminates between *to endeavor*, *to aim*, *to strive*, and *to struggle*: "To *endeavor* is general in its object; *aim* is particular; *we endeavor* to do whatever we set about; *we aim* at doing something which we have set before ourselves as a desirable object. To *strive* is to *endeavor* earnestly; to *struggle* is to *strive* earnestly. An *endeavor* springs from a sense of duty; *we endeavor* to do that which is right, and avoid that which is wrong; *aiming* is the fruit of an aspiring temper; the object *aimed* at is always something superior either in reality or imagination, and calls for particular exertion; *striving* is the consequence of an ardent desire; the thing *striven* for is always conceived to be of importance; *struggling* is the effect of necessity; it is proportioned to the difficulty of attainment, and the resistance which is opposed to it; the thing *struggled* for is indispensably necessary. Those only who *endeavor* to discharge their duty to God and their fellow-creatures can expect real tranquility of mind. Whoever *aims* at the acquirement of great wealth or much power opens the door for much misery to himself. As our passions are acknowledged to be our greatest enemies when they obtain the ascendancy, we should always *strive* to keep them under our control. There are some men who *struggle* through life to obtain a mere competence, and yet die without succeeding in their object. We ought to *endeavor* to correct faults, to *aim* at attaining Christian perfection, to *strive* to conquer bad habits; these are the surest means of saving us from the necessity of *struggling* to repair an injured reputation." (*Crabb: Eng. Synon.*)

**en-dēav-or-ēr*, *s.* [Eng. *endeavor*; -*er*.] One who strives, labors, or exerts himself to a certain end.

"He appears an humble *endeavorer*, and speaks honestly to no purpose."—*Rymer: Tragedies*.

**en-dēav-or-mēt*, *s.* [Eng. *endeavor*; -*mēt*.] An endeavor, a struggle, an attempt.

**en-dēc-a-gōn*, *s.* [Gr. *hendeka*=eleven, and *gōnia*=an angle.]

**en-dēm-ōl-ō-gý*, *s.* [Gr. *endēmios*=dwelling at home, and *logos*=a discourse.] A discourse or treatise on endemic diseases; the theory or doctrine of endemic diseases.

**en-dē-mi-ōus*, *a.* [Gr. *endēmios*.] The same as *ENDEMIC* (q. v.).

**en-dēn-i-zā-tion*, *s.* [Eng. *endeniz*(e); -*ation*.] The act of naturalizing or making a denizen.

**en-dēn-ize*, *v. t.* [ENDENIZEN.] To make a denizen, to naturalize.

**en-dēn-i-zen*, *v. t.* [Pref. *en*, and Eng. *denizen* (q. v.).] To naturalize; to make a denizen of.

**end-ēr*, **end-ere*, *s.* [Eng. *end*; -*er*.] One who or that which ends, terminates, or brings to an end.

"The maker of faith, and the party *endere*, Jesu [the author and finisher of our faith. Author. Version]."—*Wycliffe: Heb. xii. 2*.

**en-dēr-māt-ic*, *a.* [Gr. *en*=in, and *dermatikos*=pertaining to the skin; *derma* (genit. *dermatos*)=skin.]

Med.: A term applied to that method of using remedies in which they are rubbed into the skin, especially after the cuticle has been removed, as by a blister.

**en-dēr-mic*, *a.* [Gr. *en*=in; *derma*=skin, and Eng. *adj. suff. -ic*.]

Med.: The same as *ENDERMATIC* (q. v.).

**en-dēr-ōn*, *s.* [Gr. *en*=in, and *deros*=skin.]

Anat.: The dermis or true skin: the inner plane of growth of the outer integumentary layer, viz., the ectoderm or epidermis. (*Nicholson, &c.*)

A. & B. *As pr. par. & particip. adj.*: (See the verb.)

C. *As substantive*:

1. Ordinary Language:

I. A conclusion, a termination, an end.

"The times also of the Highest have plain beginnings in wonders and powerful works, and endings in effects and signs."—2 Esdras ix. 6.

2. A termination of life.

"Of Surrye a worthy kynge

Him slewe, and that was his endyngē."

Gower: C. A., vi.

3. The terminating syllable of a word.

"I can find out no rhyme to lady but baby, an innocent rhyme; for scorn, horn, a hard rhyme; for school, fool, a babbling rhyme; very ominous endings."—Shakesp.: *Much Ado About Nothing*, v. 2.

II. Gram.: The final or terminating syllable of a word.

ēnd-ir-ōn, *s.* [Eng. *end*, and *iron*.] A movable iron plate or cheek used in cooking stoves to enlarge or contract the grate. [ANDIRON.]

***ēn-dī-to**, *v.* [ENDICT.]

ēn-dive, *s.* [Fr. *endive*; Prov., Sp., Port., & Ital. *endivia*, from Lat. *intubus*, *intubum*, *intubus*, *intubum*; Gr. *entyon*, prob. from Arab. *hindiba*.]

Bot. & Ord. Lang.: A composite plant, *Cichorium endivia* [CICHORIUM], a native of the north of China, and some other parts of Asia; early cultivated in Egypt, used by the Greeks and Romans, and introduced into Britain apparently some time before A.D. 1548. It has a head of pale blue flowers. There are two leading varieties, one with broad, ragged leaves, the other with leaves narrower and curled. The leaves, after being blanched to diminish their bitterness, are used in salads and stews.

"There, at no cost, on onions, rank and red,

Or the curled *endive's* bitter leaf, he fed."

Comper: *Salad* (Trans.).

ēnd-lēss, *ende-les, *ende-lesse, *a. & adv.* [A. S. *endeleds*.]

A. *As adjective*:

1. Having no end, termination, or conclusion; unceasing, unending.

"She strikes out all that luxury can ask,

And gains new vigor at her endless task."

Comper: *Charity*, 102, 103.

2. Infinite in longitudinal extent; unlimited, having no bound or limit.

"As it is pleasant to the eye to have an *endless* prospect, so it is some pleasure to a finite understanding to view unlimited excellencies."—Tillotson.

3. Infinite in duration, unending, perpetual.

"Him thinketh his joy is *endless*."

Gower: C. A., vi.

4. Unceasing, perpetual, continual, constant, incessant.

5. Without any end or result; fruitless, vain.

B. *As adv.*: Endlessly, unceasingly, perpetually.

"To give His enemies their wish, and end

Them in His anger, whom His anger saves

To punish *endless*." Milton: *P. L.*, li. 157-59.

endless-chain propeller, *s.* One in which the paddles are attached to a traversing belt or set of chains, which rolls over two parallel wheels.

endless-saw, *s.* A band saw, consisting of a steel ribbon serrated on one edge, and passing continuously over wheels above and below the worktable; used for scroll-sawing, &c. [BAND-SAW.]

endless-screw, *s.* A screw whose action is continuous, engaging the teeth of a wheel which is revolved thereby. It is used in graduating machines, registers, odometers, and in many other places where a means of slow and positive rotation to a wheel is required. A worm-wheel. There is a necessary relation between the pitch of the worms on the shaft and of the teeth on the wheel, and a revolution of the shaft moves the wheel a distance of one tooth. By an index arrangement on the shaft to enable it to be turned a certain portion of a revolution, say through 6°, and having, say, sixty teeth in the wheel, the latter may be turned 1/10 of a revolution at a time, a distance inappreciable to the eye. This is the micrometer-screw. [Knight.] [MICROMETER.]

ēnd-lēss-lŷ, *adv.* [A. S. *endeledlice*.]

1. Without end, termination, or cessation.

"Shut up in darkness *endlessly* to dwell."

Drayton: *Legend of Pierce Gaveston*.

2. Incessantly, perpetually, continually, constantly.

"Though God's promise has made a sure entail of grace to all those who humbly seek, yet it nowhere engages that it shall importunately and *endlessly* renew its assaults on those who have often repulsed it."—More: *Decay of Piety*.

3. Without purpose, object, or end; aimlessly, uselessly.

ēnd-lēss-nēss, *s.* [A. S. *endeledsnys*.]

1. Extension without end, bound, or limit; infinity.

2. Perpetuity, endless duration.

3. The state or quality of forming a line without end; as a circle.

"The tropic circles have,
Yea, and those small ones which the poles engrave,
All the same roundness, evenness, and all
The *endlessness* of the Equinoctial." Donne.

ēnd-lōng, *end-lang, *v. t.* [ENDLONG, *adv.*] To harrow the ridges in a field from end to end, as opposed to thwarting.

ēnd-lōng, *end-lang, *ende-longe, *end-longe, *adv. & prep.* [A. S. *andlang*, *andlong*.]

A. *As adverb*:

1. In a straight or direct line; directly forward.

"They moten holde

Her cours *endlonge*." Gower: C. A., ii.

2. In continuation, without breaking off.

"I have heard that he never could preach five words of a sermon *endlong*, for as long as he has been licensed."—Scott: *Guy Mannering*, ch. xi.

B. *As prep.*: Directly along.

"*Endelonge* the borde as thei ben set."

Gower: C. A., ii.

***end-mete, *ende-mete, *ed-mette, *en-motte**, *s.* [Mid. Eng. *ende*; A. S. *ened*=a duck, and A. S. *mete*, *mette*=meat, food.]

Bot.: Lenticula. (*Prompt. Parv.*) Probably the Lesser Duckweed [*Lemma minor*]. (Britten & Holland.)

ēnd-mōst, *a.* [A. S. *endmōst*.] The nearest to the end or farthest extremity; at the farthest end; remotest, last.

ēnd-dō, *pref.* [Gr. *endon*=within.] A prefix employed to signify within.

ēnd-dō-ar-tēr-i-tis, *s.* [Gr. *endon*=within, and Mod. Lat. *arteritis* (q. v.).]

Med.: A chronic affection, commencing with relaxation and infiltration of the tissue of an artery. [ARTERITIS.]

ēnd-dō-car-di-āc, *a.* [Gr. *endon*=within, and *kardias*=belonging to the heart.]

Anat. & Med.: Pertaining or relating to the endocardium (q. v.).

ēnd-dō-car-di-tis, *s.* [Gr. *endon*=within, and Mod. Lat. *carditis* (q. v.).]

Med.: Inflammation of the internal serous membrane, extending over the valves and cavities of the heart, usually caused by rheumatism and accompanied by various well-marked valvular murmurs. Bright's disease, with albuminuria, especially after scarlet fever, is also a frequent cause.

ēnd-dō-car-di-ūm, *s.* [Gr. *endon*=within, and *kardia*=the heart.]

Anat.: An internal lining of the human heart. It consists of connective tissue, with a close network of elastic fibers often passing into fenestrated membrane, with muscular fibers in parts. (Quain.)

ēnd-dō-carp, *s.* [Gr. *endon*=within, and *karpōs*=fruit.]

Bot.: The inner coat or shell of a fruit. In drupes like the cherry it is the "stone." It is called by Gartner the Putamen (q. v.).

ēnd-dō-car-pē-i, *s. pl.* [ENDOCARP.]

Bot.: A tribe or order of lichens having the fruit, which resembles a capsule, immersed in the foliaceous or crust-like frond. (Berkeley.)

ēnd-dō-car-pi-dē, *s. pl.* [Mod. Lat. *endocarp*]; (on), and Lat. *feqn. pl. adj. suff. -idē*.]

Bot.: A family of lichens, type *Endocarpion* (q. v.).

ēnd-dō-car-pōn, *s.* [Named from the character that the receptacles are deeply imbedded in the frond.] [ENDOCARP.]

Bot.: A genus of lichens, order *Parmeliaceae*, or order *Lichenaceae*, tribe *Gasterothalamae*, family *Endocarpidae*. They are green and grayish, and are most plentiful in summer on rocks.

ēnd-dō-chōr-i-ōn, *s.* [Gr. *endon*=within, and *chorion*.]

Anat.: The vascular layer of the allantoids.

ēnd-dō-chrō-a, *s.* [Greek *endon*=within, and *chroa*, *chroa*=skin.]

Bot.: A supposed interior layer of the cuticle.

ēnd-dō-chrōmē, *s.* [Fr. *endochrome*, from Gr. *endon*=within, and *chrōma*=a color.]

Bot.: A coloring matter found in leaves. Griffith and Henfrey consider the term vague and indefinite, and prefer using the expression Cell-contents (q. v.).

***ēnd-dōc-trīn-āte**, *v. t.* [Pref. *en*, and Lat. *doctrinatus*, *pa. par. of doctrino*=to teach.] To teach, to indoctrinate.

"They were thoroughly indoctrinated in that way."—Hammond: *Works*, ii. 638.

***ēn-dōc-trīne**, *v. t.* [Prof. *en*, and Eng. *doctrin* (q. v.).] To teach, to instruct, to indoctrinate.

"Ptolemaeus Philadelphus was *endoctrined* in the science of good letters, by Strabo."—Donne: *Hist. of the Sept.* (1638), p. 2.

ēn-dō-cyst, *s.* [Gr. *endon*=within, and *kystis*=a bladder.]

Zool.: The name given by Prof. Allman to the inner membrane or integumentary layer of a polyzoön.

ēn-dō-dērm, *s.* [Gr. *endon*=within, and *derma*=skin.]

1. **Anat. & Physiol.**: A layer in the yolk of an egg or ovum, which develops into the true dermis or skin. It is called also hypoblast. (Quain.)

2. **Zool.**: The layer or membrane lining the alimentary canal, the cavity of the body and the tubular tentacles in the *Cœlenterata*.

ēn-dō-dēr-mic, *a.* [Eng. *endoderm*; -ic.]

Zool.: Of or pertaining to the endoderm.

ēn-dōg-a-mōus, *a.* [Eng. *endogam*(y); -ous.] Necessarily marrying within the tribe.

"The Kalangs of Java are also *endogamous*, and when a man asks a girl in marriage he must prove his descent from their peculiar stock."—Raffles: *History of Java*, i. 528.

ēn-dōg-a-mŷ, *s.* [Gr. *endon*=within, and *gamos*=marriage.]

Ethnol.: The custom prevailing among uncivilized peoples, by which a man is bound to take a wife of his own tribe. [MARRIAGE.]

"So far as my knowledge goes, *endogamy* is much less prevalent than *exogamy*, and it seems to me to have arisen from a feeling of race-pride, as for instance in Peru, and a disdain of surrounding tribes which were either really or hypothetically in a lower condition."—Lubbock: *Origin of Civilization*, ch. iii.

ēn-dō-gēn, *s.* [Gr. *endon*=within, and *gennaō*=to engender, to produce.]

1. **Botany**:

(1) **Sing.**: A plant, the new woody matter in the stem of which is developed in the first instance toward its interior parts, curving outward only as it has, to a certain extent, proceeded in its downward course. This peculiarity is almost uniformly associated with others in the seed, leaves, &c. The embryo has but a single cotyledon [COTYLEDON], whence the plants themselves are called *Monocotyledons* (q. v.). The leaves, in most cases, have straight veins running longitudinally; the number three or its multiples, and of the latter especially 3 X 2=6, run through the several parts of the flower. The germination is endorhizal, i. e., the original radicle forms a sheath round the first root which comes from within the former one. Palm trees, bananas, lilies, grasses, and sedges belong to this great division of the vegetable kingdom.

(2) **Pl.**: A sub-kingdom or class of plants presenting the characteristics enumerated under No. 1. Lindley prefers to call it a class, and divides it into eleven alliances, viz.:

(1) *Glumales*, (2) *Arales*, (3) *Palmales*, (4) *Hydrales*, (5) *Narcissales*, (6) *Amomales*, (7) *Orchidales*, (8) *Xyridales*, (9) *Juncuales*, (10) *Liliales*, and (11) *Alismales*.

2. **Palæobot.**: According to Schimper, the *Endogens* are represented in a fossil state by 76 genera and 118 species, but future discovery will doubtless greatly alter these numbers. Palms are believed to exist in the Carboniferous rocks, Liliaceous plants in the trias, Narcissaceæ in the Chalk; Scitamineæ, Cyperaceæ, Palmaeæ, and other orders in the Tertiary. The identification of fossil plants by fragments of leaves, by roots, &c., is so liable to error that the foregoing statements must be looked upon as partly hypothetical rather than as thoroughly-ascertained truth.

ēn-dōg-ēn-ē, *s. pl.* [Mod. Lat.] [ENDOGEN.]

Bot.: The name given by De Candolle and others to the sub-kingdom or class of plants, called in English, *Endogens* (q. v.).

ēn-dōg-ēn-i-tēs, *s.* [Gr. *endogenēs*=born in the house, but used for, produced internally, and Lat. *suff. -ites*; Gr. *itēs* (*Palæont.*).]

Palæont.: The name given by Mantell to certain fossil stems. *Endogenites erosa* is from the Tilgate (England) beds, which are of Wealden age.

ēn-dōg-ēn-ōus, *a.* [Eng., &c., *endogen* (q. v.); -ous.]

1. **Ord. Lang.**: Springing or originating from within; internal.

"It gives but little chance for *endogenous* growth."—T. M. Anderson (*Ogitive*).

II. **Technically**:

1. **Botany**:

(1) (*Of woody matter*): Developed in such a way that, when fresh additions are made to it, these are deposited, at least in the first instance, inside their predecessors.

(2) (*Of botanical classification*): Pertaining or relating to the sub-kingdom or class of *Endogens*.

2. **Anat.**: A term used of cells inclosed in a common cavity of a cartilaginous matrix. (Quain.)

bōil, bōy; pōut, jōwl; cat, çell, chorus, çhin, bench; go, gem; thin, this; sin, as; expect, Xenophon, exist. ph = f.
-cian, -tian = shān. -tion, -sion = shūn; -tion, -sion = zhūn. -tious, -cious, -sious = shūs. -ble, -dle, &c. = bēl, dēl.

ên-dôg-ên-ôus-lý, *adv.* [Eng. *endogenous*; -ly.] In an endogenous manner; within, internally.

ên-dô-gêns, *s. pl.* [ENDOGEN, 1 (2).]

ên-dô-gô-ni-âm, *s.* [Greek *endon*=within, and *gônia*=an angle.]

Bot.: The contents of the nucule of a chara.

ên-dô-lýmph, *s.* [Gr. *endon*=within, and Eng., &c., *lymph*.]

Anat.: The limpid fluid of the membranous labyrinth of the ear; the vitreous humor of the eye, first described by Antonio Scarpa, hence called *Liquor Scarpe*, and containing two small calcareous substances called *Otoconites* (q. v.).

ên-dô-lým-phân-gi-ai, *a.* [Eng. *endolymph* (q. v.), and Gr. *angyeion*=a vessel, a receptacle.]

Anat.: Pertaining to the internal part of the lymphatic vessels.

endolymphangial-nodules, *s. pl.*

Anat.: The name given by Klein to certain nodules developed inside the lymphatics. He distinguishes them from *Perilymphangial nodules* (q. v.).

ên-dô-morph, *s.* [Gr. *endon*=within, and *morphe*=form.]

Min. & Crystall.: A mineral inclosed in a crystal of some other mineral. Thus, crystals of quartz have been found to inclose endomorphs of pearl, spar, titanite, oxide of iron, epidote, sulphate of barytes, &c.

ên-dô-mý-chi-dæ, *s. pl.* [Mod. Lat. *endomychus*, and Lat. fem. pl. suff. -idæ.]

Entom.: A family of Coleoptera (Beetles), of Latreille's tribe Trimeria.

ên-dô-mý-chi-s, *s.* [Gr. *endon*=within, and *mychos*=the innermost place or part.]

Entom.: A genus of Beetles, the typical one of the family *Endomychidae* (q. v.).

ên-dô-pâr-a-site, *s.* [Gr. *endon*=within, and Eng. *parasite* (q. v.).]

Bot.: An internal parasite, as distinguished from an external or ectoparasite (q. v.).

ên-dô-pêr-l-car-dî-tis, *s.* [Gr. *endon*=within; *pericardios*=about or near the heart; and suff. Gr. *-itis* (Med.) (q. v.).]

Med.: Inflammation of the internal lining and pericardium, the external lining of the heart, more grave than either affection existing alone. [CARDITIS.]

ên-dôph-a-gôus, *a.* [Eng. *endophag(y)*; -ous.] Practicing endophagy (q. v.).

ên-dôph-a-gý, *s.* [Greek *endon*=within, and *phagein*=to eat.] That kind of cannibalism in which only persons belonging to the tribe are eaten.

"One Australian tribe is *endophagous* (that is, the people prefer to eat their own relations)."—*London Daily News*.

ên-dôph-lê-um, **ên-dôph-læ-um**, *s.* [Greek *endon*=within; *phloios*=the rind, peel, or bark of trees, from *phleō*=to gush, to overflow.]

Bot.: The name given by Link to the liber in the bark of a tree.

ên-dô-phýl-loüs, *a.* [Greek *endon*=within; *phyllon*=a leaf, and Eng. suff. -ous.]

Bot.: The name given by Dumortier to endogenous leaves, because they are evolved from a sheath.

ên-dô-phýte, *s.* [Gr. *endon*=within, and *phyton*=a plant, a tree.]

Bot.: A plant living inside another one. It is used chiefly of parasitic fungi.

ên-dô-plâsm, *s.* [Gr. *endon*=within, and *plasma*=anything formed or molded; *plassō*=to mold, to shape.]

Zool.: A diffuent sarcode, constituting the central mass in the body of an Infusorian. It is called also *Ochyme-mass*.

ên-dô-plâst, *s.* [Gr. *endon*=within, and *plastos*=formed, molded.] [ENDOPLASM.]

Zool.: A rounded or oval body in the protoplasm of the endoplastica (q. v.). It resembles the nucleus of a histological cell, but can be distinguished from it chemically.

ên-dô-plâs-tic-a, *s. pl.* [ENDOPLAST.]

Zool.: A class of animals, the higher of two ranked under the sub-kingdom Protozoa. It consists of the animals having in their protoplasm an Endoplast (q. v.). Professor Huxley divides them into the following sub-classes or orders: (1) Radiolaria, (2) Protoplasta, or Amœbe, (3) Gregarina, (4) Catallacta (?) the last assemblage, founded by Haeckel, being possibly referable to the Infusoria.

ên-dô-pleür-a, *s.* [Gr. *endon*=within, and *pleura*=a rib, the side.]

Bot.: The name given by De Candolle to the internal integument of a seed.

ên-dôp-ô-dite, *s.* [Gr. *endon*=within, and *pous* (genit. *podos*)=foot.]

Zool.: The internal distal segment of the typical limb of Crustacea. (Huxley.) The inner of the two secondary joints into which the typical limb of a Crustacean is divided. (Nicholson.)

ên-dôp-tile, *a.* [Gr. *endon*=within, and *ptilon*=a feather.]

Bot.: Having an embryo with the plumate rolled up in the cotyledons. Example given: *Endogenous plants*.

***ên-dôre**, *v. t.* [O. Fr. *endorer*; Lat. *indeauro*.] To gild, to make of a yellow color.

"Endore him with yolkes of egges."—*Liber Cure Cocorum*, p. 37.

ên-dô-rhiz', **ên-dô-rhiz'-a**, *s.* [Greek *endon*=within, and *rhiza*=a root.]

Bot.: The radicle of the embryo in monocotyledonous plants, each rootlet of which is covered by a sheath called *Coleorhiza*. [ENDORHIZÆ.]

ên-dô-rhiz'-al, **ên-dô-rhiz'-ôus**, *a.* [Gr. *endon*=within; *rhiza*=a root; and Eng., &c., suff. -al, -ous.]

Bot.: Pertaining to the Endorhizæ (q. v.); monocotyledonous.

ên-dô-rhiz'-ê-s, *s. pl.* [Gr. *endon*=within; *rhiza*=a root, and Lat. fem. pl. adj. suff. -eæ.]

Bot.: The name given in A. D. 1808 by Richard to the great sub-kingdom of plants termed by De Candolle, in A. D. 1813, *Monocotyledonæ* or *Endogenæ*.

ên-dô-rhiz'-ôus, *a.* [ENDORHIZAL.]

ên-dors-a-ble, *a.* [Eng. *endorse(e)*; -able.] That may or can be endorsed.

ên-dor-se, ***ên-dosse**, **in-dorse**, *v. t. & i.* [O. Fr. *endorser*; from *ên*=in, on, and *dos*=the back; Lat. *dorsum*.] [ENDORSE.]

A. Transitive:

I. Ordinary Language:

1. Literally:

(1) To place or put on the back of; to load, to burden.

"Chariots or elephants *endorst* with towers Of archers." *Milton*: P. R., iii. 529.

(2) To furnish with a back.

"He is at this time *endorsing* a set of seven volumes in puce."—*Southey*: *Letters*, iv. 99.

(3) To put on, to invest with.

"They *endorsed* their armors." *Knight of the Sea*, in *Todd's Spenser*, vi. 294.

(4) In the same sense as II.

(5) To write on the back of a document, as a note of the contents, &c.

"What he has *endorsed* on the bonds."—*Burke*: *Committee on Affairs of India*.

(6) To write, inscribe, cut, or engrave.

"Her name on every tree I will *endorse*." *Spenser*: *Colin Clout*, 682.

2. Figur.: To acknowledge, to approve, to sanction, to ratify; as, to *endorse* a statement.

"This perchance may be your policy to *endorse* me your brother, thereby to *endear* me the more to you."—*Hovell*: *Letters*, bk. iv., let. 1.

II. Commerce and Banking:

1. To write one's name on the back of a bill, check, note, or other document.

2. To transfer or assign by endorsement.

***B. Intrans.**: To write an endorsement on a document.

"By *endorsing* on the letter when you receive it."—*Boyle*: *Works*, vi. 70.

ên-dor-se, **in-dorse**, *s.* [ENDORSE, v.]

Her.: An ordinary, containing in breadth one-fourth, or according to some, one-eighth of the pale. It bears exactly the same relation to that ordinary as the cottise does to the bend.

ên-dor-sêe', **in-dor-see**, *s.* [Eng. *endors(e)*; -ee.]

Comm.: The party who acquires the right conveyed by any negotiable instrument in consequence of its being made over to him by endorsement. Where several endorsers appear on the back of a bill, the last is the one entitled to receive the money or right conveyed. (*Bithell*.)

ên-dorse-mênt, **in-dorse-ment**, *s.* [Eng. *endorse*; -ment.]

I. Ordinary Language:

1. Literally:

(1) The act of endorsing or writing on the back of a document.

(2) In the same sense as II., 1.

(3) That which is endorsed or written on the back of a document; a superscription.

"It was written as early as the time mentioned in the *endorsement*."—*Boyle*: *Works*, vi. 70.

(4) In the same sense as II., 2.

2. Figur.: A ratification, sanction, approval, or acknowledgment.

"The *endorsement* of supreme delight,

Writ by a friend, and with his blood."

Herbert: *Sunday*.

II. Commerce and Banking:

1. The act of endorsing a bill, check, note, or other document.

2. That which is endorsed or written on the back of a bill, check, or other document. Endorsements are of two kinds—Special and General. An endorsement is called special when the bill or check is endorsed payable to the order of the person to whom it is transferred. A general endorsement is when the holder who wishes to transfer the document simply writes his name or that of his firm. When thus endorsed, a bill or check may be transferred from hand to hand without further endorsement, and is freely negotiable. Although the literal meaning of the word endorsement is writing on the back, it is not essential that the writing should be on the back. By the endorsement of a bill, the endorser incurs the responsibility of a new drawer, and hence if the drawer does not pay the bill when it matures, the endorser, on receiving notice of dishonor, must pay the sum due to the holder, together with the notarial charges incurred.

ên-dor-sêr, **in-dor-ser**, *s.* [Eng. *endors(e)*; -er.]

1. One who endorses a document.

2. One who sanctions, ratifies, or approves.

ên-dô-sarc, *s.* [Gr. *endon*=within, and *sarz* (genit. *sarkos*)=flesh.]

Zool.: The inner molecular layer of sarcode in the Amœbe and other allied Rhizopods. (Nicholson.)

ên-dô-scope, *s.* [Gr. *endon*=within, and *skopeō*=to view.] An instrument for making examinations in the bladder, rectum, urethra.

ên-dô-sô-pý, *s.* Examination of the interior of the bladder, rectum or urethra by means of the endoscope.

ên-dô-skêl'-ê-tôn, *s.* [Gr. *endon*=within, and Eng. *skeleton* (q. v.).]

Anat.: The internal bony and cartilaginous framework of the body. It is generally called simply the skeleton, but the prefix *endo-* distinguishes it from the *exoskeleton*, found in insects, crustacea, and other animals.

ên-dô-smíc, *a.* [Gr. *endon*=within; *ōsmos*=a thrusting, and Eng. adj. suff. -ic.] The same as **ENDOSMOTIC** (q. v.).

ên-dô-smô-m'-ê-têr, *s.* [Gr. *endon*=within; *ōsmos*=a thrusting; *ōthêō*=to thrust; and *metron*=a measure.]

Mech.: An instrument invented by M. Dutrochet to measure the rapidity of the passage of a less dense fluid through a membrane which separates it from a denser fluid. A simple form of the instrument is a trumpet-shaped tube with a membrane covering its bell mouth. The tube is filled with a solution of a given density and plunged into a solution of lesser or greater density to ascertain by successive trials the relative rapidity of the endosmotic or exosmotic actions, or the action of different fluids.

ên-dô-smô-mêt'-ric, *a.* [Eng. *endosmometer* (y); -ic.] Pertaining to or designed for the measurement of endosmotic action.

ên-dô-smô-m'-ê-trý, *s.* [Eng. *endosmometer*; -y.] The measurement of endosmotic action.

ên-dô-smôse, **ên-dô-smô-sis**, *s.* [Gr. *endon*=within, and *ōsis*=a thrusting; *ōthêō*=to thrust.]

1. Hydraul. & Pneum.: The name given by Dutrochet, and since universally adopted, for the current which passes from outside inward when two liquids or two gases are separated by a porous diaphragm. When such a separation is made, it is found that liquid or gas will penetrate through its pores from first one side and then the other, till the same mixed liquid or the same mixed gas is on both sides of the partition. The endosmosis or inward current is one of these, the exosmosis or outward one is the other.

2. Physiology:

(1) *Animal*: The transudation of substances in a state of perfect solution from the stomach to the blood-vessels by capillary attraction. When two fluids differ in density, the more dense transudes more slowly than the less; when one of these fluids is in a cavity or sac, the flow of the other to it is endosmosis, or inward flow, while that outward is exosmosis.

(2) *Vegetable*: The same process takes place between contiguous vessels in the case of the sap circulating in plants.

ên-dô-smôs-míc, *a.* [Gr. *endon*=within; *ōsmos*=a thrusting, and Eng. adj. suff. -ic.] The same as **ENDOSMOTIC** (q. v.).

ên-dô-smôt'-ic, *a.* [Gr. *endon*=within; *ōsmos*=a thrusting; *t* connective, and Eng. adj. suff. -ic.] Pertaining to endosmosis.

endosmotic-equivalent, *s.*

Of a substance: The name given by Dutrochet to the number which expresses how many parts by weight of water pass through a bladder in exchange for the part by weight of the substance. (*Ganot*.) [ENDOSMOSE.]

fâte, fât, fâre, amidst, whât, fâll, father; wê, wêt, hêre, camêl, hêr, thêre; pine, pît, sîre, sîr, marîpe; gô, pôl, or, wôre, wolf, wôrck, whô, sôn; mâte, cûb, cûre, unite, cûr, râle, fûll; trý, sýrian. æ, œ=ê; ey=â. qu=kw.

ĕn-dō-spĕrm, ĕn-dō-spĕr-mĭ-ŭm, s. [Greek *endon*=within, and *sperma*=seed.]
Bot.: The name given by Richard to the albumen of a seed. It may be farinaceous—i. e., mealy—oily, fleshy, or corneous—i. e., horny—or finally it may be mucilaginous.

ĕn-dō-spĕr-mĭc, a. [Eng. *endosperm*; -ic.]
Bot.: A term applied to seeds containing endosperm, as in the Gramineæ, Umbellifere, &c.; relating to or accompanied by the endosperm, as an *endospermic embryo*.

ĕn-dō-spōre, s. [Gr. *endon*=within, and *sporos*=a seed.] [SPORE.]

Bot.: The inner coat of a spore. (*Griffith & Henfrey*.) A spore formed in the interior of a theca. It is called also ascospore and athecaspore. (*Thomé*.)

ĕn-dō-spōr-ōus, a. [Eng. *endospor(e)*; -ous.]
Bot.: A term applied to fungi which have their spores contained in a case.

***ĕn-dōss, *enn-dosse, v. t.** [ENDORSE, v.]

ĕn-dōss-tĕ-ŭm, s. [Gr. *endon*=within, and *osteon*=bone.]
Anat.: The medullary membrane or internal periosteum (q. v.).

ĕn-dō-stōme, s. [Gr. *endon*=within, and *stoma*=the mouth.]
Bot.: The name given by Mirbel to the aperture in the inner integument of an ovule.

ĕn-dō-style, s. [Gr. *endon*=within, and *stylos*=a pillar.]

Zool.: A fold of the lining membrane of the pharynx in Ascidoida. (*Huxley*.)

***ĕn-dō-te, v. t.** [Pref. *en*; Lat. *doto*=to endow.] To endow.

"Their own heirs do men disherit to endote them."—*Tyndale: Works*, i. 249.

ĕn-dō-thĕ-cl-ŭm, s. [Gr. *endon*=withi, and *thĕkĕ*=a box.]
Bot.: The name given by Purkinje in 1830 to the inner layer of the wall of an anther.

ĕn-dō-thĕl'-l-ŭm, s. [Gr. *endon*=within, and *thĕlĕ*=a nipple.]

Anat.: The name given by some German anatomists to what Quain believes is better called, as it heretofore has been, the Epithelium (q. v.).

***ĕn-dōubt (b silent), *en-doute, v. t. & i.** [Pref. *en*, and Eng. *doubt* (q. v.).]

A. Trans.: To frighten, to alarm, to put in fear.
 "If I ne had endouted me."
Romance of the Rose, i. 664.

B. Intrans.: To fear, to be afraid; to be in fear or doubt.

ĕn-dōw, v. t. [Fr. *en*=in, and *douer*=to endow; Lat. *doto*, from *dos* (genit. *dotis*)=a dowry, a gift, a share; *do*=to give.] [DOWER, DOWRY, ENDEU.]

1. To invest or enrich with a dower or portion of goods or estate; to dower; to settle a dower on.

"Thy half of the kingdom, wherein I thee endowed."
Shakespeare: Lear, ii. 4.

2. To settle property or money upon for permanent provision and support.

"Endowing hospitals and almshouses for the impotent."
Stillingfleet: Sermons, vol. ii., ser. 3.

3. To enrich, furnish, or endue with any gift, quality, or excellence.

"Endowed with many amiable and attractive qualities."
Macaulay: Hist. Eng., ch. xv.

4. To be the fortune or lot of; to fall to the lot of.
